The Revolution in Poland was quelled, after nine months of cruel war, by the surrender of Warsaw on the 7th September, 1831. An imperial ukase (17th March, 1832,) abolished the Kingdom of Poland and its constitution, and incorporated it with Russia as a province. The University of Warsaw was also abolished. It was want of dignity and humanity who to offer such pusillanimity, and the hero-lesson into Siberia at or large a number of patriots, the Emperor selected with a committee of Poles deputed to receive him at Warsaw, in 1835, on three terms. "If you continue your demon of insanity and independence, you can only injure yourselves and Poland. I have caused this country to be built to level your city to the earth the first sign of another revolt."

The ninth act of extermination the Emperor has been waging for more than a quarter of a century against the Circassians in the Caucasus; but there he encountered in Shamyl, a character as firm and resolute as his own, as chivalry and prowess among the people far exceeding that of his army. That war is still going on and while it lasts, forms a counterpoise to Russian influence in Persia and Afghanistan. England and Russia love already met once, and may meet no fear, in Asia. The campaign against Cabul by the British, and the march of the Russians on Khiva, towards the close of 1839, formed the periods of future contention for the dominion of India.

The intervention of Russia is yet too fresh in the minds of our readers to deserve a special notice. Suffice it to say that the offer of a similar intervention on Prussia proceeded it. That in Hungary was asked for by the Emperor of Austria; that the King of Prussia had made no such demands on his imperial brother in law.

Thus far the reign of Nicholas has been one of uninterrupted success, well calculated to confirm his belief in his mission to be not only the conservative power of modern monarchy, but the means of expanding the area of despotism.—He marks a period of progress proportionate to the progress of history, from the effects of which Europe may not recover during the nineteenth century. But, then, who would have predicted the downfall of Napoleon of 1812? Nicholas has reserved the growth of his power. Will he have the prudence and moderation not to go beyond it?

CONVENTION.....MONDAY, NOV. 14.

The Winthrop and Washburn Letters.

To-day we publish the interesting letter of Mr Winthrop to the Whig Committee, declining him of his nomination for the Governorship by the Whig State Convention, together with the reply of the latter accepting the same. Mr Washburn was never solicitous of the nomination, but accepts it with much pleasure, as a high testimony of the appreciation felt by his fellow citizens of his eminent public services and deserts. No pledge from Judge Washburn—other than the pledges of his high character and splendid antecedents—were called for—none, therefore, are given. On his own merits, on the merits of the principles whereof he is the impersonation (so to say)—he now stands before the people, claiming their suffrages—and sure we are that his claims will not be disallowed.

Boston, Oct. 14, 1853.

The Honorable Emory Washburn, &c., &c., &c.

My Dear Sir,—On behalf of one thousand and forty three delegates, from more than three hundred of the Towns and cities of Massachusetts, assembled in Convention at Fanebury, on the 18th of September last, I have the honor to inform you of your unanimous nomination as the Whig candidate for Governor of this Commonwealth.

I should have been proud to be the organ or much a body of my fellow-citizens on any occasion,—but it strikes me peculiarly gratifying to be charged with announcing this distinguished compliment to one for whose public and private character I have long cherished the most cordial respect and regard.

The nomination has been made in a manner and source from the State, and from the Country, and not without the fear that it might prove to be an embarrassment, as it certainly will have been expected, by yourself. But it has been made in the full confidence that you would return home with an undiminished readiness to lend your aid to our beloved Commonwealth in the hour of her utmost need, in whatever capacity your friends may call upon you to serve her.

Sincerely trusting that this confidence may be justified by your acceptance of the nomination, and that the nomination itself may be endorsed and ratified by the people of the Commonwealth, at the approaching annual election, I remain, my dear Sir,

Most faithfully,

ROBT. C. WINTHROP.

WORCESTER, Oct. 18, 1853.

Hon. Robert C. Winthrop:—

DEAR SIR,—On my arrival at Halifax on Thursday last, I learned with much surprise, from a Boston paper, which I accidentally saw there, that the Whig Convention which assembled at Fitchburg on the 28th of September last, had proposed to present my name to the people of the Commonwealth, as a candidate for the office of Governor at the coming election.

Your favor of the 14th inst., has officially confirmed that statement, and I cannot hesitate to confess his belief in his motives to be not only the compliment, but the confidence of the citizens whom Europe may not recover during the nineteenth century. But, then, who would have predicted the downfall of Napoleon of 1812? Nicholas has reserved the growth of his power. Will he have the prudence and moderation not to go beyond it?

I should be sorry to be thought to be insensible to such a body of my fellow-citizens on any occasion,—but it strikes me peculiarly gratifying to be charged with announcing this distinguished compliment to one for whose public and private character I have long cherished the most cordial respect and regard.

The nomination has been made in a manner and source from the State, and from the Country, and not without the fear that it might prove to be an embarrassment, as it certainly will have been expected, by yourself. But it has been made in the full confidence that you would return home with an undiminished readiness to lend your aid to our beloved Commonwealth in the hour of her utmost need, in whatever capacity your friends may call upon you to serve her.

Sincerely trusting that this confidence may be justified by your acceptance of the nomination, and that the nomination itself may be endorsed and ratified by the people of the Commonwealth, at the approaching annual election, I remain, my dear Sir,

Most faithfully,

ROBT. C. WINTHROP.

The Paris correspondent of the London Post on the same evening, says that the Porte has fixed four weeks as the farthest time in which the evacuation of the Principalities must take place.

The Banks of France have raised their discounts to four per cent., Vienna to five, Warsaw to six per cents.

Marcia Kenney embarked from Smyrna on the 24th inst., for the United States.

Accordingly, it appears that the Sultan has declared war, but the Grand Seignior has not signified that he considered, leaving to the discretion of the executive when to proclaim hostilities.

It is now pretty certain, we are told, that the General Cambert will go with his division to reinforce the army of the Danube. He will occupy the forts of the Dniester, and the combined fleets will reach Constantinople on the 15th inst.

It is authentically stated that the Czar at Olmutz declined to say anything with forgave, he would come back out of the difficulty. Nothing is really known with certainty.

The theatres last evening had from 50 to 100 dollars on board the ships Isaac Wright and Sidney Stevens.

Mr Steele had arrived at Madrid on the 20th ult., and would be received by the government in a friendly manner.

Commander Inglefield had returned from the Arctic Regions, but brings no intelligence of Sir John Franklin.

Commander McClure had returned from the Behring Straits to Davis's straits, thus settling the question of the North West passage.

The ship Anele Jane, of Quilley, 1000 tons burthen, with a valuable cargo, and 400 souls, persons and crew, was wrecked off the Island of Java and 300 persons perished. She left the Mersey Sept. 9th, for Quebec.

A terrible accident happened on the great Southern and Western Railroad, near Dublin, by which 8 persons were killed and 50 were wounded, many being horribly mangled.

The Rev. Mr Cox's extensive mills near Leeds Bridge, Yorkshire, were burnt down. Loss £40,000; 1,100 hands were thrown out of employment.

The Paris Patrie contradicts, semi-officially, that the Sultan had signed a declaration of war on the 20th.

The Council merely resolved that no more declarations could be made on the subject of Turkey, and that the question must be carried on with increased energy.

The rebels were committing greater ravages than ever among the Russians, and Shamyl and Omar Pasha would carry the war into Asia.

Before Nicholas left Olmutz a courier was despatched to St. Petersburg, with orders to have a new levy of troops ready.

Decidedly the Best Magazine of the Kind.

N. Y. Commercial Advertiser.

A NEW VOLUME IS COMMENCED IN JANUARY 1854.

ENLARGED AND GREATLY IMPROVED!

THE SCHOOLFELLOW:

A MAGAZINE FOR BOYS AND GIRLS;

Edited by M. C. Bradish and Uncle Arch (Wm. Allen B. Nash).

ONLY ONE DOLLAR A YEAR!

The publishers would respectfully direct the attention of parents and teachers to the merits of this popular work, which has now successfully established the point that there is room for a first class Magazine for the young, and that it will not be necessary to publish a trashy one in order to secure a large circulation. The publishers would have much pleasure in furnishing specimen numbers to any who may desire them.

It is the perfect aim of the Schoolfellow to combine the highest degree of moral and literary excellence, and accordingly in these it has found its chief recommendation, and continues to deserve a liberal support. Its articles are from the best writers for the young, and are of such a character as that no one could hurt their sensitive minds or corrupt their morals. Its illustrations are numerous, and of the highest order of excellence.—[Evening Gazette, Cambridge.

The Schoolfellow is a capital publication for the young. It is well conducted, and really deserving notice. In its mechanical execution it is unexceptionable.—[Boston Daily Bee.

A large and elegant monthly, as well in its matter as in its appearance. It is well conducted by the brothers and their corps of able assistants, and will be eagerly welcomed by the children and youth for whom it is designed.—[Boston Daily Advertiser.

The Schoolfellow is a new article of Juvenile literature, and is one of the best publications for children and youth that is now published in the country. Its contents are of a high character, and are well calculated to improve the minds and hearts of the young. The publishers have spared no pains to make it attractive, and in December last it was enlarged and greatly improved. It is now one of the largest and best juvenile magazines published in the country, and we think should be in the hands of every boy and girl in the land.—[Boston Evening Transcript.

The Schoolfellow is one of the best publications for the young that we have seen.—[Boston Post.

...ndon. Do you see anything in the appearance of the face with the chicken-hearted coward who dropped it? Are you aware that I found it when those feet of the runaway hung?"

"Mr. Bond, (languidly,) "Did you? I didn't notice it."

"Peace, ben, and hear me! Smile in the face of the bravest man you ever saw, and you expose and the memory of your manhood. This is not the time, decided I and you calmly, sudden, has it not been the opinion of master-hood for ages, and is it not therefore endured by the one thing needful to the basis of existence? existence? ...ordinary? Pride, my dear, pride is here!"

Mrs. Biddy gets flowy on her nest. "Oh, dear me, I'm so tired!"

Silence for half an hour.

Mrs. B. (in great consternation.) "My dear, do you think you would mind looking to the time a minute, while I run and pick a little bit of something? I've taken a wonderful fit to-day."

O. C. (starting up in doubt) "Madam, have I heard right? Do I understand that you have distinctly offered to shift upon your husband the little duties of the domestic men? Are you going to give up your sphere, ma'am? There I see again and again impressed upon your mind, that female misfortune alone is at the bottom of these impious doctrines! And what, on the contrary, according to the decision of all rooster kind, should be the real pride and ambition of husband? Disinterestedness, the true glorious in the course of real trials; for without temptation she preserves that there can be no virtue; without trials, no patience; without affection, no resignation; which is always as lovely in the female character. A true hen, situated as you are, would not only rejoice that her husband had seen fit to perfect her with trials, but with that beautiful self-abnegation which can never be unreasonably inculcated but by rooster kind, would not hesitate to undergo any sacrifice! I say a true hen, in your situation, instead of mewling like a little dotard, would construe some plan, (if only by watching out her fowl and picking the earth around her) for supplying her husband with a little extra!"

Mrs. B. (weakly) "Have a worm, dear?"

O. C. (solemnly) "I will."—[National Era.

ELECTION ..... MONDAY, NOV. 14.

The Abolitionist Principle—Are the Whigs Organized?

Our whig fellow-citizens can never be too deeply sensible of the paramount importance of *organization*. Ours is a with emphasis the age of organization. Ours is a with emphasis the age of big things attempted—without this. This *associative* is one of the main elements of our national individuality. This it is, which makes the nation a mass system, a net-work, of societies. This it is, which has rejected the whole land—mountain, valley and plain—field, work-shop and desk—with its complete patch-work of church, social and political, moral and scientific, artistic and literary, religious and reformatory, national and divine. Are we to construct a railroad, or to open a canal—to diffuse the Gospel, or to manufacture cotton—to war at once resort to the great agent, *organization*.

With these thoughts,—so suggestive to politicians—we come to the question—*Are the Whigs organized?* Is any organized effort making for the success of the whig party and the triumph of its candidate? And for ourselves, we confess we know of none. We are upon the eve of the election; our opponents are on the alert; every instrumentality,—the press, the misgivery and the stump,—is being used, and not without great effort, against any one of no concerted movement is being made by the whigs to resist all this.

Why then are these things so? What is the cause hereof? To a great degree, no doubt, this is attributable to that *stupor of politics* produced by the unparalleled prosperity of the nation at large. The great present success of industrial enterprise, of commerce, of all the arts—the trophies won in all departments of physical, intellectual and moral labor—have conferred a "stamina" relative to political action. Neither public spirit, party spirit, nor personal spirit has yet been competent to arouse the sensibilities of the industrial masses.

Such in brief is the disease;—what now is the remedy. Clearly, if *confinement* is the cause, then *organization* is the remedy—*concentration* is the obvious antidote. We call upon the Whigs, therefore, to *unit*. Let it once see to it that the bold are sustained—that the ardent begin the fall rest; see to it, that the indifferent are aroused from their delay and abiding sense of their obligations—that the wavering, if such exist, are strengthened in the good cause, confirmed in the old whig faith, encouraged to vote as with sincerity the great political race their country has set before them. Clear the deck for action!

Organize; diffuse the pamphlets and the papers; put the speakers in motion; and the Sunday place in nightly requisition; talk politics in the street, in the store and in the family; "visit from house to house"—let the matter go, speak for itself, do its forces; the writer, many looked, to the table; and here we just means united, solidified by all the "good old cause," for which, in times past, a Webster fought, and ever which a Clay presided.

Democratic-ism. Keep it before the people, that the Democratic *Advocate* and the Democratic *Advertiser* are published in the same office, owned by the same proprietors, and "made up" with the same type! That Wm. S. Robinson, the nominal editor of the *Advertiser*, is almost entirely disconnected therewith; that he writes scarcely anything, beside the "local," and that one-half even of his leaders, appear upon the whole of the machinery and are either written or has passed under the scissors of the Editorial. And yet the publishers seem to understand, though we doubt if Andrew Jr.) that these papers are distinct and ...ndent concerns; whereas they are one...

...tation of a medal to Hon. John P. Hale, in testimonial of his services in the cause of freedom during the session now ended. Music by the Lowell Brass Band. Tickets $1.00. "All hands round."

Lowell Independent. It's understood that a large number of indictments have been voted by the Grand Jury (now in session here,) against persons in Lowell and vicinity, for violations of the liquor law.

Pearson's Jurisdiction. The legal points raised in the matter of *Justice Timothy Pearson's* jurisdiction in the late liquor prosecutions in this city, were argued before the Supreme Court yesterday. Attorney General Clouds for the Government, and J. O. Abbot, of this city, for the defendants. An early decision is expected. We understand that Mr Choate admitted in his argument the jurisdiction of the Police Court under the Liquor Law. This is in direct opposition to Judge Merrick's decision.

Grand Attraction. Frederick Parker, Esq., made a great display of beautiful books and engravings last evening, at the window of his new bookstore. The sidewalk there was completely thronged with people. Mr Parker evidently intends to be abreast with the times—and we wish him well. Call and see his store.

Police Court.—*Friday, October 21.* Daniel Hackett, for an assault on Thomas Brannon, fined $5 and costs. Victoria Hanson, for larceny of a gold watch and chain, from Fredrick Morrill was ordered to recognize in $200. Charles J. Smith, was up on charge of being a common drunkard, of which there did not appear to be much doubt. Postponed till afternoon. Michal Morea, for abusing his wife was fined $1 and costs, and put under bonds to keep the peace for six months.

The first cargo ever received at this port from the Chincha Islands arrived yesterday in the bark Salem.

Cotton has declined 1-4 a 1-2c since the Atlantic's news was received, and the market is unsettled. Corn and flour have advanced.

It looks as though the Asiatic cholera and the yellow fever was still prevalent at Galveston, Indianola and Lavaca. Lives. Barber had fallen a victim. A dozen cases were reported by boat.

New York, Oct. 20. The stock taken in the Atlantic and Pacific Railroad now amounts to about sixty-three millions of dollars. Mr Grey, the engineer, is organizing the surveying party, and will set out for the Rio Grand on the 26th inst.

The steamer Knickerbocker, on her passage yesterday, from Norwich, came in contact with a sloop among Sands Islands, Judges of Law, and the latter vessel was knocked overboard, but was subsequently picked up. The steamer sustained considerable damage.

Wm. H. Webb, the ship-builder, of this city, has recently returned from a visit to Russia, where he collected a model of the Emperor for the building of a line-of-battle ship of 3000 tons, and to carry 100 guns on a new model.

GENERAL SUMMARY.

Thanksgiving. The Governor, with the advice of the Council, has appointed Thursday the twenty fourth of November next, to be observed as a day of Thanksgiving and Prayer, throughout this Commonwealth.

Montpelier, Vt., Oct. 20. Four votes were made this morning for Governor, before the poll at 183 for Fairbanks; 106 for Robinson, and 37 for Brainard. There will be further ballotting to-morrow.

Steam Manufacturing and "Spooning."—The Boston Mail makes the "soft impeachment" that "the editor of the Lowell News very candidly announces that he has been initiated into the modus operandi of spoon manufacturing—the same business was formerly done by his father's little imager upon the tea cannister."

Hon. Ichabod Bartlett, a gentleman extensively known as a statesman, an advocate and a politician, died at his residence in the Rockingham House, Portsmouth, N. H., on Wednesday morning.

Governor Martin has appointed Thursday November 24th, to be observed as Thanksgiving in New Hampshire.

Mr Buchanan, the editor of the Atlas, delivered an address against the new constitution, at Nantucket, on Thursday evening.

Union Meeting. A child of Mr Benjamin Hamlin, of Boston, thirteen months old, on Sunday last drank some boiling water which was left standing on the hearth, and died on Tuesday morning from the internal scalding.

Democracy. The declaration of their cashier, the Bureau of Charity have been rendered bankrupt, having failed by the sum of many hundred thousand dollars.

The steamship Daniel Webster arrived here before Mobile on the 19th. The steamship Black Warrior has arrived at Mobile with Havana dates to the 10th inst.

The yellow fever was still prevalent at Mobile

PROF. ALEX. C. BARRY'S TRICOPHERON.

THE Public are hereby cautioned against the use of a spurious article, purporting to be the genuine TRICOPHERON, which is merely a solution of nitrate of silver to subdue and restore those physical evils which the genuine Tricopheron is known to do. It is not to create moss and light hair, with the destruction of the roots, as the spurious article does, but to restore the hair to its natural color, and to prevent its falling off, by the only method of the system cleansing diseases to which the hair is subject, and which are the only causes of its falling off, and the only causes of baldness. Those who have been the unfortunate victims of the spurious article, and who have been disappointed, can now have the genuine Tricopheron, and be assured by the first use that it is the genuine article, by the immediate cessation of the hair falling off, and the commencement of its restoration.

Sold by the Proprietor, Professor BARRY, No. 32 Broadway, New York, and by the principal druggists throughout the United States and Canada.

ELECTION.....MONDAY, NOV. 3d.

Our Senatorial Nominations.

We are gratified to know that the nominations made by our recent County Convention have given general and undigested satisfaction to the several interests concerned. A ticket thus representing the feelings of the party, inscribed with its name, attached to its interests, and pronounced with its sentiments, cannot fail to be triumphantly elected. Such a consummation is "devoutly to be wished," and, without doubt, will be realized.

Of the personal merits of the several candidates, the nominees of the Convention, it is unnecessary to speak. Their long service as legislators, they have been too long identified with our party, have been too closely attended therefore in its fortunes, disagreeing when it fell, jubilant when it triumphed, to need high-sounding words of praise from our hands. It were needless, if timely, to weave elaborate panegyrics on their past achievements in the whig cause—to gain elaborate antitheses on the contrast between our men and the nominees (who will be) of our opponents; but that were a work of supererogation.

With reference to specific issues, they are, as I will presently show, the platform. The pledge-guide is always of doubtful expediency in politics;—and the general sentiment of the public has become justly averse to its use. It is not fit that questions, like that of the Boston Tunnel, or like that of the Maine Liquor Law, should be suffered to distract parties, and to embarrass the action of legislators. We are glad, therefore, to see the manifestation of a disposition on the part of the friends of certain local or moral interests, to suffer the canvass to proceed, and to leave their interests to the legislative action of the parties themselves.

On the score of temperance, our nominees are confidently believed to be invulnerable. Their systematic personal habits, their high character for temperance and all the virtues of a citizenly and manly order, will not fail to secure them the cordial support of the advocates of the cause. Again, our nominees are not bigots, not fanatics, not mad-men. Electing or not, they will accord to every question a calm and candid but judicious attention, and capable of doing honor to the constituencies that elect them. Cautious however, each parties for such objects are not to be deprecated, but rather encouraged. Such parties are salutary checks upon each other—they are a safeguard to our Constitution and system of government; when both are equally attached to that constitution and government. It is only when the necessary for the time—such will be sure to have it at no distant interval, and each will be constantly watched and looked after by the other; and if things don't go pretty well there will soon be a change again, and the other side will take the reins and all will come right. Some one indeed a campaign of ill triumphant election. That can be done, and, we are confident, will be done.

The New Constitution.
NO. 2.

Among other evidences of "Progress," so called, is the modern practice of dragging every new controversy started in the community into politics. Anti-masonry swept over the land overturning the old land marks and disturbing our elections for several years, when it had no more legitimate right to interfere with contests through the ballot box than the Turkish and Russian disputes should have.

We have here *Free* parties, tending to anything but *Free*—Native American parties, Temperance parties, and last, though not least, the Free Soil party. The claims of all these parties upon public attention, to the exclusion of evenpolitical ones, have been urged with zeal and zeus fury; every question has been made to agitate and excite the public mind and create proselytes. Even the Democratic party, at the ballot-box—generally such candidates as would never, in the ordinary moments of politics, be called on to discuss—has been set on the public service. Agitation has become the ordinary mode of conducting political controversies with a large class of disappointed and office-seekers, not subjects of proper political enquiry, but any of the other wild vagaries that have been purpled before the public—and all these have been pursued with increased zeal and fury, as their supposed and absurdity as political questions have been demonstrated. Slavery is often urged by these mad-caps—of which we shall say nothing more hereafter—when we come to take into consideration certain matters relative to the origin and progress of the free soil epidemic. We mention now the election of a particular candidate influenced by some local prejudice, such as the location of a country town or a railroad, or some local project, and members elected for a special object; but such are the exceptions, and good result from such selfish and irregular movements. When candidates are selected for public offices by the people, and they are elected for properly so called, they always should be, and generally are, selected from the best men of each party, and the most capable to fill the office charging the important duties to which they are appointed; such are known to be friends of the Constitution, a love of civil and social intercourse, and capable of doing honor to the constituencies that elect them. Cautious however, such parties for such objects are not to be deprecated, but rather encouraged. CITY MATTERS.

DEATH OF COL. CUSHING. Col. Prentiss Cushing, an old and esteemed citizen, died on Friday night, after an illness of several months, at the age of 65 years. His funeral will take place from the family residence, Tremont Corporation, on Monday next, at 1 o'clock P. M. Friends are invited to attend.

☞ The members of the Masonic Fraternity are requested to meet at their Hall at 12 o'clock M. on Monday, to attend the funeral of Col. Cushing.

TEMPERANCE LOGICIAN—CONNECTICUT. Hev. Mr. Peck, of Portland, Me., will lecture in Huntington Hall on Sunday evening, both morning and evening, as instructively announced in this morning's Herald.

☞ The new Freewill Baptist meeting-house is now well advanced towards completion—the basement is completed and the frame and roof are up. The main story has been done by Herrick & Tuttle, who have pushed the work through with commendable enterprise. The inside of the house is now being plastered.

BOOT'S NEW MILL, for woolen manufactures, on the east side of Concord river, is rising rapidly. It is a brick building, 94 by 44 feet, and four stories high. The mason work is done by Herrick & Tuttle.

☞ The new Fire-bell should see that beautiful portrait of Franklin, on exhibition at F. Parker's bookstore, Westworth's Building.

THE WARREN LOCKE GUARD paraded yesterday afternoon, under their new commander, Capt. Andrew Blood, and made a fine appearance. In the evening they gave a Levee, complimentary to their honorary members, at French's. The party was large and brilliant, and the music was furnished by Kennedy, was admirable.

PRELATE PARTIES. The Methodist Philanthropist continues to devote its columns to Catholic politics. See notice in another column.

WAR DECLARED between Turkey and Russia; but the latter must have their Furs, and McLanahan's great Fur Depot, 102 Merrimack street, at the sign of the Beaver, is the place to buy the best articles and new cheap.

☞ Mr Gannon will commence the third term of his Dancing School, at Mechanics' Hall, next Monday evening; and on Wednesday evening a class in Waltzing.

☞ See Frederick Parker's advertisement, in to-day's Courier.

COURT RECORD.
[Reported for the Journal and Courier.]
C. C. P.—Judge Merrick Term. Perkins J. presiding.

The Grand Jury this morning came in and reported to have found bills of Indictment in 22 cases. The whole number of cases presented, 25—one of which was ignored.

The court then proceeded to arraign the prisoners who were held in the jails. The following plead not guilty:

Walter B. C. Tower, burning barn; James M. Mosher, larceny; John Appleby, alias John Thornton, horse stealing; Sarah A Williams, for keeping a house of ill fame; William Shanley, burglary; Richard McCredie, burglary; George Williams, alias Michael McDonald, alias Thomas Smith, larceny; David E. Tenney, larceny and shoplifting; two indictments on John Farrell, two indictments, for attempt to burn buildings; John Bowdrie, burglary; Francis Shields, assault and battery; Sherman Nichols, for passing counterfeit money; John Shirley, do.; John Cressy, do.; Horace B. Kinniston, embezzlement; Chas. C. Moulton, larceny; Thomas Hall, larceny; Delia Donahue, larceny; James Bailey, burglary.

The case of Richard McDermot, plead guilty to breaking jail, and was sentenced to the House of Correction for three months; William Watson, plead guilty to adultery, and was ordered to recognize in $100, with surety. Jane Honing-ton, plead guilty to like offence; time, Fifty-two sentenced to three years to the State Prison for burglary; Jackson Chandler, for larceny of $46 from the person of Thomas Conner, was sentenced to House of Correction; Stephen Medley, for larceny of gold lockets, &c., plead guilty, and was committed to hall to keep the peace and bail of good behavior; Victoria Hansen, larceny, 1 year House of Correction; William Codman, common thief, 3 months House of Correction.

Charles Verbeck, Arthur Herrin, and Frank Denney, were discharged—no bills being found against them.

IMPORTED INVENTION.—Hallman's *Self Toppling Fan*. The "progressive" spirit of the age is illustrated in no manner so marked as by the almost daily discoveries of new and ingenious contrivances for improving the manufacturing resources of the world. New things become old as fast, and are so soon forced aside by improvements.

Lowell has the honor of adding a most valuable improvement in one branch of cotton manufacture, and one which will be of great and imperfect mode of "card stripping" will be forced to give way to accuracy, speed, and perfection.

We had the pleasure at witnessing the beautiful operations of this new and ingeniously constructed machine, at the Merrimack Mills, in this city, a few days since. Many fruitless efforts have heretofore been made to produce a machine to perform the laborious task of "stripping." This machine does its work with such accuracy, such speed, such perfection, and is so comparatively simple in construction. The movements are attached to a new card, built expressly to test the utility of this new principle. The main cylinder is four feet, by three feet wide, and it has twenty-eight tops. There is a segment, with eight teeth, over the tops, to which is attached machinery that deliberately picks up, strips, and returns the top to its place, the segment then moves on to the third, and so on, alternately stripping the tops as it proceeds. Mr. Thomas Williams, the inventor, acknowledges several important improvements should his machine, after a full trial, meet his anticipations. The time, labor, and loss, in the present mode of stripping, is very great. Several artists and writers are among the emigrants.

☞ France will shortly possess a more formidable Navy than at any period of her history. She will have about twelve a year, 25 ships of the line, and as many frigates, of which 15 are of the first class, and most of them fitted with screws.

LAMB. Ben Hallett's attempted reply to Edward Everett's speech in Faneuil Hall, which reply was made just evening of the same day, and from which Mr Everett spoke, was a decidedly weak affair. He alluded to the enormous fact that he was abroad to the Constitutional Convention from the town of Wilbraham, the remembrance of which would always remain with his heart. As to the trouble about the distribution of the public offices by the President *he said that he had been pretty well provided for himself*, and therefore did not care much about it.

VERMONT. There were three more trials for Governor in the Legislature, without any material change from former votes, and the matter has been postponed till next Wednesday.

NOW THE COALITIONISTS MAKE VOTING. A short time previous to the State election last year, an ignorant, simple-minded man, presently naturalized, stated that he was a true Whig and should vote the Whig ticket at the approaching election. A few days before election, however, he changed, and called himself a Democrat. Upon being asked why he had so altered his mind so soon he said, "I was invited into Boston & Alger's office, and they put me on the committee, or I must vote the democratic ticket this year."

ANOTHER HARD-SHELL SCHOOLS. Those two amiable gentlemen, Hon. C. Barrell, private editor of the Boston Times, and John H. Wentland, Esq., acknowledged editor of the Boston Chronicle, are having a regular pitched battle—in which black eyes, broken ribs, blue shins and bloody noses, figure with a great degree of enthusiasm. The brick structure—on Page street—is now well advanced towards completion—and the Republicans are to be congratulated on the manner in which the work is being planned.

BOOT'S NEW MILL, for woolen manufactures, on the east side of Concord river, is rising rapidly. It is a brick building, 94 by 44 feet, and four stories high. The mason work is done by Herrick & Tuttle.

MARRIAGES, Oct. 21. Mr L. Hanscomb, of Portsmouth, N. H., has been appointed naval constructor. Government is said to have resolved upon a new system for improving the manufacturing resources of the world. New things become old as fast, and are so soon forced aside by improvements and better, that nothing can now be regarded as settled or sure in the manufacturing world.

Sailing of the Humboldt.
NEW YORK, 23. The steamer Humboldt, which leaves this port for Havre to-day, will take out about one hundred and fifty passengers, among whom are Mr Lewis Cass, Jr., U. S. Minister to Rome. The Humboldt is a splendid ship. Capt. Wyman, U. S. N., and the Naval Family, have taken engagé passage. The Humboldt will also take out about one million of dollars in specie.

From the Japan Expedition, &c.
A letter from an officer of the Japan expedition, is dated Nassa-Kong Great Law Chery, Lew Chew, capital of the expedition then were. The Commodore had been on a visit to the Royal Palace, where he was feasted by the Regent. Some of the native princes had also visited the Commodore's ship. The expedition was to sail for Jeddo about July 20th.

PHILADELPHIA, Oct. 23. The steamer Osprey arrived safely this morning, she had been detained three days off Cape Hatteras by bad weather.

☞ The Boston Herald suggests that there should be an extra train every night to take to the poor people accused of crime. We think a movement like this highly desirable. If the poor may have a train to convey them to the expense, to aid them against the ravages of disease, why not also have an attorney to defend them in the assertion of perverted law? We like the idea.

LAW'S MUSEUM. The New York Times says that Law, by authority of that George Law, has effected a sale of a very considerable portion of his museum to the Turkish Government—to be used the war with Russia. The sale has not yet been sent, but are to be shipped in the course of a few days.

THEATRICAL. The New York Herald notices two noteworthy facts:—one that the theatrical season has been a failure, and the other that the most flourishing and prosperous condition in New York, and the other, that the Italian opera and concert rooms are crowded every night, and that the minor theatres are only not popular, but also utterly unprofitable.

escape from it at the cost of her life. No other single calamity like unto this, save in the power, save that of starving herself. For two days she maintained this determination, and was already beginning to feel her strength diminishing, when some miscreant on the part of Zack changed altogether the train of her thoughts. The old serpent, like unto the old race, effected the purpose by reading the cards, or telling fortunes, and *she artfully* led her hospital mistress to receive a wish to know what would be her brother's fate, the subject most dear to her thoughts. ELECTION.....MONDAY, NOV. 14.

Last Hours of Webster.

To day is the first anniversary of the death of Daniel Webster,—a day ever memorable in personal, political and general history. The dead year has now expired, and it may afford a melancholy pleasure to recall at brief length the circumstances of that "last scene of all," to draw near by that couch of lamentation on which the sage of Marshfield closed his dying eyes, and to survey in graphic view the solemn quent progress of the nation to whose fidelity he was so long passionately attached, and of the party over whose councils he so long presided.

It was autumn. The year and the nation were both in decline,—the one in the ne nual, the other to its quadrennial crisis. The ripe harvests of the year and the ripe men of the nation had been garnered, the former in the transient storehouse of the harvestman, the latter in the eternal mansions of Almighty God! The crops of nature and the crops of humanity had thus been cared for, or left to wither, decay and die. John Q. Adams slept safely with his fathers; yea, venerable was the rest of the "old man eloquent," who died at last in peace after a life of agitation, to glory after a world of obloquy. Zachary Taylor had departed alone as his long companion in arms, and the green that clothed that "last retreat," the grave of the hero of Buena Vista. John C. Calhoun had left his place in the senate, and had been succeeded by the *repose* of his Maker to "the great republic." James K. Polk had fallen in his prime; and the glory of the Hermitage of the Mississippi followed him to the judgment-seat of the heavenly mansery. Henry Clay had been wrapt in his winding-sheet and garnered in his long expected grave; and not as a summer's evening sophy were the then tones of that deep music which the plaintive winds and the elegiac pathaetic discovered over his new-raised grave—chanting the loud, long-sore,-resounding eulogy to the deathless memory of the sage of Ashland.

Such were the antecedents which prepared the nation, by a discipline of less than six years, to behold the coloseus of New England, the giant of the North, bow his willing submission to the decrees of Destiny—

"How sunk his soul!
What clouds of darkness overcast the sun,
Clothe the ground in gloom, and day,
Like midnight, fill with fear!"

As with the natural, so with the political world. Of parties there had been a general breathing up. The old land-marks had been obliterated or removed. The old leaders had been discarded or destroyed. Clay, Buchanan, Marcy and Van Buren, had been cast overboard from the old sea worn democratic craft, which, having kicked from her helm her former pilots, was now "going before the wind" under the pilotage of "Young America." The whig party, too, had undergone a like or a similar transition. Convened at Baltimore, it had given the helm to a new presidential aspirant. At the most suspicious balllotings, Webster had received but thirty-two votes; and now, defeated and rejected, what should be do but "run?"

"The bitter end," "the last of earth," had come; and to Marshfield he repaired, there to summon around him his "ancestoral friends" to take his farewell, and die. Alone in his own secluded library, he made his will and sent a lament—one of the most remarkable private documents in existence—and disposed of all his estate. It consisted of his farm, his small library, and the books of which it is composed. The great works of the world's great minds, all are there. On those ample shelves are the Holy Bible, Parliamentary History of England, Smith's Theophilus, Humboldt's travels in New Spain, Delaines in the British Parliament, Clarendon's History of the Rebellion, Bacon's Works, Allison's American Revolution, Memoirs of Josiah Quincy, Edinburgh Review, Life of Washington, Waverly Novels, Greek, Latin and other dictionaries, Encyclopedia Britannica, Wharton's English Poetry, Encyclopedia Americana, Scott's Life of Napoleon, Putnam's Lives of the Poets, North American Review, American Museum, Audubon's Birds of America, (the latter encased separately in mahogany drawers,) Penny Cyclopedia, Gibbon's Roman Empire, and the works of a legion of others whose productions are as immortal as their own God-born spirits, and whose naming live forever on the master-roll of glory.

Such was the employment in which he was supposed to be engaged, when, suddenly, a despatch from the Marshfield correspondent of the Webster cannot live!" The nation stood appalled. She had just seen him rejected by his own party, and had raised no note of dissent. Recalling the services of his long life, his eloquence unsurpassed, his highest achievements in the State, he hearts were in fields of intellectual competition—swelling all those, the sentimental statement returned, the national heart broke. Then indeed was the Republic *grateful!* And who shall name the bonor, the dignity, the esteem, which the national heart, in the fullness of its gratitude, would not have bestowed in lay on the dying pillow of Webster! Who shall say that the nation then, in the transition running to idolatry, would not have gloried in naming Webster among the most illustrious of its Presidents!

But this was not to be. Not until the king of men was buried in his last death grapple with the king of terrors, did these thoughts arise. Softly, and not without many prayers, did the old man sink into his grave. Of the many which buoyed up his mind in that scene, so many from most were adequate conception, when we recall an incident that transpired within a month subsequent to the adjournment of the Baltimore Whig Convention.

Mr Webster had been to a camp-meeting; and while returning with some ladies to the Capitol, alluded to the doctrines of Christianity as believed by the attendants thereof. "And," said he, "there is some fanaticism in all this; but after all, the doctrine of a future life is the only solace that our exports me. I feel a preeminent of my death. I am sure I shall not live after next January;" adding in allusion to the ladies who were with him, "I hope I shall meet you there" (in heaven),—for, said he, that Mr Webster never so deeply as though he heart would break.

The sequence of the sequel it is unnecessary here to relate. They are a part of the common intelligence of the country:—

"Families in our midst—in household words."

But we cannot conclude these reminiscences without alluding to the present position of our party. Webster and Clay being numbered with the fathers, we have no man now among us who can claim a presidential nomination at our hands. And while we cannot too deeply regret the loss of those who were so long the ornaments of our party, we are not to forget that it has been by those ornaments that we have more than once been defeated. We can now nominate whom we please; and we note has a right to murmur because his *name* have been slighted. No longer are we embarrassed by our claims upwarted and our hopes defeated, by the personal quarrels of overgrown rivals. We are now free. And while we shall cast the great deed in honorable remembrance, let us guard the future from the troubles which have wrecked us in the past.

MR PLUNKETT'S ACCEPTANCE. The following is Mr Winthrop's letter to Mr Plunkett informing him of his nomination as Whig candidate for the vice-gubernatorial office, together with Mr Plunkett's reply accepting the same:

BOSTON, Oct. 1, 1853.

The Hon. Wm. C. Plunkett, Athens:

MY DEAR SIR:—In behalf of more than a thousand delegates, from more than three hundred cities and towns of this Commonwealth, who assembled in Convention at Fitchburg, on the 29th ult., I have the honor to inform you of your unanimous nomination as the Whig candidate for the Lieutenant Governorship at the next election.

Allow me to assure you of the sincere pleasure with which I perform this duty, as the appointed organ of the Convention, and of the deep interest which I feel in the success of the ticket which you are to head. The nomination may well be accepted by every candidate who is confirmed and ratified by the good people of the State, at the approaching annual election in November, with entire confidence.

DEAR SIR:—I received on the last year from you, officially informing me, that the Whigs, assembled in their delegate convention at Fitchburg, on the 29th Sept., had nominated me as their candidate for the office of Lieutenant Governor of this Commonwealth. For this unexpected and unsought honor I return the grateful acknowledgments.

I would say, also, to say that I regard the honor the greater, coming as it does from the party whose republican principles and laws always commanded my admiration, and whose wisdom in the direction of public affairs has given to our Commonwealth a position so respectable, a prosperity so stable, and a character so proud, that it stands in the foremost ranks, and is justly entitled to the praise of all the friends of this Union, while they may well vie with such a noble example. Should I be favored in the approaching election by the Convention, I am happy to on these terms that of that party most which the plaintive winds and the elegiac pathaetic discovered over his new-raised grave—chanting the loud, long-sore,-resounding eulogy to the deathless memory of the sage of Ashland.

CITY MATTERS.

TOM'S JURISDICTION OVERRULED. We learn, but as we are going to press, that in the case recently argued before the Supreme Court, considering the question of the jurisdiction of Justices of the Peace under the Maine Liquor law, judgment has been rendered for the defendant. Tom's jurisdiction being thus judicially denied.

FIRE. A small unoccupied house, on Cumberland street, was burned about one o'clock on Sunday morning. A family moved out the day before. The house was owned by Joseph Hovill, and was undoubtedly set on fire. Loss about $400—insured $250 at the Lowell Mutual.

HOWARD FIRE INSURANCE COMPANY, LOWELL. This Company, we are pleased to notice, is now in a most prosperous condition, and well deserving public confidence. The nett profit on last year's business was over $31,000. See advertisement in another column.

HON. EDWARD EVERETT will address the people of Lowell on the Constitution, next Thursday evening, in Huntington Hall.

LEVEE. The Lowell City Guards give a Complimentary Levee to their honorary members, on Wednesday evening next, at Merrimack Hall.

[F7 Prof. Taylor opens his budget of Mysteries and Fantasmagoria at Wyllie Hall, to-night.

THE TRE-HOUR MEETING, in Huntington Hall, on Saturday evening, was not a very large one, but was a good one, if we may judge by the animation and Bostler with the spirit and conduct of the meeting, that he left the Hall shortly before he was announced to speak. Mr O'Brien of Boston spoke until-his speaking had well-nigh emptied the Hall, when, it being about nine o'clock, Mr McCafferty arose to address something like a cab-load of outsiders, who remained in the Hall to avoid the rain, no having umbrellas to protect them. The speeches were of the Buncombe species, and very harmless in their results,—harmless as young kittens.

THE NATIONAL HORSE EXHIBITION, which started at Springfield last week, was a grand and imposing affair, we are assured by gentlemen who were present. The number of horses on the ground was about 1,000, many of them of great celebrity. The number of horses in every large stable in the country was there, many noble and beautiful animals. Many distinguished gentlemen, from all sections of the country, were present.

The receipts for tickets to the show and the grounds amounted to about $18,000.

The first premium for fancy matched horses, $100, was awarded to D. Sanderson, of Somerville; that for matched horses to Lewis Gale, Barre, Vt., $100. Draft horses, $50 to C. Fosdick, Boston, and $25 to E. Fay, Charlestown. For stallions of 7 years to "Cassius M. Clay," owned by J. H. Goodwin, N. Y. Stallions of four to seven years to Daniel S. Wilcox, Terrenot, Black Hawk breed, $100. Breeding mares, G. W. Sherman, Vergennes, Vt., $100. Mare with foal by her side to Mr. Wm. Wood, Boston. Thoroughbred horse Flagg, Worcester, $100. Stallion colts, $50 to John B. Briggs, Springfield; also $50, justly entitled to the praise of all the friends of this Union, while they may well vie with such a noble example. Should I be favored in the approaching election by the Convention, I am happy to on these terms that of that party most which the plaintive winds and the elegiac pathaetic discovered over his new-raised grave—chanting the loud, long-sore,-resounding eulogy to the deathless memory of the sage of Ashland.

DEAR SIR:—I received on the last year from you, officially informing me, that the Whigs, assembled in their delegate convention at Fitchburg, on the 29th Sept., had nominated me as their candidate for the office of Lieutenant Governor of this Commonwealth. For this unexpected and unsought honor I return the grateful acknowledgments.

I would say, also, to say that I regard the honor the greater, coming as it does from the party whose republican principles and laws always commanded my admiration, and whose wisdom in the direction of public affairs has given to our Commonwealth a position so respectable, a prosperity so stable, and a character so proud, that it stands in the foremost ranks, and is justly entitled to the praise of all the friends of this Union, while they may well vie with such a noble example. Should I be favored in the approaching election by the Convention, I am happy to on these terms that of that party most

Republican Simplicity and Democratic Economy.

We publish the following paragraph, from the North British Mail, and commend it to the special notice of the simple men, who are constantly denouncing about whig extravagance:—Two thousand dollars and upwards for a single carpet! A pretty high figure for an economical republican court—a democratic one; and four carpets more of the same style and finish, making in the four about $10,000 for the single item of carpeting for the White House.

EXTRAVAGANCE is the great vice of the times, and in no case more glaring and contemptible manifestation is found in the general spring of foreign modes and styles of living. The example long set by the high circles of Washington, is in no matter for wonder, that it should be followed throughout to the lower strata of society.

Then, we mean,where carpets in this country, of exquisite beauty and the highest finish, are manufactured, from the Pacific Ocean to the St. Lawrence, and altogether too good to be dedited by some of the creatures that fawn around him, and who are never contented except in be, with a carpet all, separated himself from four others of the same kind, and from the rest of the world, by the splendor of his little sanctum, and with the dignity and the position of the President of the United States, that the carpets upon the floors of the White House should be from the looms of American manufacturers, rather than from those of Messrs. Templeton & Co., Glasgow.

Dr. John Bull takes a trip across the Atlantic, as he often does, and calls to pay his respects to our democratic Chief Magistrate, and he is not content to spend the old fellow most of his own country and her ears, to find that the President, for all his surroundings, from the cast on which he sits to the carpet under his feet, is indebted to the skill and ingenuity of British artisans.—Even the Yankee, the right arrows by our recent Prince Frank in a holiday suit, puts down his Axminster carpets, furnishes his house after the most approved pattern of royalty itself, with all sorts of gorgeous and royal embellishments, and all the product of her own work-shops. Nothing will do, no proof of the pageant, and the minnie royalty, cheerfully pays the bill, and imagines himself almost a King.

Second Despatch.—9 o'clock P. M. The firemen have got control of the fire, and the flames are fast subsiding. Last week, was a grand and imposing affair, we are assured by gentlemen who were present. The number of horses in every large stable in the country was there, many noble and beautiful animals. Many distinguished gentlemen, from all sections of the country, were present.

The receipts for tickets to the show and the grounds amounted to about $18,000.

The first premium for fancy matched horses, $100, was awarded to D. Sanderson, of Somerville; that for matched horses to Lewis Gale, Barre, Vt., $100. Draft horses, $50 to C. Fosdick, Boston, and $25 to E. Fay, Charlestown. For stallions of 7 years to "Cassius M. Clay," owned by J. H. Goodwin, N. Y. Stallions of four to seven years to Daniel S. Wilcox, Terrenot, Black Hawk breed, $100. Breeding mares, G. W. Sherman, Vergennes, Vt., $100. Mare with foal by her side to Mr. Wm. Wood, Boston. Thoroughbred horse Flagg, Worcester, $100. Stallion colts, $50 to John B. Briggs, Springfield; also $50, justly entitled to the praise of all the friends of this Union, while they may well vie with such a noble example. Should I be favored in the approaching election by the Convention, I am happy to on these terms that of that party most which the plaintive winds and the elegiac pathaetic discovered over his new-raised grave—chanting the loud, long-sore,-resounding eulogy to the deathless memory of the sage of Ashland.

Such were the antecedents which prepared the nation, by a discipline of less than six years, to behold the coloseus of New England, the giant of the North, bow his willing submission to the decrees of Destiny—

"How sunk his soul!
What clouds of darkness overcast the sun,
Clothe the ground in gloom, and day,
Like midnight, fill with fear!"

As with the natural, so with the political world. Of parties there had been a general breathing up. The old land-marks had been obliterated or removed. The old leaders had been discarded or destroyed. Clay, Buchanan, Marcy and Van Buren, had been cast overboard from the old sea worn democratic craft, which, having kicked from her helm her former pilots, was now "going before the wind" under the pilotage of "Young America." The whig party, too, had undergone a like or a similar transition. Convened at Baltimore, it had given the helm to a new presidential aspirant. At the most suspicious ballotings, Webster had received but thirty-two votes; and now, defeated and rejected, what should he do but "run?"

"The bitter end," "the last of earth," had come; and to Marshfield he repaired, there to summon around him his "ancestoral friends" to take his farewell, and die. Alone in his own secluded library, he made his will and sent a lament—one of the most remarkable private documents in existence—and disposed of all his estate. It consisted of his farm, his small library, and the books of which it is composed. The great works of the world's great minds, all are there. On those ample shelves are the Holy Bible, Parliamentary History of England, Smith's Theophilus, Humboldt's travels in New Spain, Delaines in the British Parliament, Clarendon's History of the Rebellion, Bacon's Works, Allison's American Revolution, Memoirs of Josiah Quincy, Edinburgh Review, Life of Washington, Waverly Novels, Greek, Latin and other dictionaries, Encyclopedia Britannica, Wharton's English Poetry, Encyclopedia Americana, Scott's Life of Napoleon, Putnam's Lives of the Poets, North American Review, American Museum, Audubon's Birds of America, (the latter encased separately in mahogany drawers,) Penny Cyclopedia, Gibbon's Roman Empire, and the works of a legion of others whose productions are as immortal as their own God-born spirits, and whose naming live forever on the master-roll of glory.

Such was the employment in which he was supposed to be engaged, when, suddenly, a despatch from the Marshfield correspondent of the Webster cannot live!" The nation stood appalled. She had just seen him rejected by his own party, and had raised no note of dissent. Recalling the services of his long life, his eloquence unsurpassed, his highest achievements in the State, he hearts were in fields of intellectual competition—swelling all those, the sentimental statement returned, the national heart broke. Then indeed was the Republic *grateful!* And who shall name the honor, the dignity, the esteem, which the national heart, in the fullness of its gratitude, would not have bestowed in lay on the dying pillow of Webster! Who shall say that the nation then, in the transition running to idolatry, would not have gloried in naming Webster among the most illustrious of its Presidents!

But this was not to be. Not until the king of men was buried in his last death grapple with the king of terrors, did these thoughts arise. Softly, and not without many prayers, did the old man sink into his grave. Of the many which buoyed up his mind in that scene, so many from most were adequate conception, when we recall an incident that transpired within a month subsequent to the adjournment of the Baltimore Whig Convention.

Mr Webster had been to a camp-meeting; and while returning with some ladies to the Capitol, alluded to the doctrines of Christianity as believed by the attendants thereof. "And," said he, "there is some fanaticism in all this; but after all, the doctrine of a future life is the only solace that our exports me. I feel a preeminent of my death. I am sure I shall not live after next January;" adding in allusion to the ladies who were with him, "I hope I shall meet you there" (in heaven),—for, said he, that Mr Webster never so deeply as though he heart would break.

The sequence of the sequel it is unnecessary here to relate. They are a part of the common intelligence of the country:—

"Families in our midst—in household words."

But we cannot conclude these reminiscences without alluding to the present position of our party. Webster and Clay being numbered with the fathers, we have no man now among us who can claim a presidential nomination at our hands. And while we cannot too deeply regret the loss of those who were so long the ornaments of our party, we are not to forget that it has been by those ornaments that we have more than once been defeated. We can now nominate whom we please; and no note has a right to murmur because his *name* have been slighted. No longer are we embarrassed by our claims upwarted and our hopes defeated, by the personal quarrels of overgrown rivals. We are now free. And while we shall cast the great deed in honorable remembrance, let us guard the future from the troubles which have wrecked us in the past.

MR PLUNKETT'S ACCEPTANCE. The following is Mr Winthrop's letter to Mr Plunkett informing him of his nomination as Whig candidate for the vice-gubernatorial office, together with Mr Plunkett's reply accepting the same:

BOSTON, Oct. 1, 1853.

The Hon. Wm. C. Plunkett, Athens:

MY DEAR SIR:—In behalf of more than a thousand delegates, from more than three hundred cities and towns of this Commonwealth, who assembled in Convention at Fitchburg, on the 29th ult., I have the honor to inform you of your unanimous nomination as the Whig candidate for the Lieutenant Governorship at the next election.

Allow me to assure you of the sincere pleasure with which I perform this duty, as the appointed organ of the Convention, and of the deep interest which I feel in the success of the ticket which you are to head. The nomination may well be accepted by every candidate who is confirmed and ratified by the good people of the State, at the approaching annual election in November, with entire confidence.

I am, dear sir, with great regard,
Your friend and servant,
ROBT. C. WINTHROP.

NEW MANUFACTURING ESTABLISHMENT. To-day's paper will be found the card of Mr J. D. Ashton, announcing the new works, just got into operation at Chicopee, in this State, for the manufacture of stained leather and other articles. Mr Ashton has had a leading position in his business, at the big manufactory at this city, and is an experienced, capable and thorough master of his business. There are spontaneities that will be almost of parts of the country. It can be cannot fail to win, what he so justly deserves, a high position and successful business relations. We cannot but entertain the warmest wish to the notice of all interested in procuring the right sort of work from the right hands, and a reasonable charges.

BURNED IN FOLSOM'. A young man name O.E. Rogers, in the employ of the Messrs. Carpenter, stow bonnet manufacturers in Fitchburg, committed suicide in that town Friday morning, by shooting himself in a rage. He had been sick for some two or three weeks, and his mind was no doubt affected. He leaves wife and two children. He was regarded as young man of excellent reputation.

DROWNED WHILE DRUNK. Michael Patrick Conway, a native of Fredericton, N. B., 18 years old, jumped from the deck of the brig Isaac at Long wharf, Boston, on Saturday morning, while drunk, and was lost in a fit of delirium tremens, and was drowned.

[F7 The London Times was a "great paper" when it advocated the Corn Laws, and remained so when it advocated Pierce's election. Now it is nothing but a "Tory journal."

EPISCOPAL CONVENTION. The Protestant Episcopal Convention in New York, on Saturday elected Rev. W. J. Kipp, of Albany, Missionary Bishop of Oregon and Utah, and Rev. F. F. Scott, Missionary Bishop of Oregon and Washington.

NEW YORK POLITICS. It now appears that the New York "Hards" engaged some thirty bullies, at Syracuse, to enable them to control the Democratic convention. They paid them $100. They did not pay as they promised and this has led the unpaid bullies to make public the whole affair.

[F7 The marquis of Chandos, the son of the duke of Buckingham, whose immense estates Co's liquor and among them was the Stowe estate, accepted the office of chairman to the London and Northwestern Railway. This young nobleman, it is said, is not off the small tail of Buckingham property, and deprived himself of employment per annum, in order to pay his father's debts.

[F7 The Emperor of Russia has contracted with Mr. H. Wilson, of New York, shipbuilder, for a line-of-battle ships, to be put on the stocks immediately.

[F7 The Missouri Legislature has a bill before it, in accordance with a suggestion in the Governor's message, to provide that no man be allowed to vote unless he can read the constitution of his with, and that no endorsement shall be valid without such consent.

[F7 A deserted woman who was about to become a mother, sought to escape the disgrace that awaited her, by leaping from one of the bridges in Boston, on the close of the Monday night. The hands upon the boat succeeded in rescuing her from her premeditated fate, but her black-hearted seducer witnessed the occurrence.

A GREAT BLESSING TO THE AFFLICTED.

Dr. M'Lane, the inventor of the celebrated Liver Pills, has a remedy for Fever and Ague, which he considers he ought to be instrumental to relieve them to the public to assist in relieving the afflicted, and thereby benefit humanity. The inventor physicians' fair the same repugnance that exists in the minds of others to the use of quinine, and the general complaint against consequences which obtrude the administration of that article, he has been induced to prepare a vegetable substitute which will be free from the taps on the stave of quinine good. His great sensitiveness to the unpleasant effects produced by the usual preparations, at times induces him to be reluctant to bring his medicines before the public, but the many unsolicited testimonials he has received from those most practising necessity of his wonderful remedies effect in the cure of Fever and Ague, and other kindred diseases, has induced him to offer his Pills to the afflicted with the assurance that they will give entire satisfaction, as trials "are nowhere else to be had."

Dr. M'Lane's Vegetable Liver Pills, and his Celebrated Vermifuge, can now be had at all respectable Drug Stores in the United States and Canada.

Fortunes of a Young Girl.

Consulting the cards, she answered, after a pause, an aspect of great joy on her face. "I will get no fortune-telling," she said; "the cards declare it will be by you—by you—alone! he has sworn!"

The words were scarcely uttered, when there was an unusual noise and rushing into the room of a gay officer, and seized at the same moment with a violent convulsion. She received her lover's embrace, and preserve her life, in the hope that Edward might be her own forever. But, alas! it is but poor to describe the sufferings of her beloved brother.

When the vessel arrived at Smyrna, it was discovered that Edward was getting on in his other captivity to be the happiest moment in society and mentioned his having with him a beautiful slave of Provence, by the name of Zuleika. Edward was overcome with grief and after some distance that was accompanied and conducted to the house of the Pasha, he was presently offered to purchase her first request of the Pasha.

"My brother," said Alice, "I will pay and him, I pray, liberty!"

Alice!" said the master, "that is not possible, I have set my heart upon her, and by the intervention of the Sultan, alone I fear, could I obtain her. Forswear her request and forgive me."

The Sultan? replied Alice, and for a few moments she remained in thought. "Well," continued she at length, "I cannot and will not forswear my request. The Sultan shall be myself." The counsel pressed her to clear her brother's chains, but she refused, and left the Pasha to the power of the Sultan. The slaves were ordered to bring the poor captive of Algiers before the Sultan, and the Pasha was presently in the power regard to the Sultan, and the Pasha was presently in the power regard to the Sultan, and the Pasha was presently in the power regard to

ELECTION.....MONDAY, NOV. 10.

Chief Justice Shaw and Br. P. Hallett.—We have by inference our readers the views of these two distinguished gentlemen on a question of vital importance to the citizens of Massachusetts, namely:—Whether juries shall be judges of law as well as fact. The new Constitution ordains that—

"In all trials for criminal offences, THE JURY shall have the right to determine, under the direction of the Court, *shall have the right, in their verdict, to determine* according to the law and the evidence, *the facts of the case*; but it shall be the duty of the Court to instruct the jury in the principles of the law which govern the case, in the decision of which they have a right to determine, as aforesaid, the application of the law to the facts, in connection with the evidence in the case."

Now we have supported, at least for the purpose of illustration, where a high popular principle was involved *wise and humane* general, in which large bodies of persons might come to be interested by hopes of honest but mistaken indignation against some supposed wrong, and errors in the pursuit of the objects of the interest of philanthropy or perhaps monsters may be thrown up by more than common wisdom and vindictive passions. Under these circumstances, a jury, partly, having, in the case, partly, according to the opinion of law, contrary to the instructions and charge of the judge, might return an indictment; a traverse jury, in those cases, might convict upon it, though the Court before whom it is tried should give them such directions, in point of law, that if they understood and followed them they must acquit the accused. But the case supposes that the law must be rightfully interpreted by a Court which may shift at every trial. What then becomes of the *uniformity, certainty, and stability of the law of crimes*—*a subject so vital to the peace and happiness of society, as to call for the most anxious consideration and support on the part of humanity and science?*

Free Common Schools. One of the most interesting struggles of the day (ways an exchange,) is the struggle of a party—we are glad to say, only a part—for themselves have too much intelligence for it, in the approved old Roman Catholic proposition to break up our long established Free School system, by demanding that the public money shall be in part exclusively devoted to Roman Catholic schools; and though there is now and then a lull in that struggle, yet it is by no means for, we are from being over.

The Freeman's Journal (the Boston Catholic organ in New York) says, in its last number—

"The education of the Ward Schools has been carried on by Protestants and hence school books upon the faith and morals of Catholic particular, instead of supporting, they have grown worse and worse with time."

And it therefore reserves its demand for a separation and a segregation of all Roman Catholic children. It says,

"Protestant schools of either sometimes condemned the mixed schools of Catholic children with the children of unbelievers, in schools professedly neutral, but which, in fact, were, and must be, schools of no authority here. We were told that no sensé only by the voice of Infidelity, Puritanism, Methodism, Presbyterianism, Episcopacy and Unitarianism, but by the language of the school books that disseminated the spirit and belief of each of these sects, and the consequent perversion of unbelief and of unsettled principles—to meet schools of their own, adapted to meet schools of infidelity."

This is the argument of order among us now. It is always the argument of the party in power, and of Kings, our Archbishop had said that the Pope was the only source of authority, and therefore, in the extension of the faith and his authority, the Pope had a right to depose first and then the church and schools. But we thank God that we have yet a country where we can think for ourselves, and where we will be free to do so. The time may come when the Roman Catholic party shall obtain the power of controlling public affairs, and the pleasure of exercising control like that which in England and Ireland, but we trust in God that we shall not live to see it. We have confidence enough in the intelligence of the people of this country to believe that they will not surrender their liberties to the dictation of any foreign power, or to the ravings of imaginary rights. They will throw upon their best men at the true philanthropists of our land, and the friends of the class, who are ever ready to aid him by legislative means in relieving him from the evils which he has brought upon himself, and which he is the principal sufferer.

Boston Theatre.—This evening, Miss O'Brien, alias Mrs. Dowe, was tried for keeping a house of ill Fame in East Cambridge, convicted and sent to the House of Correction for one year. E. Bigley for Defd. William Shannon, for burglary and larceny of boots at Charlestown, was convicted of the same and sentenced to the State Prison for two years. E. Bigley for Defd. John Appleby, alias John Thornton, for stealing a Horse, Chaise &c., in Cambridge, Mass. and driving it to Providence, was convicted and sentenced to the State Prison for 4 months in House of Correction. Geo. Edwards, of East Cambridge, was convicted of larceny of a silk dress. Horace B. Emerson, of Lowell, for embezzlement of a large waggon and harness, was convicted of the same and sentenced to the House of Correction for 9 months.

German and Bremen at War. New York Oct. 24. The Washington Union of this morning contains a letter from Secretary Buchanan, addressed to Collector Bronson, in reply to that gentleman's recent publication, in which Secretary Buchanan is severely censured for the appointment, of instruction and discipline to cure the evils; not, but that other kind, described as applicable and flexibly in an address lately published from the pen of one of our weakest divines and ablest writers, the Rev. Dr. Lord, of Dartmouth College—*a system of moral and especially repressive, physical, and of spurious existence, and of a mischievous character*, and *a multitude of evils*, and *a multitude of evils* with views merely *political and temporary*, and *a multitude of evils* with the *political and temporary* objects of *a multitude of evils

THE ROAD TO HEALTH!

HOLLOWAY'S PILLS.

CURE OF A DISORDERED LIVER AND BAD DIGESTION

Copy of a Letter from Mr. S. H. Hickox, Chemist, 7, Prog ress Road, Liverpool, dated 6th June, 1853.

To Professor Holloway.

Sir,—I was Troubled with Indigestion and Pain about the region of the Liver for Twenty Years, during which time I had been confined for years with a disordered liver, and was under the care of several medical men, but received no benefit. I was induced to try your Pills, and after taking them for a short time, found myself much relieved. I continued to use them, and in the enjoyment of good health. I could have sent you many testimonials of their value, but the sincerity of the actual cure speaks more than words. I am, Sir, your obliged humble servant, (Signed) SAMUEL H. HICKOX.

CURE OF A PAIN AND TIGHTNESS IN THE CHEST AND SHORTNESS OF BREATH.

From Messrs Thos & Jno. Proprietors of the Lyon Ironworks, Wednesbury, dated the 1st February, 1853.

To Professor Holloway.

Sir,—I have much pleasure in informing you that I have derived great benefit from the use of your Pills. I was troubled with a pain and tightness in the chest and shortness of breath, which after proving ineffectual from other remedies, I was induced to try your Pills, and was completely cured by them. I am, Sir, your obedient servant, (Signed) THOS. & JNO. PEARSON.

DR. MORSE'S

INVIGORATING

CORDIAL.

A PHRENOLOGICAL IN MEDICINE.

PROFESSOR MORSE'S INVIGORATING ELIXIR.

The Eighth Wonder of the Remedy.

The Ancient Elixir and Cordial introduced into and used extensively by the great chemists of Arabia Persia, by the eminent Physicians of Egypt, and by the Priests of Africa, and is now one of all the great items of Science in the best preparation extant for

CURE OF NERVOUS DISEASES.

Its language can convey an adequate idea of the beneficial effects of this Cordial in the cure of Nervous Diseases. Its power in cleansing the stomach and bowels, and in purifying the blood, is manifested in the sallow cheek by exercise, tonic, or manner, or in quickest by the use of a single bottle. Its power in Nervous Affections, Spasms, Pains in the side, Convulsions, and Nervousness, and Nervous Headache, and Nervous Debility, is wonderful. The mental and physical powers are invigorated by its use.

Dr. Morse's Invigorating Cordial is a sovereign remedy for the entire derangement, by the careful preservation of the constitution, from the effects of Mercury, Calomel, Quinine, Opium, Morphine, Strychnine, Arsenic, and all other Mineral Poisons.

MEDICAL DIRECTIONS.

Of the old World have attended, the miracle of medicine has been performed by this Cordial.

A STIMULANT THAT CERTAINLY DOES ACTION.

Dr. Morse's Invigorating Cordial is a stimulant that certainly does action. It is a stimulant to the whole system, and not to any one part of the body. It is a stimulant to the blood, and it may well be said of the man who takes Dr. Morse's Invigorating Cordial, that the blood in his veins is a stimulant. A single dose of Dr. Morse's Invigorating Cordial will be found sufficient to prove the truth of the above statement. Its stimulating properties are immediately perceptible, and are felt in the head, in the stomach, in the heart, in the blood, in the nerves, in the muscles, in the bones, in the marrow, in the joints, in the extremities, and in the whole system.

CAUTION.

Dr. Morse's Invigorating Cordial is a stimulant that certainly does action. It is a stimulant to the whole system, and not to any one part of the body. It is a stimulant to the blood, and it may well be said of the man who takes Dr. Morse's Invigorating Cordial, that the blood in his veins is a stimulant. A single dose of Dr. Morse's Invigorating Cordial will be found sufficient to prove the truth of the above statement. Its stimulating properties are immediately perceptible, and are felt in the head, in the stomach, in the heart, in the blood, in the nerves, in the muscles, in the bones, in the marrow, in the joints, in the extremities, and in the whole system.

DR. MORSE'S INVIGORATING CORDIAL

ered the chief obstacle to his preferment, was now removed, he would accordingly obtain the favor of his august masters. He resolved, therefore, that this impediment should not long cast his hopes into the deep—prepared for the unfortunate Amy, under pretense of benefitting her health by change of air, to retire to Cromer, in Berkshire. He of Dudley, who now so keenly felt the loss of his lovely bride, dreaded still more her passage with Foot, lying, fond, fraudulent, Job." "Sanctimony," he says, means "relating to expense," and, he adds—"They (those laws) can be justified only on the ground of extreme necessity."

Now the Maine Liquor Law is a law relating to food, or what is in law tantamount to food-drink; and if any man can doubt that it comes within the provinces of the Websterian definition, he must be a quick-sighted scholar indeed. But we rely not on Noah Webster. We believe that the Maine Liquor Law *is a temperance law*; and if called upon for further proof, we have a legion of legal authorities, no less respectable than Blackstone, (though he wrote French,) Blackstone, Kent, Story and Dane, to support us.

TERRIBLE ACCIDENT.—THREE MEN KILLED—SEVERAL WOUNDED. An evening audience engaged on Tuesday morning in removing a corset not well upon Mr. Pemberton' Home estate, Howard street, Boston, a portion of it fell upon several men engaged in cleaning bricks near it, two of whom were instantly killed, and another injured so severely that he died on Wednesday after being extricated from the ruins. Several more were wounded by the falling timber, but the wonder is that so many escaped. The following are the names of those killed and wounded:—Eugene Sullivan, (killed) residing at No. 2 Hamilton court; James Foster, (killed) residied in Ann street; John Murray, (badly wounded—since died) resided in Sea street. Timothy Daley, one leg broken, resided at 56 Tyler street; Patrick White, leg and back badly injured, resides at 39 Lincoln street; Patrick Sullivan, foot and head badly hurt, resides in Langdon court, entire in the neighborhood. Others were injured but not so badly as to disable them from walking home. The wounded were attended by Drs. Stedman and Adams, who were unremitting in their efforts to make the sufferers comfortable. The bodies of the three deceased were removed by coroner Smith to the house of reception in Grove street.

MARCUS MORTON ON THE NEW STATE OF AFFAIRS.—Ex-Governor Morton alluded to the proposed basis of representation in the following manner:

A single glance at the statistical facts, just named, will show that the system operates with great inequality upon the *merchants, manufacturers, mechanics, fishermen and farmers* of the west of old Hampshire. The class legislation may not have been intended. But when the effect of this system is the necessary consequence of unequal representation.

Cities and large towns, including the above classes, and, perhaps, some others, have by the system a power over each representative, while the system leaves the agricultural towns destitute of their legislative desire it. *The farmer loses, perhaps, more than any one party initially in his foster, over the mechanic, the merchant, or the artisan.*

THE DAILY GLOBE. We are indebted to Hon. John C. Rives, of Washington, D. C., for a copy of his Prospectus for the Washington Daily Globe and the Congressional Globe during the session of Congress. We should be happy to receive a copy of the Daily Globe for the ensuing year, but regret that we cannot publish the Prospectus.

MR RIVES wrote a letter from General Washington, showing that the conception of such paper originated in the mind of "the father of his country," and that he left it given to the press. Reporters in Congress," and will be "careful to gather from remote sections of the country by telegraph" the miscellaneous news of the day. To facilitate the circulation of this excellent journal, Congress last year passed a resolution making it free of postage. The Globe will be sold at half the price of similar publications. The important towns likely to be agitated during the coming session of Congress, must render this journal of inestimable value.

PRAYER PROMPTLY ANSWERED. The Petersburg Intelligencer tells a story of a little boy in that city, who, having recently lost his father, found himself deserted thereby from attending school as formerly, and, in the fulness of his faith, he determined to seek the wherewithal, for that interest to which he had doubtless been taught to look for other and higher things. In the simplicity of his heart, he sat down and gravely wrote a letter to his Redeemer, thinking, perhaps, that as formal a mode of preferring his requests, would meet with greater attention. The next day's surprise at the Postmaster, Wm. N. Friend, Esq., on discovering among the contents of the letter-box, one morning lately, a missive directed to "Our Saviour Jesus Christ, Heaven," and bearing the only postage of the story is worthy a noble mention, which we are not foolish enough to deprive our readers of the pleasure or profit of hearing, he deposited in the office, and the money required, and directed it to the young applicant.

NEW VERSION. In a poetic allusion the other day, the Boston Post,—which, by the way, was rather more distinguished for its poetical accuracy than for its political soundness,—quoted Cowper's poem "On the Loss of the Royal George," as reading

"When Kingsmill went down,
With all her brave sailors and all her renown."

As this is an age of progress, it may be that our brother of the Post has a version of Cowper which reads thus; but being a "conservative," and somewhat more "national" than the Post, we adhere to the original, which reads as follows:—

"His corse was to his sheets;
His flag was in the sea;
With fifty men around him
He fought most manfully."

THE JURY HUMBUG. Mr Dana, in his speech at Faneuil Hall the other evening, took strong ground against the "proposal monstrosity" of making jurors judges of the law, and reducing the judges themselves to a level with the moderators of town meetings. Mr Dana strongly urged the citizens to vote down the ridiculed reform. If he had extended his humility to certain other absurdities in the election movement, Mr Dana would have exhibited considerable consistency.

WARREN'S PANORAMA. The Boston correspondent of the N. Y. Herald, 'a Alpha' "—in other words Hazzard, editor of the Times, is of this opinion, that Judge Wilde will be the next Governor of Massachusetts. The writer is called something of a profound politician, and his opinion is worth a great deal. The prospect of Wareham's election, it is added on all sides, is extremely good. All that the friends of A good man, and a true friend of a bad constitution have to do is to support Gov. Lincoln. The thing is then as sure as that grass is truth.

DR. ABBOTT DIXON'S name has been withdrawn from before the Legislature of Maine as a candidate for U. S. Senator, and the election will now be between Gov. Cutting and Judge Fessenden.

PRINTING TELEGRAPH.

[For the Journal and Courier.]

LATER FROM CALIFORNIA.

NEW ORLEANS, 25th. The steamship Texas has arrived below at this port from Vera Cruz, bringing California dates of the 16th September. She reports the departure from San Francisco for Panama, on the 15th, of the steamship Oregon with four hundred and sixty passengers and one million five hundred thousand dollars in gold, and the steamer Panama from Panama with one million one hundred thousand dollars in gold.

CITY MATTERS.

ARRIVING TO NEW YORK. This afternoon, at a quarter before 6 o'clock, the excursion train for New York will start from the Northern Depot. Fare both ways only five dollars. We are authorized to say that *four days* will be allowed passengers to return.

MISS. EDWARD EVERETT will deliver an address on the proposed new monument to Bunker Hill, to-morrow evening, at 8 o'clock, in Huntington Hall. Men of all parties are invited to attend. Admission reserved for the ladies.

MR MEEK'S LECTURE. This eloquent gentleman delivered a most able and masterly address last evening in support of the Maine Liquor Law, before a large audience, (though he wrote last evening, in Huntington Hall, and was followed by more than *two thousand* persons,—the largest audience, probably, ever congregated in that spacious building. His fellow-laborers on the committee urged by the success of this occasion, were pointed, witty and convincing. His arguments for the *constitutionality* of the law, and its *expediency*, were quite satisfactory and conclusive. But his remarks, designed to show that the Maine Law is *not a sumptuary law*, and will be a valid law, and not prohibit, passed from the art of literal drinking, appeared to us to be utterly frivolous. Mr Meek has few equals as a popular debater; but the best dialectitians sometimes mar the beauty of good arguments by the unnecessary introduction of sophistry and bad logic.

"CORN OUR AND ALL, AND LOVES TO HIS WORDS AFLOAT IN ROSINESS [LIT" Such are the words afloat in a handbill announcement that young Aaron Burlingame—a lad from Cambridge—is to speak in the Tremont temple of Lowell—to "mechanics and its intelligent men—to its blacksmiths and pretty girls—in Huntington Hall, and to "young men generally" on a wind-bag. When we have said this, we have exhausted his eulogy.

A HINT TO THE "REFORM." Every new officer who comes into power is expected to make his mark. Hitherto, letter stamps could be bought at the Post Office for 5 cents; but now, under the new administration, people of Lowell—in the mechanics and its intelligent men—to its blacksmiths and pretty girls—in Huntington Hall, and to "young men generally" on a wind-bag. When we have said this, we have exhausted his eulogy.

FATAL EXPLOSION.—*Providence, Oct. 25.* One of the boilers of the Manchester Print Works in Smithfield, exploded this morning, demolishing the boiler house, and injuring the engine slightly injuring a fireman. A piece of the boiler passed through the drying house, doing considerable damage. No one else in the mill was not injured. The works are owned by Messrs. A. Sweder and Paterson.

NOMINATIONS. Hon. Samuel W. Robinson of Quincy, and James Bartlett of Brookline, have been nominated as the Whig candidates for Senators in the Executive Council.

RUN TO DEATH. John James Scott, apparently about forty years of age, and an agent of the late S. F. Belknap, Esq., of Lowell, Mass., got out of the cars at the Fitchburg Railroad depot in Boston, on Saturday afternoon, and started for Lowell, at about 5 o'clock yesterday. He stopped at Woburn, where he was seized with a spell of bleeding, and soon died, from somewhere in the system.

ARE! It is stated by the Cincinnati Commercial that Robert J. Walker received nine hundred dollars for a day's salary for accepting and resigning the mission to Mexico. Couldn't some of our democratic friends weave that into their nice little homilies upon Galphinism?

ℰ Mrs Ellen Best, of Boston, a woman of fourteen years of age, was arrested on Monday, and found an acquaintance with a man with whom, according to the Worcester Transcript, she intended to go to Lowell, last week, but on her way to the depot, he told her to go home, as she was too much intoxicated to be on the streets. She then went home in a state of excitement, seized a pistol and shot herself dead.

ℰ The Washington Star suggests that the democratic candidate for Governor in New Jersey May be defeated by the combination of the anti-monopoly elements against him. Joel Haywood, the whig candidate for Governor, is also the temperance candidate, and, himself a workingman, is said to be very popular with the working class.

PENNSYLVANIA LEGISLATURE. The political complexion of the next Legislature is given by the Harrisburg Union, as follows: Senate, 18 democrats, 15 whigs, 1 native; House, 75 democrats, 36 whigs, 4 natives; democratic majority on joint ballot, 43.

ALARMING IF TRUE. The New York Herald says: "We have various developments to report in connection with the Rothschilds, who hold a controlling interest in the Bank of the Duke of Nassau, in Wirtemburg, near Ribersach, and with a noble influence, which we are not foolish enough to deprive our readers of the pleasure or profit of hearing, be deposited in the public mail-bags, and there required, and directed it to the young applicant.

NEW VERSION. In a poetic allusion the other day, the Boston Post,—which, by the way, was rather more distinguished for its poetical accuracy than for its political soundness,—quoted Cowper's poem "On the Loss of the Royal George," as reading

"When Kingsmill went down,
With all her brave sailors and all her renown."

As this is an age of progress, it may be that our brother of the Post has a version of Cowper which reads thus; but being a "conservative," and somewhat more "national" than the Post, we adhere to the original, which reads as follows:—

"His corse was to his sheets;
His flag was in the sea;
With fifty men around him
He fought most manfully."

A BOAX FOR THE ADVERTISER. Those of our citizens who attended the course addressed by Governor Boutwell, in this city, some months since, will be gratified to see that political address, in pamphlet form. In the Constitutional Convention he said—

"Upon this point I stand, and say that it is the duty of the people of the country should be represented as regards rum, more fully than the city."

OPPONENTS OF THE NEW CONSTITUTION.—Among the most distinguished members of the Convention who have expressed their opposition to the new Constitution are,

Samuel Hoar, of Concord;
John G. Palfrey, of Cambridge;
Charles Francis Adams, of Quincy;
Moses Grinnell, of Boston;
Robert Rantoul, of Beverly;
John C. Park, of Boston.

A WORK THAT WILL DO GOOD. Messrs Crosby, Nichols & Co., of Boston, have just published a pamphlet entitled "Remarks on the proposed State Constitution, by a Promoter of the same." It presents the leading objections to the new Constitution in a very lucid manner, with the effect of the Convention, with the object of its framers. The pamphlet will, without doubt, be extensively circulated. It is understood to have been written by Hon. G. Frisbie, of Cambridge.

GENERAL SUMMARY.

SPEAKING FOR THE CAMPAIGN. The Whig State Central Committee, says the Atlas, have published the services of a large number of Free soakers, who are ready to address the citizens of the various towns in the pending contest. Our Whig friends will be supplied with speakers, by calling upon the Committee, at their room, No. 9 Cornhill square.

FROM CALIFORNIA.—*Norfolk, Oct. 25th.* The steamship Northern Light, from San Juan de Nicaragua for New York, put in here to-day for coal and provisions. She brings San Francisco dates to the 1st inst., and seven hundred passengers, together with one and a half million dollars in gold. The Panama steamer presents no feature of importance. The San Francisco markets were dull and prices were favorable to buyers.

OBJECTIONABLE. Speaking of the appointment of Elizabeth to the Lowell post-office, the Manchester, N. H., Union Democrat, the home organ of Moses Norris, says: "This appointment is of the most objectionable class of the Boston swearing, at 8 o'clock, in Huntington Hall. Men of all parties are invited to attend. Admission reserved for the ladies.

MR MEEK'S LECTURE. This eloquent gentleman delivered a most able and masterly address last evening in support of the Maine Liquor Law, before a large audience, (though he wrote last evening, in Huntington Hall, and was followed by more than *two thousand* persons,—the largest audience, probably, ever congregated in that spacious building. When we have said this, we have exhausted his eulogy.

To our Lady Readers. A tasteful, unique and rich "Dress Hat" well fashioned without, and lined within, with the finest satin, is offered in the amount invested in any other article of the same description. This is a rare chance, however fashionable the form, because every lady knows that the best article is the cheapest through the invaluable experience of their mothers, and, in this case, the hat is recommended to favor the different tastes of these sexes, as well as the different circumstances in which we must straddles their unrivalled hats are worn. Every lady is invited to call and examine the various fabrics of French millinery at the store of Mr. Hall, a liberal variety of his own manufactures, will be ready for the auction sale, which will take place with unusual and greater exertions to merit a liberal share of patronage. Mr. Hall is the successful proprietor of White's Bonnet Saloons," for the sewing machine, which has been pronounced by unequalled sirens, challenge competition; and the ladies are invited to examine its operations, be productive of "brilliant novelties," and which is to be operated by a young woman. We predict a brilliant scene on the morning of the 27th, and a brilliant sale. The ladies of Lowell will be invited with happy faces, all eager to secure the bargains which are offered in millinery before and around them. As this is the first time that Mr. Hall has made the invitation to take a peep into their establishment, we hope our citizens will call and see them, and we will join our voices in the chorus of praise. Mr. Hall deserves the fashionable rendezvous for fashionable people. [Boston Journal.

A GREAT BLESSING TO THE AFFLICTED.

DR. M'LANE, the inventor of the celebrated Liver Pills, and those pills for sea-sick power in his genuine, before he can be assured of other frauds in the market, and manner as to make them known throughout the country. The immense popularity for the sale of these pills has induced needy men of evasive feel in erecting the finest, and most extensive establishment in the United States, for the manufacture of medicines, and to secure monopolize upon the public, and rely upon a system of extensive advertising, and the great merit and real value of the Liver Pills, and influenced by the offers made to them, to purchase the secret of making them, and the right to manufacture and sell them throughout the United States. Say what you will—you cannot put down merit. Dr. M'Lane is a native American, and a patriot. Genius, and a patriot, deserve success, and he will receive it. The genuine Dr. M'Lane's Liver Pills can be had with the agents—and the public must be careful to observe that the name of Fleming Brothers, Pittsburgh, is on the wrapper of each box, and the name of the proprietor, Dr. M'Lane, is blown in the glass of each bottle. F. O. PRINCE, of Winchester.

GEORGE W. BRADLOW, of Somerville.

PETER LAWSON, of Concord.

ELECTION.....MONDAY, NOV. 14.

William C. Plunkett.

The nomination of WILLIAM C. PLUNKETT for Lieut. Governor of this State, imparts peculiar interest to the following sketch written more than years ago, though prepared, as will appear, for another than a political object. Mr. Plunkett is the eldest of the three brothers referred to, all of whom are well known in Western Massachusetts, and whose commanding talents and personal excellences have gained for them a high position in the estimation of their fellow citizens. Their success in life is poor and friendless boys, have raised themselves by their industry and efforts, to respectability and positions of honor. Our candidate for Lieut. Governor, as the Springfield Republican well observes, "is one of those men to whom we can point as the glory of our free institutions. A man whose manly struggles have won for him the confidence of his fellow citizens, and whose generous sympathies, the love of his fellow-men,—whose course is full of encouragement and instruction to the young men whose whole life is the sure guarantee of the loftiest integrity and the truest devotion to the best interests of the people in every post of honor to which the station for which he has been nominated."

Facts for Inquiry.

With the Democratic party, as often expressed by politicians of our native population, at the right moment to throw over any ignorant monstrosity, from Europe among us, we have little sympathy. We have no desire to see the necessary influence which is felt, in lowering the tone of the general character and standard of the nation where they congregate in considerable numbers, to intelligent and patriotic citizens, made itself a matter of regret. Even in our New England villages which are indebted by no new fact to some considerable extent; and occupying, as they do almost exclusively, the places which have been filled by the sons and daughters of the soil, they are not without influence upon them, and domestic habits, and as objective to many branches of business, they form an important portion of our community. The investigation of interesting questions which permeate the thing will not, therefore, be considered as misplaced or unimportant. We are to expect an alarming and sudden change in our present happy condition. The latter is the result most certainly to be apprehended from the causes to be sought by us.

Mingling as we do daily, with the mass of the community; enjoying the advantages of education, in common with our children in the public schools; living so many do in protestant families, worshipping, as never before, the freedom of religious opinions, under a free government, and possessing the liberty of our own citizens, the most free and perfect of any upon earth, we should look upon them from within. Whatever may be the result with them when looked upon from without, we feel sure that of those other influences, we feel sure that of those who have been among us while in process, we are born among us of foreign parents, who are educated in our schools and grow up surrounded by those influences which may be said to be found in open view on the right hand and left, many, if not most, will long remember with gratitude.

We have seen instances in the short history of our country, (where indeed, they are anxious and not important than elsewhere,) where persons have been elected to offices of trust, and even the offices of foreign parents, on elevated and responsible stations.

In one of the western counties of Massachusetts, a gentleman who was an officer in the Revolutionary War, and who held for a long course of years, the office of Judge of Probate some years ago, employed as gardener, a native German, who had come to this country to seek for a home. In the course of a few years, he left the employment of the gentleman, and by dint of his economy, means in the vicinity, he came to be sent. In the course of a few years, he left the employment of the gentleman, and by dint of his economy, means in the vicinity, he came to be sent. ELECTION.....MONDAY, NOV. 14.

Mr Everett's Address Last Evening.

The gathering last evening at Huntington Hall, was truly immense. Few less than three thousand persons, including six or seven hundred ladies, thronged the body and gallery of the hall. Dr. S. Richardson, Esq., Chairman of the Whig Central Committee, called the meeting to order, and Lieut. Governor Huntington was chosen President by acclamation. On presenting himself to his audience, Mr Everett was greeted with three deafening cheers; and through the entire course of his address, he was frequently interrupted with enthusiastic plaudits. He remarked that it was foreign to his habits to address political assemblies on the eve of elections; he made some happy allusions to his past connection with the Whigs of Middlesex County, and said he could find his way in the dark to her great places, Concord, Lexington, and Bunker Hill; so intimate was his acquaintance with every road of her territory. Considering these happy allusions, the effect of which was the immediate audience, it would be impossible to describe, he paid some very handsome compliments to the talents, personal and public merits of Messrs Washburn and Plunkett, the Whig gubernatorial and vice candidates; he spoke at length on the Know Nothing question, justifying what particular course England took in the crusade against Russia, and admitting that it is England's duty to set itself against the aberrations of power by Russia that would follow the overthrow of Turkey. He added, significantly, that England was not to enter into the deep questions which may develop themselves out of the possible new organization of the Ottoman Power. He further expressed strong anxiety for peace.

A peace conference was in session at Edinburgh, at which Messrs Cobden, Bright, Thayer, Burritt and other peace apostles were present.

The Sheffield manufacturers had memorialized against the Government agent entering into treaty with Turkey.

Trade continues firm. Turkish bostilities will be immediately followed by a rise in cotton.

The cotton mills at Preston were to be temporarily closed, to starve Government into submission. The number of turnouts in the Manchester districts will thus number nearly 4,000, who must soon be driven back by hunger to their work.

A large meeting had been held in London in favor of Turkey; thousands attended.

The duty has been taken off breadstuffs imported into Turkey.

Formal complaint has been made to the pope respecting Gavazzi's doings in New York.

France. The emperor and wife were at Compiegne on the fortnight.

At Amiens the religious solemnity of translating the bones of St. Theodula, called together twenty-seven archbishops and bishops, both French and foreign.

Austria. Austria continues to augment its forces on the Turkish frontier, and a considerable reviews that in the event of hostilities will attempt to occupy Servia, which territory is disaffected towards Russia.

Mr Jochanan made his appearance at the theatre.

A letter says that Kossta is on board the ship Sans Souci, of Baltimore.

The question of Austrian citizenship is to be discussed soon at Vienna.

The month hops for the safety of our Republican Union. Democratic Conventions assembled and nominated by small majorities, or against any party in the field, candidates for Governor, who are totally unworthy of the confidence of the people, and who could scarce command a corporal's guard in any State.

(Hartford, who has been condemned to death in Virginia for his share in the revolution of the 4th, had escaped to Turin after four years' confinement.

Naples is threatened with anarchy and the government is preparing for the worst.

Greece. Athens advices of September 20th announce another shock of an earthquake there and at Thebes.

CITY MATTERS.

Lost. Lost, in this city, a small gold neck chain and cross. The finder will be rewarded by leaving the same at this office.

Insolvent. Mr Edward Everett, designated assignee for the Middlesex and Bay State Mills, (Lowell and Lawrence) formerly a resident of this city, and late of Lawrence, came up to Lowell on Monday to attend the funeral of Col. Dutching. Not returning home, his friends became alarmed, and impressed with the belief that he had been drowned, commenced yesterday dragging the canal in the vicinity of the Machine Shop and the Carpet Mills, which operation is going on from last evening. Mr Everett has been the time arrived, the entire population in motion up the river.

Mr Everett will be duly at refugees and others received by the Turkish ambassador are politely and thankfully acknowledged. So far no hope has been held out to the parties that their surrender will be accepted. The Turkish government will probably decline such aid if regular assistance be given by the French and Turkish governments.

England. The queen had returned to London, and all the ministers had re-assembled. It was not her intention to make a parliament unless events became threatening.

The chancellor of the exchequer, assisted at the inauguration of the Peel statue at Manchester. He spoke at length on the Turkish question, justifying what particular course England took in the crusade against Russia, and admitting that it is England's duty to set itself against the aberrations of power by Russia that would follow the overthrow of Turkey. He added, significantly, that England was not to enter into the deep questions which may develop themselves out of the possible new organization of the Ottoman Power. GENERAL SUMMARY.

Vermont. We received a telegraphic despatch over the Nut Line, this morning, from Montpelier, stating that John S. Robinson (democrat) was yesterday elected Governor of Vermont by one majority.

The Fourteen Democrats of this County assembled in Concord yesterday, and nominated the following gentlemen for Senators: Col. Abbott, Lowell; Gen. Dana, Groton; Capt. Fairbanks, of Sudbury; A. H. Ward, Jr., of Newton; Gorham Brooks, of Medford, and — Butterfield, of Tyngsboro. Mr Sawtell or some other gentleman we have not learned. The Convention was large and enthusiastic.

"Bunky Up." The Presidents of Dracut industriously circulated an announcement that the bridge was to be carried away, would speak at the new Constitution in their town, on last evening, in opposition to Hon. Edward Everett. When the time arrived, the entire population of both sides from town, on Monday evening last, intending to go to the Old Colony House, Middlesex street, where he usually stopped when here. The night, it will be remembered, was very dark and temperatuous, and it is supposed that he mistook the railroad for the canal, and was carried away on a large English and French fleet will be despatched to the gulf as soon as circumstances permit.

The Union has good grounds for its assertions as regards Cuba.

The secretary of the treasury will urge congress to establish a new bureau, charged with the construction of custom houses, marine hospitals, &c.

The secretary's report will be ready on the first day of the session.

Thos. Corwin, Esq., U. S. brig Perry, Commander Page, sailed from Santa Cruz 20th Aug. for Cape Palmas.

Mr Sandford Haggerston, Md., has been very severe; the snow is a foot deep.

Mr McLane, Minister to China, expects to start on the 15th of November by Judge Parker Mason, minister to France, and Mr O'Sullivan, Consul to Lisbon, have been making arrangements to sail in the same vessel.

James Stewart and Robert Thompson, of Boston, have purchased the Island of Sombrero, of their gold dust after their arrival at Norfolk on Monday.

Baltimore, Oct. 27. President Pierce visited the cattle show this morning, and returned to Washington to-night.

Nominations south of Richmond to-night.

Six large derricks used at the ship yards of Richmond, fell yesterday, dangerously wounding at once.

Montpelier, Oct. 27. Balloting for governor was resumed to-day. 1st Ballot—Fairbanks, whig, 123; Robinson, dem. 117; Bell, dem. 22, free soil, 17. 34 Ballot—Fairbanks, 104; Robinson, 116; Bristow, 1.

Washington, Oct. 27. Gen. Pierce spent most of the day at the cattle show, and returned to the city in the evening.

Gen. Cushing has been appointed Attorney General of the United States, in place of Mr Mason, resigned.

Gen. Pierce has appointed Mr Bancroft, the historian, Minister to Prussia, in place of Wheaton, recalled

which her in his arms; and, although she [illegible] Give me my child! child! child!" [illegible] and was overcome by death before [illegible] at the last supposed to be [illegible] to her own. I am too much [illegible] Until my [illegible] —saying the last [illegible] I never lost the [illegible] mother was—for [illegible] what she was also.

"I was so painful to witness the old lady's looks of fearful agony as she gazed at her face, and called upon him, with accents of [illegible] to restore her child. "Oh, my child! my child, twas in my bed!" I was sustaining it [illegible] and smiling upon it, with mingled [illegible] and [illegible] that he was her son. Then her [illegible] exercising his hand, and [illegible] saying it was [illegible] to her self. "She is [illegible] hands, knee, foot and drapery—and then will our "calling and election" be made sure."

The following remarks, from the Boston Chronicle, are sensible and deserve attention:

"It is not to be denied that the friends of the new constitution are exhibiting very praiseworthy efforts to carry out their reforms. They evince much more energy and skill in conducting the campaign than their opponents. There are many gentlemen of very fair qualities, either Democratic or Free Soil, in the field at this moment, arguing or declaiming in behalf of the labors of the constitutional convention. They are nearly all young men, glib of tongue, active, zealous, and determined. Of course, they must have an influence on the political destinies of this State, and there appears to be but a very small amount of speech-making in opposition to them. The Whigs, or opponents of the new constitution, have a few men in the field, but the young and active members of the party, those who can speak and who have taken part in preceding elections, are in the back ground. They are determined to remain last evening by Mr Parker, a modest but eloquent shoemaker of Worcester. Mr Parker's style is very imperfect, and indifference of great eminence; but he evidently by his sons good sense, which his brethren have not, and reads and thinks largely for himself, or for one of his friends are apt to do.

[illegible] 17 In the Police Court this forenoon, Orenzo[illegible] W. Brett was fined $5 and costs for an assault on his wife, and ordered to give bonds in $50 to keep the peace for six months—committed to House of Correction.

[illegible] Correction. We would call attention to the advertisement of J. Q. Currier, in another column. Mr Currier is an excellent artist, and those who want a good likeness of themselves or friends, should call and see his specimens at No. 92 Merrimack street. His rooms are elegantly fitted up, and offer every inducement to visitors to spend their time pleasantly. Mr C. has also superior advantages for taking groups.

Later Intelligence from California.

New York, Oct. 25. The steamer Ohio from Chagres has arrived here at 4 o'clock this afternoon, bringing $925,000 on freight and $700,000 in the hands of her passengers; also the United States mails. The Ohio left Aspinwall on the 18th inst.

The Japan Expedition. The Overland Mail's London letter of August 20th says: Commodore Perry's flagship Susquehanna sailed on the 8th July, and left again on the 17th—not very well received, but the opening of Japan is postponed till next spring.

[illegible] 17 It is understood that Wm. S. Robinson, a young man of ability, who has had a share of talent prior to his being entered with the freedom, is the Boston correspondent of the New York Evening Post.

Mormonism. Keep it before the average people,that the freeboil American and the poor deluded Mormon are identical in spirit. They are one, having the same ultras, the same practices, the same type, and the same constituency: one basing their claims on Divine revelation, the other on the Constitution, but contemplating another expedition.

Boston. A gentleman named had been attacked by a gang of Hunkingers and robbed of $50,-00 in bills. Two of the gang were arrested and the robbers were killed, and all comprising the [illegible] Hunkingers were more or less wounded.

[illegible] There was a great want of laborers in Australia. Wages were receiving so high wages as £16 per week.

[illegible] Two Chinese Caloreen from Panama for Sydney had not arrived and had not been heard of

their objection to a particular article, can then have it considered separately, and all the labor of the Convention would be lost.

A committee of five persons was accordingly appointed, of which Judge Jackson was chairman. That committee, December 6th, reported a recommendation of which the following is the substance:

Resolved, That all the amendments made by this Convention shall be proposed in distinct articles; each article to consist, as far as may be, of one independent proposition; and the whole to be so arranged that upon the adoption or rejection of any one, or more of these, the other parts of the Constitution may remain complete, and consistent with each other. If any two or more propositions shall appear to be so connected together, that the adoption of one and the rejection of another of them would produce a repugnance between different parts of the Constitution, it would therefore be an alienation therein, not intended to be proposed by this Convention, such two or more propositions shall be combined in one article; and each of the said articles shall be considered as a distinct amendment, to be adopted in the whole, or rejected in the whole, as the people shall think proper.

The fourth resolution was passed December 8th. The others were laid on the table.

On Wednesday, Dec. 13, Mr Wallace moved "that a committee of nine members be appointed, to whom all the amendments to have been, or may be agreed upon, to the form in which it will be proposed to submit the same to the people for ratification."

Of this committee, Judge Jackson was also chairman.

On Monday, January 1st, Mr Varnum, of Dracut, moved that the committee for reducing the amendments to form in which it shall be proper to submit them to the people, be instructed to report from time to time as they were ready, and not wait for the whole business.

Mr Varnum said that his object was to have a report acted upon from time to time, so that it may be committed to an engrossing committee, and that the Convention may not be obliged to wait three or four days after all the principles of the amendments shall have been settled.

On Saturday, Jan. 6th, Judge Jackson made a report, comprising the several amendments, as amended, in the form in which they were finally submitted. On Monday, Jan. 8th, and Tuesday, Jan. 9th, the report was discussed and accepted, the exact form of the amendments under the two reports thereof were ordered to be printed by the President and Secretary, one of which was to be sent to every town in the State, and the other, *engrossed on parchment*, was deposited in the Secretary's office, and the Convention adjourned.

Thus we see that the Convention of 1820, which sat fifty-five days only, Sundays included, settled on the twenty-second day of their session the recipe - so much flour, so much sugar, so much meal, so many raisins, to be boiled so long, and in so much water. When the dinner was going to be served, and pudding time arrived, any one heard of cases for the English ambassador's dinner, or for the emperor's entertainment, reeling and panting under the weight of six enormous loaves, filled with a dark colored, liquid substance, of the consistency of gruel. "Alas, for the emperor!" cried the boy. "What the bag is to the pudding, such are the forms of liberty to its spirit. The cook of the Convention have boiled their pudding without a bag, and will the people swallow their sickening plum porridge?

SILAS HAYSTACK.

WHO WILL SAVE CONSTANTINOPLE? The Paris correspondent of the National Intelligencer seems to think that among the great Powers of Europe there will soon be a struggle for Constantinople. He says:

The Ottoman Empire is, there can be no doubt of it, threatened with dissolution. It must soon be broken up. Constantinople, containing the forts on the Black Sea and the Mediterranean, is a vacant point. It will be. Otherwise public law is a novel superstition. Europe is in favor of the nation who is in the partition of the territory of the falling empire that strikes only possess it. There are three great and powerful rival nations - France, Russia and England—which would most gladly possess it: it never could be divided with a due fair share of them. It seems to be clear that it must also be those which is to determine who one of them which is to be its lucky possessor. They could never quietly and diplomatically agree upon it. Europe therefore awaits power this clearly enough. Each one of these three will prevent England to keep Russia from entering it. When Russia covers it of the cannon of the Bosphorus would soon cause to blow upon the question of the Dardanelles, and either of the three must get possession of Constantinople and the Dardanelles, and in the power of which the most military armies in possession would be the most likely to have only to say, in favor of all this, that *if I were a British or French army I would not leave Constantinople, nor to find the British naval force in those seas* to be a large superior force superior to that of the French."

ELECTION.....MONDAY, NOV. 14.

The Commonwealth on "the issues."

On Wednesday, Dec. 13, Mr Wallace moved "that a committee of nine members be appointed, to whom all the amendments to have been, or may be agreed upon, to the form in which it will be proposed to submit the same to the people for ratification."

Of this committee, Judge Jackson was also chairman.

On Monday, January 1st, Mr Varnum, of Dracut, moved that the committee for reducing the amendments to form in which it shall be proper to submit them to the people, be instructed to report from time to time as they were ready, and not wait for the whole business.

Mr Varnum said that his object was to have a report acted upon from time to time, so that it may be committed to an engrossing committee, and that the Convention may not be obliged to wait three or four days after all the principles of the amendments shall have been settled.

On Saturday, Jan. 6th, Judge Jackson made a report, comprising the several amendments, as amended, in the form in which they were finally submitted. On Monday, Jan. 8th, and Tuesday, Jan. 9th, the report was discussed and accepted, the exact form of the amendments under the two reports thereof were ordered to be printed by the President and Secretary, one of which was to be sent to every town in the State, and the other, *engrossed on parchment*, was deposited in the Secretary's office, and the Convention adjourned.

Thus we see that the Convention of 1820, which sat fifty-five days only, Sundays included, settled on the twenty-second day of their session the recipe - so much flour, so much sugar, so much meal, so many raisins, to be boiled so long, and in so much water. When the dinner was going to be served, and pudding time arrived, any one heard of cases for the English ambassador's dinner, or for the emperor's entertainment, reeling and panting under the weight of six enormous loaves, filled with a dark colored, liquid substance, of the consistency of gruel. "Alas, for the emperor!" cried the boy." What the bag is to the pudding, such are the forms of liberty to its spirit. The cook of the Convention have boiled their pudding without a bag, and will the people swallow their sickening plum porridge?

SILAS HAYSTACK.

WHO WILL SAVE CONSTANTINOPLE? The Paris correspondent of the National Intelligencer seems to think that among the great Powers of Europe there will soon be a struggle for Constantinople. He says:

The Ottoman Empire is, there can be no doubt of it, threatened with dissolution. It must soon be broken up. Constantinople, containing the forts on the Black Sea and the Mediterranean, is a vacant point. It will be. Otherwise public law is a novel superstition. Europe is in favor of the nation who is in the partition of the territory of the falling empire that strikes only possess it. There are three great and powerful rival nations - France, Russia and England—which would most gladly possess it: it never could be divided with a due fair share of them. It seems to be clear that it must also be those which is to determine who one of them which is to be its lucky possessor. They could never quietly and diplomatically agree upon it. Europe therefore awaits power this clearly enough. Each one of these three will prevent England to keep Russia from entering it. When Russia covers it of the cannon of the Bosphorus would soon cause to blow upon the question of the Dardanelles, and either of the three must get possession of Constantinople and the Dardanelles, and in the power of which the most military armies in possession would be the most likely to have only to say, in favor of all this, that *if I were a British or French army I would not leave Constantinople, nor to find the British naval force in those seas* to be a large superior force superior to that of the French."

ANOTHER BLOW AT THE NEW CONSTITUTION. The new constitution is "dead, sure." The independent press and the Whig press have killed it. We have already had the opinion and the attacks of such influential papers as the Boston Transcript, the Boston Chronicle, the Lowell News, with a countless legion of other newspapers, who have assailed it without mercy. The Boston Post has now published a letter from Webster, and, in able article at nearly four columns, denounces it as corrupting the independence of the judiciary, as destroying the equality of the citizen insecure, as being the illicit offspring of the hybrid relations of free soil. This is unanimity. Keep the ball rolling!

HON. CHARLES SUMNER on the District System. In the late Constitutional Convention Senator Sumner said :—

"It should be the boast of Massachusetts, that she will move, whatever may be their sensations, first to adopt, in their entire form, the principles which I believe to the practicability of the District system, and then to recommend it to the other States of the Union, under the Constitution of the United States. Massachusetts could find it in the free system, whereby the representative power will be distributed in true proportion among the voters of the Commonwealth, and that it is entitled to the highest hop is proud.

To this end I have spoken by my vote.

CITY NOTICES.

HON. ROBERT C. WINTHROP will address the citizens of Lowell, and others, on WEDNESDAY EVENING NEXT, NOV. 2d, at HUNTINGTON HALL.

Doors of the entrance, to be closed, and hear an exposition of the issue injurious designed to be perpetrated by the adoption of the new Constitution.

INSTALLATION. Rev. Wm. McMillan will be installed as Pastor of the Presbyterian Congregation of Lowell, at their place of worship, in Jackson Hall, on Wednesday evening, Nov. 2, at half past 7 o'clock. Sermon by Rev. A. H. Wright, of New York; Charge to the People by Rev. A. Blaikie, of Boston; Charge to the Pastor by Rev. D. C. Waldron, of Fall River.

POSTPONED. We are requested to state that on account of the prior engagement of the Hall, for Hon. Robert C. Winthrop, the meeting to deliver an address on Tuesday evening next, as announced. Due notice will be given of subsequent appointment.

More "Reform" The question now is,—Did Mr B. F. Hallett, the renowned "outline of form" to the Post stylus him,) all for his Democratic Whig city will organize a "Young Mens' Whig Club" immediately. This is as it should be. All for the success of the ticket.

DEMPSTER COMBO. Mr Dempster, the vocalist, will sing at Mechanics' Hall next Friday evening. See his advertisement.

A "SUN" OF PROGRESS. Our friend Isaac A. Fletcher, (successor to Ransom Reed,) at a vote against the new Constitution, and elevated a bran new "shingle" on Saturday, and is now ready to supply the multitude with the best of family groceries, in every variety, from a hogshead of molasses to an ounce of "spice, pepper and ginger." John Billings, (every inch a shingle,) is Fletcher's right hand.

POLICE COURT.—Oct. 31. Michael Roken for disturbing the peace, fined $3 and costs. John Welch, for the same offence, fined $3 and costs.

General Summary.

☞ Read what Silas Standfast says about the coalition's tinkering the Constitution—comment on the first page.

☞ BEAUTIFUL. One allusion on Saturday to Orestes A. Brownson as a clergyman of the Roman Catholic Church, originated in an impression that he was ordained a priest. He was not ordained, but that he had taken holy orders in the Romish Communion.

☞ The Hon. Alexander, Jr., of the San Francisco Shipping List and Prices Current, has our thanks for files of the California papers.

☞ Dr. Jayne has a full supply of his Medicines. The public will be pained to learn that the gifted Mrs J. Russell Lowell, is no more. We have not the details but on Thursday, at Elmwood, Cambridge, aged 32.

HON. SAMUEL HOAR or the NEW CONSTITUTION. Hon. Samuel Hoar, of Concord, will speak in Fitchburg on Tuesday evening next, upon the new Constitution. The friends of the measure, of all parties, without distinction of party, are invited to be present.

VERMONT. Hon. John F. Kidder, democrat, has been elected Lieutenant Governor, and John A. Page of Montpelier, State Treasurer of Vermont.

☞ The Forging Roosters have assumed tangibility in State street, Boston. The success of the "Forging Rooster" Hon. Free Soil "operator" suspended has alsoated himself from the city. His friends, it is said, will continue to do business at the old stand.

IT WENT AS A BAD OBE. A Constitution which can unite, in opposition to it Whigs, Democrats, Free Soilers, Abolitionists, Rum Sellers, Naturalized Citizens, Merchants, Mechanics, Fishermen and Farmers, and a host of political abolitionists. The Altered Constitution does this, and is a political abortion.

☞ The News down to that B. W. Ball is editor of that paper, and says that he has never set foot within that office.

FIRE IN BOSTON. On Saturday evening a fire occurred in a three story brick building in Causeway street, occupied by carpenters, stair builders, carriage makers and others. The fire took in the rear, occupied by J. Pierce, carpenter, to which it was mainly confined. The loss to the occupants from fire and water will be about $2000.

☞ Part of the suits of Louis Napoleon in his late "progress" through the northern counties, was plainly cut.

A WHISPER. Mr T. A. Conley, a poor lawyer and dent of Portland, Me., has been appointed Attorney General of the State. Conley is a great bungler, bespattered at him by a relative in Ireland, lately deceased.

☞ PENCE CARDS.—The Boston Commonwealth says "Hogs and Logs" is the cry in Kansas. Hogs are plenty there, but they will maintain a high price until the close of a Turkish war. The French and English diplomatists therefore consider that war being confined to the Turkish Empire, will be prolonged into Europe.

The Circassians, under Schamyl, have defeated the Russians on the 27th, and had retired to the mountains. There had been much loss on both sides.

Agitation begins to manifest itself in Italy.

The Japan expedition had returned from Jeddo Aug. 27th. Commodore Perry had an interview with the Imperial princes, and delivered the President's letter. The Americans and Japanese parted with mutual expressions of good will and interchange of civilities, presents, &c.

Two hundred political arrests were made in Hungary during the month; among them M. Goedemer, minister of finance under the provisional government.

The strike in Lancashire had become serious in all the cotton districts. 25,000 persons were thrown out of employment.

The Turkish government had put into Southampton for coal.

☞ The quality of the port wine crop is represented as being good; but the quantity is considerably killed in the vintage; prices were high and speculative.

☞ Flour is 45@6 per cent. dearer in Paris than in London, and 9,55 per cent. dearer in Hamburg than in London.

The commercial advices from India and China were generally favorable.

HON. JOHN O. PALFREY ON THE NEW CONSTITUTION. So rapid has been the sale of the "Remarks on the Proposed Constitution, by John G. Palfrey, from the Press," that the publishers, Messrs. Crosby, Nichols & Co., have issued another very large edition. It is praised by the following letter, which settles beyond a peradventure the question of authorship:

Boston, Oct. 27, 1853.

Gentlemen,—I am requested by Mr. Palfrey to say that he is not the author of the pamphlet entitled "Remarks on the Proposed Constitution, by a Citizen of Massachusetts," and that the publishers are not authorized either to communicate hostilities, to make peace or to evacuate the principal cities, to declare refusal to do one thing or the other.

The first conflict it is supposed will come in the Black Sea or in Georgia.

Private letters have notified the Russian commander to retire from the principalities before the 30th instant or he would commence hostilities.

Old General Paskiewitch, of Polish celebrity, had taken the chief command of the Russian forces in the principalities

On the 25th the combined fleets were observed to be in the mouth of the Bosphorus.

Russian subjects in Turkey have been placed under the protection of Austria.

Austria and Prussia had recalled their subjects from Turkish service.

The Turks will allow neutral flags to sail on the Danube as far as Ibrahim Tabia, below Silistria.

The Times says that the Turkish manifesto is one of the strongest and most unanswerable state papers issued during the present century.

The Post says that mortally Russia is already defeated, and that she will be so materially.

The Daily News says that the Turkish army in the Caspian Sea are invincible.

The Herald says Austria both gets infatuated, though not formally, that they will maintain a strict neutrality in case of a Turkish war. The French and English diplomatists therefore consider that war being confined to the Turkish Empire, will be prolonged into Europe.

The Circassians, under Schamyl, had defeated the Russians on the 27th, and had retired to the mountains. There had been much loss on both sides.

Agitation begins to manifest itself in Italy.

The Japan expedition had returned from Jeddo Aug. 27th. Commodore Perry had an interview with the Imperial princes, and delivered the President's letter. The Americans and Japanese parted with mutual expressions of good will and interchange of civilities, presents, &c.

Two hundred political arrests were made in Hungary during the month; among them M. Goedemer, minister of finance under the provisional government.

The strike in Lancashire had become serious in all the cotton districts. 25,000 persons were thrown out of employment.

The Turkish government had put into Southampton for coal.

☞ The N. Y. Democratic State Convention have nominated Seymour for governor of Judge Bronson, which it says is as act unparalleled in the history of the American government. It proceeds to explain that the party history of Mr B. and denounces Secretary Guthrie's last letter as "unworthy of a Cabinet officer of a free people, and as one supposed to rest on the intelligence of the people."

☞ The *Salem Sentinel* says the mills of Douglass & Jackson, at Ledyard, N. Y., were destroyed by fire, with their contents, on Thursday night. Loss on the building $40,000, and on stock $30,000. Partially insured.

PERSIA AGAINST TURKEY. The last accounts from Constantinople state that hostilities have been commenced between the American missionaries at Oroomiah, on the Persian frontier, stating that great military preparations were being made for the purpose of attacking Turkey in the event of war being declared between that power and Russia. The Pashas of Van, Bayazid and Suleymania are arming the Kurds and other warlike tribes to oppose the threatened invasion. The Persian troops in the province Bagdad and cross the glorius of the Caliphate, a delusion which Russian agents strive to mould to their own ends.

WELL PUT. Speaking of the daring attempt of Don Rafael to reply to Hon. Edward Everett in Faneuil Hall, the Boston Post says:

"What a consequence our ex lacks at a line!"

☞ It is stated that George Law cleared himself of his liabilities so promptly in the California panic, by paying $150,000.

CHOICE OF COMMON PLEAS. On Saturday morning, Judge Nathaniel Hall, of Northampton, tried for liquor selling, and the jury did not agree. Chas. H. Williams, of Worcester, Judge Thomas, of Springfield, and David R. Tenney, for burglary, was sentenced to four years in the State Prison, first two days solitary; Tenney asked of the court a few days since, to have sentence postponed for a week, and while in jail some movements of the prisoner caused the suspicions of Capt. Monroe, who searched him and found on his person three small saws with which he could in a very short time break jail. Henry Bowers, of Hadley, was found guilty of passing counterfeit bank notes with intent to pass the same, (two counts) plead guilty—sentenced to pay a fine of $100 and cost, and stand one hour in the pillory. Alexander Hamilton, of Waltham, appellant, common drunkard, sentenced to the House of Correction; Delia Dewshon, for larceny, was sentenced to eighteen months' labor in House of Correction.

WIND RESISTANCE. The Suffolk Whig Nominating Committee met Saturday evening in the Supreme Court Room, and nominated the following Representatives for the Wards, for the Legislature. The nominations at large are yet to be made.

Ward 1—Samuel B. Ferguson, George Kingman. Ward 2—Henry Jones, George H. Plummer. Ward 3—Ebenezer Bailey, Jonathan Hyde. Ward 4—Robert I. Burbank, Timothy Ferrar. Ward 5—Nicholas Biney, Joseph H. Ward 6—Otis Clapp, 2. Thomas Stetson. Ward 7—Isaac Stanley, Charles Hall. Ward 8—Otis Rich, Thomas J. Rawson. Ward 9—Samuel Wheeler, Richard Carter. Ward 10—Zenas Allen, Benjamin Bisney. Ward 11—Joseph Smith, Jr., Thomas Ward. Ward 12—Benj. Seaman, Albert J. Wright.

General Intelligence.

☞ Read what Silas Standfast says about the coalition's tinkering the Constitution—comment on the first page.

☞ BEAUTIFUL. Frederick Parker, Esq., offers us not a posthumous, but a sweet child, a *Christian*. But this cannot be said of the present editor of this paper. A want of all standing—a core of scurility; a meanness of spirit, which has led him to abuse the persons of his antagonists; a disregard of all the decent courtesies of life, which has frequently manifested itself in the coarse abuse which he has heaped upon the gentleman whose books he undertook to be the *editor* of the Courier;"—all these qualities mark the present editor of the Courier, and render it impossible for us to go without the pool for the sake of sweeping the evil. They have a right to the opportunity of voting for nothing but the ticket, and against nothing but the bad, or what they consider bad.

Four Days Later from Europe,

The U. S. Mail Steamship Arctic, from Liverpool 22d inst., arrived at New York about four o'clock, P. M., Oct. 30., bringing 200 passengers.

DR. RADDIN'S

UTERINE CATHOLIGON.

THIS INVALUABLE MEDICINE, is now offered to the afflicted with confidence, as it is specifically suitable for all those painful complaints and weaknesses that have afflicted the female portion of the community for ages. It is a safe remedy for which it is recommended to every one of the GREATEST AND MOST DISTRESSING FEMALE COMPLAINTS.

CONSTITUTIONAL DEBILITY.

All who suffer from this complaint, should not fail to use this Catholigon—it produces at the same time a healthy invigoration of the whole system, and a permanent cure of every variety of pain and pecuniary embarrassment of the most distressing character. Those who have used it, need not be told its effects for sale at the lowest possible prices. Those who have not, will find it for sale at the lowest possible prices.

Also, Dalkin and Egyptian Bathic Chimney Pieces, Grates, Fenders, and Fire Irons, constantly on hand and for sale at reasonable prices, together with

MARBLE MANTELS,

of every description, made to order.

ABEL HOLT.

Lowell, 30th May, 1853. 1y

Female Complaints,

and which have been pronounced incurable, and a certificate of the most unquestionable character of the astonishing and unprecedented success of this Catholigon in the cure of the most distressing female cases. It has a powerful tendency to invigorate and diffuse healthy action throughout the whole system, and by thus toning up the nervous system, it will in a few days, in a majority of cases, relieve the patient from the most distressing symptoms, and in a few weeks, by continuing the use of the Catholigon, a permanent cure will be effected.

CHEAP BEYOND ALL COMPETITION.

The most distressing forms of female complaints, are to be found among the poor, who are unable to procure medical advice, or the necessary medicines.

MARRIED FEMALES

Who are afflicted with any of the complaints named above, will find this Catholigon, after they use a bottle or two, a thorough friend, and will save them from the use of the knife, and the many other painful operations practiced by the faculty.

The usage of the medicine referred to by the Certificates, is simple and unimportant, requiring no change in diet, or the occupation of the patient, nor could produce a hint of the use of the medicine, and the cure is performed in the privacy of home, without the knowledge of any one but the patient. Full directions for the use of the Catholigon accompany each bottle. Those who are afflicted with Female Weakness, Irregularity, Pain in the Back, Sick Headache, Nervousness, Hysterics, Fluor Albus, or Whites, Pain in the Side, Dizziness, Loss of Appetite, Dyspepsia, Costiveness, Piles, Inflammation of the Bowels, Stone in the Bladder, Disease of the Kidneys, Retention or Incontinence of Urine, Female Irregularities, Suppression, Leucorrhœa, or Whites, Prolapsus Uteri, or Falling of the Womb, Pain in the Head, Face, Teeth, Ears, Side, Back, Limbs, Joints, Nervousness, Sleeplessness, Melancholy, Hysterics, Female Weakness, Barrenness, Impotency, Involuntary Discharges, Pain in the Back, Dimness of Vision, Pimples on the Face, Blotches on the Skin, Disease of the Bladder, Kidneys, Stone in the Bladder, Gravel, Dropsy, Scrofula, Consumption, Bronchitis, Coughs, Colds, Asthma, Piles, Fistula, Fever and Ague, Fits, Epilepsy, Paralysis, St. Vitus' Dance, Rheumatism, Neuralgia, Diseases of the Blood, Liver, Stomach, Bowels, Kidneys, Bladder, Nervous System, Female Complaints, Loss of Memory, Universal Lassitude, Premature Decay, Wasting of the Energies of Life, Impotency, Nervousness, Debility, Low Spirits, Hypochondria, Blotches on the Face, Disease of the Bones, Ulcers, Mercurial Affections, Diseases arising from the Use of Mercury, Minerals, Poisons, or the Vices of Youth, Secret Habits, Nocturnal Emissions, Sexual Incapacity, Impediments to Marriage, Diseases of the Urinary Organs, whether existing in Male or Female, from whatever cause originating, and no matter of how long standing, are invited to call at the Office of the Proprietor, No. 2 Bond street, New York, and they may rest assured that a perfect cure will be effected in every case undertaken.

Dr. Raddin has been engaged in the treatment of Chronic Diseases for the last twenty years, and has had the assistance of the most eminent Physicians in Europe and America, during which time he has had the treatment of many thousand cases, and has never failed in effecting a cure in any case undertaken, when the directions for using his remedies were strictly complied with.

Dr. Raddin's Office is at No. 2 Bond street, New York, where he will be found at all times, except when absent on professional visits. Those who cannot call on the Doctor personally, can have their cases attended to by letter, by addressing Dr. RADDIN, No. 2 Bond street, New York.

Dr. Raddin's Catholigon is sold by Druggists generally throughout the United States, in cases of one dozen bottles, and by the single bottle.

Price $5 per bottle, or six bottles for $25.

Sold by CARTER & HOVEY, Druggists, Lowell, Mass., and by Druggists generally.

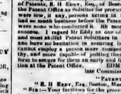
HERE IS YOUR REMEDY!



HOLLOWAY'S OINTMENT.

A MOST DELIGHTFUL CURE OF BAD LEGS AT THE SEVERE SUFFERING!

Extract of a Letter from Mr. Thomas Hall, Grocer, Bridge Street, Hopwood, near Rochdale.

To Professor Holloway.

SIR,—I have much pleasure in informing you that I have been severely afflicted with bad legs for upwards of thirty years, during which time I have had the advice of many medical men, and have tried almost every remedy recommended, but without any benefit. I was induced to purchase your Ointment and Pills, and after using them for a few weeks I found myself perfectly cured, and have not had the slightest return of the complaint since. I am now sixty-four years of age, and am thankful that I have lived to see such a wonderful remedy brought before the public.

(Signed) THOMAS HALL.

Extract of a Letter from Mr. Frederick Turner, of Bramhall Moor, near Stockport, dated November 19th, 1850.

To Professor Holloway.

SIR,—I have been severely afflicted with bad sores for more than six months, and during the whole period had the advice of two medical men, who attended me for the space of three months, but I received no benefit from them. I was induced to try your Ointment and Pills, and have much pleasure in informing you that I was perfectly cured by them, and that I have had no return of the complaint since. I am now sixty-four years of age, and am thankful that I have lived to see such a wonderful remedy brought before the public.

ELECTION.....MONDAY, NOV. 14.

The State Constitution—Its Contradictions and Absurdities.

Nowhere in the kingdom of the four arts, except such a piece of moonie handiwork as the new constitution of the Massachusetts abolitionists and their fellow-traitors, the abolitionconscripts; for need we wonder at the fetch when we consider whence it originated; with what low material it was constructed; who was its father, and who its mother,and in what sort of mom's nest the bantling was hatched.

What incoherency in its provisions! On what basis does the structure rest? Why does it announce with rhetorical ostentation, that "an impartial interpretation of the laws" is absolutely essential to the security of life, liberty, property and character; and yet leave it to justice to "administer the law" in criminal cases, thus rendering the entire fabric of the law unstable and transitionary? Why should the plurality rule obtain in county, district and Senatorial elections, and be utterly discarded in election for Governor, Lieutenant Governor, Representatives, municipal officers and the rest? Why should a man vote in one election without the prepayment of a tax, and be debarred from that privilege in another case? Why should the people be mocked with power to elect certain officers, and the Governor may have the right to remove those very officers at his own sweet pleasure? Why does it assert that representation should be based on the principles of equality, and at the same time give to one-fifth of the voting power of the whole State? Why does it announce in one,clear tone, that judges should be "as free, impartial and independent, as the lot of humanity will admit," and yet expose them at all the debasing influences of party coercion, individual favoritism and venality? Why must a city voter use a sealed envelope in his municipal ballot, while a town voter can use the open ballot-in his town election? We reiterate, why are these things so?

Let the followers of the captious instrument reply. Let them explain these subcrimes if they can. Let them escape from one horn of this dilemma without impaling themselves on the other. We want no such legislation, by machinery, but legislation by the sires of reason guided by the lessons of Patrick Henry, —the lamp of experience."

Mr Tower's Discourse. Our readers are already apprised that the tenth annual discourse before the general assurance of saints, at Worcester, was delivered on Sunday evening October 30th, by Rev. Joseph H. Towne of this city, in the Church in Main street. We have discourse was able in its conception and characteristically eloquent in style, diction and delivery. The following synoptical report, which we copy from the Worcester Tpaucript, will tell all who could not attend worship, habitually or occasionally, at the Highstreet Orthodox Congregational Church:

The preacher said he was here to plead for humility. His aim was to show the relation of religion to those agencies on which we most closely rely, under the *New Testament idea of the formation of an enlightened public sentiment.* As preliminary he took two points, he showed that the permanence of the free institutions of this country is connected with the diffusion of such a sentiment. After alluding in certain qualities or features of our institutions, peculiarly favorable to their perpetuity, he remarks on this point were unfavorably as follows:

But while there is as much in the *mechanism* of our institutions favorable to their perpetuity, the conviction cannot be too deeply engraved on our minds, that the life of the whole depends upon the character of the *public sentiment* that shall permeate the mass. Constitutions are ornaments are powers in themselves. They do not act; they cannot act. It is only as the principles are ingrained the men—fit are they for forms. But the Lord is a jealous God, and he is not a sham, a power as an agent. This is the point. The Bible is the only true principle which The Lord that statesman directs, controls,moulds it, is not in itself, but in society. If there be not public virtue enough in a community to make the machinery, it must run down. We do not see that every number of society must be a literary virtuous man. This may be very desirable—but be it as it may, there is an analogy between society in the aggregate, and a regenerated individual. There may be in this individual much ignorance and much depravity, yet if the controlling principle of piety is in him, and lives in him, he is safe, and God will not cast him away. There may be in the State much ignorance, much infidelity, much corruption, much vice, and yet if these be, underlying all this, an enlightened public sentiment, working like leaven through the corrupt mass, effectually, though it may be gradually above all interposed impurity, may hold together and we may hope that God will regard it favorably for the sake of that in it. But this salt there must be; this sentiment there must be; this principle there must be; we analyze it, an enlightened love of country, an enlightened attachment to the great principles of civil and religious liberty—an enlightened conviction of the sacredness of the law—and above all, a deep religious feeling, a reverence for the Christ of the Bible, as the great source of all political power, as the Ruler of nations, whose will is above all human enactments and the only supreme law. This must be the sentiment of our land, if we would perpetuate our liberties. It is something more than a sentiment, but differed from a flesh, every soul vitalized by the spirit of Christianity. A act of resolutions denouncing the sin of slavery would not save. Several gentlemen were called upon for speeched, but none were made, and the meeting adjourned *sine die.* The meeting was very fully attended.

From Fitchburgh we learn that the River has been rising since Saturday. It is now in excellent navigable order, immediately after a brief fast in the channel.

Baltimore advises state that the frosts on Monday at New Orleans have removed all fears of the continuance of the epidemic.

The same paper also says that the Cotton crop is effectually killed, except in a few favored localities.

The yellow fever had again appeared at Pensacola.

About 10,000 bbls of flour was sold here to-day, principally for export, at steady prices.—*Boston Traveller.*

Amongst a variety of changes ordered in the Marine Corps at Washington, are the following:

Major Dulany, from the command of the guard at the Navy Yard in the New York Navy Yard, to that of Boston.

Major English, from the command of the guard at Boston, to that of Philadelphia.

DAWN OF A NEW ERA. In allusion to Judge Edmonds' new Christianity, the New York Herald says:

We know not yet what it may be called.—Judge Edmonds calls it spiritualism. We call it a new Christianity. All other sects may look out. Their days are numbered. The new religion is the broad swallow up Methodism, Presbyterianism, Shakerism, Baptism, Congregationalism, Episcopalism, Millerism, and all other isms, and become embracing even Women's Rights. All will go, except the religion of Bishop Hughes, which is built upon rock, and therefore even the spirits, whether they are from above, white spirits, or spirits, or mediums, nothing Rev. Henry Ward Becher, and the Devil can cannot prevail against it.

This new "heroism," as Carlyle would call it, is the embodiment of "gumption." The world, however, is very stupid just now, and if the learned Judge can wake it up by talking it, he is much and clashing it, let us all bid him a God-speed.

☞ Among the awards of the Massachusetts Charitable Mechanic Association, in connection with the late exhibition, we notice the following:—

PORTRAIT OF A DEMAGOGUE. John Van Buren has recently delivered an elaborate and incoherent speech against Governor Seward. It is of course warmly praised by the Hunker and Soft Democrats in Rochester, N. Y.—The Democratic *organ* giving a synopsis of the speech, says:

"Mr Van Buren, as usual, exhibited flummery, with out of common ability, and in a manner that amuses just and a *careful* avoidance of the truth. In a strong sense, he possesses rare qualifications for a demagogue—a ready command of words, of subject, capacity in warping facts, and the ability to rouse his audience by appeals to party associations, and an apt presentation of party issues, and a dexterous manner over opponents. The speech was heard by a large assemblage of the Democracy of the city, which was composed of all sorts of people, of all political complexions. The Democracy had their share, and a common share. They appeared to Mr Seward to be a fair sample of the party at large; and, if so, the course, policy and last survey."

GENERAL SUMMARY.

FIRE AT BELLEVILLE MILLS. About 11 o'clock last night, one of the five-storied mills of Messrs. C. T. Trotter & Co., in Belleville Mills, was discovered to be on fire. The flames spread with such rapidity that the building and contents were entirely destroyed. It was a grinding mill, and contained a large quantity of ground dye-stuffs and drugs. Loss estimated at about 10,000. Insured at the Atlas, North Western, and Charlestown Mutual offices for about $7,000.

We are glad to be able to state that Messrs. Talbot have another grinding mill in operation, which will enable them to supply their orders without serious interruption. They will immediately rebuild a larger and better mill.

MORMONISM GETTING SENTIMENTAL. The Boston Journal states that in Kingston, N. H., Sunday afternoon, a man named Jonathan Tilbetta, a convert of Elder Charles C. Haswell of the gates of interjection, cruelly maltreated his wife and infant child. The woman escaped from the house if he did not desist from his outrages, whereupon he declared he would shoot her if she attempted to depart. Regardless of his threats, she started with her infant in her arms to quit the house. He immediately went up stairs, and seized a gun loaded heavily with shot, discharged it at her through the window. Fifteen of the shot took effect about the head and breast of the infant, but not the child. Their recovery is very doubtful. The wounded woman appreciated as the cruelty was enhanced and jeoped in jail.

MR HOAR IN WORCESTER. The *Worcester Transcript* says that Hon. Samuel Hoar will address the people of this city next evening this week, on the new Constitution.

☞ Hon. Reward Everett will address the citizens of New Bedford, at the City Hall, on Thursday evening next.

THE ASSISTANT TREASURER. The appointment by the President of Hon. Edward Kent, of Bangor, of Lowell, to the office of assistant treasurer in Boston, meets with general approval. Mr Kent is a man of great business talents and administration, and a gentleman of eminent abilities and moral worth. We understand he says the Post, that he will enter upon the duties of his office on or about the 1st of November.

PAINSVILLE RAILROAD ACCIDENT. The express train upon the Painsville River Railroad going west, was thrown off the track on Saturday evening, near Yonkers, owing to the displacement of a switch tender. The train consisted of thirteen passenger cars, one baggage car and two powerful locomotives. There were about 300 passengers. When the accident occurred the train was going at the rate of 35 or 40 miles an hour. The engineers discovered the obstruction with a short distance ahead, and immediately reversed their engines and leaped off, followed by the firemen.

The train was thrown off into the midst of a lot of freight cars standing on a side track, and the two locomotives and three passenger cars were smashed and the loss is estimated at about $50,000. Many of the passengers were severely or less bruised, but no lives were lost nor a bone broken. The switch tender has absconded.

☞ The Government at Washington has received no official information of the rejection of Perrott by Piedmont, but has reason to believe that he will be accredited. At any rate he will be U. S. Consul at Genoa, or there will be none.

U. S. TREASURY. The net amount of money at the Sub-Treasuries on the 1st inst. was twenty-six millions of dollars, of which nearly eight millions are in the Boston Sub-Treasury.

HARPER'S NEW MONTHLY MAGAZINE FOR NOVEMBER, has been received, and is for sale by James P. Walker's bookstore, 41 Merrimack street. It contains,—A visit to the land of the Mormons; Ward Hill, by T. Buchanan Read; the Sugar Region of Louisiana, by T. B. Thrope; His shooting in Louisiana; Napoleon Bonaparte, by John S. C. Abbott; with numerous other equally attractive communications, editorials, literary notices, etc. The literary matter is of the excellent order of the publication.

☞ The Practical Mechanics' Journal, for November—a valuable publication, published in New York, by Stringer & Townsend—has been received, and is for sale at the usual places.

☞ Harper's Magazine for November, can be found at the counter of Merrill & Straw. With this number closes the seventh volume of the work, and contains the usual interesting amount of matter.

☞ The Double Number of the *Industry of all Nations*, being Nos. 11 and 12, has been received, and is for sale at the usual places. Also, P. Putnam & Co., and is offered for sale at the bookstores.

CORNET CONCERT PIECES. Yesterday Abel Hood and Barney McSherry of Watertown, appellants, violation of liquor law, were found guilty. J. L. Mixer of Lowell for perjury, was tried, but before concluding, the government broke down and the jury were instructed to bring in a verdict for the defendant. C. McDonahue of Charlestown for assault on an officer while on duty, was found guilty—nine months in House of Correction.

Sentenced.—John Farrell of Charlestown, for attempt at arson, 18 months in State Prison. Patrick Kennedy of Lowell, Woodbury of Framingham, common seller of liquor, to pay a fine of $100 and cost, and in default 60 days in house of Correction.

This forenoon the court has been occupied with the trial of Abel Hunt and Barney McSherry, of Watertown, for violation of the liquor law, and convicted them on several indictments.

☞ By the subjoined notification from the Secretary of the Commonwealth, which appears in the Boston Courier, it will be seen that the late Convention, among their other innumerable blunders, neglected to provide the means of paying the mileage and per diem, and the proper documents for the business of voting on the new Constitution:—

TO THE CITY CLERKS.

To answer in part the numerous applies. tions which have recently come to this office, the undersigned takes this method to inform the Clerks of the several cities and towns, that there is no provision of law, or order of the Governor and Council by which a warrant can be furnished to the people of the State the new draft of a Constitution, or for the return of votes and town with blanks for return of votes on the same.

WHIG CAUCUS.

The Whigs of Ward Five are requested to meet at the Ward Room, corner of Merrimack and Bass streets, this (TUESDAY) evening, at 8 o'clock.

Nov. 1, 1853 Per order.

LOST. Lost, in this city, a small gold watch chain and cross. The finder will be rewarded by leaving the same at this office.

Young Men's Whig Club. The Whigs of Lowell will meet on Thursday evening next, in Jackson Hall, at half-past seven o'clock, for the purpose of organizing a Young Men's Whig Club. Let every Whig be on hand. All shoulders to the wheel!

☞ Dr. Boynton lectured again last evening to a large and attentive audience in Jackson Hall. He continues this evening. His lectures are very attractive.

THE FIRE last night was—no whir! The alarm was made by some rowdies on Merrimack street, for pure mischief.

TO CARPENTERS. The attention of carpenters and others, is invited to the advertisement of A. J. Fay & Co's Machines, in another column.

FOR WINTER. C. W. Hackett, 3 Wellington block is now opening a new stock of ladies' winter goods—rich in quality and elegant in style. See advertisement.

M. JULIEN'S CONCERT. See notice in another column of M. Julien's concert in Boston, on Saturday afternoon next. The arrangement is such as to accommodate neighboring cities, and an opportunity is here presented for our citizens to go and hear the famous Musard Hector and his orchestra, and return the same evening. No doubt many will improve the opportunity.

LIFE IN THE SICK ROOM: Essays, by the ZENANA; or, Six Years in India;—by Mrs Colin Mackenzie. Published by Redfield, New York, 1853.

The first work is being been a *desideratum* in the literary Market; a work embodying a complete, varied and graphic view of English and native life in India, and the various fields of labor which is excellent; the strix easy, natural and concise, and there is no little of that lazy, namby, pamby reading in the composition of the many other works of this character, that we unhesitatingly recommend the contents of this excellent volume to all who have a taste for information on the affairs of the hitherto unexplored Eastern world. We also recommend the contents of this excellent and much desired production, the reader will be enabled to form an intelligent and generally correct opinion on the customs, manners, habits, institutions, policy, education, and boundary, of the Anglo-Indian and Anglo-Hindoo population. Mrs Mackenzie deserves great credit for the elaborate researches she has made into Hindoo literature and traditional history. Her work will doubtless have an extensive and permanent sale. Watson & Sargeant, under the old City Hall, offer the work for sale.

LIGHT ON THE DARK RIVER; or, Memorials of Mrs Hurtenia L. Hamlin, missionary to Turkey; by Margaretta Woods Lawrence. Boston: Tickner, Reed & Fields. For sale by James P. Walker, 41 Merrimack street.

In this beautiful volume, we have a full but interesting history of the whole life of the distinguished missionary in Turkey, Mrs. Hamlin, from her birth among the Green Mountains of Vermont, to her death on the sea-girt island of Rhodes, within sight of the fair Lycian coast. The narrative is full of interest, especially in relating; indeed, we have seldom seen a portrait drawn with more native beauty, with more truth to life, than is presented in the pages of this volume, especially in warping facts, and the ability to rouse his audience by appeals to party associations, and an apt presentation of party issues, and a dexterous manner over opponents. The speech was heard by a large assemblage of the Democracy of the city, which was composed of all sorts of people, of all political complexions. The Democracy had their share, and a common share. They appeared to Mr Seward to be a fair sample of the party at large; and, if so, the course, policy and last survey."

ELECTION.....MONDAY, NOV. 14.

The Philosophies of Moral Reform—The Christian and the Infidel.

There are two schemes of moral reform; one operates by attacking institutions; the other, by the purification of the individual heart.—One recognizes man only in the aggregate; the other, only in the individuality. One is a species of individual philosophy, the other, a species of socialism. One is the philosophy of Jesus; the other, the philosophy of William Loyd Garrison, One is Christianity; the other, Abolitionism.

Let us consider the workings of these two schemes with reference to the institution of Slavery. How Abolitionism treats that institution is known full well. But let us see how Christ and his primitive disciples treated this institution; so that we may the more clearly remark the contrast between the Christian Philosophy of Reform and the Abolition Philosophy of Reform.

When Christ arose in Judea, all the world swarmed with institutions of the worst possible description. But neither Christ nor his apostles, so far as we learn, uttered a solitary syllable with *specific* reference to any of them. Polygamy, despotism and slavery, had an extensive prevalence in very many of the numerous provinces into which the Roman world was at that time divided; but not a word—no, not a word —could be found in reference to any of these evils, as detected among all the apostolic monuments that have come down to us. It is, doubtless, the case, that the Christianity was the aggregate, and the development of man individually, was destructive of that whole system of evil, and answers also for the other; and it is true, that Christianity has been, and was designed to be, by its component genius in its influences on the *institutions* of society than any kindred agency ever before seen; yet Christianity was altogether unadapted in the work of directly regenerating the external institutions of society and the political establishments thereof.—Ibid.

Christianity accomplished much; it was designed, it was adapted, to accomplish much.— But it was never designed, never adapted, to reform political institutions, or to create civil establishments. It was designed to effect the *inner* of society and the institutions of society through the heart; not the Abolitionism, to attack the external institutions, regardless of the influence on the individual conscience untouched. It initiated a powerful religious element into the spontaneous pursuits of the world; it imparted a moral elevation to the legislative spirit and tendencies of Rome; it liberalized and spiritualized the code of commercial and external morals of the Judean people; and in the place of that contracted philanthropy which had been solemnly mocked with the name of Patriotism, it substituted an enlarged spirit of universal love which, knowing no distinction of nations, or kindreds, or tongues, or conditions of latitude, or longitude, or caste, or color, knowing no North, no South, no East, no West, shielded all humanity in its all-ample embrace. It enlisted new light on the science of ethics; it radiated new light even on the speculations of philosophers; it furnished higher motives for action; it inspired a loftier enthusiasm; it developed new emotions, new affections, new passions, new problems for philosophy, new stories for poetry, new themes for rostrum, new fields for the whole area of logic, new substitutes for analysis, and nobler tissue for a more heavenly eloquence.

A Fool, a Chrysostom, a Jerome, an Origin, were raised up, the oracles of an eloquence whose notes had been silent for ages; and strains which had been unknown since the days of Demosthenes, resounded from the pulpit of Gregory. All this did Christianity. It breathed a new spirit within the old body of society; it kindled new fires on expired altars—from which burned by an holier flame than any that had ever illumined the diurnal horizon of the Pantheon, or ascended to Almighty God from his own sacred Temple on Mount Moriah in Jerusalem.

Further than this, the *direct* influences of Christianity were not. It never assailed institutions. The character of public men was spared. No cries of "Down with Despots," or other against a plurality of vices, no battle-words of "Death to slaveholders," were anywhere heard from the doctors of the Jordan or the shores of the Bay of Biscay. But reach the contrast between primitive Christianity and modern Garrisonianism. Further comment is irreverent. The contrast suggests its own moral.

FOREIGN INFLUENCE. Four hundred German voters of St. Louis, Mo., have signed a circular addressed to the candidates for Judges and declaring their opinions upon the following points:

1st. "The Institution of the Grand Jury in its present shape."

2d. "The constitutionality of the so-called Sunday Laws."

3d. "If you believe that those laws, (Sunday Laws,) are truly Republican, and in accordance with the liberty of the citizen?"

These questions are propounded in the candidates for Judges. What an illustration of the policy of foreign suffrage and of the action of Judges by the people. The New York Courier & Enquirer says:

"There are said to be several thousand Germans voters in St. Louis whose names will not have been signed to this circular; but who are not to be counted on to go counter to the determination in accordance with the views of Judge Lowe and the Sunday Laws. These Germans—who have unquestionably been in favor of this sort of action, expressed from their earliest arrival, and by every opportunity since—by their deeds, have proved as much as need be how far they are willing to go in order to put down the liberty of the citizen. The American, in fervent opposition to all other parties, the natural friend of liberty, as embodied in the constitutions of European Societies, is found in the 'natural liberty of American Republican life.'"

CITY MATTERS.

HON. ROBERT C. WINTHROP

JOSEPH WHITE, Esq.,

will address the citizens of Lowell and vicinity, THIS, (WEDNESDAY,) EVENING NOV. 2, at 7½ o'clock, in the Lecture Room of the

Mass. Mechanics' Association.

Men of all parties, be on hand, and hear an expression of the best political sentiments designed to be presented by the occasion of the new Constitution.

Renewed zeal in the privilege to vote.

Lost. Lost, in this city, a small gold neck chain and cross. The finder will be rewarded by leaving the same at this office.

WHIG RALLY TO-NIGHT. The announcement that Hon. Robert C. Winthrop will address the citizens of Lowell and vicinity, this evening, at Huntington Hall, cannot fail to elicit general attention, and to call out a numerous audience. Let every Whig be on hand. Let the Hall be as well crowded as on the night of Mr Everett's Lecture, when, it was said, 4,000 persons attended, and when some hundreds retired, being unable to procure seats. Mr Winthrop's stirring eloquence will not be lost on empty benches. All hands to Huntington Hall!

Joseph White, Esq., will also speak.

YOUNG MEN'S WARD CLUB. The Whigs of this ward will meet on Thursday evening next, in Jackson Hall, at half-past seven o'clock, for the purpose of organizing a Young Men's Whig Club, at every Whig be on hand. All shoulders to the wheel!

☞ The Whigs of Ward 5, hold a meeting this evening, Nov. 1, at their Ward Room, and chose J. Kendall, Chairman, and E. Bond, Secretary. Committee:—E. J. Sylvester, J. Kendall, Reuben Hutchinson, Jos! Spalding, A. B. Fox, and Daniel Barry, were chosen a Committee of Arrangements. Wm. A. Richardson, H. G. P Carlin and T. H. Sumner, Challenging Committee.

WARMEST DAYS. The new bank in this city went into operation yesterday and the first bills issued. They make a fine appearance.

MR HERSPITER'S CONCERT. We must again remind all lovers of music of the concert, or ballad entertainment, announced by Mr Dimpster, the accomplished and popular vocalist, to be given on Friday evening, in Mechanics' Hall. His programme is a capital one, and ought to draw, as it doubtless will, a full house. See an announcement in advertising column.

☞ In the Police Court, this forenoon, Patrick and Thomas Farrington recognized on each of Boston will be announced to the Grand Common Pleas, on charge of assault on Thos. Doyle and Wm. Jennings.

MARKET TABLE. The Annual Message of Art for November, containing a considerable quantity of matter on the Crystal Palace, and other Departments.

Commander Downing will be court martialed on his return to the United States, for aiding in the escape of Cazneau that steamer contrary to the wishes of the Argentine Republic.

Secretary Marcy, on behalf of the President, has written to Mr. Commander Ingraham, approving of his conduct in the Koszta affair.

Rumor says that Mr Mansfield will not be received by Secretary Marcy as Minister from Nicaragua.

Our Baltimore advices, to the 1st inst., are as follows:

The battle between the Vesuvian revolutionists and the Mexican troops continued eight days. The remnant of the revolutionists had fled to the mountains.

The Diario officially announces that money has been sent to London to meet the dividend under the Convention of 1850.

225 robbers, murderers, pickpockets, &c., were sent from Mexico to Vera Cruz under a strong guard.

The Spanish ambassador was still at Vera Cruz. The particulars of his difficulty with the Mexican government had not transpired.

Horrible accounts of the depredations of the Indians in the frontier States continued to reach the capital.

For the Journal and Courier.

The Hon. B. F. Hallett.

This gentleman has long been known as the "*Solitaire of Fortune*"—a name bestowed on him by the talented, and sometimes facetious editor of the Boston Post. The battles and services of the "soldier" have generally been illustrative of the character of a "Soldier of Fortune"—a name usually applied to such mercenary soldiers as make *fighting a trade*, and are ready to enlist in any cause that offers good pay and a reasonable chance of booty; sometimes fighting a little for love of the trade, and to keep from growing rusty. "Fine Soldier," for a few months past, has been in pretty full practice, and under a clever system of business.

At the general election a year ago, he took the field under the banner of Baltimore Plunderers Democracy—opposition to the Whiggery, but also in deadly hostility to all free soilism and conditionism. This campaign was conducted on the principles of the old Democracy. In March, at the election for members to the Convention, he took the field again, a small one, in Wilbraham, and no doubt was chosen by coalition voters, for he at once harnessed in with the coalition in the Convention; treating the true old democracy with utter contempt; battling with his usual zeal, with the free soil leaders, and with his usual indifference to the old-fashioned virtue of consistency.— Now the "soldier," whatever cause may be in hand, always lands off with any amount of professions of love to the people and equal rights, and would have every man get his equal share of political power, and if possible, a little more. So he was loud in the Convention for the equal rights of the people, and putting down all old rights; nothing was to stand a moment in proscriptive right—no tradition for him. The Senate district system was got through with great pomp—much stress laid on equal rights as the "soldier." Thus came up the House question, which was twisted and turned every way; but any way to defeat right. So there was no making anything right of it on the senatorial system, without a certainty of the prostration of the coalition, which could not abide the idea of a majority; so passed the thing they have sent on, also regardless of the *choice* of the people to rule. But how voted the "soldier" on the question? Why, to be sure, in favor of it! See his act, debates, page 657, yeas and nays. Not only so, the "soldier" is the first man to the field to justify it in the face and eyes of democracy, and equal rights, and it cut in spunkies in Faneuil Hall and Huntington Hall, he put down Brownell and he says high and low, it is all right and perfectly just—because it always was so for two hundred years, two-thirds of the time under royal rule. And this subserving and profiting by is paraded before the democracy of Lowell as a recommendation in favor of this sort of "equal and unequal proposition. A MEETER MAN.

☞ Judge Dunham, the defunct Collector of Customs, has replied to the letter of Jefferson Davis, calling upon him as a custodian free to publish the papers, to deny the imputation, and says that he has never had but one opinion upon the subject of dismissal.

Our Telegraphic News.

One New York skyline say that Mr. Benjamin has brought his client, Miss Sanchez, committed by Mr Secretary Guthrie, appear in the papers of yesterday morning.

The Municipal Democratic meeting took place at Metropolitan Hall on Monday evening. The room was densely crowded, and all the proceedings were marked by an uncommon degree of enthusiasm. The venerable Peter Cooper presided. All the municipal nominations were unanimously ratified, but the judiciary ticket, and no mention was withdrawn.

HEAVY BANK ROBBERY. The Bank of the State of New York was robbed on Monday of $27,000 in bills of its own issue. A reward of $5,000 is offered. Among the bills are seventeen of the denomination of $1000, and eight $500.

COAST SURVEY. The vessels of the surveying party under the command of Lieutenant C. W. Woodhull, consisting of the Madison, Gallatin, and Dobbin, have arrived here from the coast of Maine. This hydrographical party have just finished their work on the Eastern Coast, where they have been employed since March last.

The brig Amesbury arrived yesterday morning from Havana, bringing the officers and crew of the brig Crawford hence for Jacksonville, wrecked in the gale of the 20th.

From Albany we learn that the express train from New York on Monday evening, when near Tarrytown, was stopped by the breaking of one of the forward wheels of the locomotive, which threw the forward driving wheel off the track and bent the connecting rod like a hoop, and did considerable other damage. The train at the time was on a causeway crossing over one of the inlets of the river, and it was a miracle that the whole train was not thrown over the embankment, when a fearful loss of life would have ensued. As it was, no life was lost or bone broken.

Washington despatches inform us that on Monday morning, the Government received a voluminous despatch from Commodore Perry, giving a detailed account of his visit to Japan. The contents have not transpired.

Advices have also been received of the favorable reception of Messrs. Belmont and Dundas by the governments to which they were respectively accredited.

Commissioner Mooeypenny has returned to his post.

There are indications that a batch of removals at Boston will be announced in a few days, when but their names and other particulars of general interest and importance are refused to all papers but the Union.

The Star asserts positively that Jas. Gordon Bennett's application for the French mission is on file in the State Department.

Commander Downing will be court martialed on his return to the United States, for aiding in the escape of Cazneau that steamer contrary to the wishes of the Argentine Republic.

☞ The steam sailors of Taunton have struck for ten hour system.

☞ The Democracy people, says the New Bedford Mercury, complain that Henry Wilson, the great Democratic delegate and nominated candidate for Governor, has taken leave of his friends, and the talk in that quarter is of running a candidate upon their own private ticket. Charles Allen's paper, with the utmost spasms of indignation, when Col. Clifford declined to make a perfect Miscawber of himself, in the spindleage way. Nor have they been agitated at a similar silence preserved by Judge Washburn. But as the Free Soil maniac in the Brigadier can be trusted, it is presumed that what was desperately wicked in our candidate, becomes the sublimity of virtue in the military child of Nature and of Nadel.—So much for having fought, bled, and so forth, as a member!

"DOWN OR IT." The Boston Post has at last come out against the coalition. In an article of this date, on this subject, it says:

We regret to announce that a portion of the democrats and the free soilers of Middlesex county have formed an alliance—that those who have on their lips fidelity to the Baltimore platform have put in nomination candidates the most decided of free soilers. Democrats cannot stand on this ground. It is rank treachery to a fundamental principle of the democratic party; it is giving up the whole cause to free soilism.

We regard this as doing fatal injury to the democratic cause. We have constantly pointed out the danger of the course which has been pursued we have denounced them; and we shall continue to do so in the hope that it will not appear in time.

In taking this ground of opposition to free soilism we are glad to know that we express the views of the Democracy. The article of yesterday in the Union was copied with decided endorsement in the Washington Union; and the Democracy are now in open opposition to the coalition county nominations.

GENERAL SUMMARY.

COURT OF COMMON PLEAS. The court was engaged yesterday morning in the case of Stevens and Newton, for the violation of the liquor law, and convicted them in nearly every count. The appeal will be taken to the full court, and will go up to the Supreme Court, where a decision in one case will settle all.

FIRE AT LAWRENCE. A fire at Newcomb Mills Burst. Last night about 12 o'clock, while the hands employed in the mills were at supper, the extensive mills of Pike & Co., Norcross, were discovered to be on fire, and such was the progress of the flames, that the whole mills were burnt to the ground. The estimated loss of property amounts to almost $20,000, on which there was $15,000 insurance, $10,000 in the Manufacturers' Mutual, and $5,000 in the Northwestern Co., New York. The loss in stoppage of business to the firm, and to the hands employed, will be considerable. We are informed that they will immediately rebuild the mills. The origin of the fire is not known, but it is supposed to have taken from a lamp.

☞ In the report of Rev. Mr Towne's discourse at Worcester, there are several verbal errors which somewhat mar the sense. For "the enemies it stories about it," read "the enemies that circle around it." For "invigorate the landscape of a continent," read *irrigate*, etc.

☞ The masonry establishment of Lovell, Sloan & Co., in Woburn, was destroyed by fire yesterday morning.

☞ The National Democratic or Hunx Convention, in Concession at Hartford, yesterday, nominated Isaac Brown, of Lyon, Nathaniel Stevens, of Andover, Wm. Knight, of Marblehead, Abraham Bigelow, 3. Jonas of Cambridge, and Elbridge Sutton, of Danvers, as candidates for Senators.

☞ Hon. Henry Wilson is out in a letter in favor of the call for a State Convention to amend the constitution. He says that he is *"convinced that the people should adopt the proposed Constitution and amendments."* His letter purports to be a history of the doings of the Whig Convention was gotten up. Why, asks the Atlas, does he not hasten to the Democratic Convention and denounce Free Soilers to get elected from towns where they were non-residents?—Why does he not denounce the Democratic Convention for adopting the coalition ticket?

☞ A bag named Adelle Butler, has been detected in New York in tumbling young girls to steal and then appropriating most of their booty to her own use, giving them a trifling share as a reward. She first trained her own daughter and subsequently employed other children for pickpockets. The mother and daughter are under arrest.

Democratic Nominations.

The Democratic Convention at Worcester, on Monday, NOV. 11, 1853,

Attorney General Cushing's letter to Mr Pierce has been duly submitted to the President and Cabinet, and unanimously approved. The decidedly Abolition views here set forth in Rock or New Hampshire Granite.—Ibid.

WASHINGTON, Saturday, Oct. 26, '53.

DEAR SIR:—I preserve but in several Congresses in Massachusetts Coalition Senatorial tickets, and in all cases of nominated Democratic and Free Soilers. My judgment is that the Democrats who have participated in this, have done worse than to commit a fatal error. They have abandoned a principle which is fundamental. To support or vote for the Free Soilers in Massachusetts, is to give countenance and power to persons engaged avowedly in the systematic agitation of the Slavery question, and therefore hostile in the highest degree to the administrative policy of the Administration. The President entertains immovable convictions on this subject as I have had occasion to express to you heretofore, and all of us whom he has called to his political councils, have the same sentiments. I shall sustain his views on the subject as being the only ones consistent with the principles of the Democratic party, the general Welfare of the Country, the peace and harmony of the States, and the purity of this Union. If there be any parties here found then another in the mind of the President and those with whom he is associated, that party is the dangerous element of Abolitionism, under whatever guise or form it may present itself, and it is crushed, so far as its administration is concerned. This the President has declared over since he has been in office. He has declared over since, at all times, and in all places, and he will continue to speak on his subject.

While he does not assume to judge of the hearts of men who publicly avow sound principles, he only avails over unto to show what they are, in order that his settled policy in the administration of the Government should be unequivocally manifest. Those who have the electoral ballot or battalion on the part of the President, in treating any path which he has declared against, must be held to have themselves greatly mistaken. He is up to this time, in his policy was not hastily matured. While he occupies his present position it will be from the same motive. The Constitutional rights of all the States of the Union are as dear to me as the integrity of my own country.

I have perceived from the notice that this great principle of the Democratic party is the one which is fastened in his thoughts to the master stone of this Union. Depend upon it, my dear Sir, that whatever may be the views of him, he will never allow it to be lost sight of. I have also found in your letter a desire to know like final to well against those Democrats who have allied themselves with Free Soilers to get elected from towns where they were non-residents?—Why does he not denounce the Democratic Convention for adopting the coalition ticket?

☞ I remain very truly yours,

C. CUSHING.

PRINTING TELEGRAPH.

NEWTWORTH'S BLOCK, 103 MERRIMACK ST.

For the Journal and Courier.

New York, Nov. 1st, 1853.

Nothing of importance has occurred in this city since my last. It was occupied by Wm. Wilson, book-binder, Joseph Hague, importer of cutlery, and Jewellcast Schwartz, importers of lithographic stones. Loss, twenty thousand dollars. The adjoining store, occupied by Hazlett and Hall, dealers in shoes, was damaged to the amount of ten thousand dollars, and the one opposite, occupied by Charles Mc——the Brigadier can be trusted to him to the extent of eight thousand dollars.

The divisional review of the N. Y. troops takes place to-day; nearly 7,000 men will be under arms. Among the distinguished gentlemen who will be present are Gov. Seymour of Connecticut, Gov. Clifford of Massachusetts, and Maj. Gen. Edmonds of Boston.

The steamer Asia, due at Liverpool, left a 9 o'clock this morning. She has about eighty passengers and between eight and nine hundred thousand dollars in specie.

CLEVELAND, Nov. 2. A fire at Akron, last night, consumed the Etna flouring mills of Messrs. Tibbals & Co., the planing mill of J. H. Dix & Co., the drug store of J. R. Ford, and several other buildings. Loss heavy. The Etna mills were insured for $10,000; the planing mill partially.

NEW ORLEANS, Oct. 29th. The steamer Falcon arrived here yesterday from Aspinwall, with California dates to the 21st inst., which, however, have been dobilitated.

☞ Charles Dickens is to spend his Christmas in Italy. "The Carol and the "Cricket on the Hearth," for the benefit of the Birmingham Literary Institute. It is supposed that the profits will not altogether such, to bear the recital of stories before professedly literary assemblies; but the custom is a very creditable one indeed, it recalls the days when the Greek poets and historians recited their pieces before the assembled thousands of their countrymen.

EXPLANATORY! In our commendatory notices of the great Dry Goods House of Messrs. Ayer, Boott & Co., in the opening mill of Fox, Boston, we but echo the sentiments of the Boston papers and the Boston public on the subject. Indeed, it is impossible to do justice to any house in such a line of business, without a full knowledge of the whole extent of its operations. Such knowledge we have, and we know that the house of Ayer, Boott & Co. is one of the most liberal, enterprising and honorable in the country.

☞ Mr Packard has opened at 103 Merrimack, on the 1st floor, a splendid assortment of Furs, which he offers at very low prices. Call and see them. Mr Packard is well known to the Lowell public, and his reputation for fair dealing is a sufficient guarantee to the public, all people who want furs.

GLENN'S

True Verbena Water.

THIS delightful perfume, prepared by a manufacturing chemist, is highly recommended to the ladies in particular, as superior to all others for the handkerchief. It retains all the fragrance of the plant both in a preparation for the handkerchief and for the toilet, and is entirely free from that disagreeable odor which is produced by alcoholic liquors. As a wash for the face it is unequalled, and will be found cheaper for the fine de Cologne.

For sale by the manufacturer, No. 2 Tremont Row, Boston, and by Druggists and Perfumers generally.

DR. HERRICK'S

UTERINE CATHOLICON.

THE CELEBRATED UTERINE CATHOLICON, prepared by DR. HERRICK, 179 Washington street, Boston, is the most valuable remedy ever discovered for the cure of all diseases of the Uterus or Womb. Those who have used it will recommend it to their friends. Those who have not, should do so immediately, and be cured of their sufferings. Ladies who are troubled with Female Complaints, and which have heretofore resisted the skill and experience of the most eminent physicians, will find this Catholicon a never failing remedy. Ladies who have suffered for years from Female Weakness, Irregularity, Whites, pain in the loins or the Womb, Prolapsus Uteri, or falling of the Womb, Ulceration of the Womb, Inflammation of the Womb, Pain in the Back, Hysterics, Nervousness, Sleeplessness, Depression of Spirits, Universal Debility, Pain in the Head, Dizziness, Loss of Memory, Blotches on the Face, Disagreeable Breath, Indigestion, Want of Appetite, Bowels costive, Cold Feet, Palpitation of the Heart, Shortness of Breath, Hysterical Affections, Spasms, Sick Headache, Pain in the Side, Dragging Down Sensations, Pain in the Small of the Back, Universal Lassitude of the System, Female Irregularities of all kinds, Incipient Consumption, Chronic Inflammation of the Womb, Scirrhous Affections of the Womb, Ulceration of the Womb, Cancer of the Womb, Inflammation of the Bowels, Piles, Fistula, Stone and Gravel, Pain in the Region of the Kidneys, and all diseases arising from a disordered state of the Stomach, Liver, Bowels, Kidneys or Urinary Organs, are requested to call on DR. HERRICK, and procure a bottle of the CATHOLICON, and use it according to the directions, and a perfect cure will be the result.

CONSTITUTIONAL DEBILITY.

Those who have injured themselves by private indulgence or improper exposure, will find in the Catholicon a sure relief.

Those who have been reduced to a state of nervous debility by the use of Mercury, will find the Catholicon a safe and certain remedy.

PERSONS about to marry, or those who have reason to suspect they are afflicted with any disease of a private nature, should not delay one moment, but apply immediately to DR. HERRICK, and be cured before it is too late.

A PECULIARITY THAT ESTABLISHES NO BE-ACTION.

Those who have been salivated by Mercury, or have had Rheumatism, Scrofula, Erysipelas, Ulcers, Eruptions, Pimples on the face, Blotches, Boils, Tetter, Salt Rheum, Scald Head, Sore Eyes, Sore Throat, Ulcerated Throat, Mercurial Rheumatism, Old Sores, Ulcers, Fever Sores, Scurvy, Syphilis, or any impurity of the blood, should not fail to use the Catholicon, as it is a certain remedy for all the above diseases.

PERSONS DESIRING

to be treated by letter, will please state their case fully, and enclose $5 for a month's treatment, and $10 for three months' treatment, and address DR. HERRICK, 179 Washington street, Boston.

Boston, Aug. 21, 1858. 3m

FEMALES.

"Our declaration is based on the fact that we will cure, in three months, any female complaint, and which may heretofore resisted the skill and experience of the most eminent physicians, and will forfeit a thousand dollars for any case we undertake and fail to cure, or any case that we pronounce incurable, and which, after a fair trial, does not prove so."

PATENTS.

UNITED STATES AND FOREIGN AGENCY

FOR THE TRANSACTION OF PATENT BUSINESS.

OFFICE, MIDDLE ST., NEAR THE POST OFFICE, GEORGETOWN, D. C.

THE subscriber, late Principal Examiner in the Patent Office, and for seven years Acting Commissioner of Patents, continues to attend to the business of procuring Patents in the United States and in foreign countries, and to the management of interference cases, and cases involving questions of novelty, utility, priority, &c., before the Patent Office and the Courts.

Having been connected with the Patent Office for the last fifteen years, and for the last seven years in the highest branch of the Examining Bureau, he has had the best opportunities for becoming acquainted with the principles and practice of the Office, and with the state of the arts in which inventions are made.

Models of inventions forwarded by express or otherwise, should be marked with the name of the sender, and addressed to the subscriber at Georgetown, D. C.

Drawings for the Patent Office should be neatly executed in India ink upon tracing linen, and should be as small as will clearly show the invention. The fee for making the drawings, when they are made by the subscriber, is $10.

Specifications and other papers should be fairly written, and the model or drawing should be first completed before the papers are prepared.

Inventors who have made sketches of their inventions, and have constructed models, can generally ascertain, by a personal interview with the subscriber, or by letter, whether they are probably entitled to patents

"But you must take it," urged Zeke, growing earnest; "an even it is you and you shall take it. We've done you a great wrong—we've cheated you out of your one other way of making amends." Besides, if you don't take it, it will be given to Deacon Moseley morning. And I know that for my part I will be much obliged to commence the week with the disinterestedness of removing my money in a sensible way, than with the foggy feeling, sodden heads and empty pockets that always follow a free and easy.

"Hi! the stranger hesitated. 'Take it, take it, for poor sister's sake, said two or three voices.

"I accept it, gentlemen,' said the Quaker, 'as you say, for my mother's sake, and I hope to be able some day to return principal and interest.

The Quaker left for Paris shortly after; and it is a few months we had the satisfaction of hearing that his sister was completely restored to sight, and that they were on their way home.

I have heard from him several times since. His visage has been cast in a pleasant mould, and he is now a judicial functionary in a neighboring State.—[Kentucky.]

ELECTION.....TUESDAY, NOV. 14.

THE REPRESENTATIVE BASIS. We invite the attention of our readers to the following extract from Mr. Webster's pamphlet, lately published, entitled "Remarks on the Proposed State Constitution, by a Free Soiler from the State."

In the first place, the facts and figures here given, plainly exhibit the inequality and injustice of the basis of representation, which it is proposed to incorporate into the new Constitution :

"The strict republican principle is, that all persons shall have equal political power in other words, that they shall have a share of representation in the public councils in proportion to their numbers. The proposed Constitution violates this principle also, and violates it much more seriously than that which it is intended to supersede. The town of Westport, by the last census, has 1003 inhabitants, and in point of numbers is the equal of the town of Dover, at Court. Boston has 136,786 inhabitants, and of course is entitled to ten times as much power, in her representative power, by the existing Constitution, as the town of Westport with its 93 ; while her population is as 136 to 1 ; ten men in Westport having more power than a hundred Boston. This is a great inequality ; and, on the basis of representation established by the amended Constitution, it is proposed to be largely increased. By that plan, Westport will have one representative, and Boston thirty-five, every year ; each Boston man having a power of four times as much political power as a citizen of Boston.

"New Ashford, in Berkshire, has 719 inhabitants, and sends two representatives in ten years. Boston, in the same county, has 6000 inhabitants, and sends twenty representatives in the same time. That is, the political power of a voter in New Ashford is more than three hundred times greater than that of a voter at present. According to the tables in the Secretary's Report of February (Senate, No. 183) December of 1852, No. 18), New Ashford, with a population of 719 and 207 legal voters, will contain but 109 inhabitants (or less) to each voter, and to each of the 20 votes proposed Constitution, send six representatives in the proposed Constitution, while Boston, with 136,786 inhabitants and 30,000 voters, will have but twenty representatives. Thus, while Boston will have nearly fourteen thousand inhabitants to each of her representatives, a voter in Pittsfield, His present influence will be more than three hundred.

"It is difficult to say in what way this inequality is to be remedied, to what this may grow. It looks like a rapid advance towards the rotten borough system. When thirty or forty years from now Ashford can send a representative to the General Court six years out of ten, a majority of the people have a right to a money ration. In last valuation was $99,900 ; that of Ashford was $94,400 ; Charlemont, $94,453 ; of Monroe, $90,588. Three towns in Berkshire, each of which could each by the property of ten such towns, and if they had the requisite number in the Legislature by these boundaries, they would have a motive to do so. Then there is the aggregate property of the valuation of 1849 in the year 1950, will by the proposed arrangement be used to send twenty more representatives to the General Court, which will be a majority of the eight that they now send. The population of all of them had doubled and is decreasing from one county to another ; but the prodigious and increased power which is given to them by the proposed Constitution is to be considered, in by the towns Constitution as forever to be thus ; while that of all towns entitled to send one or more representatives every year by the same Constitution, to be abridged at every new census. How does the case of such small corporations as have been mentioned differ from that of Boston and Lowell ? Surely Ashford has only one-tenth of the number of inhabitants that Boston has the rule by which the English Reform Bill of 1831 disfranchised sixty boroughs at a blow. In 1845, the state of things was such, according to one of the ablest orators in the Convention, Mr Richard H. Dana, Jr., the number voting for Governor was about twenty-six thousand, and the number of legal voters was about forty-six thousand. Of these, the number voting was about one-half. Of the remainder, a considerable portion were minors, aliens, paupers, &c. Now, if the number voting was one-half, and the number of legal voters was forty-six thousand, then twenty-three thousand would be a majority of the whole number of legal voters. Now, twenty-three thousand voters, in the towns which have but 109 inhabitants to each voter, would be 2,507,000 inhabitants. Add to this the number of inhabitants of Boston, Lowell, Lawrence, Worcester, Cambridge, Salem, Lynn, Chelsea, Roxbury, Dorchester, Charlestown, Newburyport, Taunton, Fall River, New Bedford, Nantucket, Gloucester

peared, it did not seem to have [illegible] concealed by the light fleecy clouds in the [illegible] ground, but gradually dwindled to a speck so small that it could no longer be discovered.

At first, the spectators seemed to have been insensible of the danger attendant upon the voyage. They regarded it merely as a good joke, and a pretty spectacle—so beautifully did the balloon rise, and so gracefully did it float along, high above the tops of the mountains. It was only when it became scarcely perceptible, rising higher and higher above successive belts of clouds, that they began to inquire into the circumstances of the ascent, and the name of the daring boy, as well as to who might be to blame for permitting or countenancing the rash act. Much anxiety was entertained, to know whether he had fallen from the board. A glass was obtained and it was ascertained that a heavy substance was still attached to the balloon. This must either have been the boy or the board—scarcely the latter. Kelly started on horseback in the direction the balloon had taken, but there is no probability he could have kept in sight, for when last seen it must have been beyond the mountain, and this was but a short time before sundown.

When the balloon first attained a position above the line of the mountain, it seemed to be about five times the height of the mountain—when last seen, about eight times. It then appeared to be at an angle of about eighteen degrees with the base line of the earth. The distance from the place of departure, and the height above the earth, must of course remain a subject conjecture. The direction in which the balloon was going, when last seen, was that of Sacramento. The balloon was distinctly seen throughout its progress, by the citizens of San Francisco, and the additional distance added by the bay appears to have varied the appearance of the object but slightly.—[San Francisco paper, Aug. 29th.

Safe Return of the Boy Aeronaut.—Joseph Gates, the boy who made an excursion in a balloon from Oakland, on Sunday afternoon, and for whose safe return there appeared little ground to hope, arrived last evening in the Sacramento boat, safe except a sprain in his ankle. He landed in Suisun Valley, fifteen miles from Benicia, and five miles from any house. He retained his presence of mind throughout, during the hour and a half that he was in the air, in which time he travelled about fifty miles.

He was excited when he started, but when he had risen a slight distance, he became perfectly collected, and leaned back in an easy position against the cords. Here he sat, and for a long time heard the cries of the crowd below, and saw the whole Bay, and the country from San Francisco to Sacramento.

The only unpleasant sensation he felt, was cold in his feet. He took off one shoe, and tied a handkerchief about his foot, and then took off the other shoe, but dropped his handkerchief, and had to put on that shoe as it was before.

He wanted to come down soon after the balloon started, but the rope broke; but he was not disconcerted nor frightened. He knew very well whither the balloon was going, and wanted to land near Benicia, but could not climb the ropes to cut the balloon as he wished. This he knew was his only hope, and he persevered until he succeeded in getting up to the body of the balloon and cutting a hole with a penknife. He was careful not to make the hole too large, and when he was satisfied that it was of the right size, he slipped down to the hoop. The balloon descended very gradually, and as it reached the ground in the open plain, he sprang off. The balloon, light ened of his weight, rose again rapidly.

He then walked five miles before he reached a house, and the next day he walked to Benicia. This aeronautic tour is undoubtedly one of the most remarkable on record. When we consider the youth and inexperience of the navigator, the unexpectedness of the trip, the scanty accommodations, his success in climbing up the cords and cutting the balloon in a perfectly successful manner, and his fortunate escape from the many dangers, the voyage has scarcely an equal for romantic interest from the time of Mongolfier to the present day. To climb the cords was a labor of extreme difficulty, for they were only about a quarter of an inch in thickness, and the distance from the hoop to a point practicable for cutting was about twelve feet. But few persons could perform the feat of climbing such cords near the earth, and much less three miles above, for that was about the height to which he ascended. He saw not a little danger, but his voyage will become famous, and his name will be spoken from Europe to Australia. He can sell oranges and peanuts with a perfect rush for a few days. One of the first questions after his arrival here, was what his partner had done with the money for the oranges and peanuts in the basket he left behind. He was not entirely absorbed by the romance of his voyage, nor made forgetful by the fright.—[Alta California, Aug. 30th.

The New Constitution.—No. 6.

Proposition No. 1.

The practical application of the amendments proposed in Proposition No. 1, under the present census, will create a House of Representatives of 405 members; 224 of the smaller towns, with a population of 323,000, will be entitled to elect 208 members—the remaining 97 towns and cities, containing 650,000 inhabitants, will be able to elect only 197 members. Nor is this all! In every future Convention for the amendment of the Constitution, these 224 towns will be entitled to choose 224 members, and the 97 towns and cities only 197 members of the Convention! When are we likely to procure relief from another Convention that will remedy these intolerable evils, if we accept this Proposition No. 1, and thus subject ourselves to the mercy of such a power? But this is not all—what proportion of a State tax of $300,000 will be paid by the 224 towns? The answer is $72,434—less than one quarter of it! and the 97 towns and cities will pay the balance of $227,566! and be allowed *eleven* less votes in the House of Representatives, and *thirty-seven* less votes in any future Convention of the people to amend their Constitution!

Is it true, indeed, in the middle of the nineteenth century—an age pre-eminently, of *progress* in the principles of *civil freedom* and *equal rights*—that a body of delegates, chosen by the citizens of our old Massachusetts—in this birthplace of civil liberty and religious freedom—have *dared* to propose to their fellow-citizens, a system of such abominable injustice and inequality, so anti-republican, so wickedly and corruptly dishonest, so grossly abused, as the scheme presented in Proposition No. 1?—deliberately consigning two-thirds of the people, who pay more than three-fourths of the expense of supporting the Government, to the domination and rule of less than one-third of the people who pay less than one-fourth of the expenses for the support of that government which they are to administer; at the same time leaving the two-thirds so manacled by the provision as to future amendments, that it will be impossible ever to obtain relief.

Citizens of Massachusetts! descendants of the Pilgrims! sons of Liberty! lovers of Liberty and *equal rights!* will you tamely submit to this injustice, this galling tyranny, at the hands of a wicked and corrupt coalition of political demagogues and intriguing conspirators, and tamely and meekly bow your heads and *say aye?*—or will you answer in tones of indignant thunder, No, No! MERRIMACK.

☞ Even General Wilson, we have authority for asserting, regards his election as not better than *four chances in ten!* He and his supporters know very well that the friends of the "new Constitution" as it is boastingly called, are lessening every day.—[Bee.

ELECTION .... MONDAY, NOV. 14.

Address of the Free Democratic State Committee—A Gross Falsehood Nailed.

From the airy address of the Abolition State Committee we quote as follows:

"When the Convention closed its labors, there were general indications that the people were satisfied, and that there would be no serious opposition to the adoption of the proposed amendments. The country Whig press was generally silent, or spoke favorably of the new Constitution, as compared with the old one.—Under such circumstances, no party under ordinary counsels would have dared to make a party opposition to a Constitution so clearly embodying the will of the people. But the Boston cabal determined to once more brave the people's indignation, and make one more struggle to retain its power, and defeat the reforms which the people demand. It therefore called a council of the Whig party leaders, and forced the Whig party, contrary to the judgment of its shrewdest men, into a party opposition to the new Constitution."

We think it would be difficult to discover a writer—ancient or modern—whose *lying* ability was extensive enough to enable him to crowd so many utter falsehoods into so few lines as the above quoted paragraph. The author of this address has attained a pre-eminence in the talent of falsefying that may well excite the emulation of all who seek distinction as members of the *corps* of editors of the abolition party. Not one statement herein is true; not one contains the shadow of truth. The facts were as follows:

At the time of the adjournment of the Constitutional Convention, little interest was manifested by any party in the result of its ninety days' labor. The whig press generally denounced it; the coalition press generally admired it; but neither the denunciation of the former, nor the admiration of the latter, was very warm or at all remarkable. It was quite natural, under the circumstances, that a Convention of Whig editors and others should be convened; it was natural that they should convene in Boston. But when Bird and his junto talk about the pressure of "the Boston cabal" on the whig editors outside Boston, he knows that he is traducing men far more independent than himself. He *knows* that he is a *calumniator and a falsifier!* When he asserts that the whig party was "forced" by "the Boston cabal" into a "party opposition to the new Constitution" against "the judgment of its shrewdest men," he knows that he asserts what is grossly and willfully *false*. We challenge him to the proof of his slander. We were present at that Convention; we claim to know as much about its doings as Bird of the coalition committee, who was not present, unless he smuggled himself in as a whig—a thing which he probably would not scruple to do,—and we defy him to verify his contemptible slander. "Bring on the documents," Mr Bird; you *know* that no Boston *pressure* was necessary to rally the whole whig party against the odious new Constitution. You *know* this.

Duplicity in our Opponents. George S. Boutwell, according to the New Bedford Mercury, said at Worcester, that there were a great many things in the "proposed amendments" which he did not like, yet the same Mr Boutwell—the same, physically speaking, though not morally—is now sustaining them, all over the State, in language the most thoroughly eulogistic. He is going out of his way, and out of the way of truth and decency, to bolster up a basis of representation which the most ardent coalitionist has never dared honestly to defend. He is going out of his way, to create factious feeling, to inflame the prejudices of place against place, to promote sectional selfishness, and to promote local legislation. Charles Sumner passes everywhere for a sort of purged and sifted Simon Pure, and one would think, to listen to him, that in his mouth political butter, so to speak, would freeze to adamant. Chas. Sumner said in the Convention that the District System was the only fair and honest one, and yet he is now busily engaged in the attempt to make the worse appear the better reason, by supporting a document, which, we tell the people plainly, will utterly destroy all hope of the District System for a quarter of a century. Richard H. Dana, jr., passes for a young man of superfine sentiments—a perfect moral milliner. Mr Dana has spoken against the amendments proposed—he does not like the contemplated overthrow of our judicial system—he does not like the emasculation of the bench—he does not like the conferring of judicial authority upon a squad of irresponsible and, it may be, ignorant jurors—he does not think the manner in which the alterations are submitted to the people is at all an equitable one. For all that, Mr Dana can make his best speech in Faneuil Hall in favor of the object of his abhorrence, without a single apparent rebuke of conscience. There must be something dreadfully demoralizing in the party influences which surround him, when they can drive such a man as Mr Dana into such crooked and miry paths.

"Colloquy of the Gods." The Butler-Hildreth clique were in secret conclave during the whole of yesterday. Butler labored to bring the clique to support the coalition, in spite of the Cushing letter; his eye being on the Attorney-Generalship. Hildreth, however, succeeded in bringing the clique up to the Cushing letter, in getting them to abandon the further open advocacy of the coalition; his eye being on his new office as Postmaster—an office which he knows he cannot retain, unless he repudiates, at least openly, the hybrid union with the free soilers. Despair lest they should be unable to carry the new Constitution and elect Wilson, was the cause of the acquiescence of the clique in the scheme of Hildreth. All faces are still *pale*.

The Unkindest Cut of All. Fisher Hildreth, the free soil coalition wire-puller, after having snatched the Lowell post office, with its large income, from J. G. Peabody, to the disappointment and dissatisfaction of the whole party in Lowell, and after having helped Peabody to the nomination as a coalition candidate for Senator of Middlesex, to pacify him, with not now put at the head of his newspaper, the Advertiser, Peabody's nomination, *lest it should endanger his own confirmation as postmaster*. Somebody may well say "save me from such friends."

East Cambridge, Nov. 4, 1853.

Supreme Judicial Court—Cambridge.—Jacob M. Phillips vs. the Merrimack Mutual Fire Insurance Company.

This case has been on trial since Monday morning last, and went to the Jury Thursday at noon. The action was brought in January, 1850, against the defendant Company, whose business is at Andover, in the County of Essex. The action was originally commenced in the Court of Common Pleas, and at the September Term (1850) of that Court a trial was had, and a verdict was rendered against the Plaintiff.—Exceptions were taken to the ruling of the Court (Judge Mellen). The case was argued on the exceptions before the full bench of the Supreme Court, the exceptions were sustained, and a new trial ordered at the bar of that Court. This cause has excited a good deal of interest in the community in the neighborhood of the defendant Company, and the town of Reading, where the property was situated. The action was brought to recover the sum of $625 on a policy of insurance made by the defendants to the plaintiff on his dwelling house in North Reading, which was burned in Nov. 1849.—The defendants resisted the payment in the policy on these grounds:

1st. That the plaintiff having only an equitable interest in the property insured, he having a bond for a deed from one Daniel Flint, who owned the farm. The policy of insurance was issued to Flint, and by him assigned to the plaintiff, Phillips, which assignment was assented to by the defendant Company; and the Company allege that this assent to the assignment was obtained of them by fraudulent representation of Phillips.

2d. That the plaintiff, Phillips, at the time of effecting the insurance made fraudulent representations as to the value of the property insured.

3d. That the plaintiff set fire to his own house in order to get the amount of insurance of the defendants.

These three points were attempted to be sustained by the defence by a great number of witnesses called by the defence from Andover and Reading, including the President and Secretary of the Company. Yet, notwithstanding all this vigilance on the part of the Company, defended, also, by able counsel, they most signally failed of establishing either of these points.

The Jury retired at 3 o'clock P. M., and were out until 5 o'clock P. M., when they returned into Court with their verdict for the plaintiff—assigning damages at $816.06.

The cause was very ably and ingeniously argued on each side and the other, and they made a long harangue. And it appears to us, that in the result the defendants have been taught a lesson of wisdom.

J. G. Abbott and H. G. Nesmith, for plaintiff—Geo. F. Farley and —— Perry, for deft.

Our Telegraphic News.

Our New York advices are to the 4th inst., as follows: Yankee Sullivan was brought before Judge Edmonds to-day on a writ of habeas corpus, he having been arrested yesterday for the purpose of being surrendered to the authorities of Massachusetts. The court adjourned the case until to-morrow, in order to allow the district attorney time to consider the objections brought by Sullivan's counsel to his surrender. Sullivan remains in custody of the sheriff.

The stockholders of the New York and Pacific Railroad chose to-day Francis Damon, of Rhode Island, for Vice President; Wm. W. Leland, of New York, secretary; no choice yet for Treasurer. A warm contest is going on between the friends of David Leavitt and Comptroller Azariah Flagg.

Baltimore advices state that the Maine Law assemblymen in that county are certainly elected as also the Sheriff. The Legislature is whig; the State officers, democrats. The contest in the 5th district for Congress is doubtful.

We have Washington despatches to the 4th inst., to the following effect: We understand that Messrs Spence, minister to Turkey, Mason minister to France, and McLane, commissioner to China, are expected to receive their instructions to-morrow; the former is to sail with his family in the U. S. steamer Saranac, direct for Constantinople, on Monday or Tuesday next.—The two latter will sail on the 19th inst. Gov. Seymour, of Connecticut, is expected here in a few days to receive his instructions for St. Petersburg.

Mr Palfrey's Pamphlet. This pamphlet is unquestionably a most able production, and was so pronounced by Hon. Edward Everett in his recent address in this city. He, in a very able and elaborate review, passes upon the objects of a Constitution with reference to the Senate and House of Representatives, the Judiciary, the Executive, and many minor points, and says in concluding:—

"In the foregoing pages, I have set down some of the reasons which compel me to vote NO on the first of the questions presented to the people by the recent Convention,—the question relating to that part of the revised Constitution, which embraces the Frame of Government for the Commonwealth. In my view, some of the innovations which is proposed—and among them, some of the most important—are entirely unsustained by good reasons, and can only be fruitful of evil, while, of all the really beneficial changes which it offers, there is not one which cannot be obtained, or which would not probably be obtained, with a very little delay, through simple Legislative action, or through the method of amendment provided by the existing Constitution. Under these circumstances, I cannot think I should be acting the part of a man of common sense, to make any considerable sacrifice of other just Constitutional principles and provisions for their attainment—certainly not to buy them at the cost of such mischievous provisions as those of the new Constitution relating to the Judiciary and the basis of representation."

"The provisions of the existing Constitution, in respect to the House of Representatives are far from good; but that is no reason why we should supersede them by others more subject than themselves to the same class of objections, more unjust, and, what is worse, increasingly more unjust, from census to census."

Afraid of his Head. Our new abolition postmaster is Lowell, is evidently afraid he shall not be confirmed by the United States Senate. He does not dare to place at the head of the columns of his organ, the Advertiser, the coalition ticket for Senators.

But, Fisher, you can't wink it out of sight that you are one of the wire-pullers of the coalition; that you publish at your office the only professedly free soil newspaper in the county, the American; that your own organ, the Advertiser, actually favors the free soil agitation; that you have done much towards making the bargain by which Charles Sumner was sent to the United States Senate, and by which [illegible] Wilson was promised the Governorship of [Mass]achusetts, and that you are all covered over with free soil. These things will be exposed when your nomination comes before the United States Senate, and a sound national democrat will be made postmaster in your place.

If Chesley has kept out of the coalition, he can have the post office yet, we have no doubt.
VOX.

New Towns Proscribed. Let the voters in the "rural districts" read this provision in the new constitution, chapt. 3, Art. 4. "No town hereafter incorporated, containing less than fifteen hundred inhabitants, shall be entitled to choose a representative." If this new constitution is adopted, some fifty towns in the State, each containing less than one thousand inhabitants, will be entitled to send in the aggregate at least *three hundred* representatives every ten years, while fifty new towns may be hereafter incorporated with a population in each of fourteen hundred and ninety-nine souls, and these not allowed one single representative. Truly, this is *equality and justice*.

Another Convention. The "unterrified" National Democrats of this County, hold their County Convention in Charlestown on Monday next. It is expected that the Convention will be a large one. The abolition democrats look very pale, and, some of them, even blue, when addressed on the subject.

☞ At the late election for Delegates in Oregon 8000 votes were thrown. This shows a great increase of population. In 1849 the vote did not exceed 700; in 1851, 2000. Since 1851, Washington Territory has been taken from Oregon.

☞ The Washington [Union] publishes an order from the Adjutant General abolishing the geographical division of the military department, and substituting the following:—Department of the East—country east of the Mississippi, headquarters Baltimore. Department of the West—country west of the Mississippi and east of the Rocky Mountains, headquarters St. Louis. Department of Texas—headquarters at Corpus Christi. Department of New Mexico—headquarters, Albuquerque. Department of Pacific—country west of the Rocky Mountains,—Utah and New Mexico, headquarters, San Francisco. The order concludes as follows:—And the President further directs that officers of rank and experience be placed in command of the several departments established.

Tribute to Real Worth. In the New Hampshire Court of Common Pleas at Hillsborough, on Wednesday, an appropriate official tribute was paid to the memory of the late Samuel H. Ayer. A number of eloquent eulogies were pronounced, and resolutions adopted, expressive of the deep regard in which the virtues, talent and moral worth of the deceased are held by his surviving friends and neighbors.

Boston Alive. The Boston papers of today publish a call, signed by about a hundred highly respectable men, of all parties, calling for a public meeting in Faneuil Hall, on Tuesday evening next, in opposition to the odious new Constitution.

Foundling. On Thursday night, a watchman found a female child, two months old, on Eastern Railroad wharf, Boston. Officer Harrington furnished it with quarters for the night, and the next morning a family in Salem street adopted it.

"Still they Come." The Ploughman, an able agricultural, neutral paper, has come out against the new Constitution. This is auspicious.

☞ The word *Parisee*, which occurs in our quotation from the *News*, was probably written *Pariahs*. But whether it be a blunder of the writer, or a blunder of the News' compositor, we cannot tell. The quotation appeared yesterday.

Popular Influences in this Country. The Bishops of the Episcopal Church, in their pastoral address, remark that "Besotted ignorance cannot long prevail in a land of free schools.—Servile superstition must gradually decline in a land of free inquiry. Priest-craft and imposture cannot long flourish in a land of newspapers."

The Style of Dickens.—Dickens intensifies as he grows older. His tragedy deepens, his eccentrics become more eccentric, and his style more and more elaborated. Pickwick was all fun; Oliver Twist and Nicholas Nickleby had serious veins running through them; in Dombey & Son, and David Copperfield there were terror and disaster; and Bleak House is deeply and painfully tragic. Except in this intensification, Dickens has altered little. He is the Dickens of former years; only "more so."—His *forte* is, as it ever was, in describing extraordinary scenes and portraying extremely peculiar characters. The more peculiar they are, the more successful he is in delineating them.—[Home Journal.

A VALUABLE FAMILY MEDICINE.

So celebrated has Dr M'Lane's Vermifuge become, that it is regarded as the only specific cure for worms. Families should never be without a supply of it. At this season particularly, when worms are so troublesome and frequently fatal among children, parents should be watchful; and on the first appearance of those distressing symptoms which warn us of their presence, at once apply this powerful and efficacious remedy. We are confident that it only requires a trial, to convince all that it richly merits the praises that have been bestowed upon it. It is safe and infallible. Volumes of certificates can be produced, showing its great medical virtues.

*Purchasers will be careful to ask for Dr. McLane's Celebrated Vermifuge, and take none else. All other Vermifuges, in comparison, are worthless.

Dr. M'Lane's Vermifuge, also his Celebrated Liver Pills, can now be had at all respectable Drug Stores in the United States and Canada.

"Decidedly the Best Magazine of the Kind" [illegible]

A NEW VOLUME TO COMMENCE WITH JANUARY 1854.

ENLARGED AND GREATLY IMPROVED!

THE SCHOOLFELLOW:

A MAGAZINE FOR BOYS AND GIRLS;

Edited by H. C. RICHARDS and COUSIN ALICE (Mrs. Alice B. Neal.)

ONLY ONE DOLLAR A YEAR!

The publishers would respectfully direct the attention of parents and others to the following, among the large number of favorable notices of the press, that have already appeared of the Schoolfellow. They will simply say that the new volume will in every respect be fully sustained, and they would have much pleasure in forwarding specimen numbers to any who may desire it.

NOTICES.

"It is a perfect gem in the way of print and illustrations. It all parents paid proper attention to the reading of their little ones, and awakened in them a love of books by furnishing them with tales and sprightly miscellanies such as this, we should have few such precocious men and women as some of our young friends we know of."[Godey's Lady's Book.

"A lively miscellany of decided merit, from the pens of some of our best writers for children. It is pervaded by a wholly moral tone, and deserves an increase of its already extensive circulation" [Evangelical Catholic.

"It is inferior to none. Its pure moral tone, its healthy cheerfulness, and its really amusing matter, in its stories, charades, and enigmas, must recommend it to all." [New Haven Palladium.

"A most pleasant companion, as well as instructive mentor. Its contributors embrace writers of fine ability, and its articles are especially suited to the intellect and moral nature of children. We should like to see it in the hands of every boy and girl, because we think it would produce desirable results." [Norfolk News.

"Those who purchase books for village and family libraries, will find that hardly any will be in such constant use as bound volumes of such magazines as contain a pleasing variety. We may name as an illustration, The Schoolfellow. The volume is an inexhaustible mine. The young reader explores in a random way, again and again. There is always a chance for some new discovery. Indeed, we know of no book so permanently attractive to the young as the volumes of this magazine." [Weekly Mirror.

NEW MUSICAL WORK!

ON the 12th of November, will be issued by ALEXANDER MONTGOMERY, of 12, 14 and 16 Spruce st., New York, the first number of a new Musical Serial, to be called

THE MUSICAL REPOSITORY.

This publication is intended to occupy the same position in Music that the better class of Periodicals do in Literature. It will be a repository of the progressive genius of the day; a casket filled with gems from the garnered from the mines of the old and new world.

It has been, and is, a matter of just complaint, that the most elegant and refining art of music is, by reason of its exclusiveness, almost beyond the reach of the great masses. To maintain an acquaintance with the current productions of the modern school, requires an outlay which few can afford to bestow on the gratification of a taste. Two or three pieces a year—pieces that have become so obviously popular that not to possess them argues a lack of musical appreciation—are the most that a person of limited means may procure.

The *Musical Repository* will, it is believed, remedy this deficiency. Abandoning the old theory of large profits and small returns, the proprietors are determined to seek a remuneration for their labor and outlay in a large and widely-spread circulation of their work. To attain this object they offer the following favorable conditions to the public.

1. A weekly issue of the best Music, consisting of eight beautifully printed pages, full music size, for the remarkably low price of six cents. In point of elegance and artistic accuracy, the *Musical Repository* can have none superior.

2. A judicious selection from all the modern operas, arranged in a simple, effective, and pleasing manner, and generally in such keys as the majority of pianists can execute.

3. New translations of the libretti, or where that is impracticable, original words, in which sense will be consulted as well as sound. In scenas, cavatinas, national songs, &c., the original words will be given in addition to the foregoing.

4. A complete series of the most popular ballads.

5. Selections from the composers of dance music, such as Musard, Strauss, Lanner, Labitzky, Anschutz, Thomas, Charles D'Albert, &c., will contribute to this department of the work.

6. Selections and arrangements (made in all cases with especial reference to progress) from the classical composers, Mozart, Beethoven, Chopin, Mendelssohn and other great luminaries of the musical firmament, will be introduced in this portion of the work.

7. The latest and best productions in every school, and by all the composers of eminence now living.

The arrangements for carrying these promises into execution have been completed. It will remain with the public to reward the experiment with the patronage it deserves. Nothing but a large, almost unlimited sale, will remunerate the proprietors. It is believed, however, that the day has arrived when the masses require new and good music at the same popular prices they pay for literature. The proprietors of the Musical Repository are determined to try the experiment in the most complete and satisfactory manner, and hope for the ease of the "divine art," as much as for their own, that they may not be mistaken.

Orders from the trade and subscriptions received by FREDERICK PARKER, Wentworth's Building, cor. Merrimack and Shattuck sts., Lowell, Oct. 20, 1853.

ATTRACTIVE NEW JUVENILES.

I. *Pleasure and Profit, or Lessons on the Lord's Prayer*—In a series of Stories, by Mrs Manners, 1 vol. square 16mo. cloth, illustrated. Cloth pln. 50c; gilt 75c.

"A pleasant little book, originating in a most beautiful idea. The Lord's Prayer runs the sight it like a golden thread, upon which the author has strung a series of pleasant and well told stories." [illegible]

II. *The Pet Bird and other Stories*—By Cousin Alice, (Mrs Neale) Illustrated. 1 vol square 16mo. Cloth plain, gilt 75c.

"These delightful stories cannot fail of enchaining the attention of children, written as they are with a simple pathos, so rare, as it is beneficial to the minds of the young. The heart of the authoress is evidently engaged in her labors."

III. *Naughty Boys and Naughty Girls.* Comic Tales and Colored Pictures, by Dr. Julius Bahr, 4to, in Picture binding, 75c.

IV. *A Laughter Book for Little Folk*—By Madame De Chatelain, 18 large colored comic Engravings, 4to, Picture binding. Price 75c.

"Two highly amusing books for children. The moral of the stories is unexceptionable, and the fun, if we may judge from the merriment of a little critic to whom we submitted them last evening, is of the most exciting character."—[N Y Com. Adv.

V. *Grimm's Household Stories*—A new edition, in 3 vols. Cloth, gilt; Plates beautifully colored. Price $4 50. An exquisite edition of the fascinating Legends and Stories of Germany, collected by the Brothers Grimm.

Thirty Years' Experience of AN OLD NURSE.

MRS WINSLOW would call the attention of the Ladies to her SOOTHING SYRUP, for children teething. [illegible]

Testimony of a Lady [illegible]

Dear Sir—I am happy to be able to certify to the efficacy of Mrs Winslow's Soothing Syrup, and to the truth of what it is represented to accomplish. Having a little boy suffering greatly from teething, who could not rest, and at night by his cries would not permit any of the family to do so, I purchased a bottle of the Soothing Syrup in order to test the remedy; and when given the boy according to the directions, its effect upon him was like magic; he soon went to sleep, and all pain and nervousness disappeared. We have had no trouble with him since; and the little fellow will pass through with comfort, the excruciating process of teething, by the sole aid of Mrs Winslow's Soothing Syrup. Every mother who regards the health and life of her children, should possess it.
H. A. ALGER.
Lowell, Mass., May 30, 1853.

PROOF POSITIVE.—We have sold very large quantities of Mrs Winslow's Soothing Syrup during the past six years, and over 10,000 bottles the last year. We believe it the best medicine in the world for Children Teething, or for the cure of Dysentery and Diarrhoea in Children, whether it arises from teething or any other cause. It gives universal satisfaction—never heard a complaint from any one using it—never sold a medicine so universally successful in relieving pain and effecting cures. In all cases above stated, if taken in season, relief is immediate, and ABSOLUTELY CERTAIN.

Price 25 cents a bottle.

Also for sale as above, CURTIS & PERKINS WILD CHERRY BITTERS for the cure of Bilious and Liver Complaints, and General Debility. They quicken the blood, and give new life and energy to the whole system. Price only 25 cents in pint bottles.

CRAMP AND PAIN KILLER. The world is astonished at the wonderful cures performed by the CRAMP AND PAIN KILLER, prepared by CURTIS & PERKINS. Its equal has never been known for removing pain in all cases; for the cure of spinal complaints, cramp in the limbs and stomach, rheumatism in all its forms, bilious cholic, chills and fever, burns, sore throat, and gravel, it is decidedly the best remedy in the world. Evidence of the most wonderful cures ever performed by any medicine, are on circulars in the hands of Agents. You may be positively sure of relief if you use it. Millions of bottles of this medicine have been sold in New England the past six or eight years. For sale by the above named Agents.

MASTA'S INDIAN PULMONIC BALSAM.

For Colds, Coughs,

INFLUENZA, HOARSENESS, BRONCHITIS, CROUP, WHOOPING COUGH, ASTHMA, AND FOR ALL DISEASES THAT LEAD TO CONSUMPTION!

REMEMBER that disease of the lungs is usually the result of irritation produced by neglected colds, [illegible]

In the month of October last, I took a violent cold which settled on my lungs. My side was badly pained, and had a severe cough. I had applied for two or three weeks, finding that the disease rather increased than abated, I applied to Mr. Masta who gave me a bottle of his Indian Pulmonic Balsam which cured my cough and side in the space of six or eight days. I consider his Pulmonic Balsam a most exceptional article for which it is designed. SAMUEL H. STANWOOD, No. 31 Charles Street, Lowell.

In recommendation of Dr. Masta's Indian Pulmonic Balsam, I would speak from experience. Having a severe cough the last winter, for five weeks, which the usual remedies failed to relieve, [illegible] WILDER LINDSAY. Lowell, April 23d, 1853.

portunity enabled her to inquire that he was sober looking man, of very respectable and having altogether the appearance of one who had seen much misfortune, and been exposed to many crimes. His age she judged to about forty.

His words after, the stranger was still a inmate of Brandale's. He was now fast approaching convalescence, although still unable to walk without the aid of exercise.

During this period, a degree of intimacy had taken place between him and Mrs Brandale and her daughter, which placed them on a comparatively familiar footing with each other, and it was soon made understood by the good grown up between the parties, that the stranger gave, for the first time, something like a history of himself. His name—this, however, he had mentioned before—was Mr. Hinckley, Williamsley. His profession, the sea; which he had held he had followed since he was a boy.—That, latterly, he had been the commander of a large American ship, trading between Boston and Canton in China. That having retained an independency in that employment, he had now returned to his native country, from which he had been absent for five and twenty years, to spend the remainder of his days in the quiet enjoyment of the fortune he had acquired.

He told too, of the Woodrow sugar he had seen, and Otherlie like, of the dangers he had passed; and another Desdemona was won by the stirring tales

Margaret Brandale gazed on the manly form of the steamer, and listened to his stories of savage life, of wild adventure; to his thrilling descriptions of the mighty conquests that career over the face of the great deep, leaving the ponderous mass in its wake, and tossing the huge ship to and fro, as if it were the plaything of a child, till the exhaustion of the bold and daring spirit by which these scenes had been braved, had passed into a nerve and intense love

To a stranger like their inmate was, or had been, a seaman, gave him an additional interest in the eyes of both Margaret Brandale and her mother, for they had a son and only brother, a son to the one, and brother to the other, who had followed the same profession too, but who had been lost at sea, a had never been ascertained exactly how. He had been captain and principal owner of the vessel he sail in—the Mineva, of Portsmouth—which never returned from the voyage on which she was proceeded. She had sunkbut ever since been heard of either the vessel herself, or of any of her unfortunate crew. Little wonder was it, then, that the widow's heart should warm to Captain Stanley, who so strongly reminded her of her long lost and most beloved son. Little wonder that Margaret Brandale should associate with person, the tenderest recollections of an adored brother, and should thus rivet the attachment she had formed for him on other grounds.

ELECTION.....MONDAY, NOV. 14.

Our Prospects in the Coming Election—Massachusetts expects Every Man to do his Duty!

The State election in Massachusetts occurs on Monday next—just one week from to-day—. The prospects of the Whigs are of the brightest possible character. While the ranks of our opponents are divided and scattering, we present an unbroken front; united as to candidates; individual as to principles; bearing aloft the same banners, inscribed with those words so grateful to the American ear, LIBERTY, JUSTICE AND EQUALITY! Massachusetts expects every man to do his duty!

The present indications of the political horoscope are, that the complexion of the next Legislature will be *certainly and decidedly Whig*. Two months since, this prediction would have been unqualified heresy. Disturbing causes have, however, so changed the lineaments of the times, that it is hazardous no longer. Of the parties opposed to us, the National Democrats are by no means formidable; and the Abolitionized Democrats are important for effective action:—the Free Soil party is shorn of its moral vigor, the only power it ever had—and the Coalition is dead beyond the reach of galvanization or of resurrection. Massachusetts expects every man to do his duty!

The success of Crabbing has brought us to a crisis. It has rendered the election of the Whigs in the pending contest more than ever certain. It has aroused many thousands to the National Democratic communion—a portion of all others, it is the least likely to stand in the way of a quiet and happy triumph. The union of the free nullers with the abolitionized democrats in one party, is now inevitable. The days of the free soil party, as a party of principle, are now ended, and ended forever. That faction, which at one time controlled the moral power of the entire North, is hastening to be but a miserable and unprincipled squad of discontented democrats, bearing a flag and occupying a position identical with that of the Soft Shell Democracy of New York. This political fiasco being their choice of his wool, the victory of the Whigs will be more sure and easy of achievement. Massachusetts expects *every* man to do his duty!

Nor is the defeat of the odious new Constitution any longer problematical. Denounced alike by whigs, by all the democracy of the National stamp, by many democrats even of the abolition water, by every honest free soiler in the State, by all the naturalized citizens to a man, by Maine Law Men and by repealers, by Christians and by infidels; denounced, we say, by all these, it is the fate of the base Code to sink, and sunk unalterably. The general hope which has lately seized our opponents, the advocates of this new body of organic law, also indicates success to the whigs. On the other hand, our friends, the opponents of this instrument, have suddenly become animated with unwonted vigor and enthusiasm. The new Constitution will be carried by a majority, and Massachusetts expects every man to do his duty!

We exhort our friends to action. Six days' work remain to be done; let the Whigs see that it is well done. Let no hand be idle. Let no hearts be silent. Let every man be a missionary—let one for the arousing of his neighbors.—Voters in the country must be over to bring the polls on the day of the election. The city will be ready for the day of action. The towns on the seaboard will give their new Constitution a loud and effective note. All now depends on the rural districts, on the towns in the interior.—Whatever be the state of the returns from these, let our country friends be sure that the political weather is well reported at. The issue is with them. They can save Massachusetts from the disgrace of her assailants,—save the cau. Let the country whigs bear this in mind.—Massachusetts expects every man to do his duty!

The day of debate has passed. The day of action has come. All minds have been made up. All minds have been determined. Let the whigs of Massachusetts—Massachusetts expects every man to do his duty!

CITY MATTERS.

CAUCUS.

The Whig Caucuses are requested to meet in their respective wards, on SATURDAY Evening, Nov. 5th, at 8 o'clock, for the purpose of choosing delegates to attend the City of Lowell in the next General Court.

By order of the Whig Central Committee.

D. S. RICHARDSON, Chairman.

I. W. JAQUITH, Secretary.

WARD MEETING TO-NIGHT. There will be a meeting of the Whigs of Lowell held this evening in Jackson Hall, to take preliminary steps for nominating a ticket of representatives in the General Court. Let every Whig be present, by all means.

ATTENTION! The Whig Ballifying Committee of Ward 1 are requested to meet at the Whig Central Committee Room, in the Courier building, this Monday evening, Nov. 7, at 8 1-2 o'clock. Be on hand every member.

Per order. GEO. GARDNER, Ch'n.

UP O. A. BROWNSON and EDWARD YOUNG, of Boston, will address the citizens of Lowell, on the proposed Constitution, on Tuesday evening, Nov. 8, in Huntington Hall. Men of all parties are invited.

MAINE PEOPLE ATTEND! The sons and daughters of Maine residing in Lowell, are invited to meet at Mount Hall, corner of Merrimack and John streets, this Monday evening at 7 1-2 o'clock, to make arrangements for a social festival, or dinner party, to be held next week.

DR. BOYNTON will give his eighth and closing Lecture of the present course at Jackson Hall, on Tuesday evening, Nov. 8th, commencing at 7 1-2 o'clock.

SUNDAY RAILROAD. At the annual meeting of the Stockholders of the Boston and Maine Railroad Corporation, held in this city to-day, the old Board of Directors were re-elected.

DEATH. Yesterday Caroline Carney, a woman of dissipated habits, died suddenly in a fit at a house on Lowell street.

GLEESON NEWS FROM MARYLAND. The Maryland election is substantially a Whig triumph. In the last House there was a tie, and thirteen Democratic majority in the House.—Between these twelve counties four up to last

	House of Delegates	
	1853.	1851.
Whig,	30	30
Dem.	30	30

Dem. majority,	0	0

The Patriot of Friday says:

The Senate consists of twenty-two members, and the House of Delegates of seventy-four members. Of the twenty-two members of the Senate, that, without further notice, will be found to be composed of the same body; and they have gained nine in the House of Delegates, which, added to the majority in the counties yet to be heard from would give them a majority of at least fifteen on joint ballot in their majority on joint ballot thirteen. There is scarcely a probability that the counties to be heard yet from will change this, except to increase the Whig majority.

The election for the Legislature was, after that for Governor, the most important to be decided in this election, as a Senator of the United States will be chosen by the Legislature, and also a State Treasurer. The Whigs having the majority on joint ballot, as now anticipated, the re-election of *James* A. Pearce to the United States Senate, and will give the Whigs the choice of State Treasurer. Under the new Constitution the Governor has the casting vote in the Board of Public Works, which, when they are divided, will be the case, as it did last year, of two Whigs and two Democrats, and if they should divide, as it is not unlikely, the Treasurer will have a casting vote in the election of Treasurer, and the most important appointment in which the Governor and Council have a voice.

Hon. MARCUS MORTON addressed the citizens of Taunton in opposition to the new constitution, on Friday evening last, and was received with enthusiastic applause. He spoke about an hour; he said, how he began upon the subject he did not know. He knew it was not a mass of material that I don't know what to do with. He was opposed to the constitution, with the general confession of its merits, and he could not vote for it. He was not satisfied these things which we ought to have done—he was not satisfied these things we ought not to have done." If he had been present when caucus met last night, he would tried it under three hours, and would consider what the Convention did not do; second what it did do, and third the manner of doing it. And if his strength would permit he could satisfy any man that the constitution was a curse to the State and ought to convince any honest minded man that it was the duties of wisdom and policy to mark the whole proceedings with disapprobation.

From the description given in this account of the unfortunate ship of the pirate wh[illegible] and the time when the tragedy had taken place, Mr Ecclesford had no doubt that the vessel spoken of was the Minerva, and that the mystery in which her fate had been so long shrouded, was at length dispelled.

In his confession the doomed wretch stated also that the captain of the pirate ship, whose person he strictly described, was, he had reason to believe, in Britain, although he knew not where.

From regard to the feelings of the friends and relations of young Evandale, Mr Ecclesford had not mentioned to them his suspicions of the fate of the latter, thinking that the doing so would only give needless pain.

The story of the locket, however, had given a new turn to the affair, and such a one as determined Mr Ecclesford to follow out certain suspicions which it had excited. He, in short, suspected and very strongly, that Mrs Evandale's inmate was no other than the murderer of her son, the murderer of Margaret Evandale's brother, and of Mary Walter's lover—the captain of the pirate by which the Minerva had been plundered and sunk.

Under this suspicion he refused, mildly indeed, but determinedly, to give up the locket which Miss Walters had put in his hands, although without assigning any reason for his conduct, which he said would shortly be explained.

On the day following Captain Stanley, to whom the circumstance of the detention of the locket by Mr Ecclesford had been mentioned, suddenly disappeared and was no where to be seen or heard of.

Ten days after, the apprehension in Liverpool by a couple of Bow-street officers, of a noted pirate captain who had committed some dreadful murder, was announced in the papers. This captain was Stanley. He was subsequently brought to trial, when the depositions of his companions in guilt, who had been previously executed, and other evidence which had been mustered against him including the locket, the strongest of all, secured his conviction, and he suffered at the usual place of execution in London, for criminals of his description.

It remains only to be added that this result, this retributive justice, had been brought about by the activity of Mr Ecclesford, who, immediately after obtaining possession of the locket, put himself in correspondence with the office in Bow-street, when the case was promptly taken up, and as we have seen, efficiently followed out.

On Miss Evandale the effect of this unfortunate affair was, for a time, sufficiently distressing; but in escaping the dreadful fate of being united to the murderer of her brother, she found a consolation which amply compensated the temporary pain of a disappointed attachment, which, though ardent, had not, perhaps, been very deeply seated. And her good sense taught her to appreciate the kind Providence which had saved her from so unhappy a connexion.

ELECTION.............MONDAY, NOV. 14.

Hon. Josiah G. Abbott on the New Constitution.

Consistency is a great virtue in a politician; inconsistency is a great sin. We were a little surprised on reading, in the Advertiser of yesterday, the following note from the Hon. Josiah G. Abbott, late a delegate in the Constitutional Convention, from this city:—

"*To the editor of the Advertiser:*

Dear Sir—I have understood it is claimed that I am opposed to the adoption of the New Constitution. I desire to say, through your paper, that I am in favor of it as a whole, and shall vote for its adoption. Yours, &c.

J. G. ABBOTT."

The statement that Mr. Abbott was opposed to the new Constitution originated with the Fitchburg Reveille. It has been extensively copied by the press in various parts of the Commonwealth. For ourselves, we did not believe it. We knew Mr. Abbott's sentiments touching the principle of majority rule. We knew with what indignant eloquence he had denounced the odious system of White and Butler. We knew that, in his "heart of hearts," he loathed almost every prominent measure embodied in that odious instrument. But we knew also the power of *party pressure*, even over the most upright and independent minds; and hence we are not alarmed, though somewhat surprised, to hear from Mr. Abbott's own pen that he is "*in favor of it as a whole*," tho' he loathes it most heartily *in detail*. We now quote Mr. Abbott's own words, as reported in the published debates of the late Convention. The passage has been selected for our use by a friend:—

"I do not agree with my colleague (Mr. Butler) in his expression of opinion, or any other member of the Committee who has taken similar ground, that this question is not one of principle. It seems to me, that if ever there was a question of principle addressing itself to a Convention assembled for the purpose of making and framing a government for the people, it was that rule of action upon which the people were to act for all time to come, until that frame of government had been altered in the selection of agents through whom their laws were to be made. It seems to me that if you can make it stronger, it is even more than a principle; and I ask the members of this Committee here, if when they speak of our form of government—the government of this Commonwealth—they do not inculcate the very idea that the majority shall rule. I undertake to say that this is the general idea—that it is something that pervades the people of the whole Commonwealth. It is the atmosphere in which we live and breathe for all governmental purposes. Why do you give up the rule of your own conscience—the rule of your own judgment? Why do you defer to the law of the land? Is it because a part, less than a majority of the whole, have a different opinion, and a different rule of action, and a different conscience? No, sir. You defer your judgement, you give up the rule of action prescribed by your conscience, and so it is with the whole people, because a majority of the people, and not a part, have prescribed a different rule of action. This is something more than a mere matter of expediency. It is the principle upon which our form of government is based, which every man knows and feels, with us, if nowhere else, that the majority shall rule and not a part less than a majority."

* * * * * * * *

"Where is the man who will get up and say to the people, that the true rule of action is not that the majority shall rule. Everybody acknowledges it."

* * * * * * * *

"I think I am right in this, that every man, under the principle of action, that a majority shall rule, [illegible] and obeys a law [illegible]"

That Mr. Abbott should thus denounce this odious feature of the new Constitution,—a feature, too, of such vital moment—while in the Convention, and now be ready to endorse that obnoxious code, even under the salvo of so equivocal a note as that quoted above, is truly extraordinary. But we leave Mr. Abbott to reconcile his former speech with [illegible]

Again—On the [illegible] of Representation Mr. Abbott is authoritatively reported to have said—we have quoted the same remark once or twice before:—

"*It is something gentlemen cannot wink out of sight, or keep out of sight, that you have provided here by your votes, that a majority of the House of Representatives may be chosen by one third part of the people of this Commonwealth.*"

If, having said this much against the most prominent and vital details of the new Constitution, Mr. Abbott can now consent to vote for that odious hotch-potch instrument, we hope he will at least have the decency to relinquish all claim to consistency.

Three More of Fisher's Tricks! A day or two since, Fisher caused it to be published in his organ, the *Herald*, that Edward Everett had refused to speak again in opposition to the new Constitution, and the same falsehood is copied into another of his three organs, the *Advertiser* of to-day. The truth is, Mr. Everett is engaged to speak in several places—among others, in Lynn—during the present week.—*Secondly*—He has caused the same *Herald*, his organ, to announce that Messrs. Brownson and Young were to "address the Whigs" against the new Constitution, knowing all the time that Brownson is an old line Democrat, and that the meeting to-night is a no-party affair. We lay the blame of these falsehoods directly to Hildreth, because we cannot hold the nominal editor of that paper responsible for such gratuitous *lies*. *Thirdly*—He seeks to "pull the wool" over the eyes of the Irishmen, by publishing Butler's Mount Benedict speech just on the eve of the election. Who will be gulled now? Why did Butler *dodge* in voting?

Our Telegraphic News. Advices from Washington, to the 7th inst., are as follows:—Umpqua Valley had been the seat of a formidable Indian war. With the assistance of Gen. Lane, Jamor Alvord, in command of the general forces there, raised a company of Umpqua volunteers. Gen. Lane, after leaving the main body, was elected to command it, and on the 24th of August, met some 300 Indian warriors, whipped them, and made them sue for peace.—Surprising them by marching, and otherwise acting with vigor and rapidity, he overtook them in their stronghold in the mountains, where the battle took place. The General was badly wounded in the shoulder, but kept the field.

Gov. Seymour, Minister to Russia, was here to-day, in attendance at the State Department. He will sail in the Pacific, on the 26th inst., accompanied by Mr Irving, as Secretary of Legation.

The appointment of James W. Green, of Alexandria, as Consul to Lima, vice Judge Smith, of California, declined, is reported.

John Bell, of Tennessee, received 10 democratic votes, which secured his election to the U. S. States Senate.

Ole Bull gave a concert to a crowded house at Carusi's this evening. The President and other distinguished persons attended.

New Orleans advices to the same inst., say: The steamship United States has arrived here, with Havana dates of the 5th inst. The News is quite unimportant.

A public dinner has been given to the members of the Howard Association at the City Hotel, New Orleans.

Advices from San Antonio report a rumor that 5000 Mexican troops are marching upon El Paso.

A despatch to the same date, from Buffalo, says: The Patchin Bank in this city suspended payment this morning. The suspension was brought about by large loans to the Buffalo and New York city Railroad, whose affairs are embarrassed. Mr Patchin, president of the bank, is president of the road, and the liability is on its behalf.

Our Baltimore advices, to the same date also, are to the following effect: Mr Toombs replies in the Augusta Chronicle, to Secretary Davis's late letter. He denounces Mr Gaskill, to whom Davis wrote, and denies that he styled him a disunionist. He then says, "What was said by me on the occasion referred to, was not done in a corner. It was said before a public assembly of people, therefore the truth of the charge could have been easily ascertained.—The usual course pursued by gentlemen who feel themselves aggrieved, under such circumstances, is to inquire of the person who is alleged to have made an offensive charge concerning its truth,—that of swaggering braggarts and cunning poltroons, is to indulge in vulgar epithets and argumentative personalities, just so far as may not complicate them with falsehood, if the charge should prove to be untrue. The Secretary of War has chosen to pursue the latter course; what other advantages this course may have, it is not to be commended for its chivalry."

For the Journal and Courier.

In the bare-faced address of the free soil State Committee they say, "Under such circumstances, no party under ordinary counsels would have dared to make a party opposition to a Constitution so clearly embodying the will of the people." Now, what if that junto *did* think the *whigs dare* not make opposition to that wonderful piece of patchwork, styled a "New Constitution?" Does it follow that they had no *right* to oppose it? Suppose they did not start their whole force instantly on the close of that long Convention, before their patches were put together? Does it not show that there were calm, deliberate, and prudent counsels? No firey, hot haste, before they knew what they had to rip to pieces and where and when to begin in order to show the black injustice of its main points and ends. Well then, what will they think, as every day brings to their astonished gaze the bold and manly opposition of such men as J. G. Palfrey, S. Hoar, and hundreds of free-to-speak men of their *own party*? Does not their often repeated slander of whigs now recoil upon their own heads like great hail stones from a cloud they had not wisdom to discern, nor power to avoid? And *yet*, free soilers are *free* to say in our hearing every day, that they will vote to give the small towns the control of the State, because it will destroy the vote of Irishmen. J.

Becoming National. Fisher A. Hildreth has become a regular true blue National Democrat dyed-in-the-wool. His organ in Lawrence, the *Sentinel*, has taken strong grounds against the coalition and in favor of the Cushing missive. His Lowell organ, the Advertiser, has not yet run up the names of the Middlesex coalition senatorial candidates, but continues undecided as to whether it will become "National" or "Coalition." His other free soil organ, the American, has at last ventured to run up the coalition senatorial nominees.—Fisher evidently means to ride on two stools.—Let us see him—tipped off!

We expect to see the Lowell Advertiser run up the Bunker Senatorial ticket to-morrow. The "National" stock is rising—"hards" is [illegible]!

Snow. We are having a light fall of snow to-day—the first of the season—reminding us of the near approach of Thanksgiving.

Sons and Daughters of Maine. A preliminary meeting of the Sons and Daughters of Maine was held last evening at Mozart Hall, to take into consideration the propriety of having a festival. The meeting was called to order by G. G. Evans, and W. K. Tarbox was chosen Chairman, and S. A. McPhetres Secretary.

On motion of G. W. Partridge, it was unanimously voted to hold a festival.

On motion of J. J. Judkins, a committee of 13 gentlemen and 13 ladies, one each from each county in Maine, was raised to report a plan of the festival. The committee retired and subsequently reported the expediency of having a supper on Thursday evening, the 17th inst., it being the anniversary of Thanksgiving by "The old folks at Home." It was also recommended to have speeches, toasts, sentiments, vocal and instrumental music, and a general good time.

A committee of 41 was then raised to make the necessary arrangements. Spirited addresses were made by the Chairman, Mr G. W. Partridge and others, and the greatest enthusiasm prevailed.

The Committee of Arrangements will meet this evening at the same Hall.

After remarks from several gentlemen, the meeting adjourned to meet at the same place on Friday next at 7 1-2 o'clock.

Phalanx Parties. The first of the series of Phalanx Parties will be given to-morrow night, at French's Hall.

Silver Ware Made to Order. Raynes, 43 Central street, now manufactures his own silver spoons and other articles of silver ware. He has on hand a fine assortment, and can make to order, at short notice, any article desired. See advertisement.

The Farmer's Almanac for 1853, published by Phillips, Sampson & Co., Boston, has been received, and is offered for sale at the store of F. Parker, Esq., Wentworth's Building.

The Free Evening Schools. The first of three Free Evening Schools commenced last evening. More than two hundred operatives, mechanics, and domestics, entered their names the first night. There is no more popular or useful movement among us—none more deserving of the hearty encouragement of the citizens and of the City Government. How could these young men and women and ignorant adults spend their lengthened evenings more to their advantage or to the advantage of the city? May there be no lack of means or of teachers. A small annual appropriation from the City Treasury, for these schools, must do great good.

Yesterday, in the Police Court, Mary Ryan was sent three months to the Workhouse. To-day, Michael McCarty, for drunkenness, previous conviction, was sent three months to the House of Correction. John Binton was fined $3 and costs for drunkenness—committed. Chas. Redden, a small boy, was sent 30 days to jail for knocking ball in the streets. John Ryan for an assault on Mary his wife, was yesterday discharged.

Whig Caucus.

At a meeting of the Whigs of Lowell, called for the purpose of making arrangements for nominating candidates for Representatives, held at Jackson Hall last evening, S. J. Varney was chosen Chairman and Ambrose Lawrence Secretary.

It was voted that the several wards be requested to nominate each one candidate for Representative, and report the same to the Central Committee; and that the Central Committee be requested to nominate four candidates at large, and report the entire list at an adjourned meeting.

Voted, that the several wards be requested to report to the Central Committee as early as Thursday next.

Voted, that when this meeting adjourn it be to meet next Thursday evening at Huntington Hall, and that the Central Committee be requested then and there to report their nominations.

Brief and pertinent addresses were made by Messrs. Jona. Kimball, B. C. Sargeant, Charles Cowley and Geo. F. Richardson—with reference, mainly, to the *humbug reforms* of the proposed Constitution.

Voted to adjourn.
S. J. Varney, Chairman.
A. Lawrence, Secretary.

IS YOUR NAME ON THE CHECK LIST?

"The Iron Rod of Party." Mr Adams, in his able speech delivered on Saturday evening before the citizens of Quincy, alluded to the extraordinary course of Mr Sumner in the Convention, relative to the basis of representation, when he ably argued in favor of the district system, but voted against it! Mr Adams said—

"There was one man in the Convention who saw the matter as I saw it, and had the courage to come out and advocate it. That man was Charles Sumner. His speech on this point has not been answered—and cannot be. But he came to a wrong conclusion. He listened to the syren song of expediency—of danger to his party friends, and he bowed his neck meekly to the iron rod of party, at least in action, if not in sentiment or words."

An arrival from Campeachy reports the cholera to be raging terribly in Yucatan. There were a hundred deaths in the town of Meyda.

National Democratic Convention. The Democrats of Middlesex county [illegible] at City Hall, in Charlestown. [illegible] presided. A list of Senators was agreed upon, and resolutions passed approving of President Pierce, of the measures of the administration, the nomination of Bishop and Dowley, and the new constitution. The following ticket was put in nomination:—Gorham Brooks, of Medford; Nathan P. Colburn, of South Reading; Thomas Greenleaf, of Charlestown; Joseph Holbrook, of Concord; Enoch Foster, of Tewksbury; Timothy Butterfield, of Tyngsboro. It adopted the resolutions of the large and enthusiastic meeting of the democrats recently held in Charlestown.

Butler on his Legs in Danvers. The Salem Register says that on Thursday evening the Coalitionists held their meeting at Granite Hall, on the Plains, at which B. F. Butler, the roaring Behemoth of the party, from the river near Lowell, performed his antics; and the way he bellowed, snorted, and throwed dirt, was a caution to all animals not partaking of his amphibious qualities, his obliquity of vision and ranting propensities.

The whole performance of Behemoth consisted in lauding the new Constitution and throwing dirt on the old one and all those who prefer it. Juries were wiser and better judges of the law than Judges. The plurality system was a minority system. The new Constitution was not mostly contained in one proposition for the purpose of making the good take the bad, as was stated by Whig speakers, but it was done that we might have a perfect instrument, because it would be imperfect if any part should be rejected.

Progress of the Truth. Hon. Joseph T. Buckingham, the distinguished free soiler, declares himself opposed to the new Constitution and advises his friends to vote against it. It seems that all the original friends of the Convention of any distinction, except the reckless demagogues, are opposed to the unjust Constitution which that Convention framed. We now have the following list of free soilers and democrats who are openly and avowedly against it, all of them men in whom the people have great confidence:—Hon. Marcus Morton, Hon. John G. Palfrey, Hon. Joseph P. Buckingham, Hon. Samuel Hoar, Hon. John G. Park, Hon. Charles F. Adams, Charles B. Goodrich, Esq., O. A. Brownson, L. L. D., and Bradford L. Wales. There are many others of less distinction who are known to oppose it and who will vote against it.

Geology of the Globe. Through the kindness of F. Parker, Esq., we have received a neat copy of the "Outline of the Geology of the Globe, and of the United States in particular," with Geological Maps and sketches of characteristic fossils, by Edward Hitchcock, D. D., L. L. D., President of Amherst College and Professor of Natural Theology and Geology. Boston: Phillips, Sampson & Co., 1853. It is a work of great value, and has been much admired by scientific men. Prof. Hitchcock's attempt to reconcile the Mosaic cosmogony with the facts of modern science and the principles of Cuvier, Lyell, and other eminent geologists, have been generally regarded as entirely successful.

Attempted Murder. On Sunday evening, in Turnpike street, South Boston, one of two men who were walking together, named James H. Smith, a blacksmith by trade, suddenly drew a knife and plunged it into the body of his companion, Josiah Smith, a teamster. A dangerous wound was inflicted on the left side under the ribs. The assailant was secured, and in the Police Court yesterday, the wounded man being unable to appear, was held to bail in $2000 for examination on Thursday—in lack of which surety, he was committed to jail. The injured man is under the care of Dr. York, and doubts are expressed as to his recovery. The cause of the affray is supposed to have been an old grudge between the parties.

GENERAL SUMMARY.

In the Court of Common Pleas, this forenoon, Charles Going of the American House was convicted of being a common seller of liquor. Capt. J. M. Marston and Henry Emery were on trial for the same offence.

The public are notified to beware of counterfeit $1000 bills of the Exchange Bank, Providence, R. I. They are genuine impressions with counterfeit signatures.

Resigned. Rev. E. K. Fuller, of the Baptist church in Medford, has resigned his pastorship, on account of some disaffection in the society.

The State Election in New York takes place to-day. There are four regular State tickets in the field, viz: whig, hard, soft, and free democratic. The contest is mainly between the two divisions of the democratic party, while the whigs will slip in between them, and are almost certain of a sweeping victory.

Railroad Accident. On Saturday afternoon last an accident happened to the Dedham train upon the Boston and Providence Railroad. When near the Toll Gate the truck of the tender broke, damaging the forward part of the train considerably, but injuring no one except Mr Richardson of the Dedham Express, who was somewhat bruised.

Duplicity. A day or two since, the learned editor of the Lowell Advertiser advocated the adoption of the new Constitution, because it secures the adoption of the district system "if the people want it." Judge Allen, of Worcester, advocates the same measure, because it *effectually prevents* the adoption of the same system in any future time! Now which is right, the learned editor of the Advertiser or the equally learned Judge Allen? Here is a snake!

The District Attorneyship. It has just "leaked out" that A. R. Brown, Esq. is "fishing" for the District Attorneyship; a development which easily accounts for the extraordinary zeal *in behalf of the working-men*, which this gentleman has manifested so much of late. The law students may have as many "cachinatory bosses" at Mr Brown's [illegible] of legal ability as they please; but if Tim may be a Judge why may not Alpheus be a District Attorney?

Fatal Accident. On Monday, 31st ult. the excavation now being made on Southbridge street in Worcester, caved in, burying an Irishman named Timothy Foley. The poor fellow was rescued, but died of his injuries on Wednesday, 2d inst.

One of the female riders at the Hippodrome in New York on Friday evening was seriously injured by the fall of her horse in leaping the water ditch. The horse in leaping failed to make the other side of the ditch, and consequently fell, causing a complete somersault, falling upon his rider.

Appointment. Amos W. Frye, Esq., one of the editors of the Boston Courier, has been appointed a Justice of the Peace for the County of Suffolk.

Decapitation of Coalition Postmasters
The Pierce-and-Cushing Letter Illustrated!

Washington, Nov. 8th. The President has ordered the removal of Mr Stiles, Postmaster at Bedford, Mass., and Mr Merrill, Postmaster at South Andover, on account of their coalition principles. Mr Hobart Clark has been appointed in the place of Mr Merrill, and Henry A. Gleason in place of Mr Stiles. Calvin H. Perry has been appointed Postmaster at Natick, Mass.

Suicide of a N. Y. Merchant.

New York, Nov. 8th. Samuel B. Appleton, merchant tailor, committed suicide yesterday, at Williamsburg, by shooting himself in the head with a loaded pistol; he formerly resided in Boston.

The Pine-fighters in limbo!

Six or eight individuals were arrested in this city yesterday on a requisition from the Governor of Massachusetts, charged with being abettors of the recent prize fight at Boston Corners. Considerable excitement has been created, as it is asserted that the Sheriff holds warrants for the arrest of sixty other parties, many of them moving in high life, who are charged with the same crime.

Providence, Nov. 8th. Gottschalk's concert for the benefit of Mr Leland, music dealer, who lost everything by the late fire, was crammed full; receipts about eight hundred dollars; no expenses. Gottschalk goes next to Baltimore and South.

Will the Advertiser make a note of the fact that William Schouler, Esq., of Boston, will address the citizens of East Boston on Saturday evening, November 12, in opposition to the odious new Constitution? The Advertiser has made a great parade of an unfounded rumor, that Mr Schouler was disaffected to the whig cause.

Thanksgiving. Governor Powell, of Kentucky, has issued his proclamation, fixing upon the 24th of November as a day of Thanksgiving in that State, when Pennsylvania, Ohio, New Jersey, Massachusetts, Maryland, Connecticut, and Rhode Island, observe the same festival.

Fire in Waltham. The barn of Jabez Walcott, in Waltham, near Newton line, was destroyed, with valuable contents, by an incendiary fire on Friday evening.

Complimentary. Since Fisher Hildreth has refused to support, in his Advertiser, the coalition candidates for Senators, and to place their names at the head of its columns, the candidates and their friends are boasting that "it makes no difference, nobody reads the Advertiser and very few see it; people would never know whether it supported or opposed the coalition *if it was not for the Courier*."

During the past week a case has been on trial in the U. S. Circuit Court, at Philadelphia, to recover $50,000, alleged to be due to the estate of the late Daniel Webster, for fees in the great case of Matthias Aspden's estate.—The case is not yet finished.

Surrender of Yankee Sullivan. In the Supreme Court of New York, Saturday morning, Yankee Sullivan was surrendered to take his trial before the Courts of Massachusetts, and was delivered over to Sheriff Willis, of this State, for that purpose. A process is also out for the arrest of Morrisey, but it is said that he has taken passage for England.

The loss by the conflagration at Sonora was greatly exaggerated. It was only $300,000.

CONVENTION ——— MONDAY, NOV. 14.

Hon. Charles Sumner is Coming—His Views on the District System.

The citizens of Lowell will this evening be addressed by Hon. Charles Sumner, one of the United States Senators from Massachusetts—Mr. Sumner visits us on Lowell. He is the "truest and front" of his party; he has eloquence in abundance, and can make so great an impression on a popular audience as almost any man of his age. He is a very uncouth appearing man. Some men have taken him to be an Irishman. But Irishman he is not. He is as American, native and and "to the manor born," but, of course, he is none the better for the place of his birth. Now Charles is a sensible man, and hates the great feature of the instrument which he is coming to defend, viz: the proposed basis of representation. He will probably talk eloquently on the Fugitive Slave Act, on the abolition of the law qualification for voters and imprisonment for debt, and on some other topics which are of comparatively little interest to the people just now. But not one word—not—will he breed from him in favor of the one great "damning feature" of the new constitution—that provision that a man in New Ashford shall have eleven times the representative power that a man in Lowell shall have. Mr Sumner loathes that feature of the new organic code as much as his illustrious colleague, Mr. Everett; never is not for the "iron rule of party," we should hear eloquent words from his now half-united lips denouncing it as worthy of the lowest "dregs of infamy."

We have his own words for this. In a remarkable and characteristic speech in the late Constitutional Convention, on the proposed basis of representation, Charles is reported "in the debates" to have observed as follows:—

"The Rule of Three, it is, applied to voters, seems to me sound; but whether applied to voters or population, it is the true rule of representation, and stands on adamantine principles. In all well-ordered governments justice or, obviously, so instinctively, to the natural reason, that I do not feel disposed to dwell upon it. But since it has been called in question, I shall be excused for saying a few words in its behalf. Its advantages present themselves in several ways.

First. And I put in the front its constant and equal operation throughout the Commonwealth. Under it, every man will have a representative; and every representative will have the same representative power as every other man. In this respect, it carries out a darling idea of our institutions, which cannot be disregarded without manifest wrong. It gives to the great principles of human equality a new extension and application. It makes all men, in the enjoyment of the electoral franchise, wherever in their diversities of intelligence, of education, or of wealth, or wherever they may be within the borders of the Commonwealth, in small town or in populous city, absolutely equal at the ballot-box.

Secondly. The Rule of Three as applied to representation is commended by its simplicity. It supersedes all the painful calculations to which we have been driven, the long agony of mathematics as it was called by my friend over the way, (Mr. Giles,) and is so easy in its application as it seems to me to be just.

Thirdly. The rule is founded in nature, and not in art; on natural bodies, and not on artificial bodies; on men, and not on corporations; on souls, and not on petty geographical lines. On this account it may be called a natural rule, and when once established, will become fixed and permanent, beyond all change or desire of change.

And, fourthly, this rule moves, to every possible extent, those opportunities of political partiality and calculation in the apportionment of its representation, which are naturally incident to any departure from the rule. It was beautifully said of law by the greatest intellect of Antiquity, that it is one *evident* passion; and this very definition I would extend to a rule which, in its application, differs from law in mass will, applies absolutely to fixed numbers. The object is free institutions; is, to withdraw all concerns of state, so far as practicable, from human discretion; and place them under the shield of determined principles, to the end, according to the words of our Constitution, that there may be a government of laws, and not of men. But, just in proportion as we depart from a fixed rule, it becomes a government of men, and not of laws."

Mr. Sumner then answered at length the objection which had been made to the district system, and then said:—

"*I cannot doubt that the district system, as it is generally stated, whereby the representative power will be distributed in the proportion, according to the Rule of Three, among the voters of the Commonwealth, is the true system, instinct in its natural law to prevail. And gladly would I see this Convention hasten to the day of its adoption; it is the poetry for adoption in the organic law.—To this end I have written my name.*"

The Town Warrants. The Ward officers in the cities and the selectmen in the towns must exercise the greatest circumspection in the mode of submitting the ballotings at the coming election.

Appletonus, says the Worcester Tribelium, have been made to us, by town officers, to furnish a form of warrant for the meeting in which the election is to be held, for the proposition of the Constitutional Convention. After stating the items usually incorporated in the warrant for the annual meeting, and mentioning the latter, he says we should regard as necessary for its completion:

"Also to bring in their votes upon the following propositions submitted by the Constitutional Convention held on the first Wednesday of May, 1853, viz:

1st. Shall proposition number one, containing the *Preamble, Declaration of Rights, and Form of Government*, stand as the Constitution of the Commonwealth of Massachusetts?

2d. Shall proposition number two, respecting the *Judicial Power*, stand as a part of the Constitution?

3d. Shall proposition number three, respecting the *Legislative Power*, stand as a part of the Constitution?

4th. Shall proposition number four, respecting the *Executive Power*, stand as a part of the Constitution?

5th. Shall proposition number eight, respecting the *Power of Banks*, and the *Creation of Bank Bills*, stand as a part of the Constitution?

Said propositions are to be written or printed, and the ballot, in substance as follows: Shall, and will express, in writing or printing, the word opposite each proposition; said votes to be deposited in sealed envelopes, in a box for that purpose; and no votes upon said propositions, not thus deposited, will be received or counted.

It will be necessary, in all cases, that a *separate box shall be used for the votes upon the Constitutional propositions*, and that those ballots be deposited in envelope distinct from those used when balloting for public officers; and for these reasons:—

First—The Convention, under the authority given by the people, provided that "the qualified voters of the several towns and cities shall vote by ballot, upon each of the propositions, for or against the same, which ballots shall be received within sealed envelopes, &c., and *no ballots not so enclosed shall be received.*" So there is no discretion left with town officers upon the subject of the mode of voting.

Second—To prevent confusion and double voting, it will be necessary that the balloting on the constitutional propositions should be entirely separate and distinct from that for public officers. The last Legislature so modified the secret ballot law that it is now optional with the voter, in the election of public officers, to deposite the vote in the ballot box, open or *enclosed*, at the will of the voter. Provision must therefore be made for the accommodation of all such as desire to vote the open ballot.—They can not be required to put their ticket for officers into an envelope; and the convenience would be overwhelming. Take, for example, the city of the Governor of the developments of Mr Hale's district plan. When the constitutions of towns approved, the Whigs found it utterly impossible to bring the country portion of their party up to it. In this county we had put together such towns as Buckland and Charlemont, Gill and Northfield, towns between which there has always existed a degree of hostility which no political party can destroy. It was so with the scheme all over the State. The fact is, a delicate and minute plan of districting cannot prevail before the people."

Hillsdale versus Cushing. In the American of yesterday, Mr Postmaster P. A. Hillsdale, alluding to the recent missive of Attorney-General Cushing, says:—

"The writer is an enormous Agonoria and Sagadahoc, and the person he writes to is guilty, peddling, huckstering knave.

But this interference with State legislation, is a matter which must be immediately corrected. There is no independence likely to be left.—

We are ready to co-operate with shoebinders and shoemakers, hands and staffs, employers and employed, to get rid of and a monstrous tyranny on the part of the Slave Power, which has usurped and set a tyrant. There is not a democrat in the State more deeply implicated in this matter with freesoilers than he is. He *broke* with the bankers on this very question.

If President Pierce will continue a man in office who denounces one of his cabinet then, farewell during the rest of his term to all "instructions," we have been mistaken in forming an estimate of his character and calibre.—Off with his head, Frank; down with traitors!

Charity. The Lowell Advertiser, hitherto the great champion of coalition, now refuses even to give the details of the coalition State torial candidates at the head of its columns.—This is too bad; and in consideration of this forlorn condition of our democratic coalition friends in this respect—and lest the names of their candidates might otherwise never be known—we volunteer to put them on record for the benefit of posterity. Here they are:

William Claflin, of Boston, for Governor.
Julius Rockwell, of Winchester, Daniel W. Coates, of Salem, Charles R. Train, of Worcester, Henry Wilson, Peabody, of Lowell; Charles G. Hazewell, of Conway, Councillors.

P. S. Who are the Advertiser's candidates?

Hon. Charles Sumner in Lowell. The New Constitution.—No. 7.

Will you what a monster of inconsistency is the new Constitution! Its framers and abettors, they say, are for the "rule of three." By the rule of three they mean the corrupt leaders and managers of this coalition—for the real *ifs* were brought under the iron rule of party drill, and were mere automatons to move as they were directed by their corrupt leaders, who first laid their plans and made all their arrangements in secret caucuses. Now this part of the Democrats, there are *five* who stand out conspicuously—Boutwell, Rantoul, Rockwood and Banks; and the five Sailors, Wilson, Keyes, Sumner, Dana, Burlingame, Alvord, Bird and Phinney. Of the Democrats, two only were legitimate representatives of the people of the towns or cities where they reside—Butler and Banks; the other three were not able to obtain the votes of their immediate townsmen, but were smuggled in over the wall, as delegates of little free soil towns, remote from their homes, under a constructive right, and against the ordinary common sense honest view of the subject, by means of a miserable petifogging trick of these corrupt conspirators in forming the act for the choice of delegates. Of the Free Soil leaders, also, are only were legitimate—Wilson and Bird—the rest, Keyes, Dana, Sumner, Alvord, Phinney, Burlingame, Hamlin, Hoar, Rockwood, Stearns at home, under the same juggling trick, permitting, as was contended, the return of representatives by delegation.

On looking back to the doings of the Legislature under the coalition mis-rule, it will be seen that all but one of the democrats above named, and all but three of the five free soilers, Dana, Sumner and Alvord, were members and leaders in that Legislature; and Sumner was the great champion of the five soilers, for whose seat in the United States Senate the corrupt bargain was first made.—Now when we look at the characters of these men, their objects and expectations, in connection with their past conduct under their coalition leaders, and their present course in the primaries they have attempted—we are ready to say that no absurdity, no injustice, no outrage, no tyranny and fraud of the just rights of the whole people, would be too great to be expected from the party of the coalition, whose object is to be gained. Men, who, although of most opposite and discordant principles, could corrupt-ly unite on one ticket for the sake of power and emolument, and divide them with each other, would not hesitate still to unite and continue in undisguised and unblushing corruption on the rights of the people, that they might be able to perpetuate to themselves those offices of power and profit, which constitute all the life of their party organization. "Come over and help us" is their battle cry.

Great Natural Curiosity. The crier last evening was crying about the streets—"A great natural curiosity on exhibition at Democratic headquarters!" Whether anything could be more natural, or more curious, than the exhibition of stupidity and giving to a small minority, less than a third of the whole, the absolute control of the whole party, we think could not be imagined. Those gentlemen intend to keep it as a memento of their folly.

Good Speaking. The canvass of the minister's land citizens at Huntington Hall, last evening, was largely attended. The meeting was a serious one—the occasion was the discussion of the tyranny and fraud and the spurious drift out some stalwart blows on all parties alike.—The speeches were very able in their kind; and the meeting, called by the Independent Naturalized Citizens' ticket some hundreds of votes.—Our opinion, however, is, that our Irish-American fellow citizens will be wiser to "cast in their lots" with the Whigs, than to create an independent organization whose only effect would be to distract the action of the regular party organizations. "Come over and help us" is our battle cry.

"Recovering from Wine." The editors of the Post are at last restored to their senses, and the names of the Middlesex Senatorial candidates of the regular National, anti-coalition, Bishop-and-Dorr democracy—Bradley, Whitcomb, Colburn, of South Reading; Gotham Brooks, of Medford; Thomas Greenleaf, of Charlestown; Joseph Hosford, of Concord; Enoch Foster, of Tewksbury; Timothy Butterfield, of Tyngsboro'.

The Fire at Spring Lane. It is stated that Messrs. White & Potter's loss by the fire in Boston of Monday night, will amount to $3000 or $4000. They are fully insured in Lowell.

On Dr. Thal General Wilson says he no longer expects to become Governor of Massachusetts, but he no longer expects to be adopted as the new Constitution. A gentlemen from Boston brings the above news.

Fire. A Cotamount, killed in Lee, N. H., on the first of this month, by Wm F. Chapman, while out on a shot gun, and the wound which has been noticed in all the papers, can be seen on Market street, where it is now on exhibition. The ball entered the breast, and came out in the back, a foot in length. The charge which killed him took effect in his eye and entered his brain.—Persons wishing to see the wound, can see him on exhibition. No one should fail to see this stranger in the North States.

If every Whig should attend the Ward meetings to-night.

The Buckwater Chronicle: a narrative of an expedition into the land of Canaan, in Randolph, Va., by "The Clerk of Oxenbridge." With Illustrations from Life, by Strickland. Redfield, New York, 1853. For sale by Watson & Sargeant.

The appearance of this volume is unique and beautiful. The narrative is exceedingly well written, and is highly interesting and romantic in character. It is but fair to call it a very attractive production. The illustrations possess the rare merit of striking originality of conception and great beauty in the execution.

Warren Chandler on Type of Border Life in the Western States—by J. L. McConnel, author of "Talbot and Vernon," "The Glaums," etc. With Illustrations by Darley. Redfield, New York, 1853. For sale by Watson & Sargeant.

This volume has the merit of exquisite typographical execution, elegant illustrations, easy and graceful style, and a thrilling recital of some of the most picturesque and romantic adventures that have ever been produced in illustration of Western life. The chapter on "The Indian Queen of the Pawnee Pass," commencing on the 168th page, may be applied with expressive pertinency to the scenes which were enacted in Kansas during the last summer. It is expressly rich and judicious.

The Greenfield Gazette reminds Secretary Cushing of the case of R. B. Taylor, of Greenfield, who is in the Boston Custom House, who has labored for the coalition during the past three years.

A child of Catholic parents having been chastised by the teacher, and afterwards expelled from school, at South Boston, N. Y., for refusing to study and read the Protestant version of the Bible, an appeal was made to the State Superintendent of Common Schools, and that functionary has just decided that the proceedings of the teacher were unauthorized, and contrary to law. The children can so far as to have the offending parties punished.

ELECTION.....MONDAY, NOV. 14.

Our State Election — "Personal Liberty Bill" — Judge Loring — Gov. Gardner — Rendition of Slaves — Every Man to his Post!

But few hours now remain on the clistress of the Old Bay State will be called upon to exercise that greatest right of the freemen—the election franchise. A most solemn duty is before our party, and before the whole body of the voters of Massachusetts. Our sacred Constitution, the charter of our rights, the guarantee of our immunities, the palladium of our liberties—is violently and recklessly assailed by a band of "swap-and-barter" politicians and spoils-seeking mendicants who seek to lay it in the dust, and to substitute, in the place of the masterpiece of Sewall and Webster and Parsons and Adams, a patch-worked instrument, without a principle for a basis, without an apology for a reason to recommend it to our favor.

This is one part of the plot—to demolish the Constitution!

A second part of the conspiracy planned so amazingly by these "architects of Ruin"—(as Edmund Burke would call them) is to elevate to the Executive chair a mere bilerical wire-puller, who aspires to handle the "executive ribbons," not for the State, not for the people, not in the spirit of an honorable public servant, not in the mind of his constituents, not to the fear of God; but in the spirit of faction, for the good of a party, for the purpose of plunder!!

Citizens of Massachusetts—you have a solemn mission to discharge this unapplly conspiracy.—You have a duty to God, a duty to man, a duty to your country, a duty to posterity, a duty to yourselves and to your children, to prostrate this diabolic project, at once and forever, in the dust! Arise from this plot to triumph, and how can we longer a government by the people—a government by the party—and by party only? Politics are indicted on a live people. "God save the Commonwealth of Massachusetts!"

Arise, then, ye citizens of the old Bay State! Perfect your organization. Unfurl your flags to the winds of heaven. Summon the citizens to your aid, from field, workshop and desk. Call out every interest in your cause. Let your voice be heard in the wake of the retiring sun, and in the dawn of the November morning. Do with your might what your hands find(s) to do. Acquit yourselves like men, and the victory will surely be yours. Peace to the manes of your enemies!

CHARLES R. GOODRICH, Esq., on the NEW CONSTITUTION. No democratic lawyer in Massachusetts stands higher at the bar than Charles R. Goodrich, of Boston. Mr. Goodrich has always been a strong democrat, and still ranks with them; but he cannot support the edicts new assemblies. On the contrary, he has taken the manly upstand it. From a recent speech made in Charlestown, on Saturday evening last, to a meeting of citizens of all parties, we quote as follows:—

Another is the district system. The Senate by districts, and it is an exceedingly good arrangement; but if it is well in relation to the Senate, it is well in relation to the other branch of the General Court. If the district system is the system which the interests of this commonwealth demand, then every just and every portion of it requires the same system to be carried through. But the system as to this is that we have been accustomed to town representation, and the towns have multiplied enormous interests. When the number of towns was small, it was not of so much importance as it now is. The principle upon which town representation was based, was founded upon the right in the "rotten borough system" of representation. Upon its obvious principle it has worked how well it did them. But the principle itself is an erroneous one, and does not agree with the republican theory under which we live, and that is, that each man is equal, every individual equal before the law. It is, therefore, a thorough and great evil that is to be corrected, which we have and should be rejected. It also, as now proposed, makes the Senate districts distinct between town and city—between small towns and large towns. It says in so many words that the towns and the cities are enemies—are inconsistent to constitute a unity. It stood on pre-cisely the same principle when we live in small towns. The speaker resided in a town next to the Legislature of the Commonwealth; and did not believe, aside from the constitution, perhaps, a better place of the interests of Essex and Worcester and Plymouth and Adams, a patch-worked instrument, without a principle for a basis, without an apology for a reason to recommend it to our favor.

A Rare Falsehood. The lying Advertiser, in an article entitled "Speech of Hon. Josiah Minott, asserts that Orestes A. Brownson "was hired and paid" to deliver his recent speech against the odious new Constitution, by "the whigs." This is a willful lie. The man who perpetrated it was in the Hall while Mr. Brownson was speaking, and knows it. "D—n him, what a liar! Why don't they hire him more?"

"Rebuke two stools." In the Ascension of Tuesday last, Father instructed his brief editor, Robinson, to denounce Caleb Cushing; he threw gave vent to the gall and bitterness which his long confined in his bosom and also to the murder of to-day, he appears on the directly opposite side, flattering Caleb, and defending his Demillian. ssinal! We wonder ith what feelings our Mephistopholes will regard his pseudon enemy but present friend.

Hon. Marcus Morton, in his address to his constituents in Taunton, on Friday evening, remarked, but he did not know how to begin to speak to those he had represented so long and so faithfully. In the Administration

DR. MORSE'S INVIGORATING CORDIAL.

A PHENOMENON IN MEDICINE.

PROPHETIC SCORES IN THE HEATHEN PANTHEON, OR CORDIALS.

The English Wonder of the Botanic World.

The Invigorating Blood Cordial introduced into medical practice by the celebrated botanic physician and author, Dr. E. Morse, has for its base an Oriental Herb, first brought to this country from the interior of Africa, by Dr. Morse, whose travels in that country have been enhanced by the medical researches which have resulted in the choice of Nature's remedy, for the cure of

CURE OF NERVOUS DISEASES.

He recognized the vast resources of the vegetable and mineral kingdom and almost miraculous change which it ascertains to the human system, when taken in connection with certain roots and herbs known to the botanic physician, by its tonic, alterative and sedative properties, the soothing and relaxed organizations it set resonant, the blood purified, and the whole train of nervous disorders and symptoms of nervous diseases vanish together instantly, as if by magic. The Indian Doctors of the East Indies, and the savage physicians of the forests of Africa, have long known and used the vegetable remedies, which have given such wonderful results from the superstitious world, and restore it to its natural vigor, and to the full enjoyment of health.

MEDICINAL WONDER!

Of the wonderful effects of this Cordial, a single dose will convince the most skeptical that the value of it cannot be estimated in dollars and cents. Its remedial properties in fact are

BEYOND PRICE AND TO BE ACTION.

Its tonic power when prescribed, as to its cure with cramps, spasms, colic, cholera morbus, dysentery, diarrhœa, sick headache, nervousness, sleeplessness, dizziness, fainting, weakness, &c., is truly wonderful, and in most cases it acts like magic. Its action is upon the nerves, and through them upon the blood, and by its use the most delicate female may be relieved from pain, and restored to health and vigor.

FEMALES.

This distinction is conferred on the fair that it will cure more than nine tenths of a class of very prevalent diseases, termed

Female Complaints,

and which have been the opprobrium of medical art and science for ages. Many of the most eminent physicians of the present day have declared that of almost every other malady to which the human family is heir, there is a remedy or preventive, and that the general and liberal increase of very many incurable diseases, is owing to the fact that the study of medicine has been neglected by the profession, and that the health and welfare of their patients, and in every way wanting the requisite knowledge to treat them successfully. Dr. Morse's CORDIAL REMEDY, IS THE ABSOLUTE personal pro of his most extensive practice, and the most successful remedy ever discovered for the cure of

CONSTITUTIONAL DEBILITY.

All who are afflicted with this disease, should not lose a moment in procuring a bottle of the genial spirits. Loss of vitality, nervousness, sleeplessness, dizziness, fainting, weakness, trembling, universal debility, &c., are the symptoms of this disease, and the various forms of nervous affection, it will prevent, cure and relieve. Persons who are afflicted with any of the above symptoms, will also receive a depression, excitement, &c., accompanied by a sensation of fullness of the head, noises in the ears, sparks of fire before the eyes, dimness of sight, pain in the back, dryness of the skin, eruptions on the face, pimples, blotches, &c., which, if there is any existence to be placed on human testimony, will be entirely removed by its use.

DR. MARCHISI'S UTERINE CATHOLICON.

THE GREATEST DISCOVERY OF THE AGE.

THE CATHOLICON OF MARCHISI is a sovereign remedy for all those painful and dangerous diseases to which the female constitution is subject.

THE CATHOLICON OF MARCHISI is the only known remedy that will cure Chronic Inflammation of the Uterus, Ulceration of the Uterus, Incidental Hemorrhage, Chronic Inflammation of the Ovaries, Prolapsus Uteri, Leucorrhœa or Whites, Retroversion of the Uterus, Anteversion of the Uterus, Irritation of the Neck of the Bladder, Incontinence of Urine, Stricture of the Urethra, Chronic Inflammation of the Bladder, Diseases of the Kidneys, Gravel, Calculus, Dropsy, Suppression of Urine, Pain in the Back, Hips and Loins, Nervousness, Universal Debility, Hysterics, Spasms, Sick Headache, Derangement of the Digestive Organs, Constipation of the Bowels, Piles, Fistula, Stricture of the Rectum, Diseases of the Skin, Scrofula, Mercurial Affections, Rheumatism, Neuralgia, Tic Doloureux, Female Weakness, Sterility, Impotency, Involuntary Discharges, Diseases of the Urinary Organs, Secret Diseases, Affections of the Throat, Nose and Skin, Syphilis, Fever Sores, Ulcers, Tumors, Cancers, Chronic Diseases of whatever nature or kind, and all diseases arising from the use of Mercury, Minerals, Poisons, Impure Blood, &c., &c

simply to begin by altering the Constitution, which at present could scarcely be worse if it would. This would render the majority absolute, and remove all effectual restraint/ whether upon their arbitrary will, directly in contravention of the fundamental ends of constitutional government. The theory of the Constitution is not merely to confer a the majority the power to govern as they see best, but also/ to protect, and to protect the rights of minorities and individuals. But if the Constitution itself be placed under the power of the majority, absolute at their pleasure, minorities and individuals have no constitutional protection, and are at the control of the arbitrary and irresponsible will of the majority. The government is then no longer a constitutional government, but a government of arbitrary will, and therefore a despotism, as decidedly so as that of the Grand Turk.

The Convention was undeniably convened for the purpose of making a simple majority suffice to alter the Constitution. The act conferring a power by a bare majority of the Legislature, a bare majority of the people approving it, and the proposed amendments if adopted, will be adopted only by a bare majority. Hence a bare majority of high party times, and under the influence of selfish demagogues, possessed of the baneful elements of political science, say, when they please, change the fundamental law of the state. Now and I, then, who happen to be in the minority, have no constitutional guaranty; we hold our rights, our property, our conscience, our wives and children, and our lives, at the mercy of any party or body that may happen to rise the time being to be able to command a majority of votes! And this is what a native liberty proposes, keeping up with the spirit of the age! I should believe that the noble old Massachusetts, the mother and nurse of American institutions, has become so dead to her past glory, so forgetful of the free and lofty principles of her fathers, as to consent to be a/ accessible to the humor of republican government as to sanction this base attempt to destroy our liberties by adopting these proposed amendments. I presume myself that something of he/ of his will have to be submitted, and that as she resisted a fourfourer the most attempts of a foreign Atlantic tyrant to enforce her to political slavery, she will be no less prompt and resolute to resist the modern attempts of her own degenerate sons, with unAmerican hearts, and principles, to reduce her to a still more ignoble slavery—the slavery of the mob.

Moreover, the amendments come before us from an illegal and revolutionary body. I have been no opposition as to the abstract right of revolution, but I will say, and I think you will not controvert it, that these amendments are revolutionary in their source, and that we cannot vote for them without exactioning a revolution. The Convention which proposed them was an illegal and unconstitutional body, and therefore a revolutionary body, as much so as the Hartford convention of Rhode Island. The constitution, I grant, may be altered, but not without exactioning a revolution, to reform by any, and in the mode which it itself prescribes. A convention for amending it, unless convened by its authority, is not legal but revolutionary. The convention which framed these amendments was not so convened, but there is no provision in the constitution authorizing a convention of the people for any purpose whatever. The constitutional mode of amending the constitution in most of the States of the Union is by way of a convention of the people, but in Massachusetts another mode was adopted in Massachusetts. The constitution of this State provides another mode for altering it upon amendment, and it is only in that method that it can be amended without revolution. I have, then, done my duty, as I have the highest legal authority in the Commonwealth for my assertion, and I have done my duty, and I have no reason to believe truly said, that more than one of our eminent jurists refused to accept seat in the Convention on the ground that they held it as a body illegally convened, and, therefore, a revolutionary body

---

GOVERNOR MORTON ON THE NEW CONSTITUTION. In his recent speech at Taunton, alluding to the mode in which the new constitution was submitted to the people, Hon. Marcus Morton said:

> The amendments were appointed to put in order the amendments which had been adopted, and the constitution of the people, and to submit them in the manner in which they should be submitted to the people. They grouped together the whole matter of the proposed amendments in one proposition and said to the people shall such be or not be made a part of the Constitution? Shall the unimportant matters to be acted on separately. He would ask if there was any reason in this. Why was it done? It was so arranged for the purpose of having the whole thing carried through. It could not be denied—and some of the committee did not attempt to deny it. One member declared, "you need not attempt to deny it, everybody will see through it. The less skin is not half long enough to cover the other animal." They are hardly willing to meet this manfully and to vote on the materiality of it. One of their number, a/ spokesman, whose speech in Faneuil Hall is reported in the Post, and who, I suppose will be/ over the greatest number in Massachusetts—he did not, I think vote. However, he declared he/ should have been glad to have seen some/ of the amendments adopted, and tried to bring about that result." There is a little history about this matter. It is a fact that before it came to the final issue, that gentleman made a speech in favor of having the amendments submitted separately. During the first part of the proceedings in Convention, we held out for submitting it in any other way. But party spirit sometimes makes queer work, and sometimes incurs the necessity. It so happened that he was on that committee with gentlemen/ to settle the manner in which it should be submitted. The committee consisted of 12. They were six on one side and six on the other, and it is a fact that every question this gentleman who now looks so grieved that the proposition were not submitted separately, voted to put them together.
>
> Look at the nature of this proposition. Here are some things which one man likes and some which another dislikes. Are the people afraid to say what they like and what they dislike, or are they treated like children, and obliged to take what is held out to them? Does not this operate as a confusion of terms, and also as a/ bribe? Have the representatives of the people any right to bind up the people in this/ way, and constrain them to take what they do not like? He would respect what he said in the Convention, and which to some seemed a hard thing—namely, that he belonging to a religious/ you may have a church if you will put a gun/ thing between/ handle of it; or like saying to a friend of education, you may have a female school if you will put a bottle of smallpox on each side b—but you shall not have one without the other." I told them that I would let the church and the school go rather than to get them at such a sacrifice. I would be loth to be party/ for a proposition based upon injustice; and I hope the people will adopt that language, and when they look at the matter in the light of wisdom, they will do as the Convention directed our confidence, and we will reject the whole of its proceedings.

☞ The Lowell Advertiser, which has been in a very shaky condition for the last week, comes out this morning and justifies Caleb Cushing's interference with the local politics of Massachusetts. What next? Will Caleb Cushing a Postmaster will do to retain his office. If we were poor as Fisher A. Hildreth, we might perhaps be as mean as he.

The above paragraph is from the American—a paper which has never been on terms of courteous intimacy with Hildreth and all his dickerings, but which, nevertheless, we understand, consigny to our previous statement, is now owned/ exclusively by Fisher himself. Truly, poor Fisher is reminded in the league of his friends.

of giving the pay to the State as well as the fact. This throws the whole judicial power into the hands of the party, and reduces the Judge to little more than a mere Chairman, whose duty it is only to preserve order.

I have no interest to pursue this subject any further. But consider what would be our condition if these proposed amendments should be adopted. A solemn sanction will be given to the principle, that a single majority in committee is also the Constitution when and as they please, and also that they may do it not merely without, but in defiance of a constitutional provision. The provisions, then, proposed to be put in operation for the future direction of the Commissioners, even if adopted, will bind the majority no more than the present, and the Constitution is therefore virtually abrogated, and constitutional government abandoned. The majority for the time being may govern as it pleases.

Add to this the destruction of the independent judiciary and the conversion of the judges into politicians and demagogues, and the clothing of any twelve irresponsible jurors, chosen by lot, with the supreme judicial authority of the Commonwealth, and tell me what protection can we count on for justice, for liberty, for vested rights, for property or for life. The Judge, if even allowed, may be a judicial function that is transferred to the jury, who know little of law, and who, we may be sure, will more often find the law in favor of one they wish to condemn, or against one they would acquit. We should henceforth be governed not by law, but by the will of an irresponsible and ever-changing jury. Is it to be supposed not according to law, but according to the passions or the prejudices of jurors. The law will not govern, but the mob, led on by the art and skill of lawyers, will govern in irresponsible demagogueism. That, sir, is what the adoption of the proposed amendments will prepare the way for. They are directly opposed to the principles and end of constitutional government, and if I had the public confidence as I once had it, and when I deserved it far less than I do now, I would oppose them to the utmost of my feeble citizens, day and night, till election time.

Forgive me the warmth with which I speak, for I feel deeply. I regret my inability, for having trespassed so long on your time, and believe me,

Very truly and sincerely yours,
O. A. BROWNSON

ELECTION.....MONDAY, NOV. 14.

Up, Whigs, and At Them!

Whigs of Massachusetts! Three great duties are before you—to *defeat* the NEW COALITION by 20,000 majority! to *re-instate* the COALITION at once and forever!—to elect WASHBURN AND PLUNKETT Governor and Lieutenant Governor of Massachusetts!! All this can be done. Rally then to the work like Men! *Defeat* the Odious New Constitution! *Rebuke* General Wilson!—*Annihilate* the *Spirit Coalition*. *Elect* Washburn and Plunkett! Massachusetts spirit every man to do his *duty!*

Whigs of Middlesex! Rally at the Polls on Monday next! Rally, and clear your Senatorial nominees! They are worthy of your most earnest support!

Whigs of Lowell! Rally on Monday to your duty! Charge your votes with the triumphant election of all your Representatives! This is important,—*most important*—because the House will in all probability elect the Governor. Vote the Whig ticket! Vote nothing else! All tickets not purely and wholly *Whig*, are spurious! Rally again and again! You can carry Lowell by 1000 majority against the *new constitution!* You can elect your Senator and your Representatives at the *first trial*, if you will! Be at the Polls early! Vote by Secret Ballot against the *New Constitution!* Rally early and late! Massachusetts expects every man to do his duty!

One State Secretary—Prospect of a Splendid Old Whig Victory—Glad Tidings from the South!

The whigs of Lowell are "all alive;" and our party in Massachusetts was never more permeated with energy and enthusiasm than it is to-day. Could we see their country from trailmen and from; called to redeem Massachusetts from the unholy clutches of ruthless [illegible]; having a "mission" to perform "for God" to prosecute the rebel which has ridden us so long, emboldening conspirators headed by our candidate; with our God as Author of events all,—the whigs of the Old Bay State are presented with one of the most glorious, inspiring triumphs that have ever illustrated the career of the party in Massachusetts!

It would not be surprising if the new constitution was defeated by 20,000 majority; should we wonder, were Washburn and Plunkett elected by the people? Even if we consider the multiplicity of [illegible] issues which have distracted the minds of people much as they have, we cannot look the [illegible] of the defeat of the new constitution and our party triumphant without the most joyful emotions.

Even the South is glad! We have received among the opponents of the odious new constitution. Antagonisms are subdued; not one "opposing interest" has manifested itself during the whole course of the contest. The simple, truth, which at one time paralyzed the action of the party, has entirely disappeared; every man seems profoundly sensible of the high personal responsibility of his position, and no man now asks but that he may go at once to battle, and "to victory!

The news from abroad is of the most encouraging character. From all quarters of the State we have the presentiment of success. Everywhere in the abiding confidence, the energy of victory will perch on the banners of the whigs. We repeat, then, once more, to the towns—let them do their duty, and we are invincible. Rally, then, in the "rural districts." Rally again and again. Let no moment be lost; no means left unemployed. Put forth every energy. Let your battle-words be, Lowell, Andover and Barnstable, now and forever!

Our Representative Candidates.

At the head of our columns stand the names of our candidates for Representatives to the General Court. We shall indulge in no fulsome laudations of them in anticipation; such would be wholly out of place. We think we can say with truth that the nomination of each and all of these gentlemen, was made solely "nomination fit to be made"—a nomination worthy of our candid and undivided support. That each of these candidates is pledged to be devoted to the whig interest, none will hesitate to affirm. On all *political* questions, all may be considered invulnerable. We directly opposed to the principles and end of constitutional government, and if I had the public confidence as I once had it, and when I deserved it far less than I do now, I would oppose them to the utmost of my feeble citizens, day and night, till election time.

CITY AFFAIRS.

☞ 17 *RALLY TO-NIGHT.* Whigs of Lowell, every man, at Huntington Hall—when you will hear good whig speeches from Hon. Otis P. Lord, and others. Rally at 7 o'clock.

☞ 15 YOUR NAME ON THE CHECK LIST!☜ Every Whig voter should look for himself, and know that his name is on the list. This is the last day for adding and correcting.

Sermon on Temperance. The Rev. M. R. Cutler, who has been eminently and successfully engaged in efforts to promote the cause of Temperance, will deliver a discourse on the Sabbath Evening, in the Middle Street Church, at 7 o'clock, at the High St. Church, Lowell.

☞ 17 The feeder of a ten dollar New York note, and who can define New Jersey mud, may also find the owner and a reward at this office.

Lyceum Lecture. The lecture of Timothy Bigelow, Esq., of Boston, which has been delivered in several towns and cities within a few weeks past, has been highly complimented by the Boston papers. We think that some society of the Lyceums of Lowell might do itself credit by inviting Mr Bigelow to repeat his lecture here. As an orator, Mr Bigelow stands deservedly high. His last Fourth of July oration was handsomely complimented by the Hon. Senator Everett.

Police Court—*Saturday, Nov.* 12. Burgess Newport, for assault and battery, fined $5 and costs. Thomas Hughes, for the same offence, was sent three months to the Work-house.

Coalition Ticket—Last Rites. The Lowell coalitionists, after a stormy time of it, last night, "revised and corrected" their Representative ticket; and the list now stands as follows:

Ward One.

Dawes Melvin, John Green, John Fox, 2d, Alpheus Richardson, Hollard Wood, Shubael P. Adams, John Nesmith, E. Barney, A. M. Hadley.

P. S. The latest intelligence is, that Wm. H. Andrews takes the place of E. A. Alger, Esq., Capt. Hollard of Adam Truman.

Loss at H. The elegant silver service presented to Mr. Babcock, the retiring Agent of the Boston Steamboat, on the Merrimack, is now on view at the store of Messrs. Bailey & Co., Washington street, Boston. The article have been got up in a style that reflects credit upon Reeborn's establishment.

Jons Greer. Having concluded to drop the name of Mr Maguire forever, and yet being desirous to pay for his tickets by hauling up an Irish Roman Catholic candidate, the hollow hypocrites of the coalition stripe have nominated John Greer—supposing that they came to catch the votes of our Irish-American fellow-citizens! The game is too transparent for the Irish to be taken in. Greer is not an Irishman by birth. The independent naturalized citizens have a ticket of their own! Now, Fisher, what trick next?

☞ 7 Part IV. of the Practical Draughtsman's Book of Industrial Designs has been received by F. Parker, Esq., Wentworth's Building.

Ten Tabes. As we stated on Thursday, a few extensive, friends of the Maine Law, have determined to support temperately and [illegible] Maine Law Senatorial ticket," leaving the success of four of the coalition candidates, and the defeat of the remainder, entirely to the personal considerations. Now the fact that no regular whig candidate is put on this ticket is a very good fact to satisfy some of our whig Rattle-Hillroth boy to catch votes. Let us fairly understand the matter. Let the whigs be honest men to themselves into the support of the coalition candidates by the vain hope of obtaining the small portion of [illegible] from Adams

ready-made coffin warehouse. This is a dance house—a low dance house—where prostitutes, who sleep in the house, fast effect mine by those irreproachable means. In one corner of two dissipated bungs, who appear to be a species of machine, for their locos are void of character and their motions are simply mechanical. They are swing away on two sing dissipated violins—the one playing something like Yankee's Hornpipe, and the other some other tune, strange, however as a second to it. The ladies of the party are quite youthful looking—not a dress about sixteen to twenty-one years. Their "style" is somewhat peculiar. One wears a white bonnet with a pound Grecian outline appears to have had some little difference with her last lover, a gentleman who must have been addicted to striking argument; for a circle of black, about 4 in inch and a-quarter round her eye, is of the deepest jet black. She, however, is not alone in these fist-souvenirs, for another young lady—and she is a pretty one, too, has a black eye (pugilistically speaking)—a bruised cheek and a cut lip. They dance away, however, and dance and shuffle in the most approved up and down, and round-and round. The music-machines in the corner work away in a manner that would do honor to the east tune of the Crystal Palace—and one lady whom we were regarding, being composed of a red jacket to the knees, and copious blouse trowsers—cocked up to the hip and caked as if we would not trust her to some duet. There is something in the voice of feminine innocence that seems borne from the most distant corner of Heaven. But oh, when a woman can neither laugh nor blush, how her sense is dulled—up the chords of her tones, and turned them into the reaping echoes of ensured despair! Sweet statement—dragging herself a little out of the corner—if not yoking at the awful hour of midnight the wrath of God on her soul if it was good! Good—good—to turn and blast the delicate tissue of the gifted by remembrance—the possibly sore throat—the rounded bosom, life of maternal love—the low-falling tone—the celestial mantled eye!

ELECTION.....MONDAY, NOV. 14.

Butler on Cowley—A Challenge!

We were not present at the new depot on Saturday evening, during the speech of "Kurnal Beetler," having "better fish to fry." But we are informed by a gentleman who was present, that this notorious demagogue laid himself out at length on hearer's laugh, in a most humorous and characteristic diatribe on the character of Mr Charles Cowley, and on the Lowell Courier. Among the arguments used by this bawling party hack, were, *"star line, Charles Cowley!" "that father of his, Cowley!" "that lying sheet, the Courier, which has been lying all the fall," &c. &c.*

These expressions having been used in reference to the incident related in the Courier of Saturday, we will now relate the circumstances of that incident as we learned them from an eye-witness. The scene was on board the cars, coming from Boston to Lowell. The person present with Butler was a man who, not having read the new Constitution, but having heard it commended, and began to debate with himself whether he should not vote for the new instrument. Butler asked him in a tone of intimacy, "Shan't you vote for the new Constitution?" The reply was, "I don't know; I haven't thought much about it." Butler then exhorted—"Do you want to see the Democrats beat Appleton?"—No," replied the gentleman interrogated. "Then," said Butler, "you had better vote for the new Constitution; *for if this isn't adopted, the Irish will have everything their own way in the State!*" Such is the substance of the conversation between Butler and a gentleman, on the reasons why Massachusetts should adopt the new Constitution. Such were the arguments by which Butler, "the friend of the Colt," "the champion of the workingmen," "the advocate of the reputation of the Mount Benedict Convent," "the defender of the people," attempted to catch a vote for the new Constitution. The facts are given us by the gentleman himself. An affidavit can be given of their truth if necessary.—Then it will be seen that the Courier does not affix without grounds for its affirmation. If Mr Butler asks us to verify, by the help of the gentleman from whom we gather these facts, we are ready to verify. So, "Come on, Macduff!"

As for Mr Cowley, personally, he has no special quarrel with Mr Butler. He has seldom spoken, or written, disrespectfully either of Mr Butler or of any other gentleman in politics like it. Mr Cowley himself, he seeks to treat all others not only with the common courtesy/politeness of debate, but with the most prudent display of gentlemanly courtesy. He has no very exalted estimate of the character and calibre of Mr Butler. He regards him as a small man, a small politician, a small politician—singular as the combination may appear—a very small politician indeed.

While, however, he would seek to live on kind terms with Mr Butler as well as with all the nations of the earth, and do our *al mans* kind," he would say to Mr Butler, that, however desirable he may allude to Mr Cowley as "that lying, Charles Cowley" when in the new depot, surrounded by his body-guard of hired ballots, yet *he dasn't not dare* Mr Cowley's room, in the Courier Building, and *style him a liar there!*

It seems that strange changes have come o'er the spirit of Mr Butler's dream, within a few weeks; for we heard him in a speech in a recent canvass within the week, whose light he lauded to Mr Cowley as "a very reputable gentleman personally, but a man who wrote for mere political effect." Why then should Butler now brand him as a "liar" whom he so lately thought "a very reputable gentleman personally?" What has given him the power so suddenly, that he now "whistles from the other side of his mouth?"

We have closely paid some attention to the political manifestoes that we intended, or that we deserve; yet we can but pause to notice another "moment" which this liber-eyed density has recently turned. In the first speech which he made after the adjournment of the Constitutional Convention, Butler said he liked what the new Constitution provided with regard to *sectarian schools*; he objected to all sectarian schools and to all sectarian colleges. But in his ranting speech, or mode of speech, at the new depot, on the new depot, this time-serving truckler said he should vote against the proposition with regard to sectarian schools, and reiterated "all Catholics" to do the same!

To conclude, then, we advise Mr Butler, that if he did use the opprobrious epithet *"that liar, Charles Cowley,"* and will call at Mr Cowley's room and reconfirm the term, he is not only a smoking blockhead, but a contemptible and despised coward! Now, Butler, on which horn will you hang?

Onward the Battle!

The work goes bravely on. Not a man in Lowell but is "all alive" to duty. During the few hours that remain before the closing of the polls, let every man devote himself solely to his country's service. Go out, all! Leave your business and your pleasure! Go up from your counting-rooms, from desk! Let no man remain at home through coldness or supineness! All shoulders to the wheel in earnest!

If Whigs are true to their duty—if no treachery lurks in the hearts or the votes of the voice of the past, the present and the future, is heeded—all will be safe. There is every present state of things, a remembrance of our territorial and Representative tickets. The new Constitution will certainly be adopted in this city. All are against it—Whigs, National Democrats, Abolitionist Democrats, Abolitionists, Temperance men, Naturalized citizens!

Let no man remain at home through coldness or supineness! All shoulders to the wheel in earnest!

There is every present state of things, a remembrance of our territorial and Representative tickets. The new Constitution will certainly be adopted in this city. All are against it—Whigs, National Democrats, Abolitionist Democrats, Abolitionists, Temperance men, Naturalized citizens!

It is too late now for argument or expostulation. Action, and not argument, will do it now. Not a paragraph—can alone now avail. To the work, then, Whigs. Every man for himself, and God for us all!

Mind no Coalition Lies.

Our opponents are hard to be caught by all manner of falsehoods—hood them not. Mind your own party—your own business—let no trick seize you. Forward the column!

Repeaters, Vote the Whig Ticket. You have nothing to expect from the coalition; you cannot possibly elect your own independent ticket; therefore vote the Whig ticket, and by your cause with the liberal whig party. All hands to the polls. Vote the Whig regular, unlimited whig ticket, and nothing else.

Butler telling them how they must vote! Butler closed his delectable harangue, Saturday night, by telling his hearers how they MUST vote. He delivered his orders by words of command, as to his Regiment on the Muster field. We reckon the demagogue will hear of new depot, surrounded by his body-guard of hired ballots, yet *he dasn't not dare* say Mr Cowley's room, in the Courier Building, not style him a liar there!

It seems that strange changes have come o'er the spirit of Mr Butler's dream, within a few weeks; for we heard him in a speech in a recent canvass within the week, whose light he lauded to Mr Cowley as "a very reputable gentleman personally, but a man who wrote for mere political effect." CITY MATTERS.

Up, Whigs, and At Them!

TO THE POLLS!

To the Polls! to the polls!! If there be a whig in Lowell who is not already bestirring himself, we call upon him to put on his hat and coat and start at once. Every man is wanted to stand by the good old ship of State in this her day of peril. Let every one, then, consider himself a member of a RALLYING COMMITTEE OF THE WHOLE, whose duty it is to ELECT TEN WHIG REPRESENTATIVES, and give an united

to the *Coalition* PARTY OF CORRUPTION. Every man, then,

TO THE POLLS!!

A Tribute to Departed Merit. The members of the bar in Lowell held a meeting on Saturday afternoon, at the Police Court Room, to take into consideration the death of Hon. Joseph Locke, formerly Justice of the Lowell Police Court. Judge Crosby of the Police Court, was called to the chair, and W. P. Webster, Esq., was chosen Secretary. A series of resolutions in testimony to the high moral worth of the deceased, was adopted; and several gentlemen, members of the bar, made brief and appropriate addresses. It was resolved, that the bar attend the funeral of the deceased in a body. Funeral this P. M.

Sentence. At the Whig caucus on Saturday evening, in Huntington Hall, Hon. Linus Child, of Lowell, and Otis P. Lord, Esq., of Salem, were nominated by acclamation as the Whig candidates for the Senate, and Hon. Levi Chamberlain, of Lowell, to the Executive Council.

Whig Meetings. Election. The returns of the Secretary of State, so far as received, show a majority of about 10,000 for the battle cry of "no coalition" in the contest over of its proposition. Vote no, and defeat it forever. God save the Commonwealth of Massachusetts!

A Penitentiary Fool." A certain officious contemporary having undertaken to instruct Father McDermott how he should vote, and influence his people to vote, on the proposition to amend, and having proved that the annoyance became intolerable—the Reverend gentleman finally shook him off with a emphatic declaration that his tormentor was a "conservative fool!" The sentence going through the Catholic Church, was responded to by his "conservative energies" to renew his proselyting labors.

Be Not Deceived or Flattered! Let the Temperance men remember that the Maine Law is safe. Vote the regular whig ticket straight. Listen not to the lies of the liberal whig-rum-democracy. Remember that the Maine Law is safe. Fear not for that. Cut no man's throat. Vote an honest, undivided ticket. Let every man do his duty.

The Lowell American, speaking of the Whig ticket for Representatives, says it "cannot stand by long enough to be knocked down." It is weaker than Tecumseh ever was. Well, we can tell the American that a portion of the coalition ticket is as much stronger than Tecumseh as a complete interdict of new rum can make it.

GENERAL SUMMARY.

☞ Do not forget that vote against the NEW CONSTITUTION must be put in Electoral Envelopes, that cannot be identified.

Cause Coming in sprout. The abolitionized democracy of Ward four hung their pennies Monday night, at the new depot, this time-serving truckler said he should vote against the proposition with regard to sectarian schools, and reiterated "all Catholics" to do the same!

To conclude, then, we advise Mr Butler, that if he did use the opprobrious epithet *"that liar, Charles Cowley,"* and will call at Mr Cowley's room and reconfirm the term, he is not only a smoking blockhead, but a contemptible and despised coward! Now, Butler, on which horn will you hang?

The Tomb-like Procession of the abolitionized Democrats, on Saturday evening, was a most pitiable failure. Not more than one hundred, including boys, could be mustered on such occasion, could be got together to march through the city with their horses and wagons, new and then sending up an humble rocket to beguile the dankness of the horizon.

Lawrence. We learn that the whigs of Lawrence on Friday night, with great unanimity, selected the following ticket for candidates for Representatives:—Amos Bryant, John A. Goodwin and T. T. Osborn. These gentlemen are well known to the citizens of Lawrence, as correct, active and reliable whigs.

Colonel Benedict. We are happy to learn from the Atlas, that Wm. Schouler, Esq., formerly editor of the Lowell Courier, and more recently editor of the Boston Atlas, has recently purchased an interest in the Cincinnati Gazette, and will assume the editorial charge of the paper. Let no man remain at home through coldness or supineness! All shoulders to the wheel in earnest!

If Whigs are true to their duty—if no treachery lurks in the hearts or the votes of the voice of the past, the present and the future, is heeded—all will be safe. There is every present state of things, a remembrance of our territorial and Representative tickets. The new Constitution will certainly be adopted in this city. All are against it—Whigs, National Democrats, Abolitionist Democrats, Abolitionists, Temperance men, Naturalized citizens!

THE ELECTION RETURNS.

Glorious Triumph of the Whig Party!

THE COALITION CONSTITUTION DEFEATED!

MASSACHUSETTS IS REDEEMED.

The election is passed. The Coalition has met a Waterloo defeat. The new pamphlet which was mocked with the name of *Constitution* is dead, damned and forgotten. The election of Governor will devolve on the Legislature. The House is certainly Whig. Our party has won one of the most brilliant victories recorded in political history. The bribe offered to the "rural districts" has been generously and magnanimously rejected; the small towns have "covered themselves with glory." Our National Democratic friends have "deserved well of their country." The best of feeling pervades the whole party. Hurrahs are going up from all the wind-pipes in the whig party.

We have not elected our Governor; but we have rendered his election by the Legislature certain. We have achieved "glory enough for one day." We may now ask, in the words of Shubael Adams, "*Whose bottom's up now?*"

The Boston Times says—"No Illumination of Democratic Head Quarters." It thinks the odious new constitution was "*Not radical enough!!!*"

But to the returns. In 291 towns, the majority against the new constitution is 4,859.—This number will probably be increased to 5000.

The result as regards the Legislature is highly gratifying. The coalition tickets, in all but one or two counties, are defeated. So far as heard from, says the Boston Journal, 10 whigs and 9 opposition are elected to the Senate.—There are 20 vacancies and 1 to be heard from.

The House shows a grand whig gain. So far as heard from the whigs have 67 majority—leaving 190 to elect. Last year at the first trial there were 250 to elect—leaving the whigs relatively 50 better than last year. This of course secures the Senate and the State officers, and Emory Washburn will be our next Governor.

On the popular vote, Washburn, the whig candidate, has a plurality of twenty-five thousand, but lacks about nine thousand votes of an election.

Last year Clifford wanted fourteen thousand of an election. Net whig gain *five thousand*.

The free soil candidate, Gen. Wilson, has lost between seven and eight thousand votes, compared with last year. The *free soil* organ predicted that Wilson's vote would be 40,000, and it is but about 28,000.

Here is a synopsis of the returns from the several counties.

The People's Victory. Of the victory of yesterday, the Atlas most justly observes:—"We cannot claim this as a party triumph, for the votes show that it is a popular, and not a party verdict. We rejoice in it as citizens of Massachusetts. We rejoice that there is yet a majority of her people worthy of her past reputation for integrity, justice, and a regard for the true principles of Democracy. If changes in our State Constitution are desirable, and far be it from us to dispute it; if the people desire the introduction of single Senatorial and Representative Districts, elections by a plurality, or any other alterations of the instrument, let us now have them in the manner provided by the Constitution itself, and let us have such alteration only as the people have themselves indicated, and not those merely which may subserve the ends of the coalition faction.

Whigs, Be Active Still! Don't lay aside the harness. There are yet *one hundred and ninety vacancies*. If you are active, vigilant, united and firm, you can elect as many as your opponents—and our present majority of fifty-seven will be maintained. Elect Whigs wherever you can. Be on your guard, and Old Massachusetts is safe. Give no encouragement to your opponents, who still hope to secure the control of the Legislature. Be vigilant!

Untrue. The lying Herald says that "the editor of the Courier is challenging B. F. Butler into his sanctum to fight! He says if he comes he is a blackguard and brave, and says if he don't come he's a blackguard and a coward. What's Butler to do?"

It would be expecting too much from so monstrous a falsifier as the editor of the Herald, to ask him to retract this gross, palpable, wilful and lying slander. If he was a gentleman we might feel indignant enough to visit him with a cow-hide; as he is not, he may *lie with impunity*.

☞ The informant of "Algoma," of the New York Herald, *alias* C. C. Hazewell, of the Boston Times, who stated that the Lowell Advertiser "has run up the hunker ticket for Senators in Middlesex county," was mistaken.—The Advertiser, whose proprietor, Hildreth, was, as "Algoma," well says, "the grand-father—as Henry Wilson was the father—of the coalition," has no candidates. Since the missive of Cushing, the Advertiser has been neutral in politics and religion." "Algoma" is also mistaken in saying that "there is to be no coalition ticket formed in Lowell for Representatives." He ought to have known that there was a coalition ticket formed here for Representatives.

Whig Triumph in the New York Election! The Tribune figures the result of the recent election as follows:

Total vote estimated—Whig, 158,000; Hard, 95,000; Soft, 97,000.

In round numbers the Senate stands—Whigs 22; Hards, 5; Softs, 2; not decided, 3. The Assembly—Whigs, 80; Hards, 28; Softs 20; Free Democrats, 2.

The Tribune believes that not less than 20 of the 32 Senators, and of the 128 Assemblymen, are in favor of the speedy enactment of the Maine Law.

Santa Anna's Despotism—Great Robbery. A letter from Washington states that M. de la Rosa, formerly Mexican Minister to the United States, and General Robles, late Mexican Minister of War, had both been shot near the northern boundary of the State, by order of Santa Anna.

A New Orleans paper, received here, states that Robles was at Rome, on his way to New Orleans. He had been banished to Monclovia, in the State of Coahuila, and sent off under military escort, the commandant of which was furnished with sealed orders to shoot Robles on arriving at the spot designated. Having learned the fact while proceeding on the journey, he seized an opportunity, and effected his escape.

Two boxes, containing $50,000 worth of gold dust, consigned to the American Ex. Bank, were robbed of their contents while on the way from California in the last steamer, and filled with stones and shot. No clue has been obtained of the robbers.

CITY MATTERS.

THE VOTE OF LOWELL.

The Whigs have done nobly in this city;—for, though they have not elected their Representatives, they have a handsome plurality, and have badly beaten the Coalition. Lowell is no longer to be *misrepresented* in the Legislature. We will elect TEN GOOD WHIGS at the next trial. Below are the figures:

Vote on the Constitution.

Question 1—Yeas, 2034 ... Nays, 2151 [illegible]

Shocking and Fatal Accident. A young man, named Bartholomew Pearson, about 17 years old, at work in the Lowell Machine Shop, was this forenoon so shockingly mangled by being caught by a belt and drawn over the main shafting, that he died in a few minutes.

A Prodigy. Miss Oldfield, the little female drummer, not inaptly called the "American Mocking Bird," is a very remarkable little personage, and performs with astonishing proficiency. She will be here Thursday evening next. See advertisement.

Tribute to Departed Worth. The meeting of the bar on Saturday last, to which we alluded yesterday, called on the occasion of the death of Hon. Joseph Locke, formerly Judge of the Lowell Police Court, was called to order by Hon. Tappan Wentworth, and on motion of L. S. Morse, Esq., the Hon. Nathan Crosby was appointed Chairman, and William P. Webster, Esq., Secretary.

Daniel S. Richardson, Esq., submitted the following resolutions, which on motion of the Hon. Josiah G. Abbott, were unanimously adopted:

Resolved, That it is with deep regret, that we have heard of the death of the Hon. Joseph Locke, a member of the Bar, and late Justice of the Lowell Police Court.

Resolved, That we find consolation in this sad event, in the remembrance that the deceased, at the bar as well as on the bench, by his integrity, and professional ability, never failed to command the uniform respect of the community in which he dwelt, and that he only laid down his life at the end of a long and honored career.

Resolved, That we tender to his relations our friendly and sincere sympathies in their affliction, and that the Secretary transmit to the relatives of the deceased, a copy of these resolutions.

During the passage of the above resolution Judge Crosby remarked that—

In connection with the character of Judge Locke, it may not be improper on this occasion to call to mind his college classmates, as illustrative of his early mental training. Most of his class have passed away—five having deceased since the class-meeting at Dartmouth in 1847, upon the *fiftieth* anniversary of their graduation. Judge Locke graduated at Dartmouth College in 1797, in a class of thirty-one members. It has so happened that I have been personally acquainted with an unusual number of this class. In my boyhood, James Otis Freeman, of this class practised law in my native town. He was the first lawyer I ever saw or knew; and such were his personal charms, his elegance of manners, bland and gentlemanly carriage, that I thought lawyers were a different race of men from the farmers about me. He was a talented man, an able lawyer, and an eloquent advocate. He was a man of wit and repartee, and well fitted to associate with Hale, Moody, Crosby, Woodman, and other members of the Strafford Bar of that early day. Peculiar personal troubles turned him from the honorable strife of the profession, and brought him to an early grave in 1815.

Parker Noyes, Esq., who spent a life of diligent service in our profession, another member of this class, died in Franklin, N. H., about a year and a half since. I had long known him; commenced the practise of law near him, and found myself a learner at his feet in causes with and against each other. He was an accurate and learned lawyer, a safe adviser, an honorable practitioner, a good citizen and valuable friend. His door was next to Judge Webster's, in Salisbury, and his farm lay along side of the New Hampshire homestead of our lamented and distinguished Webster. Mr Noyes, although in constant intercourse with Mr Webster, and possessed of strong powers, never sought public office or involved himself in politics. He lived a remarkably quiet life. Professional business sought him, and he performed it with all his ability and carefulness, apparently as much from duty as from its emoluments. He was a Massachusetts man, but like other young men of his day, planted himself in a new settlement to grow up with the country around him. He lived like our now lamented Judge Locke, to a ripe old age.

The late John Ham, Esq., of Gilmanton, N. H., was another member of Judge Locke's class. An industrious lawyer and an honorable man. Mr Ham was very much respected and beloved by the Strafford Bar. He was gentlemanly, social and amusing. His fees passed away as fast as received. He never learned the art of saving up money. He in fact seemed more inclined to do business than to get his pay for it when done. He had a too large and open heart for a large purse. The poor, the widow and orphan had freely as good law as he could give for early thanks in pay.—Mr Ham died when he had spent his professional life, in 1837.

Hon. William B. Bannister, who within a few months departed this life in Newburyport, was also a member of this class. He was an educated lawyer, but many years since left the profession and became a merchant. He was a man of bland manners, of great respectability, moral influence and religious character—a man of puritan zeal and puritan stamp—a man of wealth and benevolence—a man who wished to do much good, and whose zeal was according to knowledge.

Mr Kingsbury, another member, and a lawyer, for many years Register of Deeds in Grafton County, now a District Clerk in New York, is a gentleman of marked ability, integrity and courtesy.

Brother Jacob W. Gaw, a respectable lawyer and friend, in our own neighborhood, was also a member of this class. It furnished several Physicians, of whom Dr. Adams of Keene, N. H., still lives the honored and beloved Physician. Two of the class were members of Congress and four were Clergymen.

Brethren of the Bar: I have thus at a moment given my reminiscences of Judge Locke's class. We can well understand that his early training, with such competitors and associates, had much to do in forming the marked outlines of his character. As a man, a lawyer, and a magistrate, I need not speak. He was a man of the old school—learned in the elementary principles—in the mazes of special pleading—in the stern inflexibility of the common law, rather than the more modern beauties of equity. Our professional fathers are fast passing away. If we need to learn more law in the discharge of the duties of the profession now, we may well content ourselves if we successfully imitate their virtues.

Foreign News. The steamer Baltic, with four days later news, arrived at New York yesterday at 12 o'clock.

The Turks have crossed the Danube unmolested. It is rumored that an armistice has been agreed upon. News quite contradictory.

Markets generally are unchanged. Cotton, Breadstuffs, and Provisions are rather lower, if any change.

Paris, Oct. 13. The Austrian government, having ascertained that the cholera has broken out at Jassy, has extended the term of quarantine for travellers from the Danubian Principalities.

The navigation of the Danube is now quite impossible. The last steamer was not allowed to touch at any point on the right bank, and at Rustchuk she was even prevented from delivering her letters for that town.

Prince Stirbey is still in Bucharest.

The Russians are settling into their winter quarters in the vicinity of the town.

Constantinople, Oct. 17. Namik Pasha goes immediately to Paris and London, as Extraordinary Commissioner, to contract a loan for 4,000,000*l* sterling. The armaments are zealously continued.

America only an "Island." We have hitherto been taught that America is a continent. But Capt. McClure has practically demonstrated that *America is only an Island*. He has proved the existence of a north-west passage, and solved the great problem so long moved among geographers and navigators. He has established the fact that a passage exists between the Atlantic and Pacific through the ocean that surrounds the Pole. No ship, it is true, has yet passed through it, and the North-west passage still remains to be made; but the fact of its existence is no longer doubtful. A vessel sailing westward through Barrow and Melville Straits can pass either north or south of the newly discovered Baring Island, and thus reach waters that open through Behring's Strait into the Pacific Ocean. It is doubtful indeed, whether the vast accumulations of ice on that route will ever permit it to be pursued; and it seems quite certain that no practical use of the channel can ever be made. But geographical science gains by the knowledge that the passage exists, and that America is only an island.

GENERAL SUMMARY.

Coalition Love for Irishmen! By the Advertiser's own returns, it will be seen, that John Green, the coalition Irish candidate for Representative, ran *a full hundred below his ticket!!!* When will Irishmen cease to be deluded by the once-dominant, but now-damned coalition?

Afflictive Bereavement. Died at Somerville, on the 10th inst., after an illness of several weeks, Samuel John Bell, eldest son of Dr Luther V. Bell, and a member of the Freshman class of Harvard College, aged 17 years. He was a youth gifted with rare graces of mind and person.

☞ The Manchester Mirror says that Hon. Chas. G. Atherton, who was attacked in the Court Room, in that city, last Thursday morning, with a paralytic shock, has remained insensible since last Saturday morning. All hopes of his recovery are given up.

Murder Trial. John Murphy was arraigned on Tuesday before the Supreme Court now in session at Bristol, for the murder of his wife, and pleaded "not guilty." The case was assigned for trial at a special term of the Court to be holden at Taunton on the 20th of December.

Missing. Christopher Chase of Manchester, N. H., has been missing since January last. He was a cattle dealer, and was formerly in partnership with Sewall Chase, of West Newbury, and was about sixty years of age.

☞ L. D. Geer, of Erie Co., Pa., was robbed in the National Theatre, New York, on Wednesday evening, of a pocket book containing $2500 worth of Buffalo and New York City Railroad stock, a check on the Hollister Bank, Buffalo, for $455,44, and about $200 in money. James Badis has been arrested.

The Missing Man. Mr Hunt, the Sunday Dispatch says, was seen in a theatre in New York one evening last week.

☞ Moses G. Cobb, Esq., whig, was yesterday elected Alderman in Charlestown, in place of Geo. P. Sanger, Esq., resigned.

☞ The Hon. Thomas H. Seymour, U. S. Minister to Prussia, is to leave New York for his mission, in the Liverpool steamer on the 29th inst.

☞ Judge Kellogg, democrat, was on Friday, elected to the U. S. States Senate, in Vermont, over his whig competitor, Judge Collamore, by three majority. This was effected, a la Sumner, by a coalition between the free soilers and democrats, on the ninth ballot.

☞ The trotting horse Prince again beat the pacer Hero, on the Union Course, Long Island, on Friday, in a ten mile race for $6,000. The ten miles were done in 28 minutes and 8 1-4 seconds.

☞ The total amount of California gold deposited at the Philadelphia Mint and its branches, since the first discovery up to Nov. 1st, is $204,000,000.

☞ It is calculated that the postage on the letter sent by the President of the United States to the Emperor of Japan will have cost about $1,246,767 45.

☞ John Van Buren and Collector Redfield are in Washington, doubtless for the purpose of consoling the President and Secretary of State, under the recent afflictive dispensation of politics in the State of New York.

☞ An order from Gen. Scott assigns Gen. Wool to the command of the Eastern Department of the U. S. Army, Gen. Twiggs to the Western, Gen. Persifer F. Smith to the Department of Texas, Gen. Garland to that of New Mexico, and Gen. Ethan A. Hitchcock to the Department of the Pacific.

☞ The Superior Court of New York awarded Richard M. Crane $1750 damages against the Hudson River Railroad Company, for injuries sustained by a collision on the 6th September, 1851, at Peekskill.

☞ During the recess of Congress, the hall of the House of Representatives has undergone a complete and thorough renovation. The hall, committee rooms, &c., have been fitted up with great taste and elegance. Members of Congress are beginning to arrive in Washington, the object of their early appearance doubtless being to secure comfortable quarters for the session.

☞ The Halifax Chronicle says it is understood that the Cunard line of ocean steamers, fearing competition from the line established by the Canadian government between England and the St. Lawrence in summer, and Portland in winter, have decided upon running a branch from Liverpool to Portland all the year round.

John Mitchel. Thomas Francis Meagher, Esq., received a letter on Friday, from Mr P. J. Smith, dated at San Francisco, and stating that John Mitchel and family would leave for New York by the steamer of the 1st of November.

☞ The Mayor of Washington has appointed the 24th inst. for Thanksgiving day.

"Capital" Eloquence. In his recent address at the Virginia State Agricultural Fair, Ex-President Tyler spoke of the effects of concentrated capital, and said:

Much, I admit, has been thus done by individual effort towards the improvement of the soil—but what can individuals, isolated and apart, accomplish to be compared to the result of united action? Look at the concentrated capital in the various concerns of life. It bids the manufacturing establishment arise, and forthwith the loom and shuttle clothe the naked. It penetrates into the bowels of the earth, and the fire blazes in the hearth to expel the frost; the plow subverts the globe, and the axe fells the forest. It speaks to uninhabited places, and towns and villages and cities arise. It builds the engine and lays down the iron, and the car speeds over hill and plain; it calls into requisition the lightning and makes it the letter carrier "from Indus to the Pole." If such be the results of concentrated capital, shall mind have no affinity with mind in this great work of improving the very *matrix* of every comfort known in life? If gold and silver poured into one common coffer, can build up and embellish, can the united efforts of mind produce no similar effects upon the agriculture of a State? Mind, from which sprung the universe—mind, the great attribute emanating from Deity, and which makes man but little lower than the angels, can its scintillations when collected and drawn to a focus, be less in their effects than the metal, which but for it would still lie unbosomed in the earth. And how is this concentration of the mind to be obtained but by association? It is only by intercourse with the world that each man is active and useful. Separate him from his kind and isolate his mind, and he becomes the naked savage, and wild beasts, no more savage than himself, are types of his condition.

M'LANE'S VERMIFUGE.

No remedy ever invented has been so successful as the great worm medicine of Dr M'Lane. All who have used it have been equally astonished and delighted at its wonderful energy and efficacy. To publish all the testimonials in its favor would fill volumes; we must therefore content ourselves with a brief abstract of a few of them.

Japhet C Allen, of Amboy, gave a dose to a child six years old, and it brought away 83 worms. He soon after gave another dose to the same child, which brought away 50 more, making 133 worms in about 10 hours.

Andrew Downing, of Cranbury township, Venango county, gave his child one tea spoonful, and she passed 177 worms. Next morning, on repetition of the dose, she passed 113 more.

Jonathan Houghman, of West Union, Park county, Ia., writes that he is unable to supply the demand, as the people in his neighborhood say, after a trial of the others, that none is equal to Dr M'Lane's Vermifuge.

Messrs D & J W Colton, of Winchester, Ind., happened last spring to get some of this Vermifuge. After selling a few bottles, the demand became so great for it that their stock was soon exhausted. They state that it has produced the best effect wherever used, and is very popular among the people.

☞ Purchasers will be careful to ask for Dr. McLane's Celebrated Vermifuge, and take none else. All other Vermifuges, in comparison, are worthless.

Dr. M'Lane's Liver Pills, also his Celebrated Vermifuge, can now be had at all respectable Drug Stores in the United States and Canada.

FURS! FURS!!

N. PACKARD has opened at 110 Merrimack street, opposite Kirk street, the largest and most magnificent stock of FURS that were ever before offered for sale in any retail store in the United States. And what is better, every article is NEW, having been purchased this season. Every person in want of Rich Furs should fail to visit Packard's store and examine his mammoth stock. He has had some seven years' experience in the Fur business, and may be assured it they purchase Furs at his store they will get good goods and at lower prices than any other store, as he buys larger quantities than any other trader, he buys cheaper, and can afford to sell cheaper.

N. B. Ladies, be sure you are in Packard's store before you purchase your Furs, as some were deceived last season, and bought at another store, thinking they were buying at Packard's, and were made to pay much higher prices for the same quality of goods. oct15

"A SPLENDID REMEDY." Devines' Compound Pitch Losenge, THE WONDER OF THE WORLD, *For Colds, Coughs, Asthma, Consumption, &c.* The Great Remedy is at last discovered! CONSUMPTION CAN BE CURED!!

And Coughs and Colds, the precursors of that fell disease, that so often brings woe to the homes of our land, vanish, as if by magic, before the SOVEREIGN REMEDY! This is that which has so long been sought for, and is in full faith offered to the public as a certain cure for Coughs, Colds, Whooping Cough, Croup, Asthma, Costiveness, and Consumption, and this will in any case where lungs sufficient are left to sustain life, check the ulceration and raise the patient to health. Certificates of cures to be relied on, found in the circulars left with the agents—and the public may be assured we shall never publish any thing we do not believe entitled to the fullest confidence, as truth "and nothing but the truth." When the Losenge is soft like a paste, it is then preferable for use, and acts beneficially on every part of the system and makes strength and vigor take the place of weakness and debility, and is admitted to be the cheapest, most efficient and pleasant remedy ever offered to the afflicted. Try it faithfully. Safe for the Infant or Invalid to use. S. D. FULLER & CO., 8 Tremont Temple, Boston, Proprietors.

NEW SAFETY FLUID LAMPS, INVENTED BY PROF. HORSFORD AND Dr. NICHOLS, of Cambridge and Haverhill. THESE Lamps are different from all others. Made of glass, they are lined on the interior with metal, reflecting light like burnished silver, and forming a complete protection against breakage. It is well known that more accidents have been caused by BREAKING Lamps than by their burning; hence the importance of Lamps such as these. They may fall and the glass be broken to pieces, yet not a drop of Fluid will escape; and by the wire gauze arrangement in the interior they cannot, by any possibility EXPLODE. They are therefore indeed SAFE SAFETY LAMPS, and are such as they are commended for general use, especially to families where there are children. Sold wholesale and retail by W. DEARDEN, at the old Crockery Store, 20 Merrimack st., south side. Nov. 9, 1853.

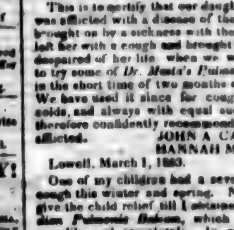
CRAMP AND PAIN KILLER. The world is astonished at the wonderful cures performed by the CRAMP AND PAIN KILLER, prepared by CURTIS & PERKINS. Its equal has never been known for removing pain in all cases; for the cure of spinal complaints, cramp in the limbs and stomach, rheumatism in all its forms, bilious colic, chills and fever, burns, sore throat, and gravel, it is decidedly the best remedy in the world. Evidence of the most wonderful cures ever performed by any medicine are in circulars in the hands of Agents. You may be *positively cure of relief* if you use it. Millions of bottles of this medicine have been sold in New England the past six or eight years. For sale by the above named Agents.

MIDDLESEX ss.—To the Heirs at Law and others interested in the estate of PRENTICE CUSHING, late of Lowell in said county, deceased, Greeting. WHEREAS a certain instrument purporting to be the last will and testament of said deceased, has been presented to me for Probate by N. H. Wright, the Executor therein named,—You are hereby cited to appear at a Court of Probate to be holden at Lowell, in said County, on the first Tuesday of December next, to show cause if any you have, either for or against the same. And the said Executor is ordered to serve this Citation by giving personal notice thereof to all persons interested in said estate, fourteen days at least before said Court, or by publishing the same once a week, three weeks successively, in the Lowell Journal and Courier, printed in Lowell, three weeks successively, the last publication to be three days at least before said Court. Dated at Concord this eighth day of November, A. D. 1853. S. P. P. FAY, Judge of Probate.



For Colds, Coughs, INFLUENZA, HOARSENESS, BRONCHITIS, CROUP, WHOOPING COUGH, ASTHMA, AND FOR ALL DISEASES THAT LEAD TO CONSUMPTION!

REMEMBER that disease of the lungs is usually the result of irritation produced by violent colds. It first shows itself in the form of Catarrhal, Bronchial and Severe Cough, which if allowed to continue ends in disease of the lungs. During the Fall, Winter and Spring, the sudden changes in the weather render the liability of contracting the first stages of the disease greater. Masta's Genuine Indian Pulmonic Balsam is warranted to cure speedily and completely all such cases if used in season. [remainder partly illegible]

In the month of October last, I took a violent cold which settled on my lungs. My side was lame and painful, and had a constant distressing cough. After two or three weeks, finding that the difficulty rather increased than abated, I applied to Dr. Masta, who gave me a bottle of his *Indian Pulmonic Balsam* which cured my cough and side in the space of six or eight days. I consider his Pulmonic Balsam a most excellent article for which it is designed. SAMUEL H. STANWOOD, No. 31 Charles Street, Lowell.

In recommendation of Dr Masta's *Indian Pulmonic Balsam*, I would speak from experience. Having a severe cough this last winter, for five weeks, which the most approved remedies for diseases of the lungs failed to relieve, this preparation gave me immediate relief, and my cough speedily and completely cured by the use of one bottle. WILDER LEEMAN. Lowell, April 23d, 1853. 64 Lawrence Corp.

Being afflicted with constant and distressing cough this winter for some two or three weeks, which rather increased than otherwise, I applied to Doct. Masta for relief. He gave me a bottle of his *Indian Pulmonic Balsam*. In three days time I was essentially relieved, and my cough entirely cured before I had taken half of the contents of the bottle. MOSES S. GLEASON, Merrimack House, Lowell.

I can speak highly of Masta's *Indian Pulmonic Balsam*. For six weeks the past winter I had a severe cough; I tried various cough remedies for relief, but to no purpose. Being somewhat apprehensive, on account of its obstinacy, I applied to Dr. Masta, who recommended this medicine which cured me speedily and completely in a short time. SOPHIA E. SEAVER. Lowell, June 11th, 1853.

I took a severe cold this spring in Boston, which settled on my lungs and brought on a violent cough. For four weeks I tried various remedies, which did me no good. Having long acquaintance with Doct. Masta, and knowing the value of his remedies for diseases of the lungs, I applied to him. He gave me a bottle of his *Pulmonic Balsam*, which relieved me immediately, and my cough completely cured by the time I had taken up its contents. JULIUS LAFEVRE. Lowell, May 23d, 1853.

This is to certify that our daughter, aged 2 years, was afflicted with a disease of the lungs which was brought on by a sickness with the lung fever, which left her with a cough and brought her so low that we despaired of her life. When we were recommended to try some of *Dr. Masta's Pulmonic Balsam*, which in the short time of two months entirely cured her. We have used it since for coughs, brought on by colds, and always with equal success. We would therefore confidently recommend it to any similarly affected. JOHN A. CALDWELL, HANNAH M. CALDWELL. Lowell, March 1, 1853. No. 7 Boott Corp.

One of my children had a severe and protracted cough this winter and spring. Nothing seemed to give the child relief till I obtained *Dr. Masta's Indian Pulmonic Balsam*, which effected the cure speedily and completely. In recommendation of this medicine I would say, that I consider it one of the best preparations for diseases of the lungs. A. HAGGETT. Lowell, April 8, 1853.

On account of a severe cold my child had the lung fever last spring. At its termination it left her with a constant and distressing cough. For five weeks every thing that was considered valuable for coughs we tried, but afforded no relief. Hearing some one speak highly of *Masta's Pulmonic Balsam*, I procured a small quantity, with the object to try it, which cured the child speedily and completely. ANSON BAILEY. Lowell, May 10, 1853.

☞ Sold by the Proprietor, at his office, 47 Merrimack st., brick building below the Museum, where he can be consulted by those who wish to consult him, from the hours of 8 in the morning till 9 in the evening. Lowell, Aug. 29, 1853.

CHARLES T. CARNEY WOULD call the attention of the Medical Faculty and the public to his assortment of FLUID EXTRACTS consisting in part of Fluid Extract Senna—do. Sarsaparilla—do. Buchu—do. Cubeb—do. Senna and Pink Root. These Extracts possess in a highly concentrated form the valuable principles of the medicines from which they are made. Being prepared by myself I feel warranted in recommending them. For sale at the corner of Kirk and Merrimack sts.

J. RUSSELL SPALDING'S

AND CASTOR OIL

ROSEMARY AND CASTOR OIL. ARE NO NEW ARTICLES FOR THE HAIR. They were formerly used in the form of a pomatum and highly esteemed. Since their introduction by Mr Spalding, in a beautiful liquid state, their sale has been immense and success astonishing. W. T. Brande, F. R. S. L. & E. of Her Majesty's Mint, Professor of Chemistry in the Royal Institution of Great Britain, and of the Materia Medica to the Apothecaries' Co., and Editor of the English Dictionary of Science, Literature and Art, says, "Rosemary is an excellent stimulant, and will promote the growth of the hair and cure the headache. Castor Oil is valuable for its nourishing and strengthening properties, and when these are properly combined, free from all oil and grease, and the invigorating properties of alcohol, it proves, in an invaluable remedy for all diseases of the hair and scalp, rendering the hair a soft and rich appearance." Such is Mr Spalding's Article, and are presenting it again to the public we warrant it as the best article ever used for the Hair.

USE IT, IF YOU WISH, 1st. To beautify the hair. 2d. To curl the hair elegantly. 3d. To remove the dandruff effectually. 4th. To restore the hair to bald heads. 5th. To give to whiskers a beautiful appearance. 6th. To prevent the hair from falling off. 7th. To cure all diseases of the scalp. 8th. To dress false hair elegantly. 9th. To cure the headache. 10th. To kill Animalcula. 11th. To dress children's hair elegantly.

READ THIS. I can be seen at the Bromfield Temperance House, at almost any time, where I have been engaged for years past. I have used two bottles of J. Russell Spalding's Rosemary and Castor Oil for my hair, which had been falling off, and was very thin—almost bald on the top of my head. It has entirely stopped its falling off, and has thickened it up very much, as well as keeping it clean, healthy and in excellent order. I believe I shall not have to buy another bottle, as it does not soil any paper or clothes. I should have lost all the hair on my head, and am happy to recommend it to any one in need of a hair "embellisher," improver, or restorer. Call for BENJAMIN SEAVEY, Bromfield House, Bromfield st., Boston. May 20, 1853.

Daily Journal & Courier.

Lowell, Wednesday, November 16, 1853.

The Whig Party—its Position—its Prospects—its Duty—Come to Duster.

The Whig party has now taken another year's lease of the State House, with all the appurtenances thereunto belonging. It has once more returned to power as the *party of moderate reform.* On the broad platform laid out at Faneuil Hall, it distinctly pledged itself to *recall the Senate, to refuse the Maine, to establish the district system of representation, to establish pleurisy rule, to reinstate the supremacy of the Executive in the appointment of State officers, and to promote several other minor reforms* in the Constitution and Administration of the State Government. These pledges saved the Whig party. It could never have triumphed without them. And hereby we stand victorious for the present, with the prospect, if we show ourselves worthy of the confidence reposed in us, of continuing in power for many years to come.

Holding power in the state, then, as the *party of reform,* let us see to it, that our pledges are all faithfully redeemed. Let us not mock the people with lip-service. Let us not conduct like conservatives, or like cowards, while the phylacteries of reform are about our persons; but let the name of the representative like men—abolish the odious system of representation by time—establish a system as near to perfect equality as "the ills of humanity will permit,"—do away with majority rule—establish the principle of plurality in all our elections—and thereby give to the Senate districts electorally single districts—make the Council elective directly by the people—abolish the power of the Governor—make our State officers, all or part of them, elective by the popular suffrage—and let the people feel that we are not hollow hypocrites, like the party which they have so recently cast to oblivion, but true men and worthy of illustrious confidence!

Rush we trust will be the counsels by which our party will hereafter be swayed; for if we play like fools we our constituents—if we treat them as the coalition treated them—if we promise what we do not perform—we shall be hurled, as our opponents have been, into a speedy and irrevocable oblivion. To the work then in "deeds of good earnest;" let us show our faith in reform by our works of reform, and let Massachusetts know what manner of spirit we are of.

Hazewell on Hildreth. In his "Algoma" letters to the New York Herald, Charles C. Hazewell, of the Boston Times, one of the Mid-dlesex coalitionist delegation, pays his respects to Parker A. Hildreth in these words:

"Mr. Hildreth, the first person, has received an executive appointment under the coalition, emanating from Gen. Chandler as Sheriff of Middlesex, a short time since. Boutwell's inauguration, it was a strong partizan, and for the election of Mr Sumner to the United States Senate, and until the lashing of the Cushing whip-lash was so much relied upon to go with the coalition this year as Henry Wilson himself."

"Mr Hildreth is understood to have been very busy during the past season in liberalizing national democrats who hold office, with the vengeance of the national administration should they oppose the coalition. The vigorous support that he of late has given to the coalition, contributed not a little to its triumph this year; and his appointment as the Lowell Post Office was universally regarded as the strongest evidence that the administration would give of its desire for a coalition triumph."

Our Telegraphed News. A dispatch from New York, to that 10th inst., says: A merchantile house in this city has received, via England, a letter from Dr. Parker, Secretary of the United States Legation at Canton, dated to noon Sept. 3d, in which Mr P. says that private letter from Pekin states that the Emperor of China fled on the 3d of August to Tartary, leaving the Empire in charge of Prince Wel Chin; and that the rebels were within six days' march of Pekin. The British consul at Canton had received intelligence to the same effect.

A despatch from Concord, N. H., of yesterday, says: The Whigs of New Hampshire held their State Convention here to-day, to nominate candidates for Governor, and Wm. Whittle, Esq., of Manchester, for railroad commissioner, the only two offices which are voted for by the people of the State. Several addresses were made and the best feeling prevailed.

The Sherburne Murder. The examination of Nayan Mann, arrested on suspicion of being concerned in the murder of Reuben Cushman in September last, took place in the Town Hall in Framingham yesterday, before Lemuel Ames, Esq., assisted by Simon Whitney and John Worrell, Esqrs. The prisoner was defended by Charles R. Train and Hon. Peleg Sprague, and the prosecution by T. F. Hunt, Esqrs., of Framingham; and the defense by C. C. Hasty, Esq. The Hall was filled by a large audience, a large number of whom were ladies. The result was a commitment for trial.

The New Englander. The November number of this able literary journal, published in New Haven, by T. W. Norton, has just been received. In addition to six able articles on Physiology, Responsibility for Errors of Opinion, Review of Cousin on the Philosophy of the True Genuine of Human Life, the Unsympathetical Conservative, Review and Criticism of New England Theology, the Church and its Ministry, the Life and Works of John Robinson—the editor finishes up the monthly review of the New Englander contains an able, calm, and comprehensive review of the public life of the late President Polk, which we transfer in full to our columns, as we are sorry to say, is not given. The latter portion of this number contains nearly twenty interesting literary notices, which will repay a perusal. We regret that no agency for the sale of this valuable periodical has yet been established in this city.

☞ On the evening of the 12th, Mr Soule, minister of the United States to Spain, was admitted to an audience with the queen. The queen was attended by the minister of foreign affairs and by the officers of the palace. After being received in with the usual ceremonies, Mr Soule handed to the queen the President's letter, accrediting him as envoy to the Spanish court, and then made an address to her in English, to which Queen Isabella replied.

ALL RIGHT!

A WHIG SENATE!

A WHIG HOUSE!!

5000 MAJORITY

AGAINST THE NEW CONSTITUTION!

"WE STILL LIVE."

From the Atlas.

The majority against the Constitution now exceeds 5,000—Nantucket and Dukes having constributed 227 to swell the amount.

The Senate. Joseph Hinckell, Esq., whig, is elected Senator in Nantucket and Dukes counties, by a vote of 570 against 484 for all others. The Senate therefore now stands 11 whigs to 10 all others, with 12 vacancies.

Additional Representatives.

Sandwich elected a whig. Reuben Collins, 2d.
Sherborn elected a whig, name not given.
Rochester elected a whig, gain from last year.
Tewksbury elected a whig, Aaron Frost, jr.
Medford—Joseph P. Hall, whig.
Lynn—Edwin Walden; coalition gain.
Fitchburg—Two coalition, names not ascertained.
Beverly—no choice, meeting dissolved.
It now lacks the name of the representative elected from Pittsfield, Jan. D. Colt, 2d, whig. Our types had it Independent Whig.

The name of the representative elected in Bernardston is Barzillai King. That of the whig in Somerset is James M. Hood. There was no choice in Fairhaven, according to the New Bedford Mercury. Drew, whig, had 313, all others 314. The Taunton Whig reported him elected, but this, we presume, is an error.—Herald.

Poet is the name of the representative from Swanzey. Nathaniel Gilbert and not Asa R. Nye, was elected in New Bedford. Mr Nye has unfortunately one less than the requisite number.

Whig majority over all, *sixty-two.*
Anti-Coalition majority, *seventy-nine.*
There were seven Nantucket and Dukes chosen.

Too Many Machines. The Hartford Insurance Company, Boston, offer a reward of $100 for the recovery of the body of Mr Sam'l Hunt, who is supposed to have drowned himself on Wednesday morning last.

☞ The report of the accession of the Emperor and Empress of France is again revived. The carriage used at the baptism of the Count de Chambord has been prepared for King Jerome. There other carriages have been fitted up for the members of the imperial family. Those carriages are called the Turquoise, the Topaz, and the Victoria. All these carriages have been made with the utmost despatch.

☞ The Washington Union has neither forget nor pity to express in regard to the election vote of the "Hards" and "Softs," at the late election in New York, but looks "with much more concern to the best means for avoiding on disastrous a defeat in future."

☞ Jacob Davis, the Teller of the Franklin City Bank at Cleveland, Ohio, who was arrested on suspicion of being connected with counterfeiters, has had his examination and been honorably discharged.

☞ At Poughkeepsie, N. Y., an Irishman threw a potato at his wife in a fit of passion with fatal effect. The missile glanced aside and killed his child.

☞ The doctors in Norfolk, Va., have struck for higher pay till neither nurses, watchers, grave nor cup without an advance of three hundred per cent on former prices.

☞ A woman in Birmingham had received from a pen maker at New York, an order for *fifty working pens.* The order was executed in due time, but when the package was accompanied for the whole party at £5 ($40) per gal.

Mr Allen an Easy Rogue. On Saturday afternoon, an Irishman was killed by the tumbling of a bank of earth upon him, while engaged in digging a trench on Summer street, East Boston. He was formerly owned to be Nicholas Doyle, a'out 26 years of age.

Religious. Rev Charles Smith, of the Old South Church in Chicago, and Rev Mr Anderson accepted a call to the pastorate of the Shawmut Congregational Church, Boston.

Fatal Accident. Yesterday afternoon, about two o'clock, Mr Josiah Snow, jr., was engaged with others in putting in one of the "boulders" of Gray's new building upon the Chickering estate, on Washington street, Boston, when a brick upon which he stepped gave way, and threw him backward from the top of the tall building to the ground in Brewster's court, a distance of more than a hundred feet. He lived but about ten minutes after the accident.

Severe Accident. At Dedham, Saturday, Mr Thomas Colburn had his arm so badly injured by a planing machine as to require amputation; but the operation was performed without pain after he had taken chloroform and he is now doing well.

Fatal Accident. Nicholas Doyle, twenty-two years of age, was buried alive and crushed to death, by the falling in of a bank of earth at East Boston, on Monday.

Taking Time. Some rogue yesterday thrust his hand through the window of the shop of J. D. Cummings, Salem st., Boston, and carried off eight gold watches.

☞ Yankee Sullivan was bailed at Lenox on Saturday, on a charge of assault, in 1849. Yesterday, left for New York with his friends, among whom was Tom Hyer.

☞ The Pension in the Town Hall in Framingham yesterday, before Lemuel Ames, Esq., assisted by Simon Whitney and John Worrell, Esqrs. The prisoner was defended by Charles R. Train and Hon. Peleg Sprague, and the prosecution by T. F. Hunt, Esqrs., of Framingham; and the defense by C. C. Hasty, Esq. The Hall was filled by a large audience, a large number of whom were ladies. The result was a commitment for trial.

☞ Capt. S. K. Hutchinson, of this city, one of the Commissioners for the assignment of the State House, will be attending upon that duty yesterday, was struck on the head by a brick which fell some sixty feet, and that he was knocked down and stunned, and for a while it was feared that he was dangerously hurt.—We are happy to learn, however, that he is comfortable to-day, and will be about his business immediately.

Fire Alarm. There was an alarm of fire at 9 o'clock last evening.

☞ The choicest and most extensive assortment of goods for ladies' cloaks and other outside garments, such as *ladies' Broadcloth of the* the delicate texture and perfect shades, *Rich Velvets,* of every width, and many of the other goods, have just arrived, direct from New York, at the store of Mr Kimball, over the Post Office. We advise all the ladies in the city to go and see them before making their purchases.

GENERAL SUMMARY.

☞ We are indebted to our whig friends in the neighborhood of Lowell for the result of their elections, for which they will please accept our thanks.

☞ We regret to learn that Charles Gordon Atherton, U. S. Senator elect from New Hampshire, died at Manchester at one o'clock on Tuesday afternoon, of paralysis. He was the only son of the late Charles H. Atherton, of Amherst, and had recently come into possession of a large property inherited by him.

Fatal Accident. Yesterday afternoon, at

DR. MORSE'S INVIGORATING ELIXIR OR CORDIAL.

The Rapid Wonder of the Botanic World!

The Invigorating Elixir and Cordial Drink, now manufactured by DR. MORSE, of Lowell, Mass., is the discovery of Dr. M. Morse, but he is not now in Oriental Herb, but brought from the Interior of Africa, by Dr. M. Morse, who resided there for a number of years, and from whom he received the secret of its preparation.

CURE OF NERVOUS DISEASES.

No known remedy has ever been discovered for the immediate relief and cure of Nervous Diseases, that has ever produced, determined and obtained such an extensive reputation as Dr. Morse's Invigorating Elixir or Cordial. It embraces the astonishing and rational appreciation of a vast number of persons, who have been cured of Nervous Affections. Not in the effect temporarily. On the contrary, the cures performed by this Elixir are permanent, and in some cases such that have been given up by the most eminent physicians of this country and Europe, as incurable.

FEMALES.

This declaration is based on the fact that it will save more than nine tenths of a class of very prevalent diseases which are

PECULIAR TO FEMALES,

and which have heretofore resisted the skill and exertions of the most scientific and talented Physicians of all countries. A degree beyond that of almost every other remedy in which it has been administered. It is a remedy that is perfectly safe in all cases, and can be administered with safety by the members of the Medical Faculty in the United States and Europe, and by females in all cases, without the fear or interference of their professional duties, and in every way worthy the attention of the Ladies. It is a remedy that will be found to be of the greatest value in all cases of Female Complaints, in the particular, in which the attention of Ladies has been called.

ELECTION.....MONDAY, NOV. 28.

HASEWELL vs. CURRIER. The minutes of Caleb Cushing seems to have excited the hottest "Algidian wrath" of Hon. C. C. Haswell, the "Algerine Secretary" of the New York Herald, and private editor of the Boston Times. Haswell is determined to make Caleb "feel his power." This, however, he cannot do before the Times—that paper being controlled by Gen. Schouler, its proprietor, who holds patronage under the government, and who, much as he respects Haswell, his hired chief-editor, would rather dismiss him than incur the rays of executive favor which now shine upon the Times.

But in his letters to the Herald, Mr Haswell reviews the history of Gen. Cushing in connection with the coalition, with great severity, because with great thoroughness. Mr Pendington to whom the Attorney General communicates his pronunciamento, is shown to have written the very first article on record which advocates the coalition. It is also proved that Cushing himself wrote pointedly in its favor—that he intrigued for coalitionists to the Legislature, who elected Charles Sumner—that he sought a seat on the Supreme Bench from Boutwell and his Free Soil Council—that he labored to send Mr Rantoul to Congress—and that he has within a few months, recommended coalitionists for office.

Mr Haswell thus pointedly sums up his letters:

"I think I have adduced facts sufficient to fix the fact, whatever the sins of the coalition, Gen. Cushing is the last man who should speak against it. He led not here eighteen—hence? What right has Jemmy Twitcher to preach?—Whether we regarded coalition as *union on principle or motive profession*, then Cushing stands condemned before the world. If he did it blindly, he came a mass of his intellect to have anything to do with it—to accept office from the government of its creation—to be hand and glove with its chiefs, and to eat eight huge bushels of salt to a nation, at position the ablest opponent the country ever had to the late Fugitive Slave Law! If he was acting fairly then, has he not now realized Fe. lix Brunotism—a thing so odious and astounding as would by the vastness of his magnitude? If it be bad, because doubtful, that is, constitutionally bad—why has he been on the best terms with coalitionism and with men that ratify about one-half the whigs in the last House of Representatives could be brought up to vote for the repeal of the law, and do not the proportion of Irishmen in the Legislature, who declined to support the repeal, have been instrumental in getting places for scores of coalitionists? Why, within five weeks previous to writing his letter to Mr Frothingham, did he take part in giving high offices to those persons who had been eminent as coalitionists, and all of whom had held office under the coalition? I should really like to have these questions answered in a satisfactory manner, and would accept only facts. Both Mr Cushing and Mr Frothingham have been coalition friends who do not agree with him in politics, and who bitterly regret that they should be compared in any singular a manner as that which is now making their names, and the names, but notoriety. For myself, I think I could point to pretty strong evidences that I have given of my regard for both gentlemen; but neither the subscription, which I hold the public services of the one, nor the deep sensibility of admiration that I have for the moral and intellectual character of the other, shall operate to cause me to suppress the truth in a matter where they are so largely concerned."

BARNUM CONTRADICTS IT. Barnum is out in the New York Times, contradicting the report that he has lost $40,000 in the "Illustrated Nerws." He never invested but $20,000, and don't understand how $40,000 could be sunk from that. He thinks if figures were squared he would not be more than two thousand dollars out of pocket.

☞ The election is passed. The Coalition hast a Whig-Coal defeat. The new pamphlet which was mocked with the name of Constitution is dead, damned and forgotten.—[Lowell Courier.

Very, and along with it, all professions of regard, from the whig party, for the district system. Who will be mad and crazy enough to advocate it now? Propose it in the next legislature, and even your 11 by a two-thirds majority in the House of Representatives, and intelligent people would laugh at it as a farce.—[Advertiser.

Brag as you will over the "farce" of submitting the district system to the people, the whigs are pledged to submit it, and will not forfeit the confidence which the people have so generously reposed in them. Prior to the election, the chief ground on which the Advertiser contained the new Constitution was that the district system *was to be submitted to the people in 1855*; and reproaches or sneers at that course now with ill grace from such a paper as the Advertiser. The district system will have to be submitted; if the people want it, it will be forthwith established; if not, its adoption must be postponed for a few years.—But certain we are, that the production of Chief-Scribner will be verified, and that *Representation by districts* will one day become the policy of Massachusetts. Let us hail it as a true progress.

THE MAINE LAW is safe. We have before asserted, and we now reiterate, that there is no danger of the repeal of the Maine Law. We contend, therefore that the Maine Law Whigs will make no a vote to secure the triumphant election of the TEN WHIG REPRESENTATIVE CANDIdates from Lowell, as no other ticket can possibly be elected. But in this opinion, that the Maine Law is safe, we are not alone. The Boston Times, whose editor was one of our opposing Massachusetts delegates, says that "only about one-half the whigs in the last House of Representatives could be brought up to vote for the repeal of the law, and do not the proportion of Irishmen in the Legislature, who declined to support the repeal, have been instrumental in getting places for scores of coalitionists? Why, within five weeks previous to writing his letter to Mr Frothingham, did he take part in giving high offices to those persons who had been eminent as coalitionists, and all of whom had held office under the coalition? I should really like to have these questions answered in a satisfactory manner, and would accept only facts. Both Mr Cushing and Mr Frothingham have been coalition friends who do not agree with him in politics, and who bitterly regret that they should be compared in any singular a manner as that which is now making their names, and the names, but notoriety. For myself, I think I could point to pretty strong evidences that I have given of my regard for both gentlemen; but neither the subscription, which I hold the public services of the one, nor the deep sensibility of admiration that I have for the moral and intellectual character of the other, shall operate to cause me to suppress the truth in a matter where they are so largely concerned."

THE SECRET BALLOT. The Boston Commonwealth and its echoes, the American and Advertiser, in Lowell, are lugubrious with prophecies, that the secret ballot law will be repealed. This is false. We have no particular predilection for the secret ballot, but are rather attached to the open ballot; nevertheless we say that the victorious whigs will carefully avoid any future action adverse to the present secret mode of voting, as a means of rooting out an unpopular affair. But since certain clauses have magnified its importance and been fanatically attached to it as a matter of *principle*, the abusive policy of the whigs will be, *to let the secret ballot alone.*

BELLERICA, Nov. 16, 1853.

The Whigs of Billerica were busine on Monday—fairly, whipped, I presume; but you must breathe air as down as one of the persons. Early in the morning, teams were seen from the Nine mile river, and from Billerica Mills, and from Billerica Centre, and from Billerica Corner, and from Billerica Village, and from Billerica Factory Village, and from Billerica Meadows, and from Billerica Farms, and from Billerica Hill, and from Billerica Plain, and from Billerica Pond, and from Billerica Bridge, and from Billerica Bridge, and from Billerica Bridge

cause of a lady whom he so highly esteemed, and if it were necessary in order to secure his release that he should *eat* her he was ready to gratify her, he was ready to declare that he had no cause or occasion at all for fighting the gentleman under bonnets. Upon this it was declared, that according to the high precedent before them, Colonel Bumble Bee was a suitable person according to his declaration, to send the challenge. The next question was as to who should receive the challenge, and as Mr Katy Didn't *feel* declared that he had felt himself aggrieved, and as it was decided that he ought himself to receive it, the office. Up to keep himself consistently out of the affair. Upon this the elegant General Herbert came forward, and in the most dignified and peaceful manner, offered his services, saying that he should be extremely happy at any time either to kill, or to be killed in the cause of so fair a lady as Miss Katy.

The day for the duel was then appointed, and all the gentry in the vicinity assembled to witness the chivalrous display. As soon as the gentlemen doctors appeared on the ground they made many demonstrations of civility and cruel flecking. General Herbert, laying his claw on his heart, declared in the most interesting manner that he had not the least feeling of ill will towards his respected opponent, and that whatever might be the result of the present encounter, he should feel gratified to wave except the hostage of his high consideration. Colonel Bumble Bee, having in the most gentlemanner, made similar protestations. The seconds then bowed to the company around about bonnie with each other, and then proceeded to count out the ground, while Dr. Grasshopper arranged his surgical instruments and bandages.

At the word of command the combatants engaged. The combat was very fearful for a long time victory hung in suspense. At last it was manifest that Colonel Bumble Bee had received a fatal wound, for he ceased all effort at fierce at defence. Immediately General Herbert called to and Dr. Grasshopper, but it was soon manifest that all such outmeasurably was too late. General Herbert then came to the unspared of his dying antagonist, whether there was anything he could do that would afford him any comfort or satisfaction. The Colonel raised his dying eyes and replied in a faint but one wish to express. "Let me hear it," said the patient general, "and I will fly to the furthest verge of the green earth, rather than it should not be fulfilled." The colonel then, in the most touching manner, stated that he was dying to vindicate the honor of the bowlest of ladies, and as his antagonist was worsted in the place of the one who had given the offence, he wished him in the presence of the assembly to retract what had been said. "Certainly," exclaimed the generals, "it is with the greatest pleasure and satisfaction I here declare that Miss Katy, when she said 'she did,' spoke simply and only the truth." Upon this Colonel Bumble Bee turned his face to the sun and closing his eyes, exclaimed, "I die content," and immediately expired.

The scene was very affecting, overwhelmed with grief and admiration at this interesting scene. The next day, at the General Congress of Bugs, it was unanimously voted to attend Colonel Bumble Bee's funeral, and to wear for say of these high respect for his memory, that each member should wear a black string on the left leg for thirty days.

For several hours never since felt very melancholy, and so while away my leisure hours I have compiled a little list by grouping the history of my misfortunes. Let me then conclude by entreating all my young friends to shun the fault, that they may escape the misfortunes of *their sorrowful friend*—Katy Did.

ELECTION.....MONDAY, NOV. 28.

Three Days Later from Europe.

By the Arabia, at New York, yesterday morning, we have advices from London, Paris and Vienna, to the 4th inst. War has already commenced. Russia, though "short in the pocket," has been generally forced into several fights with the troops of the Grand Sultan. Ireland has suffered greatly from inundations—especially the city of Cork. Manchester market remained flat, although under the reduced prices, operations are very steady.

The European Governors. Reliable information relative to Eastern affairs is scanty.

In Circassia, however, and Daghestan, the Mountaineers have defeated the Russians and captured some forts.

Prince Paskewitch has been sent out to take the command of the Russian army in Principalities.

There was a talk of opening a Turkish loan in the United States.

The allied fleets were collecting in the Sea of Marmora, having been dispersed by a storm.

It is stated positively that the Austrian Envoy has presented the Porte with a note, the note, which the Czar approved of conditionally on its being accepted pure and simple, by the Sultan. The effect of diplomacy are now directed to procuring the joint assent of the Czar and Sultan to that note. Its tenor has not transpired.

Bucharest and other cities had been placed in a state of siege; and war in corresponded ones with the Turks shall be shot.

The Turkish fleet weighed anchor from the Bosphorus on the 25th ult., for the Black Sea.

The rumor of a rendezvous of the continental powers at London on the future prospects of Turkey, gone credited.

It is said that Austria has effected her proposed loan by the guarantee of the several bank of Frankfurt, and now remains her satisfaction; as she sees that her efforts in favor of the termination of the difficulty will not be fruitless.

As a set off to this pacific news, we learn that all the places in the principalities on the banks of the Russians have been placed under martial law, and correspondence with the enemy prohibited under the penalty of death.

Latest from the Danube. Fighting is going on briskly in Wallachia. Two thousand Turks (so data) appeared at Giurgevo, and fired upon the town. This brought on an engagement with the Russian force, despatched to the assistance of the place. Considerable slaughter ensued.

Another encounter took place between 4000 Turks and a like number of Russian cavalry, between Kalafat and Sorbia, when the Russians were forced to fall back.

Paris, Nov. 6th. A private telegraphic despatch of the 5th announces the defeat of the Turkish corps which had crossed the Danube near Kalafat.

A private telegraphic despatch from Constantinople of the 30th October, after mentioning the presence of the fleets at Leuguki, says that a party of *Russian officers* had arrived at Constantinople, and that certain British officers had left for Shumla.

Vienna, 4th. The Press mentions the news of the arrival of 7000 troops at Kalafat, of the left wing of the Turkish reserve from Sofchia.—The vanguard, under General Prim, had a severe conflict with 3200 Russian cavalry between Kalafat and Krajova. The affair lasted two hours, when the Russians retired towards Sofchia.

The *press* states on the authority of Constantinople letters, that Rieschid Pacha has consented to a fresh draft of a note by Lord de Redcliffe, based on the Czar's admission at Olmutz. Rieschid Pacha is said to have given his consent, after a series of stormy conferences.

Constantinople, 15th. The supply of ships has further increased. The number in port was 360. Wheat and grain were in better demand at rather higher prices, and the aggregate quantity that will be despatched within the next few weeks would be extraordinary large.

On the whole, it still remains difficult to decide whether there will now be a general war in Europe or not. The great remaining difficulty is—*has an empty money-chest*, and her soldiers will not fight *unless paid for it.*

Personal Address. The sixth Article in proposed new constitution has probably been adopted. It bears on sectarian schools, and reads as follows:

"All moneys raised by taxation in the towns and cities, for the support of public schools, and all moneys which may be appropriated by the State for the support of common schools, shall be applied to and expended in the several towns; and no religious sect or denomination shall ever be appropriated to any religious purpose, nor shall any portion of any fund ever be under the authorities of the town or city in which the same may be expended; and every such town shall never be appropriated to any religious sect, for the maintenance, exclusively, of its own schools."

Many towns polled a large vote in favor of this section and perhaps judicious proposition. In Hampden, Hampshire, Franklin and Berkshire, it passed by hundred votes, but lost in the others. In Boston, the majority against this proposition was 1221 *less* than against the others. In Lowell, where one rejected by a vote of 147 against the first proposition, there was a majority of 282 for this: a difference of 435.

The idea that Irish-American or Roman Catholic citizens are opposed to this proposition is utterly unfounded. Governor Seward (last he was dying to vindicate the honor of the lowliest of Indians), and a his antagonist were voted in the place of the one who had given the offence, he wished him in the presence of the assembly to retract what had been said. "Certainly," exclaimed the generals, "it is with the greatest pleasure and satisfaction I here declare that Miss Katy, when she said 'she did,' spoke simply and only the truth." Upon this Colonel Bumble Bee turned his face to the sun and closing his eyes, exclaimed, "I die content," and immediately expired.

The scene was very affecting, overwhelmed with grief and admiration at this interesting scene. The next day, at the General Congress of Bugs, it was unanimously voted to attend Colonel Bumble Bee's funeral, and to wear for say of these high respect for his memory, that each member should wear a black string on the left leg for thirty days.

For several hours never since felt very melancholy, and so while away my leisure hours I have compiled a little list by grouping the history of my misfortunes. Let me then conclude by entreating all my young friends to shun the fault, that they may escape the misfortunes of *their sorrowful friend*—Katy Did.

CITY MATTERS.

☞ The shop of C. D. Williams, on Merrimack street, was broken into last night, and about $30 worth of clothing stolen therefrom.

☞ In the Police Court yesterday, Woodbury Clough for an assault on the person of a young girl on Sunday evening last, was fined $10 and costs, and in default, three months in House of Correction.

Police Court—*Friday, Nov.* 18th. Henry Poor and John D. Davis, for trespass on the premises of Robert J. Garrett,—Davis pleaded guilty, and Poor was discharged: cost sentenced. Samuel Stone, for drunkenness—postponed till Dec. 3, with $20 security.

Drawing and Painting. We invite attention of parents to the advertisement of Miss Sexton, in another column. Miss S. is an accomplished teacher of Drawing and Painting, Taylor Macks, Leather work, &c.

Observation. On account of the storm, the sale of wood and timber in Chelmsford, by Baldwin & Parker, advertised to take place to-day evening. It was entirely destroyed, with the snow, twenty-tons of hay, and a quantity of grain.

About 9 o'clock the paint shop and carpenter's shop of Jason H. Coolidge, near Boston depot, was discovered to be on fire, and was entirely consumed, together with a large lot of lumber and stock.

Those fires were the work of incendiaries.—Ten buildings, mostly barns, have been burned in Newton in the last three weeks—three in four weeks. Two arrests have been made. One as in Dick Jay, who has been committed for trial, and another, Albert Jonnison, who is accused of setting fire to his own house, at Newton Corner, but he will be in the run of $1500 to answer to the charge.

Cabinet Tyranny. Alluding to the despotism of the Cabinet over President Pierce, the New York Herald says:—

"The fact is, we should not be at all surprised to see Caleb Cushing, Jefferson Davis, and another, Albert Jonnison, who is accused of setting fire to his own house, at Newton and Dick Jay, who has been committed for trial, Hillsborough county voted to attend the funeral.

Alms House Insurrection. The Governor and Council have appointed Stephen Moseley, Esq., of Lowell, Hon. Gayton P. Osgood, of Andover, and Rev. Jacob Coggin, of Newburyport, Inspectors of the State Alms House in Tewksbury.

☞ The junior editor of the News has just returned from the Island of Correction, and speaks flatteringly of that distinguished public establishment. Heaven grant that we may not have to "visit" it!

Absent Robbery. Mr Ezra Goddard, a very worthy farmer in the north part of the city of Worcester, was robbed on the night of the 31st of October. He placed his paste partly under his pillow, and during the night the thief entered his room and cut out his pocket, containing his wallet. It was found in the road the next day, about four rods from the house, and Fortunately, it contained at the time no money but a tax dollar bill, which the thief carried off.

Adventures at Harper's Ferry. The Journal says a strong feeling seems to exist in Roxbury at the present time, in favor of annexation to Boston. A meeting is proposed to consider the question of authorizing the city government to take measures for the annexation of Roxbury to Boston, by petitioning to the Legislature.

What a Sight! In a lecture before the Mechanics' Association, Theodore Parker said:—"Slavery bears about the same relation to free labor that a slum-child does to a reaping machine."

The Maine Law in New York. The N. Y. Tribune considers it useful by the late election in New York, that they are to have the Maine Liquor Law in that State, and that the passage of such a law will be one of the first acts of the next Legislature.

☞ The Boston Spiritualists have made arrangements for a series of public lectures at the Melodeon. Warren Chase, of Worcester, will commence the course, and be followed by Judge Edmonds.

Is it So? The American—which, notwithstanding its late defeat, is still printed to the amount of twenty-two copies *per issue*—says that Fuller, Adams and Morton, were all entrusted in their opposition to the new Constitution "by pure and unadulterated motives towards Gov. Wilson!!" If this is so, there must be many thick sheep in the milk-white fold of free soil. But the American candidly admits that "so lady doubts" that "the Convention made blunders." We suppose so.

The Charlestown Democracy. In Charlestown last city, they have nominated a portion of the tonsured and of the Company. Hitzen long precise hitherto, and the Democrats have nominated to the public, although the Democrats have nominated to the public, although the Democrats have nominated to the public, although

ELECTION.....MONDAY, NOV. 28.

The Rejected Constitution—Who Has It?

The main body of this instrument being rejected, it will be interesting to see what becomes of the "documents," including the three dull volumes of insipid speeches and dry debates which the publishers "by authority" have cast upon the world. No man will use himself in these debates without considerable personal chagrin, — for many sworn truths will be told in Flanders," but not more "terribly" than the "candidates for immortality" whose incubations repose side on the files of the defunct convention.

But the "consummation," so "devoutly to be wished," has not come yet. The "last scene of all" is to be redacted hereafter. A concluding chapter, by the secretaries on the last day of its session, directed the time and end manner in which the people should vote on the proposed amendments, viz: that the vote should be taken on the day of the annual State election, that the ballots answering yes or no, to each question of the amendment, should be deposited in the ballot boxes enclosed in sealed envelopes, that they should be received, sorted, counted, declared, and recorded in open meeting, in the same manner as votes for Governor, and a copy of the record attested by the selectmen and town clerk, or by the mayor and aldermen and city clerk, and should be sealed up, directed to the Secretary of the Commonwealth, and delivered to the sheriff of the county within 14 days, or by him transmitted to the Secretary's office on or before the third Monday of December next, or be delivered by the sheriff or city officers personally at the office of the Secretary, within the date above specified.

By another resolution of the Convention, the Secretary of the Commonwealth is required to deliver the said returns, on the third Monday of December next, to a committee of the convention, to consist of the President of that body and four other members by him designated. It is made the duty of the committee, says the Boston Advertiser, on the day aforesaid, to assemble at the State House, and to open the returns and examine and count the votes so returned, "and if it shall appear that either of the propositions has been adopted by a majority of votes, then the propositions so adopted shall become and be either the whole or a portion of the Constitution of this Commonwealth." The resolution further directs that the constitution and the amendments shall be published in the newspapers, "shall also notify the Governor and legislature as soon as may at the said results," and that the latter are requested to make proclamation of the fact of the adoption of either or all of said propositions. It therefore is given as to the course the convention shall take, or the notice they shall give, in case neither of the propositions are adopted. Such happens to be the result of their proceedings thus far, and as the people of the Commonwealth are utterly informed of it, it is perhaps not important whether any official notice is given or not.

This committee of the Convention designated in pursuance of the resolutions above recited, consists of the Hon. B. F. Hallett, jr. President, and the following delegates to the Convention, viz: Messrs. Boutwell for Berlin, Dana for Manchester, Giles of Boston, Morton of Andover, Upham of Salem, Butler of Lowell, Wilson of Natick, Grinnell for Irving, Pettingham of Charlestown, Wood of Middleborough, Hillard of Boston, Aspinwall of Brookline, Chapin of Springfield, Sumner of Roxbury, Allen of Worcester, French of New Bedford, Oliver of Lawrence, Eames of Washington, Putnam for Chelsea, and Wilder of Quincy.

The Legislature and the Liquor Law.—The Boston Chronicle, the anti-Maine law party paper, claims that the new Legislature of this State embraces a majority in favor of the repeal of the liquor law. It sets down all the Boston Senators and Representatives—fifty in number—as unconditionally opposed, and divides the 21 Senators elected as follows: For repeal, Suffolk 8, Hampshire 1 (Mr Hubbard), Nantucket 1, Worcester 2, Franklin 1 (Alvord), and Berkshire 1 (Field)—12; for the law, Hampshire 1, Barnstable 1, Worcester 3, Hampden 1 (Holland), Berkshire 1 (Dr Sabin, when he's caught) and Bristol 1—8. It also claims, of the whig candidates who will probably be chosen to all the Senatorial vacancies, six from Middlesex, 2 from Essex, and 1 each from Norfolk and Bristol, which with the 12 already chosen would make 23—a decided majority of the upper branch. We do not believe in the thing being fixed Republican, that the Chronicle is soliciting you are to be realized. The principle of the Maine law, in some form, is not to be rejected by Massachusetts yet—that's certain.

☞ The people-distrusting Advertiser thinks the Irish have been "rather scurvily treated," because the sovereign people of Massachusetts are supposed to have adopted that proposition in the rejected Constitution touching sectarian schools. We thought that the Advertiser placed "implicit confidence in the intelligence and wisdom of the people." But—query—is it nice rather too late for the Advertiser to profess any peculiar love for "our dear adopted fellow-citizens?" Has it not for several days a hundred times, until at last they have spurned it from their house and places of business?—A party to be in order to succeed, must, it is probable be "egged" for "that dear tongue?" The Irish don't like a Bible theft. Fisher, mercenized Irishmen in the pay of the Pope—by the way—is nice rather too late for the Advertiser to profess any peculiar love for "our dear adopted fellow-citizens?" His is not a several days a hundred times, until at last they have spurned it from their house and places of business!—A party to be in order to succeed, must, it is probable be "egged" for "that dear tongue?" The Irish don't like a Bible theft. Fisher, mercenized Irishmen in the pay of the Pope—by the way—is not the less familiar specimen of your pseudo political success!

☞ The Advertiser has in saying that the sixth proposition of the rejected Constitution was introduced by Judge Parker of Cambridge. It is Peter Parker, Esquire. It was when Peter added Bolton made a speech in favor of this clause, that the "honest" applauded. "*Dear!* nonsense that word is entirely out of place in our vocabulary when we speak of the *honest* men!" The editor, and proprietor, and certain conductors of the Advertiser, understand this.

☞ A *disgraced* coalition paper has been instructed to sustain—We learn that the coalition city government has been put into the second cold by representatives with their former sticks." This is only a taste to blind opponents. A new statute to put the laws decided on by the citizens of the double-headed election democracy.

Our Telegraphic News.

Washington advices of yesterday state:—Mr Marcoletta, the Nicaraguan Minister, was presented yesterday, and duly recognized. He made some extemporaneous remarks on the occasion, to which the President responded in appropriate terms, extending him a cordial welcome.

The State Department is advised of Gov. Vroom's arrival at Berlin, under favorable auspices, though he had not been presented, owing to the absence of the King.

Letters from responsible houses, received by the last steamer, induce the belief in diplomatic circles, that there will be no war in Europe, peace being now considered almost certain.

Despatches from Constantinople have been received here, against the American Consul at Pomgary, for improperly using the American flag for the protection of one of the vessels seized by Admiral Ons, and sold to the enemies of the cause he was serving, when he turned traitor. The Consul is said to have employed but little service of the New York and Paraguay Company, whose agent he is, after Gen surrendered her, and had the American flag hoisted upon her, for her protection. The officers of our squadron, who were a Mussulman, when he brought her on the 20th of August, were taking measures to force him to haul down the flag, and were also aware of the defiant conversation.

The Naval Constructor, John Lenthall, has been appointed chief of the Bureau of Construction, Samuel Hart that of Steam Engineering.

Hon. Linn Boyd, of Kentucky, has arrived here. We understand that he will be a candidate for re-election as Speaker of the House.

A despatch of yesterday from Pittsburg, says:—Thomas Hanna, Esq., an old and worthy merchant of this city, died this morning.

The river is in fine navigable order, and the United Line, between Pittsburg and St. Louis, has commenced running.

Portland advices to last evening, say:—Our barber is full of cousins, on account of the late storm. The steamers Boston and Ocean, with passengers and freight for Boston, put in last night. They proceed to the Secretary of the Commonwealth, and delivered to the sheriff of the county within 14 days, or by him transmitted to the Secretary's office on or before the third Monday of December next, or be delivered by the sheriff or city officers personally at the office of the Secretary, within the date above specified.

By another resolution of the Convention, the Secretary of the Commonwealth is required to deliver the said returns, on the third Monday of December next, to a committee of the convention, to consist of the President of that body and four other members by him designated. The river is in fine navigable order, and the United Line, between Pittsburg and St. Louis, has commenced running.

Portland advices to last evening, say:—Our barber is full of cousins, on account of the late storm. The steamers Boston and Ocean, with passengers and freight for Boston, put in last night. They proceed to the Secretary of the Commonwealth, and delivered to the sheriff of the county within 14 days, or by him transmitted to the Secretary's office on or before the third Monday of December next, or be delivered by the sheriff or city officers personally at the office of the Secretary, within the date above specified.

By another resolution of the Convention, the Secretary of the Commonwealth is required to deliver the said returns, on the third Monday of December next, to a committee of the convention, to consist of the President of that body and four other members by him designated. It is made the duty of the committee, says the Boston Advertiser, on the day aforesaid, to assemble at the State House, and to open the returns and examine and count the votes so returned, "and if it shall appear that either of the propositions has been adopted by a majority of votes, then the propositions so adopted shall become and be either the whole or a portion of the Constitution of this Commonwealth." The resolution further directs that the constitution and the amendments shall be published in the newspapers, "shall also notify the Governor and legislature as soon as may at the said results," and that the latter are requested to make proclamation of the fact of the adoption of either or all of said propositions. The direction is given as to the course the convention shall take, or the notice they shall give, in case neither of the propositions are adopted. Such happens to be the result of their proceedings thus far, and as the people of the Commonwealth are utterly informed of it, it is perhaps not important whether any official notice is given or not.

This committee of the Convention designated in pursuance of the resolutions above recited, consists of the Hon. B. F. Hallett, jr. President, and the following delegates to the Convention, viz: Messrs. Boutwell for Berlin, Dana for Manchester, Giles of Boston, Morton of Andover, Upham of Salem, Butler of Lowell, Wilson of Natick, Grinnell for Irving, Pettingham of Charlestown, Wood of Middleborough, Hillard of Boston, Aspinwall of Brookline, Chapin of Springfield, Sumner of Roxbury, Allen of Worcester, French of New Bedford, Oliver of Lawrence, Eames of Washington, Putnam for Chelsea, and Wilder of Quincy.

He has had a long experience in the business, and has been employed in the principal establishments in the country, and will guarantee perfect satisfaction to all who may favor him with their patronage. He will also keep constantly on hand a large assortment of Steam and Gas Fixtures, for the latter recently of best and cheap.

Orders left at the shop will receive prompt attention at the most reasonable rates.

N. B. Purchasers and shippers of goods will find it to their interest to call before purchasing elsewhere, as he is determined to sell at such prices as will please them, before shipping or making contracts with other parties.

The subscriber has also taken the Foundry formerly occupied by Messrs. Hall & Gordon, on Merrimack street, Lowell, and has put in a supply of Patterns for the manufacture of Steam and Gas Fixtures, Hydrants, Water Gates, &c., and is prepared to execute orders with dispatch.

Having had a long experience in the business, and having been employed in the principal establishments in the country, he will guarantee perfect satisfaction to all who may favor him with their patronage. And it is merely pretext to the character of the work, that he refers to the numerous gentlemen for whom he has done work in this city, and to a single reference in Boston, to whom he has been known for the last seven years

but there is no doubt that Johnson, though he showed a manly firmness, proved a most indispensable agent in the last movement of Mr. Johnson's life.

ELECTION.....MONDAY, NOV. 28.

Our Recent Victories—Prospects of the Whigs in the Nation.

The late splendid triumphs of the Whigs in Massachusetts and New York are replete with prophecies of glory for the whig party in the Nation. Next to no majority, a great majority is the worst condition in which a party can be placed; and precisely such is the present position of the Democracy of the United States.—They have done the work well. They have swept the country from Maine and Cushing, as the Gods and Vandals swept from under Attilla and Genseric. As Webster said of Calhoun in the Texas case, they have "made no booth of it." But it would not be strange, if two-thirds of the States in the Union now followed in the foot-prints of Massachusetts and New York, as the "Old Thirteen" of '76 followed in the foot-prints of Massachusetts and Virginia:—if a majority of the Congress two years hence turned up in Washington wearing the phylacteries of the whigs; if the States of the South and West, following the States of the North-east, should return whig legislatures to power under whig auspices and majorities. The dream played under the administration of Polk will, it is quite likely, be repeated: with, certainly, a hundred under the administration of Pierce. In Massachusetts the Administration is a by-word and a shadow of the loud to all party jokes. Pierce, Marcy, Guthrie, Cushing—the Mephistopheles of all—are the most unpopular men in the State. In New York the whigs have elected all of their general ticket for State officers, almost by acclamation. Nevertheless, Power seems that Don did use those words.

Complete Returns, and their Result.

The complete returns of the vote, for Governor and on the main propositions of the new Constitution, on Monday last, show the following result: The whig majority in the Senate is two, which will be increased to thirty-one, when the twenty vacancies are filled, which is quite likely to be done with a big candidates. The whig majority in the House is now 66, which probably will not be materially varied by the elections on the 28th inst. Monday. The majority against Mr Washburn is about 10,500, that against Mr Bishop is only 10,000 ? while against Mr Wilson the vote is very trifling. A majority of *seventy-three thousand three hundred*! The coalition vote is 56,759; the anti-coalition, 67,067. The majority against the new Constitution is 6079. These footings will not be materially changed by the official count.

The latest returns of Representative elections give the following result: Whigs 184; opposition 98; no choice 18.

☞ Col. Benton says that there will be but two questions before Congress at its coming session, to wit: the construction of the Pacific Railroad by the central route, and the organization of Nebraska. He anticipates the opposition to both, from party motives, to slavery, and maintains that the measures on that question will never pass until his recommendation viz. either to the military will the railroad shall be carried out.

Our Telegraphic News.

Washington advices, of the 20th inst., say: The Union says that Joshua Bates, of the firm of Baring, Bros & Co., has been appointed umpire to the mixed commission, and has accepted the office.

The Intelligencer has a severe article on Secretary Guthrie, characterizing him as a bold, bad man, whose conduct has brought discord into the party.

A New York despatch, of even date, states: After a succession of several days of exceeding wet, foggy and uncomfortable weather, a change of wind this forenoon was followed by a clear sky and the afternoon and evening has been fine, and nearly as warm as summer.

A Baltimore despatch, of the same date, says, the Indiana and Illinois delegations have not been received; they contain Galveston dates of the 11th inst., but the news is generally unimportant.

The Indiana had become very bold, committing many depredations.

Eight companies of infantry had left San Antonio for Eagle pass.

Gov. Bell was about raising companies of rangers for the protection of the frontier.

New Orleans advices, of the 19th, say: Wm. H. Grogan, late chief operator in the New York and New Orleans offices of the Washington and New Orleans telegraph lines, and formerly connected with the Morse line between New York and Boston, died this morning of a lingering illness of several months. Mr Grogan was a native of Liverpool, England, and was one of the oldest operators connected with the telegraph business in the country.

An Albany despatch, also of the 19th, says—The Troy Times publishes an account of a much larger amount than has been reported.—The accused individual is the present Mayor of the city, and has left crowds of creditors.

Flooding in the Navy and Merchant Service.

The words of the law by which flogging on ship board was abolished are—"That flogging in the Navy, and on board vessels of commerce, be and the same is hereby abolished from and after the passage of this act." The verb *fay* in this defined by Webster: "To beat or strike with a rod or whip; to whip; to flog; to punish with repeated blows." To *flog against word applied to whipping or beating for punishment, as to flog a school-boy or a sailor.*

In the telegraphic report of the charge of Judge Curtis, at the session of the United States Circuit Court, in Rhode Island, it is stated that he said "that the flogging which is inflicted under this act, is only the flogging which had been practiced in the Navy—that is, only a few stripes. The law does not prohibit any other mode of correcting seamen."

Many of our exchanges take exceptions to this ruling of he Judge in the case above cited, and we think with reason; for if the decision be sound, flogging in the Navy should have been abolished, nor in any considerable degree ameliorated. The decision is a most unfortunate one. Judge Curtis had better learn from Blackstone that the law should, in doubtful cases, always be construed "in favor of liberty," or what is much the same, *humanity*. We trust that when the decision of the Circuit Court comes up upon appeal to the Supreme Court, the voice of reason and mercy will not be stifled by any doubts that may arise in the muddled head of any Judge Curtis.

Rhode Island Constitution.

The people of Rhode Island are to vote to-day upon a question which they have once decided, by the legislature but winter passed an act for submitting to the people the question whether a Convention should be called to revise the Constitution, and requiring the people to choose delegates to the Convention, in case the affirmative vote was in favor of it. The people decided that such a Convention was not to be called, and chose the delegates. These being no Convention, the election of delegates was in the nature of the case a nullity. They never had an official existence. They were elected to a specific Convention, and that Convention never was held, and they cannot legally be delegates to any other Convention. The Legislature, however, at its late session—was instructed by the people did not know what they were about when they voted against the Convention, or that somehow or other the popular vote did not express the popular sentiment—passed a law for submitting to the people the question whether after all a Convention shall not be held, and whether the delegates chosen as above mentioned shall not be—not revivified, exactly because being born dead they never had any life—but galvanized into vitality, and being considered as good as alive, be called together to revise the Constitution. The Providence Journal, according to the Boston Journal, says:

"On Monday, the people, according to the act of the General Assembly, are called upon to decide again. What they will decide, in the second case, if they will change their fundamental law in violation of its own provisions, and set the precedent, which Delaware and Massachusetts have just refuse to set, that the whole law of the State in the power of the mere accidental majority of the day, making it liable to change with every change of party, and the people liable to be called upon at every session of the General Assembly to the excitement and inconvenience of an election. All the forces that are really desirable can be obtained in a legal and constitutional way, and without endangering the rights of minorities."

Another Sickener.

The Advertiser, hitherto the dirtiest advocate of the hybrid coalition in the State, always excepting the Boston Commonwealth, has "pulled to" under the pressure of Post Office influence, and abandoned all its former professions. It says—

"And as for a coalition for purposes of constitutional and State reform, it is entirely now or too late" to effect any such results by any means. The 'condition is dead,' and no good for even State purposes can be effected by clinging to it. State critics are dangerous, and now more than they have been for the last four years, but they can be effected only through the regular democratic organization. And we hope and trust all democrats will proceed to do in this path until Massachusetts shall be restored, and the constitutional amendments and forms demanded by democratic principle be permanently established."

Ah, ha! The following is a copy of a curious bill posted about town to-day:

"All Democrats are to leave of the Administration of President Pierce, not opposed to all State and National political Coalitions, are requested to meet at Huntington Hall on Tuesday evening, the 22d inst., at 7 1-2 o'clock, for the purpose of effecting an organization, and to nominate ten persons to be supported as candidates for Representatives, on Monday, the 28th inst. Hon. I. W. Bonny, Hon. Caleb Cushing, and others, will address the meeting."

The Advertiser this morning formally announces the dissolution of the "coalition."

State Papers.

It is fortunate that the State Almshouses are nearly completed, as several coalition vagabonds, who were depending upon the success of the coalition to obtain their support from political offices, are supposed to be in a deplorable condition and anxious to avail themselves of the benefits of those state charity houses. These men have already cost the State many hundred thousand dollars, and the people have learned that they can be supported cheaper as State paupers than as public officers.

CITY MATTERS.

☞ The alarm of fire on Saturday evening, originated in a house on Church street. Damage trifling.

☞ Owner wanted for a large brass shop key, inquire at the Marshal's office.

☞ A Bad Place. On Saturday night, a disgraceful fight occurred in the cellar at the corner of Central and Market streets. One of the parties, Alexis Baker, of Detroit, got very severely cut up and bruised. This is the second time we have had occasion to refer to this same locality, and we trust we are of frequent occurrence there, and we call upon the police to see to it, and remove a nuisance from under the public nose.

☞ We understand that warrants will be issued this week under the liquor law, by the Deputy Sheriff of our Police Court, against liquor dealers in this city.

Reuters Lost. One of our city watchmen was made aware last night, to arrest a couple of customers, made No. 1 secure by a pair of wristlocks, but while after No. 2, No. 1 stepped out with his new ornaments, and neither man nor property have been seen since.

☞ *Fire Job.* Kerr, upon the capital in the City hall, was discovered to be on fire by a passing watchman, which, on account of the moist state of the atmosphere, did not much improve Joshua's *lilliputt* appearance. He was picked up by the police, and locked up "to sober off." His mouth has not been anchored in the canal for a few hours first.

☞ In the Police Court, this forenoon, Isaac Tracy, for drunkenness, was fined $3 and costs. Could not pay, and was committed to jail.

Attraction at Jackson Hall. The grand Diorama of the Conflagration of Moscow, combined with Original Paintings, Ventriloquism, &c., opens at Jackson Hall to-night—for four nights only.

☞ Miss Wright sleeps in an humble grave in Cambridge, but her poet son of the Valley of Canton, St. Lawrence Co., with a simple monument, bearing his name, and dates of his birth and death. He offers his services as converted into an ice-house attached to a hotel.

☞ Rev. Asbiscuite L. Brown united a happy couple in the holy bonds of matrimony, at Watertown, N. Y., last week. She conducted herself with marked grace and propriety throughout the ceremony, and evinced a clear understanding pertinent to the occasion except the primeval "I will."

☞ Rev. R. H. Chapin, in a lecture in Boston on Wednesday evening, brought down the house by the following remark, to which the audience either gave a local application:—" Many a man who has stuck to his legatees would have acquired a competency, but his intellect was weak, while others who have forsaken their vocation for the senate chamber have astonished senates and the world with their wisdom and eloquence."

☞ The Ohio river was in fine navigable order in Pittsburg on the 18th, and the United States engineers at Pittsburg and St. Louis had commenced running.

☞ On the banks of the Miami Canal may be seen frozen fish on the towpath, engaged in unloading boats. They are said to be able to do almost as much work as common laborers, and are much cheaper than Irish or Dutch.

A Lawyer Reared in the Municipal Court. Tolman Willey, Esq., a member of the Suffolk bar, was reared in the Municipal Court, and his client Court room in Boston recently. He had anxiously detected a client charged with highway robbery, in the Jury dock, and was looking round for his cue, at the conclusion of the trial, to wow game.

☞ It is suggested that Pittsburg will be the next Presidential Convention place.—Why so sure, (Wood and Ware.)

☞ The Springfield Republican observes:—If Gen. Cass is appointed Colonial Court by reason, (Wood and Ware.)

☞ The Springfield Republican observes:—If Gen. Cass is appointed Colonial Court by reason of his services, where the new Constitution was, meaning the document. "Well," says the Governor, "I don't know; but I rather suspect that Robinson's have got it." The question naturally arises, what is Robinson's Constitution with the prize. Why not have it established after the manner of the Egyptians? Is it supposed that Robinson's Constitution is the article in chaos or that they have divided it?

☞ At a meeting of the Spanish Cabinet, at which the Queen presided, the question respecting a Protestant burial ground was finally settled, the Cabinet resolving that a special burial ground should be given by the Government of Protestants, whether with or without the right to perform religious ceremonies is not stated.

☞ Georges C. Lurgo, a foreman in the office of the New York Journal of Commerce, committed suicide by cutting his throat with the muscle of his gun to his chin and blowing out his brains.

On Saturday afternoon, Mr M. L. Gates, chair dealer, at No. 56 Commercial street, Boston, left his counting room for a few minutes, and during his absence some person effecting rascal stole from his safe notes of band and acceptances for $1192 41, realized bonds for $1000, $7 in change, and a parcel of letter stamps.

☞ Bayard Taylor, the wandering editor of the New York Tribune, is on his way home from Japan and China. He is expected at New York about Christmas.

☞ The nautical life-boat is a late and ingenious invention, effected by placing a small life-boat inside a larger one, and filling the space between with cork, which renders the boat a life preserver, and capable of sustaining in the water four hundred pounds weight. It is said about the usual size of the ordinary pail and holds about the same quantity of water.

☞ The Boston Post says the State owes seventy-five cents per bushel for corn, and will probably not receive more than half that is beyond the reach of a Cabinet whose.

☞ Silas Wright sleeps in an humble grave in the village of Canton, St. Lawrence Co., with a simple monument, bearing his name, and dates of his birth and death. He offers his services as converted into an ice-house attached to a hotel.

☞ The Litchfield Enquirer estimates the loss by the late storm to the towns and to individuals in Litchfield county, Conn., at $100,000.

☞ Bishop Atkinson has entered upon his duties as Bishop of North Carolina.

☞ Professor Rowsick has resigned his Professorship in Columbia College.

☞ Spain and Portugal, it is said, are about to fight.

☞ The United States Review has arrived at these judicious conclusions:

"It is time that we were writing for a newspaper nuisance."

It means nothing. It hints against the inelegance, without opportunity for reflection, certain ideas which are in the air. It suggests a nuisance dressing for a ball in the dark; painting a woman's face by candle light; or the answering questions of fact from imagination. It is the expression of a thought before it is ripening fools believe you have done it. Worse than all, it is the habit of writing for writing's sake, instead of quality; diluting flasks of fragrance with water, and presenting cologne off hollow tubes for the bees of solid metal.

Derangement of the Liver,

is one of the most common causes of Dyspepsia, and of nervous misery in American physicians. It had been long known to the medical profession, and is now freely on all parts of the United States, and yet up to the time of the discovery of Dr. Hostetter's Stomach Bitters, it was almost beyond the reach of medical skill. Thousands of testimonials can be seen at the office of the Bitters, which thousands may yet be destined to feel the direct influence of this wonderful remedy. Let the afflicted read the certificate of Mr. Wilson, one of the Commissioners of the Court of Common Pleas, and the opinion of Dr. Wilson, one of the most eminent physicians of the Lower Falls feel confident that they offer a remedy which will cure every case of Liver Complaint, and every disease which arises from a disordered state of the Liver.

☞ It is suggested that Pittsburg will be represented in the next General Court by something of a Cass man.

☞ A postal convention has been concluded between England and Spain.

FALLING OR LOOSENING OF THE HAIR.

If this disorder be neglected, it will assume the precursor to baldness, and in the most unfavorable form. Use the Restorative which gives natural color to the hair, and which the most delicate may use with safety.

DANDRUFF AND SCURF.

This disorder, in most cases owing to neglect or a want of proper attention to the hair, is entirely removed by the use of the Restorative.

HEADACHE! HEADACHE!!

If you would be relieved of headache, and the dreadful consequences of nervous affection, use the Restorative. It will in a few days restore the nervous system to its natural healthy spirit resulting from a head clear and free, and a brain free and active from that dreadful burning pain.

CHILDREN—It may be used upon the heads of children with perfect confidence.

Whatever may be the disease of the hair, the Restorative will cure it. Its operation, perpetual in its proper influence upon the hair, is to restore it to its natural color, to prevent it from falling off, and to promote a new growth. Where the hair is entirely gone, and the various species of nervous affections, it will produce a new growth, and in a short time. Where the hair is turning gray it will also restore a prepossessing appearance, rendering it beautiful and luxuriant in its growth.

Where the hair is falling off, and the scurf and dandruff be dead, nutritious, and vitality, hypermedicate, dyspeptic, peculiar to the head, it will restore the hair to its natural color, and to the head its natural healthy appearance. Where the hair is dry, it will

a caller under the Parliament House, removing his stock in trade to some other place. Upon this, the conspirators, who with all their digging and charging, had not yet dug through the foundation, thick with money, changed their plan, hired this cellar, which was directly under the House of Lords, put in and stored thirty barrels of gunpowder in it, covered it over with faggots and coals. Then they all dispersed and departed, when the following November the operators were admitted by Sir Edward Baynham, of Glougestershire, Sir Edward Digby, of Rutlandshire; Ambrose Rookwood, of Suffolk; and Francis Tresham, of Northamptonshire. Most of these were rich, and were able to let out the cost; which with money and some with horses, upon which the conspirators were to ride through the country and rouse the Catholics, after the Parliament should be blown into the air.

ELECTION.....MONDAY, NOV. 28.

THE LOWELL POST OFFICE is still the theme of discussion in some circles in this city. The general desire and belief is, that Hildreth will be promptly rejected the moment his nomination comes up for confirmation in the United States Senate. The whigs and citizens generally seek this condemnation because of Hildreth's known and life-long democracy. The free soilers and pseudos coalition democrats seek the same condemnation because Hildreth has so recently, like a Judas or an Arnold, betrayed their cause, and abandoned the sinking ship, leaving his friends to drown in "untitled, unhonored, and unknown." The National Democracy have no

ELECTION.....MONDAY, NOV. 7th.

Thanksgiving Sentiments.

To-morrow is Thanksgiving day. As no paper will be published from this office on that day, we propose to offer some remarks appropriate to a Thanksgiving occasion to-day.—Thanksgiving day contains to us two relations: it is the one day we have duly commemorative of the fathers of New England; it is the festal day of the Genius of Industry. We dwell on each a day to recall the memories, the achievements, the deathless merits of our Pilgrim ancestors—to look retrospectively to those from whom we have sprung—to see who were our fathers, who our mothers, and to what stock among the multitudinous races of Adam we belong.

Many attempts have been made to portray the Puritan. Carlyle, of course, embroses him on the loftiest pinnacle of fame—calls him an "earnest man," a "hero," and Puritanism one of the sources of "heroism" in the world. On the brilliant page of Macaulay, too, he stands invested with most or all of the attributes of divinity; looking down from his lofty throne on the eloquent, on nobles, and on princes," with contempt; conscious in himself of being "rich in a more precious treasure, eloquent in a more sublime language"—a noble "by the right of an earlier creation," a priest "by the imposition of a more sacred hand." Channing, Everett and Webster, have also added their names to the endless catalogue of those who, like the historian, Noah, have done honor to the ark to the very heaviest the colossal monument of Puritan literature.

But there was after all something in the sturdy, honest, psalm-singing, prayer-whining, God-fearing Puritan, which, on the one hand, yet adequately described—something which, it is probable, no one will successfully essay to delineate in the life. As somebody has said of Lord Byron—the Puritan was "an embodied antithesis." Carlyle's portrait is a contrast of elements—such an opposition of characteristics—such a combination of cant and honesty, of affectation and sincerity, of generous neighbor and the hard-bargain-driver, of the saint and the savage, of conservative and radical—that, call him what you will, you sum up but partly right, another view being always before your mind's eye. We cannot tell whether a eulogy by a democratic admirer, or a denunciation by a royalist detracter, last expounds the true calibre of this "earnest man."

But with all his affectation—and he had plenty of it—the Puritan stood before his fellow-men eminent for intelligence, talent, industry, public spirit, and for his devotion to pure with Bible and Catechism and Whole Duty of Man. He founded town, state, emphasis, a third estate, *tiers etat*, and they left the impress of their democratic character on all their institutions—on Church and on State, and on all their posterity. They left us a democratic Church, a democratic State, and a democratic School—a Church without a Bishop, and a State without a King. All about us bears this impress of sturdy democracy, and, we trust, will remain it forever.

As we have instanced, they were an industrial people, given to agriculture and the useful arts. At their command the virgin earth teemed with luxuriant harvests. The barren wastes of the sterile American wilderness likewise seemed like the blushing rose in the halycon days of their parent toil. With one hand they held the plow, and thinned the ranks of King George's troops with the red-hot "coffee" they handled in the other. From the plow to the battle-field they regained with native valor, and carried to the work of death the same constancy of purpose which had aided forces in the work of life. History taught them to toil; but, from history, they had another monitor of emotion, "without work they may not live." Neither foreign nor domestic annals furnish a more cogent argument than that. This, then, was the power which enabled them to accomplish what they did—to maintain liberty at home—to maintain house abroad—to hurl defiance in the face of every foe—to achieve a name, and a *thousand years of glory*, by speaking into life a nation, immortal, independent and free! In the annals of the mighty past, there are many rare things

GLENN'S

True Verbena Water.

THIS delightful perfume, prepared by a chemical process, from living plants, is

LUXURIOUS TRIUMPH.

Is confidently recommended to the Ladies in particular, as necessary to the toilet, and a delightful perfume. It is unlike all the fragrance of the plant itself in a concentrated form, and as the hand rests softly after removing the lid, a sweet odor is wafted to the nostrils, and a delicious and a pleasant change for the Eau de Cologne.

For sale by the proprietor, GLENN & SON, Druggists, Tremont Row, Cornhill, Boston, and by druggists generally.

time caused the Queen so much remorse, that she ever held the Duchess of Buccleuch in disgust, and withdrew entirely from her all royal favor. It can be very easily perceived, therefore, that the Duchess of Sutherland, the partaker of the incendiary authorees, was about the last person, who could have incurred for their friend' s cordial, or any reception, at the Court of Queen Victoria. Lady Flora was the young lady to whom Hugh Boston Legare, once Attorney General of the United States, wife in Belgium, was so devotedly attached.

ELECTION—MONDAY, Nov. 8.

THE ELECTION ON MONDAY looks in the highest degree favorable to the Whigs. The Coalition, by the acknowledgment of the Advertiser and American themselves is dead beyond the possibility of a resuscitation. The free soilers are disheartened, their last hopes crushed forever, and their force elongated to a monstrous and disproportionate length. Let the Whigs only be vigilant, and victory is sure. Let every Whig be at the polls, and our whole ticket can be elected without the smallest difficulty. This is not only desirable, but absolutely necessary, in order to put it beyond a doubt that demagogism and Dutiesism (which is both the same,) are completely extinct in Lowell. Meantime, let every Whig be on the alert. See to it, that a full whig vote is polled on Monday next; let no stone pass lyon our efforts for our party's success; let no diversity of opinion on any other moral question prevent our united, energetic and harmonious action in the common cause; and we are confident, that whenever the whig party is earnestly united, it is thus irresistible.

THE HOUSE OF REPRESENTATIVES. In connection with a revised summary of the House of Representatives, we subjoin the figures standing viz: whigs, 108; opposition, 101; vacancies, 1.0—whig majority 63.—The Boston Daily Advertiser adds the number of the members of the Representatives from the same towns last year, as follows: whigs, 139; opposition, 73; vacancies, 74, and also adds the number of members this year from those towns which have thus far made no choice this year, to wit: whigs, 34; opposition, 20; vacancies, 76. The Advertiser remarks: "It will be observed that in the towns which have thus far elected, the whigs have made an absolute gain of 46 and a net gain of 18. If they should gain in the same proportion in the remaining towns, (which we see no reason why they should not do, if they make proper effort) their majority will be increased to 81. Even if the remaining towns should choose the same as they did last year, the whigs will have a majority of 36. We have not included in the above, which the twelve towns which right to representation is exhausted. Six of them had no whig and only one opposition representative in the last Legislature; the other six had none."

☞ We are permitted to publish the following extract from a private letter:

WASHINGTON, D. C., Nov. 32, 1852.

Washington is now in readiness for the incoming Congress—having been thoroughly cleansed from cellar to attic. It is not at all improbable, however, that the Board of Health may deem it necessary to recommend a like operation to be gone through with again before the session closes, with perhaps the additional precaution of a careful sprinkling of chloride of zinc. Like the mosquito and other pests, Congress has always following in its wake a train of pickpockets, blackegs, prostitutes, &c., together with a multitude of broken down political hacks who convert this usually quiet and moral city into a den of dissipation and vice.

Another diagnostical and repugnant feature attending the approach of that body, are its public accommodations—the hotels are not supposed to have been engendered by the decomposition of legislative mentality. Then comes the rumor to the Administration. Every Administration has its quota of subtle, treacherous and intriguing foes in its own ranks, who go about devouring the reputation of the fair youth about to persuade a multitude that they are not as well pestered as they ought to be, shall never want for attentive and favorable hearers." There will be many persons of the shoreless kind, who will probably succeed in getting up considerable of an "outside hum," but very attempts to sour the Union, it is believed will prove groundless.

The appearance of the forthcoming Pres. dent's Message is awaited with no little anxiety, by all parties. It is believed by many, that the document will satisfy the most intelligent Whig. Cushing did not speak unadvisedly when he said that the President was "*up to any occasion*" which might arise—Mr. Cushing is regarded here as the "leading spirit" in the Cabinet. His ability and unfailing industry will certainly render him prominent in any position in which he may be placed. I eat this letter short, with the expiring wish of Father Paul to his country, "*Esto Perpetua.*"

FREEDOM AT HOLDERNESS is influenced that upon his fee his revely course on Tuesday evening, were ordered by Charles T. Crane, one of his most polished lecturers, and the author of the pamphlet, Butler-Hildreth, abolition city committee. The simple fact, that Hildreth called Mr. Butler "a lurking human and there repressed his wish that he (Hon. L. W. Beard) would be present to speak at the caucus in person, in order to identify him with the objects of the meeting, notwithstanding his effects to say it to the whigs, to the rum party, and to others collectively. Poor Fisher, you had it hard, after all, to jump into Beard's humbug-caucus, much as you favor and cringe to that old hard-shelled democrat! It will soon be "all over" with Fisher!

CLOSE OF CANAL. The Cleveland (Ohio) Herald has the following: Of the convicts confined in the Tennessee Penitentiary, 32 were pardoned before sentence, and 102 unconditionally, and 147 were released by their sentences expiring. There are 43 whose fathers were transported, 108 whose fathers were intemperate, of whom 73 took themselves to drink. There are three who have had a classical education, 7 a common English education, 156 who can read and write, 62 who can read only, and 69 who have neither of the above. Of the convicts, over very directly that intemperance and the use of ardent spirits are the two most fruitful sources of crime.

For the Journal and Courier.

The Constitutional Amendments.

It is infinitely amusing to hear the various contradictory reasons assigned, by the coalition journals, for the defeat of their yet scheme, the new constitution. The "Times" says it was "an edited enough, and, therefore, rejected by the Democrats. Others say, it was Boston influence—the money of Abbott Lawrence that controls on the catastrophe. Others still, it was the Roman Catholic vote that gave it its quietus. Caleb Cushing's letter, say others, was not sufficient a fatal stab, and the life blood out of the new born bantling of the coalition, and so on to the end of the chapter. All these reasons, and every reason, possible and impossible, but the true one, are assigned for the result that has filled our party with joy unspeakable, and covered the other with mortification and disgrace.

We are reminded of an anecdote of the late Samuel L. Mitchell, of whom everybody has heard. He was, as all know, a most learned man and a great philosopher, and would occasionally, to his own satisfaction at least, for all the phenomena that were happening in the material world around him. He was somewhat credulous, to be sure, and easily hoaxed. A wag of a fellow, filling a pumpkin with feathers, put in a steadnut, one day, thus addressed him:—"Doctor, can you give the reason why white sheep have more wool than black sheep?" The Doctor immediately entered upon a most learned and elaborate disquisition, touching the subject, and fanned a very ingenious but fanciful theory to explain the phenomenon.—"Oh, fie," says the wag, "that's not it."—"Well," retorts the doctor, "can you tell why white sheep have more wool than the black sheep?" "To be sure I can," replies the joker, "there are more of them."

Now if the coalitionists would just take a natural view of things, they would see that at no loss for a reason why the proposed constitution was rejected. There is a body of living intelligence, in the State of Massachusetts, disengages call them the dear people, when they want their votes, and when they don't get them they call them fools, who in this profane not to be mentioned to ears polite, A large majority of the people, both in and out of profession in life, creeds in religion, and, in a good degree, belief in politics, preferred the old constitution, with its faults, to the new one with its abominations. So preferring, they voted as they did. Hence they are treated with all sorts of abuse, and called all sorts of bad names—knaves, fools, old fogies, fossils, &c., &c. The people, too good natured, and too well pleased with the result of their labors at the their disappointed neighbors, simply laugh at their rage, and defy their malice.

We don't think that the expense of the defunct convention has been money entirely thrown away. Several worthy gentlemen have found employment, at fair pay. It proved a god-send to the paper manufacturers, in the month of November, when the trade is usually so good white paper, on which to print the proxy speeches of the members. Type founders and printers have come in for a good share of the golden shower, and the people and the politicians have both received a useful lesson. The former—the one to distrust and repudiate demagogism, the other to beware how they pressume upon the ignorance and credulity of the people.

SEVEN AMERICA. From the Argentine Confederation we learn that the constitutional convention of the other thirteen provinces, exclusive of Buenos Ayres, which has twelve votes—which was still in session at Santa Fe. They had refused to accept the resignation of General Urquiza as provisional governor.

The election of president and vice president under the new constitution was appointed to take place on the 20th of this month. It was said that Urquiza would undoubtedly be elected president and probably Senor Gurruri vice president. Senor Carrell was one of the plenipotentiaries appointed by Urquiza to conclude the treaties for the free navigation of the rivers, and Quvaza is the president of the constitutional congress.

The congress of the thirteen provinces had unanimously approved the treaties with the United States made by Urquiza.

The seat of the confederation has been established for the present at Parana, which is in the province of Entre Rios, on the river opposite Santa Fe.

At Monte Video all was quiet under the provisional government established by General Pachoco and his associates.

☞ Of the population in China and the Germanic states, the Sun says: "The census of the former country is estimated, and it is believed, correctly, at 367,482,967 inhabitants.—In the despotisms of Germany—Austria, Prussia, Turkistan, Thibet, &c., the population is about 48,000,000, making a total of over *four hundred* millions of people under one government, a eighteen times as many to live under this Republic. Should our population double in number every half century, it would require nearly two hundred and fifty years to acquire a population equal to the present census of China.

The quantity of land in China is estimated at 830,820 100 English acres, of which 141,119,247, are nearly one-sixth, under cultivation. The total area in square miles, is 1,297,099, and the population on each square mile 283. Were the Chinese a warlike people, and as far advanced in all the modern arts and sciences as the Americans or English; they could overrun all Asia, and conquer the combined armies of Europe. The effects of a successful revolution among 400,000,000 cannot be foreshadowed by any human imagination."

JUDGE CURTIS OF FLORIDA ON SHIP BOARD. The telegraph gave a very erroneous report of the decision of Judge Curtis respecting the right of abolishing flogging in the naval and merchant service. Our remark, therefore, in disparagement of that learned jurist, was not called for. The tract as somewhat. His decision, as now reported, however, is a little ambiguous, to say the least. Here it is:—

He declared punishment by flogging to be inconsistent by the infliction of stripes with the act of 1850, but, or punishment which use the same in manner and effect to identify him with the objects of the meeting, notwithstanding his effects to say it to the whigs, to the rum party, and to others collectively. Poor Fisher, you had it hard, after all, to jump into Beard's humbug-caucus, much as you favor and cringe to that old hard-shelled democrat! It will soon be "all over" with Fisher!

CITY MATTERS.

BOSTON.

The Whig Central Committee will meet in their Room in Central Court, (second story) on Friday evening, 12th (FRIDAY) evening, at 7½ o'clock precisely, punctual attendance is requested.

Nov. 11. L. W. JAQUITH, Secretary.

☞ Hon. Tappan Wentworth, our Representative in Congress, (accompanied by Mrs W.) left for Washington to-day.

FALSE ALARM. Last night and the night before, there were false alarms of fire. This species of outrage has recently become of almost nightly occurrence, and we would respectfully suggest to the City Government the propriety of offering a reward for the arrest and conviction of the offenders.

WELL DONE. Messrs Cushing & Mack, stove and tin ware manufacturers, of this city, presented to each and every man in their employ a good turkey for Thanksgiving.

SWINDLING. On Wednesday afternoon a man belonging in Windham, N. H., called at the cellar, corner of Central and Market streets, and while there, got swindled out of $9, principally in bills of three cent notes. The suffering individual reported the case at the marshal's office, and the parties have been apprehended.

☞ The Fancy Goods are referred to the advertisement in to-day's paper, of James G. Hovey & Co., Boston, who have a choice stock, and sell at low prices.

☞ John B. McAlvin, Esq., of this city, has been appointed by the Governor a Justice of the Peace.

GOVERNOR JOHNSON'S RECEPT. Arrangements have been made with the railroad company to run an extra train down and back to the Governor's Benefit, at the National Theatre this evening, for fifty cents fare both ways, provided sixty tickets can be sold. The Governor has scores of friends in this city, who, we doubt not, will take the requisite number of tickets and thus give him a handsome testimonial of their appreciation of one of the best executives in the country. Tickets may be had at the office, at the American House, and of individuals.

POLICE COURT—*Friday*, Nov. 12th. Joseph McDermott, formerly a supernumerary at the Museum, on charge of picking a portemonnaie from the pocket of an individual, was held in $300 to C. C. P.—could not give bail and was committed. David Dixon, a common drunkard, sent four months to the Lowell Work-house. James McNally, fined $1 and costs for drunkenness—paid. Martin Tearney, for assault and battery, fined $2 and costs—paid. James Slowey, a minor, for larceny from E. Hapgood, sentenced to the State Reform School during minority.

CASUS FROM THE OCEAN-WORLD; or Experiences in a Voyage to Europe, principally in France, Belgium, and England, in 1847 and 1848. By Rev. Henry Ward Beecher. Auburn: Derby, Miller & Co. Boston: Phillips, Sampson & Co. Lowell: Stimpson & Whittemore, 1853.

This volume of 400 pages, we are informed by the publishers, is filled with illustrations, is now canvassing this city with the above work;—a subscription for it would be a work of supererogation. The author needs no introduction to its favor. Ladies and gentlemen of high character and refined taste, who have traveled much in Europe, and especially in places described in this volume, have bestowed upon it the most unqualified commendation. The author is a teacher by profession, and he furnishes in this volume much valuable information in relation to the various systems of education abroad. The sketches of the scenes, incidents, character, costume, monuments, churches, palaces, and gardens, are all graphic and often powerful.

These handsome volumes contain a great variety of happily written sketches—each independent in itself, yet all forming a systematic whole—exhibiting a most graphic picture of European and Oriental life in the fifth century. The work is very happily conceived, and fills a gap in historical romance, in a manner highly creditable to the genius of the author.

☞ Governor Clifford's Thanksgiving Proclamation is issued in the following terms: "The people of the New Express: "The Proclamations of the Governors of the several States, setting apart days of thanksgiving this year, have been distinguished for one thing—and one only—a studious omission to return thanks for extreme brevity. To our notion, now, a Thanksgiving Proclamation should not aspire to be more than an entire train down and back to the Governor's Benefit, at the National Theatre this evening, for fifty cents fare both ways, provided sixty tickets can be sold. The Governor has scores of friends in this city, who, we doubt not, will take the requisite number of tickets and thus give him a handsome testimonial of their appreciation of one of the best executives in the country. GENERAL SUMMARY.

☞ We were almost provoked on Wednesday, on reading that portion of our own leader where we were made to speak of the United States as the *Mecca* of nations. Nonsuch is the word. A girl "sitting in tears," is rather an inappropriate image for the "model Republic" of the West.

☞ We see by the Boston papers, that Daniel Ayer sells at auction 48 lots of land in South Boston, next Tuesday. Many a man has made his fortune by owning a small piece of land in Boston.

☞ We learn that the President has appointed Robert Greenhow agent in California to ascertain and settle private land claims, and Louis Blanding, law agent before the board of land commissioners. The President has reversed the sentence of the court martial on Gevers'or's Island, cashiering Capt. H. B. Field and ordering him to be discharged from arrest.

☞ Persons having friends in the East Indies, or attached to the Japan Expedition, are informed that a steamship will be despatched from the Brooklyn Navy Yard, about the 10th of December next, for the squadrons of that station. Letters directed to the care of the Naval Lyceum, Navy Yard, Brooklyn, postpaid, will be forwarded.

☞ The House of Representatives of Georgia have by a vote of 97 to 57 refused to print the resolutions censuring the administration for its interference in politics previous to the late election. The Senate refused to lay them on the table and ordered them to be printed.

☞ The Boston Times says: "We expect to see the Democratic party of Massachusetts dwindle down to a few abolition battalions, without the power even to return a blow. It should there be found any party cruel enough to strike them."

☞ The States of Maine says: Messrs. Clark and McClellis have contracted to send 6,000,000 feet of lumber from Canada to Portland next season, and have already got a large part of it. They have extended their operations so as to cut 20,000,000 the ensuing winter for the Portland market.

The lumber operations of Messrs. Pingree and others, upon Umbagog Lake and the head waters of the Androscoggin, will also largely to the lumber trade of Portland another year.

LEON NAPOLEON and his Empress, are about to send four months the Lowell Work-house, to James McNally, fined $1 and costs for drunkenness—paid. Martin Tearney, for assault and battery, fined $2 and costs—paid. James Slowey, a minor, for larceny from E. Hapgood, sentenced to the State Reform School during minority.

CASUS FROM THE OCEAN-WORLD; or Experiences in a Voyage to Europe, principally in France, Belgium, and England, in 1847 and 1848. By Rev. Henry Ward Beecher. Auburn: Derby, Miller & Co. Boston: Phillips, Sampson & Co. Lowell: Stimpson & Whittemore, 1853.

This volume of 400 pages, we are informed by the publishers, is filled with illustrations, is now canvassing this city with the above work;—a subscription for it would be a work of supererogation. The author needs no introduction to its favor. Ladies and gentlemen of high character and refined taste, who have traveled much in Europe, and especially in places described in this volume, have bestowed upon it the most unqualified commendation. The author is a teacher by profession, and he furnishes in this volume much valuable information in relation to the various systems of education abroad. The sketches of the scenes, incidents, character, costume, monuments, churches, palaces, and gardens, are all graphic and often powerful.

These handsome volumes contain a great variety of happily written sketches—each independent in itself, yet all forming a systematic whole—exhibiting a most graphic picture of European and Oriental life in the fifth century. The work is very happily conceived, and fills a gap in historical romance, in a manner highly creditable to the genius of the author.

☞ Governor Clifford's Thanksgiving Proclamation is issued in the following terms: "The people of the New Express: "The Proclamations of the Governors of the several States, setting apart days of thanksgiving this year, have been distinguished for one thing—and one only—a studious omission to return thanks for extreme brevity. To our notion, now, a Thanksgiving Proclamation should not aspire to be more than an entire train down and back to the Governor's Benefit, at the National Theatre this evening, for fifty cents fare both ways, provided sixty tickets can be sold. The Governor has scores of friends in this city, who, we doubt not, will take the requisite number of tickets and thus give him a handsome testimonial of their appreciation of one of the best executives in the country. Tickets may be had at the office, at the American House, and of individuals.

POLICE COURT—*Friday*, Nov. 12th. Joseph McDermott, formerly a supernumerary at the Museum, on charge of picking a portemonnaie from the pocket of an individual, was held in $300 to C. C. P.—could not give bail and was committed. David Dixon, a common drunkard, sent four months to the Lowell Work-house.

EXCELSIOR HAIR TONIC!

A purely VEGETABLE Preparation for promoting the Growth, Preservation and Beauty of the HAIR.

THIS article has been thoroughly tested, and the result is, its universal commendation of every one using it. It is a preparation of vegetable ingredients, which, as a foundation to this great preservative for the hair, renders it soft, pliable and glossy, and in most conditions its curling, dressing or other operations unnecessary, as it will retain the hair in any style desired. The Excelsior Hair Tonic being a purely vegetable preparation in the liquid and the only thing worthy of the name.

BALDNESS! BALDNESS!!

Should any one desire to see his head covered with a luxuriant growth of hair, let him take immediate use of the Excelsior Hair Tonic.

FALLING OR LOOSENING OF THE HAIR.

If the disease is not of long standing, a few applications will restore the hair. But it will be by means a desirable article to use, as it is highly recommended by a thorough use of the Excelsior Hair Tonic.

DANDRUFF AND SCURF.

This disease is the most annoying to contend with, and requires the most searching remedy to entirely and entirely eradicate it. By the use, according to directions of the Excelsior Hair Tonic.

HEADACHE! HEADACHE!!

If you would be relieved of headache, and this most distressing complaint removed upon it, take it in time, and use the Excelsior Hair Tonic. A few applications will relieve you much—and by using it freely and faithfully, you will find relief and a new growth of hair, and use the Excelsior Hair Tonic.

CAUTION! Beware of worthless imitations under the heads of Excelsior Hair Tonic.

For Preparation only by LEONARD & CUNDALL, Drug Store, 33 Central street, Lowell, Mass.

ELECTION.....MONDAY, NOV. 29.

Once More, Rally to the Polls!

On Monday next, the Whigs of Lowell are again to meet and do battle with the hosts of their enemies; and it is expected that every man will do his duty. It is not to be disguised, that there is some diversity of opinion, with regard to certain moral questions, which have unhappily been brought into the arena. Some Whigs are, in the popular technology of the day, *legal* reformers; others are *moral* reformers; and others, *both*. We trust, however, that no diversity of sentiment with reference to such issues as these, will deter any honest whig from voting the whig ticket. Let moral and unchallenged Whig ticket;—for it is obvious that if we are to maintain any moral ground we agree with in all questions in morals and religion; no portion of a political character, nor indeed any other project requiring concert of action, can ever be consummated. We repeat all Whigs, therefore, to lay aside all side questions for the present;—to give their attention to political science—to vote the regular Whig ticket (which alone can possibly be elected)—and to put the cap-stone upon the edifice of that glorious monument of victory whose main structure was so gloriously consummated a few weeks since.

Let every Whig be at the polls early. Rally your friends; call out the whole strength of the party—and the victory is secure.

The New War in Europe.

It is now certain that the Eastern question, which has occupied so large a place in the public mind during many months past, must be settled by the almighty "peace maker"—the cannon. Without entering into details at present, we cannot conceive why Austria should not twist its coats with teaspipe—either Constantinople (or, as the Turks call it, *Stamboul*) will fall into the hands of the northern autocrat, or Austria will be swallowed up—Hungary, for instance, or some other neighboring nation will be carved on as independent kingdom, to occupy the place in preserving the balance of power in Europe which was once occupied by Poland. Some certain lawful forbearings in view of this contingency; but no timid fears for the future of liberty in Europe have a place in our bosom. Should Constantinople fall to Russia, it would in all probability one day become her chief capital. In that event, the Russians would lose all their present attachment to the person and government of the Czar; they would be denationalized (as in speech) by the climate of those latitudes would soon enervate their physical constitution, and the power and prestige of the Russian name would be lost, as the power and prestige of the Roman name was lost by the removal of the seat and last Constantine to the same final city. On the other hand, should the Russians come of from the contest the worse for themselves—should a new nation be created to hold the old Poland, the scale of power in Europe,—there certainly would be nothing to be feared for constitutional liberty on the old continent.

One word on our own interest in the war.—The exports *from* Russia to the United States during the seven years ending in 1852, were of the net value of $7,315,176; while the exports *from* the United States to Russia during the same period, were only $250,854.—A fact abundantly indicating that the United States have not been the principal beneficiaries of our treaty with the Russian government. It may, however, be observed, that the treaty is of importance which fully secures the most hostile party in the opinion of the United States, as well as of all other neutral nations, will secure an equitable arrangement on the war's assessment; and a great market will certainly be opened for all kinds of American products. There is a hope, probability that our ramified commercial interests may, before the end, involve even ourselves in hostilities—with some of the most of the belligerents of Europe. Meantime, let us do as Lord Palmerston advised the English to do —*stop nothing, but keep our powder dry!*

Fourther Foreign Items.

Five Russian officers had ordered at Constantinople, prisoners of war.

Admiral Dundas and Hamelien are at Constantinople. The fleets are anchored in the Bosphorus.

It is rumored that Bunkanan has been shown of perhaps premature.

The son of Abbas Pacha is named as minister of war, and other new men existing in Egypt.

The pay of the Turkish army is disbursed regularly.

Silesia—Diplomacy lags zealously in the rear of the fighting, and even yet hopes are entertained of settling the matter, must be settled after a decisive battle shall have been fought. A conclusion is also said to exist that to move the Constantinople question from the arena of diplomacy would offer any opponent in which the nations are parties.

The Vienna Diary is said to be raging in the Russian mania, and has ordered the number of its fighting men to be doubled. It has, as yet, made no decision—ministers are active here—Russia's ambassador has left Vienna.

The Czar has no friends.

TURKEY. The Porte has decided that foreign refugees shall not be employed in Bosnia but only natives.

All Poles are to be removed from the Austrian army.

Montenegro is quiet.

SERVIA. The British fleet at Spithead is ordered to be ready for sea on the 11th, but its destination is not known.

The last mayor's banquet at the 6th was attended by all the cabinet ministers; other by all the nobility.

Mr Buchanan. Mr B.'s speech was merely complimentary to a successful issue.

The earl of Aberdeen was referred to his knowledge policy of peace but said that while he still believed a peace policy it was not impossible to engage in war to preserve greater evils. The other ministers made no political allusions.

A full cabinet council was held on the occupied of the Indian intelligence; the result of the deliberations has not transpired.

The weather in England has been very favorable for wheat sowing.

FRANCE. The trial of the conspirators of the opera comique just was proceeding. It seems from the evidence to have been really a plot to assassinate the emperor.

The most formidable of France are strongly urging on the government an immediate reduction of the duty on cantals. This has created a speculation in the British iron markets.

BELGIUM. The legislative session was opened at Brussels on the 8th. The king's speech was congratulatory and talked of various reforms.

AUSTRIA. Austria is keeping strict watch on the movements of Servia, and is concentrating a force on the frontier; but otherwise remains neutral. The Servian government meanwhile, has ordered its population to arm, and has informed the Porte that neither Austria nor Russia will be permitted to occupy Belgrade.

Reschid Pacha has informed Austria that Turkey will expect the Austrian government to prohibit the Russians from supplying the Montenegrins with arms through the port of Cattaro.

It is said that Austria offers to remain entirely neutral if the Porte will refrain from employing Austrian refugees in the army; as Hungarians hold high commands in the Turkish army the Porte is likely to refuse to accede to the terms although not employing them in Europe.

TELEGRAPHIC. A New York despatch says: Charles Edward Wedemayer, the young nephew of the German department of the Crystal Palace, was arrested yesterday for stealing a bottle of perfumery from the French department. Many stolen articles were found at his lodgings.

Two men were arrested at Toledo, Ohio, last week, on a charge of attempting to rob a returned California. Upon search, and under-clad Whig ticket;—for it is obvious that if we are to maintain any moral ground we agree with in all questions in morals and religion; no portion of a political character, nor indeed any other project requiring concert of action, can ever be consummated. We repeat all Whigs, therefore, to lay aside all side questions for the present;—to give their attention to political science—to vote the regular Whig ticket (which alone can possibly be elected)—and to put the cap-stone upon the edifice of that glorious monument of victory whose main structure was so gloriously consummated a few weeks since.

CITY MATTERS.

Whig Committee, Attend!

The Ward, and Whig Committees, and Vote Distributors, who served at the last election, are requested to serve at the Monthly Ward Meeting, to be held at the usual place, on Monday Evening, at 7 o'clock.

IF A FULL WHIG VOTE IS A WHIG VICTORY! Do you hear that, boys? Every Whig is expected to do his duty next Monday.

LOOK OUT FOR TRICKS! Whigs, do not be cheated into the support of a "half-and-half" Temperance ticket for Representatives. It is a free soil trick to draw whigs from their regular ticket. The discomfitted coalition leaders, knowing they cannot possibly elect their own men, now turn their attention to defeating the Whigs. Whigs, spurn the cheat, and vote the CLEAR WHIG TICKET!

PROVIDENTIAL MEETING. A meeting will be held at Huntington Hall this evening by those "in favor of the secret ballot, ten hour's system and State reform." Is this another of Fabor's caucuses? Why is not Mr Beard announced among the speakers? Is the course not to be run?

IF The lecture of Rev. Mr Howe, which was postponed last Sunday evening, will be delivered next Sunday evening at 1-2 past 6 o'clock, unless the weather be stormy, in which case it will be delivered until the third Sunday evening in December. The collection intended for the last lecture-evening, will be taken up on the next.

THE SEWERAGE SUPERVISORS OPERATION. This forenoon Thomas Burnham, of Boston, went into the cellar corner of Central and Market streets, and was induced to bet on a game of cards, to the amount of $20, which he lost. He went and made complaint at the Marshal's office.

The Marshal and posses entered and arrested the keepers of the place for being common cellars of liquor. We hope that place will be closed up before long.

POLICE COURT. This forenoon, Jeremiah Shaw, for drunkenness, was fined $1 and costs.

Committed. Edward O'Brien, for drunkenness, fined $3 and costs, or House of Correction.

Ex-GOVERNOR CRAFTS, OF VERMONT. Hon. Samuel C. Crafts, a distinguished citizen of Vermont, died at Craftsbury, Vt., on Saturday last, at the advanced age of 80 years. The Vermont Watchman says:

For many is the days we have devoted so large a portion of their life to the public service as the late Gov. Crafts, in the Legislature, in the House and Council, member of Congress, Governor of the State, and U. S. Marshal, and in other minor offices in his town and country, we do not know of a man who has left a brighter name, or a faithful public servant, ever deserving and receiving more the entire confidence of the people.

GENERAL SUMMARY.

IF Ayer's Land Sale in Boston, on Tuesday, is expected to be a great affair. We are by the Boston papers omnibuses run from the hotel or State street to the Sale every three minutes.

IF Mr. Pierce, Attorney, of New Hampshire, who was injured on the Boston and Maine Railroad, at the time the son of Gen. Pierce was killed, has commenced an action against the road. His injury is so severe, that he is unable to preach, and he is partially blind.

ANNIVERSARY TO HON. MR. BUTLER. Hon. Zenas Bendice met with a serious accident in Barnstable on Tuesday. He slipped from the steps of the Hotel, and fell on the back of his head, breaking his leg just below the hip. Mr Bendice's health, which has been very feeble during the last winter and spring, had so far improved that he had made arrangements to start for Washington this week.

IF The Massachusetts Teachers' Association held a very large and respectable Convention in Boston a day or two since. We have not room for the able lecture of Mr C. C. Chase, of this city, on that occasion, and shall publish it on Monday.

APPOINTMENTS. Bradford L. Wales, of Rockdale; Nahum Stetson, of Bridgewater; and Samuel Hooker, of Springfield; Alonzo Young and Levi L. Goodspeed, of Barnstable, Superintendent of State Alms House at Bridgewater. John Cornwaker, of Springfield; Alonzo Y. Blanchard, of Palmer; and Alvan Smith, of Bedeid, Inspectors of State Alms House at Bridgewater.

Joseph B. Lothrop, of Boston, Superintendent and Physician of State Alms House Hospital on Rainsford Island.

IF Albert Jonnson, charged with setting fire to his house in Bangor, was arraigned, and holden for trial in $20,00 bail, which he procured.

IF At the request of the President, the ministers to China, France and Russia will not sail till they are confirmed by the Senate.

IF The news from "the seat of war" being of an one-sided character, we remind our readers that it is not altogether worthy of implicit confidence, like the intervention in Rumania was the worst lies in the world.

PUTNAM'S MONTHLY, for December, has just been received. The first article of 12 pages—"The Great Exhibition and its Visitors," will abundantly repay all the expense of a year's subscription.

IF Elihu Burritt, whose self-denying labors in the cause of practical Peace, and in behalf of the establishment of a system of Ocean Penny Postage, are so well known in both hemispheres, has just been returned to America, and is now with his friends in Connecticut. He will be cordially welcomed by his countrymen.

A SOUTHERN VIEW. The Charleston (S. C.) Mercury, speaking of the Fugitive Slave Bill, says:—The South has gained nothing but a half-victory. The law is a victory North of mason and Dixon's line, but a defeat South of it. Its true object was to settle the question forever, and to do away with the agitation—and the public may be assured that the South will not be satisfied with anything short of the full measure of its rights under the Constitution.

The Democrats hold 198 in the House, 1 being elected by the Free Soil vote, and with it they can muster a majority of 4 on joint ballot. The Senate is composed of 31 members, of whom 27 are Democrats. The Democrats have a majority of 23 on joint ballot.

IF The Post says the change in the weather on Thanksgiving evening was only about forty degrees.

IF Mr Bosworth, the postmaster at Troy, has resigned.

DERANGEMENT OF THE LIVER, is one of the most common diseases, and most fruitful source of disease known to American physicians. It has been estimated that one person in every family in all parts of the United States, and put up in packages, and sold at retail by all the druggists in the country. It is the most beyond the reach of medical skill. Thousands and perished without even a hope of relief, and although thousands may yet be destined to feel the distressing effects of this terrible complaint, we are happy to the research of Dr B'Lane, most completely within the reach of all, and that in the Vegetable Liver Pills of the Liver Pills fail eradicate that they offer a positive and permanent cure in every case. Sold by all Druggists throughout the country. Price 25 cents per box.

IF The Worcester Republican says that Mr Thomas Wentworth, of Worcester, has been appointed to a clerkship in the Treasury Department at Washington.

IF The Worcester Revive says, that King Ferdinand VII, late of Austria, was only "Emperor" of European royalty does not seem to improve much since Jefferson's time, for we read, in April of this year, that the head of the reigning sovereigns of Europe were active fools or monsters.

IF Alfred Beane, in his book, remarks that "the Yankees are a remarkable people. They are the only people on the face of the earth who are ever ready to answer a question."

IF The "staff of life" is raised too much at present. We hope it will "come down," suddenly on the head of some greedy speculator.

IF It is difficult to see with what face the South can raise such a question. The advocates of the extension of Polygamy can but say as Wilson Payne—for no special legislation for freedom. They propose an extension of the slavery system.—The Fox jumped over the Parson's gate," and the Parson "followed suit," by jumping with his effect. The Tramp Chorus and the Tete from Attila were also given in excellent style. Miss Ratcliffe's voice was particularly effective in its purity and beauty. The Miss McEvoy also performed their parts admirably.

IF We give below, from the Lynn *News*, a description of a scene which throws the burial of Sir John somewhat into the shade.—Query:—You that have been prepare to shed them now."

Report of Presidents Banks and Company

ON THE CONSTITUTIONAL PROVOCATIONS.

Resolved, That the Secretary shall deliver said copies [the returns of votes on the constitutional] to a committee of this convention, consisting of the President of the convention, and twenty other persons, who shall assemble at the State House, on the third Monday of December next, and then count the votes returned. * * * And the said committee shall promulgate the result of said votes."—Resolves of the Constitutional Convention.

Now we ask, in view of the above resolve, and the vote and proviso on concurring,

Who is to count the votes for the 3d?

Who is to count the votes for the 4th?

And who is to count the votes for the 5th?

Who is to count the votes for the 6th?

For and about were the words that we said,

Who is to count the votes for the 3d?

For we manifestly gaped on the face of the dead—

Who is to count the votes for the 4th?

We thought as we added the gape and the sense—

Who is to count the votes for the 5th?

That the Whig and the Banker would laugh at the word

Who is to count the votes for the 6th?

Lastly, the Whig answer at us, sternly they'll frown,

Who is to count the votes for himself?

Who is to count the votes for himself?

Yes, indeed, the question will be answered.

To a point he is not proper to mention.

Who is to count the votes for himself?

We were ill at an honest clashing,

Who is to count the votes for himself?

That the Whigs would be wickedly nothing

Who is to count the votes for himself?

Just at the people had cast them,

Who is to count the votes for himself?

And we'll not see a count of the votes for them.

Who is to count the votes for himself?

A purely VEGETABLE Preparation for promoting the Growth, Nourishment and Beauty of the HAIR.

THIS elixir has been extensively used, and the most satisfactory evidence of its virtues exhibited in restoring, in a short time, the hair to bald heads, where there is a tendency to hair upon the surface; it invigorates the nerves to vitality, renders it soft, pliable and glossy and to good condition, thereby preventing its coming out, while it is unsurpassed by any liquid ever offered to the public for dressing the hair. It is the cheapest article now in use, as a little only is required to produce the desired effect.

SALESROOM, SALEM-ST.

Physicians are desirous to see its full test among all the families in the land. Try it.

FALLING OR LOOSENING OF THE HAIR.

A. C. GUP'S HAIR, in an incredibly short period of time, (about a week,) is by no means a fanciful assertion, but a fact fully proved by a thousand witnesses.

DANDRUFF AND SCURF.

The Hair Vigor is agreeable to the taste, and a mere matter of pleasant attendant, may be easily and entirely removed by the use of this preparation, in a few applications.

HEADACHE! HEADACHE!!

If your scalp is diseased or inactive, and the glands of comparatively torpid, this preparation will restore them to healthy action, and relieve the head from pain. Those who have been afflicted with Headache for years, have found relief in the use of this article, and have been restored to their natural health, and the luxuriant growth of hair.

CHILDREN'S HAIR.

Children are more subject to diseases of the scalp than adults, with the humors attending. This preparation will be found to be the most effectual remedy for the humors of children.

Prepared only by A. C. GUP & CUNDALL, Druggists and Chemists, Salem-st., Boston.

Sold by Druggists and Fancy Dealers, Saco Bourne, Portland; Hall, Providence; Hall, Worcester; Hall, Springfield; Hall, Albany; Hall, New York. Agents for Lowell, J. C. HAYES & CO., corner of Merrimack and Central-sts.

Not, after all, his heart was not in the work. He had been bred to that noble profession, the law, and it had been, at the old country town of ——, but a step—hardly a move—to the bench. Under its mantle he could have hewed his way into the house of representatives, or, to exercise the noblest function of man, and really fresh and ground gold Hooker, that, "of law no less can be acknowledged than her seat is in the bosom of God, and her voice the harmony of the world." He believes that, however its practice may be degraced by pettifogging and villainy it is still a purveyor worthy of the utmost integrity and the purest morality.

ELECTION.....MONDAY, NOV. 28.

Two Weeks Later From California.

U. S. mail steamship United States, Captain Lems, arrived at New Orleans on Friday from Aspinwall with advices from San Francisco to November 14. The Illinois, bound for New York, had left Aspinwall previous to her sailing, with 168 passengers, and $1,000,000 in gold dust on freight. The Panama steamer, it is reported, had on board rather more than a million. The accounts from the mining districts continued very favorable, and new discoveries of gold had been made.

The Sonora filibustering case was exciting much attention, and there was but little sympathy for it amongst the people. It would probably prove a total failure.

The most absorbing questions were the personal removal of the capital, and the election of United States Senator, to take his seat in 1855. The principal candidates are Messrs. Broderick, Collector Hammond, and Gwin.

Senator Jackson Eagle, playing between San Francisco and Sacramento, had burst her boilers, instantly killing six or eight persons and wounding many more. An explosion had also occurred on the steamer Stockton, by which ten or more lives were lost.

The fine building known as the Sar Francisco Hotel had been entirely consumed by fire.

A serious affair is reported to have occurred at Martinez, in which three Spaniards were killed.

The complimentary dinner to John Mitchell, took place on the 30th October, and Mr Mitchell sailed on the 1st of November, *en route* for New York.

Emigration to Australia had ceased.

Trade in San Francisco, and indeed throughout California, is represented as exceedingly dull, owing to the immense stock of goods on hand, and all articles except flour have not sold with a further decline. Flour, however, is quoted as being fairly held. The crops were running out fast.

From the Frederick Intelligencer the news is ten days later. Another change has been made in the ministry, Prince Kanehoonlu having resigned the office of prime minister, and John Young being appointed his successor.

Later from Australia. The packet ship Bavaria, Captain Bailey, arrived at New York on the morning of the 26th inst., from the port of Melbourne. She brought 600 ounces of Australian gold on freight for Adams & Co., and it is estimated that there is in the hands of passengers at least $150,000. Even the sailors have returned home rich. One passenger, who had been searching for gold only three weeks, has gone to his family at Williamsburg with a good supply of treasure.

The inhabitants of Australia are deeply moved by the question of legislative reform.—Meetings have been held in all parts of the colony to demand a new Constitution from the legislative council.

There appears to be a growing feeling against the license-fee levied upon the miners, and an appeal was about to be made to the legislature present for its abolition.

The price of gold is still sustained, and the small amount on offer finds a ready market.

The rush to the Geelbore diggings is now abating, as the diggers find that the want of water on the spot renders it almost a serious impediment to their operations. The nearest supply is any quantity, to at a swamp three or four miles distant, and the difficulty of the washing stuff to this place involves an expense of £3 per load.

Governor Latrobe has published a proclamation appointing a number of irishmen, and several other citizens, waited upon Mrs Hinds, to deliver to her an address of deep sympathy, and a gold watch and chain, of exquisite workmanship.

Daniel Webster on Mormonism in Lawn. The question will soon again come before the Congress—In what way shall the Tariff be modified? It is most probable that the duties on unmanufactured wool will be reduced while a corresponding reduction will be connected on the duties and imposed by others on manufactured goods. Among the new manufactures which have arisen in the country within a few years, that of *excavation de lainos* is among the most remarkable. The great success of this immense new product by the late lamented Daniel Webster so early, at least, as 1846 for in a speech in the Senate on the 26th and 28th of July of that year we find him using the following language:

"There is one manufacture just beginning whose success, if it succeed, is destined to change the labor of the country and the agricultural districts. And I beg to call the particular attention of the Senate to it. It is that article which, they call excavation de lainos, a material, lately discovered in this country, and whose utility has to be avoided by that I have been an article of immense import for some years past. Now I wish to state the facts connected with one of these establishments just one of the manufacturers of this article. There are two manufacturers of this article before the Tariff of 1842. After the Tariff of '42 it began to extend at the Middle and Eastern States.—There are now, within a few months, seven of these establishments that have been attempted on Mormon, No. 1, which is the basis of a large capital. These materials sell for no more than they can manufacture for in Europe, and the present Tariff. But when sold by the manufacturer of Charles Sumner in the United States. Remove these free and pauperizing duties, and you give Mr. Sumner a monopoly of the market. Let the Tariff be raised to the point of prohibition, thereby increasing the duty of a public revenue, and you give the manufacturer a chance to live. Then will the manufacturer employ capital and labor, and then will the country be relieved from the present embarrassment of the treasury. Then will the country be relieved from the present embarrassment of the treasury. Then will the country be relieved from the present embarrassment of the treasury.

Three Cheers for our Rooster!

Hip! Hip! Hurra!!

Another Whig Triumph!

THE QUALTYUS CRIBNED FOREVER!

Triumphant Election of the Two Whig Candidates for Representatives from Lowell.

The election yesterday terminated nobly.—The Whigs of Lowell exerted triumphantly in the election of Tue Goon Whigs who will represent Lowell in the General Court during the coming winter. In many other places, a similar victory has been achieved, as is shown in the table annexed.

This result in Lowell is highly significant. Lowell has, for three years past, been the headquarters of Coalitionism,—"the breast and front" of the pernicious "Reform" Party. In no other place had Coalitionism obtained so powerful a hold. In no other place had the coarse ballot and ten-hour-law fever run so fearfully high. In no other place could the ramsilly "Reformers" less afford to be so hopelessly defeated. By thus electing ten staunch Whigs, Lowell has solemnly and emphatically ratified her zeal of condemnation on those defenders of the people who have long clamored for sweet ballot laws, ten hour laws, new constitutions, and all the *et cetera* in the schedule of the projects of "Reform." This result will do much to quench the fever of fanaticism which is now in some degree convulsing several other manufacturing cities and towns in New England, and even in the Middle States. It is a true index of the public sentiment of the "Manchester of America." It is an honest expression of the honest sentiments of honest men. Our fellow Whigs all over the State will so regard it. Butler, Hildreth and Robinson, have been emphatically rebuked by their late constituents; and their confidence in pronounced knaves, quacks, empirics and fools.

The Whigs of Lowell have shown their loyalty to party nominations—their confidence in the Whig nominees—and when, in the future, Butler or Hole shall attempt to seduce Whigs from their consistency by offering half-and-half temperance tickets, it will be grateful to recall *the glorious unanimity of yesterday*, as an index of the loyalty of the Whigs to their party.

By their action of yesterday, the citizens of Lowell have given an unmistakable evidence of their displeasure towards such demagogues as Butler, Adams, Hildreth, Robinson, &c., and towards such disgraceful party cogues as the American, Advertiser and Herald; at the same time, intimating that neither of them good-for-nothing newspapers is any longer needed in Lowell. We trust that the prospectors, the reptiles and editors will "take the hint," pack up their effects, and depart forth-with for other parts. Lowell has no need for them any longer.—Hildreth and his company, Robinson and his company, Butler and his company, and his company, are now given to understand that the sooner they start the better. We trust they will not resist the will of their constituents;—for we pupose our *fist*—the voice of the people is the voice of God!

There is great gratulation among the Whigs of Lowell, and indeed of the whole State, at this splendid victory. In no one wise resulted our friends that the *duties* imposed upon us, as the party of moderate reform, are more than commensurate with the magnitude of our success. A great work is before us. Great difficulties must ever path. A thousand measures remain to be carried, a thousand problems to be solved; and it will require all our wisdom, all our sagacity, all our circumspection, to perform our manifold duties. Let us take counsel, and move with caution.

By the elections yesterday, it is rendered morally certain that our able and popular gubernatorial and vice-gubernatorial candidates—

BANKER and DEWEY—will become servants of the distinguished posts assigned them. The Senate will be Whig by a majority of many more than two. It is doubtful if Council. The House will be Whig by from seventy-five to eighty-five majority. Speaker Ford, Esq., will in all probability be Speaker. His large parliamentary experience—his eminent legal talents—his ability, yesterday and on all of such variety and depth—all point to him as the next Speaker.

In connection with the office of Clerk—which is quite as important as that of Speaker—the names of Messrs. William Brown of Springfield, John F. Purdy of Somerville, and Hon. Minus of Roxbury, have been most prominently mentioned. Either of these gentlemen would discharge the duties of Clerk acceptably.

Later from California, South America and the World—Arrival in Boston.

The steamer Illinois, with the California mails of the 1st of November, $900,000 on freight, and $700,000 in the hands of passengers, about 300 in number, arrived at New York last evening.

Contrary to general expectation, John Mitchel, the Irish patriot's name, is not on the list of passengers by the Illinois. He would have took passage by the Nicaragua Line, and will probably arrive per Promethean, on Tuesday morning.

Consignment of Specie per Illinois—Adams & Co. 217,000; American Exchange Bank $140,000; John Cunningham $18,000; Wells, Fargo & Co. $130,000, and other specie to a small amount not included above stated.

Among those on board are Gen. Lane, Mexican hero; Col. McGwin, special agent of the Post Office Department to Panama; Col. Irving, Charge d'Affaires to Ecuador; A. B. Corwin, late British Consul at Panama; Lieut. Selfridge, U. S. N.; A. Maguire, bearer of despatches from Peru.

By the city officers of the steamer Stockton, the Captain, J. R. Sharp, was on badly injured that he died on the following day.

The names of the killed, by the explosion of the steamer Stockton, are Capt. Sharp, chief engineer; Fred. Hudson, fireman—Geo. Gage, watchman (Chris Hendricks, colored); Charley——, 14 mos.; and 14 passengers, names unknown. Among the wounded are Dr. Hoffman, formerly of Washington; Mr. Henry Dart, port owner of the Stockton; Mr. Hardin, telegraphist of the American Eagle.

The Festival Dinner was a grand affair; about 600 persons attended. Gov. Bigler presided, assisted by Mayor Purdy. Mr. Latrobe of the guests were Ex-Governor McDougal, of California; Major Ord, Boston, and several other gentlemen of distinguished note.

Mr Mitchel made a long speech, which was received with enthusiastic applause.

The Press are giving vent.

The Board empowered in favour of $750000 of San Francisco city bonds, which are below the bids, on the ground that they were not as favorable to the city as it had a right to expect, being only 84 1-4c on the dollar.

The papers, as usual, teem with accounts of crimes and casualties.

Notwithstanding the vigilance of the government, a part of the Sonora expedition is said to have got off in the vessels in addition, which was towed outside the bards during the night.

The Panama Star says that when at Acapulco, the Mexican authorities were called to account for their conduct in the Captain of the schooner R. L. Allen, and others, and their matters duly investigated, and settled.

Valparaiso dates are to the 15th of October. Business was miserably active. Flour in limited demand at $9.50@10. Produce remained as before.

The opening of a line of steamers to England via the Straits of Magellan is on the tapis.

The American Consul and Minister at Valparaiso, had chastised the Chilian Admiral, and proceed to the outrageous Island, on which the brig Chatham, Capt. Beaver, was lost in January last, and bring off the over $'ill allowed on her on account of the loss. Other matters passed from a U. S. Steamship.

Home from Peru are to the 7th of October. The Brazilian Government has despatched a special Minister to Peru, Bolivia, Paraguay and New Grenada, for the purpose of adjusting a treaty to accomplish the entire trade of the Amazon.

The gold discoveries on the Amazon continue to excite great interest.

The convention appointed for the purpose, report about $6,000,000 tons of guano remaining on the Chincha Islands.

Bolivia continues much the same.

Sandwich Islands—The Amphitrite had arrived at San Francisco, with Honolulu dates to the 5th of October.

The Ministry had resigned in consequence of having satisfied the people.

The Hawaiian Legislature proposed to annexation, has come to the columns to the advocate of this measure.

The small pox had not ceased its ravages, but was gradually diminishing.

Advices from Tahiti to Oct. 6th, report the breaking out of a civil war among the natives of the Society Islands. A battle had been fought in which the King of Raiatea had been killed.

The French were about to have a brush with the natives of Huahine.

CITY MATTERS.

☞ There was a grand display of fireworks from the Whig Head Quarters, in the Courier Building, last evening, in honor of the triumphant election of ten Whig Representatives from Lowell to the General Court. The Whigs of Lowell is to "happy." Late in the evening, a large delegation of the victorious Whigs, accompanied by the Columbian Band, waited upon several of the Representatives and other prominent Whigs, at their residences, and were addressed in neat and animating speeches. Oysters were "used up some" at Marston's Leonard's and French's.

WHIGS! Stand by your guns. There is one more battle to be fought. In ten weeks you are to SELECT A WISE CITY GOVERNMENT, and thus triumphantly terminate the campaign.—Keep the harness on, boys, for the last heat.

☞ An owner wanted for a Buffalo Robe. Inquire at the Marshal's office.

☞ Mr Shaw, the unfortunate individual who lost both his legs some six weeks since, by being caught in the machinery at the Lowell Machine Shop, has so far recovered as to ride out one day last week. He visited the Shop, and was presented with between $500 and $700, the proceeds of the benefit given him immediately after the accident.

YOUNG LADIES' SCHOOL. Miss Rogers' School for Young Ladies, was advertised, through mistake, as commencing Wednesday 28, when it should have been November 28th. Her School commences to-day, in Nesmith's Building, corner of John and Merrimack sts.

HEROICISM. Miss Rogers having been absent from the city, the mistake was not detected till Saturday evening last.

"DON'T LIKE THE COMPANY." In his speech, or mode of speech, on Saturday evening, at Huntington Hall, Mr. S. P. Adams alluded to the Temperance ticket as a "Whig trick"—though he knew that Person Brewster was the prime factor of that irregular ticket—and said he "didn't like the company." But, even after this "rebuff" he condescend that many voters deposited their votes for Mr Adams! However, as he is not elected, we suppose Mr Adams will no longer object to the company of his peculiar temperance friends.

☞ The Illustrated Magazine of Art, for December, has just come to hand. As the next number commences a new volume, a favorable opportunity is now offered to persons desirous of subscribing for this valuable artistic journal. Frederick Parker, Esq., will receive subscriptions, at his store in Wentworth's Building.

THE ARRIVAL. A Buffalo dispatch of yesterday says—The weather here continues warm and pleasant, with every indication of a late season. It is doubtful if the receipts by the Lake are fair, sailing vessels and propellers being in full fleet. The shipments by canal are light, the principal article of shipping flour through if the weather holds fair till November.

The Chicago dispatch of yesterday says—Charles Clark was arrested here this morning, in charge of counterfeiting, and in default of $30,000 in spurious notes, plates, &c., were seized.

A New York dispatch, also, of yesterday, says—The London correspondent of an eminent mercantile house in this city, writes:—"We have just received private telegraphic advices from Trieste, anticipatory of the overland mail. Usages remained unaltered; not much doing. At Shanghai business was at a stand still, owing to the city having been taken possession of by a party of rebels, so-called, it is said, with the rebels at Nankin—being rather a band of the Triad, or Short Knife Society. They had seized the Treasury, who, however, afterwards escaped—and plundered the public treasury to the amount of $2,000,000 in lieu of duties, but did not molest the foreign settlement."

The U. S. mail steamship Crescent City sailed this afternoon, for Havana and New Orleans.

"HOME TO WHOM HOME IS DUE." We fully agree, says the New Bedford Mercury, with a correspondent of The Salem Register, in the estimate of the invaluable service rendered during the recent canvas by Hon. John Sargent, as Secretary of the Whig State Central Committee, and we take a little cheerfull to ourselves that we have not before this expressed our sense of his merits in the discharge of his official duty. Mr Sargent's admirable speeches upon the question of Representation were probably more widely circulated and did more efficient service than any other political documents, and to the management of the State Committee, he has labored "in season and out of season," with energy, tact and perseverance, in the good cause. We believe the Whigs throughout the Commonwealth will join with us in these commendations.

ANNEXATION BY WHOLESALE. Mr Gwin, U. S. Senator from California, was among the guests and dinner-table speakers at the recent dinning of Wilkes's new hotel. He excelled, in a brief speech, the main point of which was "manifest destiny," by the following sentiment:

"The City of Washington:—May it before the close of the present century be the capital of the United States, instead of thirty-one." (Loud and rapturous cheering.)

By the "present century," Mr G. undoubtedly referred to the approaching session of Congress. We may therefore expect, says the Boston Journal, at an early day, that he will introduce a resolution for annexing all Mexico, Cuba, Japan, a dozen or so of the Pacific Islands; and perhaps Turkey, if that shall be required to make up the thirty-one new States.

THE AFTERMATH GENERAL. It will be remembered, says the Tunnelpit, that the editor of the Lyon Bay State was quite severe in his comments on the letter of Hon. Caleb Cushing on the subject of Prohibitory Laws, &c. This original great surprise in Essex county, but it now appears that a reason has been found for the letter "still in the crescent." In the Supreme Court on Saturday last, in the progress of a trial for libel, the editor was called upon by one of the counsel to read and write. It is added:—"So pleased her own counsel made by one of the opposite counsel to the court. The penalty for the "offence" is fine and imprisonment. Her daughter, who is fashioned on the same change, has fled to New York." The result is not known.

☞ A ghost "story" juvenile in Wetzel county, Virginia. The ghost of a man murdered some time ago, it is said, has appeared and demanded vengeance on his murderer. The man pointed out as the murderer has been arrested.

Barker's Vermifuge.

It is notice of Barker's Vermifuge, republished in the Boston Daily Advertiser a few days ago from the "Scientific American," of the 13th inst., it is stated that, for the week ending Oct. 7th, the same letter at the Crystal Palace in New York, heated by Baker's furnace, evaporated 11.45 pounds of water with one pound of coal. We are not aware that any other furnace from which the water was evaporated. This is a essential point. It is, however, evident that the temperature has been reduced to the usual common standard 212° F., for it is said, in the notice above, the obtained result "comes within three pounds of the theoretical evaporation of water by the best quality of coal, in the Laboratory."

Despots experimentally determined that, one pound of pure charcoal from sugar, would evaporate 12.3 pounds of water from 32° F.; Dr. Schaffhaeutl, from theoretical calculations, assumes that, one pound of anthracite coal, containing 92.63 per cent. carbon, and 3.37 hydrogen will also evaporate 12.3 pounds of water from 32°. Believing this to 212°, we arrive at the fact that one pound of pure charcoal, or of anthracite coal as above, evaporates 14.457 pounds of water from 212°. The result with Baker's furnace as above stated is "three pounds" less" than 11.45. However, the value in this case has been reduced to 212° F.

"This," continues the notice, "is the greatest amount of water evaporated by one pound of coal, in a boiler, ever recorded." This assertion may be true of "a boiler" heated by Baker's furnace, but it is not true when applied to boilers, heated by extensively formed furnaces for the last ten or fifteen years, both in England and in the United States.

It is not true of "Cornish boilers" for with these, Heywood & Parkes, in 1841, evaporated with ..... pounds of water from 212°, evaporated with ..... pounds of water from 212°, and on the worst plan; for with this on the Lancashire principle, Fairbairn & Lillie, in 1840, evaporated with ..... pounds of water from 212°, and with ..... pounds of water from 212°, and with ..... pounds of water from 212°, and with ..... pounds of water from 212°.

It is not true of a *Battery of four boilers*, at the Manchester Mills in Lowell, for with these Fairbairn & Lillie, in 1840, in 13 days of 24 hours each, with ..... pounds of water from 212°, and with ..... pounds of water from 212°.

It is not true of *Non-boilers*, for with this boiler we no longer object to the company of the M. M. Co. Printery, in 1860, in 6 days, with ..... pounds of water from 212°.

It is not true of a *Tubular boiler*, for with this the same Printery, in 1860, in 6 days, with ..... pounds of water from 212°.

It is not true of an *Improved Cornish boiler*, for with this, which was erected in 1840—at the M. M. Co.'s Printery, the underground evaporated, at the Manchester Mills in Lowell, in 1841 at the Massachusetts Mills in Lowell, in 1841 at the Merrimack Mills in Lowell, in 1841 at the Hamilton Mills in Lowell, in 1841 at the Lowell Machine Shop, in 1841 at the Boott Cotton Mills in Lowell, in 1841 at the Middlesex Mills in Lowell, in 1841 at the Tremont Mills in Lowell, in 1841 at the Suffolk Mills in Lowell, in 1841 at the Lawrence Mills in Lowell, in 1841 at the Lowell Bleachery, in 1841 at the Lowell Print Works, in 1841 at the Lowell Dye House, in 1841 at the Lowell Gas Light Co., in 1846, in 13 days of 24 hours each, with ..... pounds of water from 212°, and with ..... pounds of water from 212°.

It is not true of *Non-boilers*, for with this boiler we no longer object to the company of the M. M. Co. Printery, in 1860, in 6 days, with ..... pounds of water from 212°.

It is not true of a *Tubular boiler*, for with this the same Printery, in 1860, in 6 days, with ..... pounds of water from 212°.

It is not true of an *Improved Cornish boiler*, for with this, which was erected in 1840—at the M. M. Co.'s Printery, the underground evaporated, at the Manchester Mills in Lowell, in 1841 at the Massachusetts Mills in Lowell, in 1841 at the Merrimack Mills in Lowell, in 1841 at the Hamilton Mills in Lowell, in 1841 at the Lowell Machine Shop, in 1841 at the Boott Cotton Mills in Lowell, in 1841 at the Middlesex Mills in Lowell, in 1841 at the Tremont Mills in Lowell, in 1841 at the Suffolk Mills in Lowell, in 1841 at the Lawrence Mills in Lowell, in 1841 at the Lowell Bleachery, in 1841 at the Lowell Print Works, in 1841 at the Lowell Dye House, in 1841 at the Lowell Gas Light Co., in 1846, in 13 days of 24 hours each, with ..... pounds of water from 212°, and with ..... pounds of water from 212°.

GENERAL SUMMARY.

☞ No steamer from Europe yet.

☞ The Springfield Republican says that a Mrs McBride of Lowell is in jail at New Haven for leaving her baby, a male child about two weeks old, in a privy connected with the railroad depot, at the Railroad Square, last city, on Thanksgiving day. Her anxiety to get rid of her child may find its solution in the fact that her husband is in jail for debt, and that the husband of the loyal Irish woman in Troy, have written home.

THE AFTERMATH GENERAL. It will be remembered, says the Tunnelpit, that the editor of the Lyon Bay State was quite severe in his comments on the letter of Hon. ☞ A ghost "story" juvenile in Wetzel county, Virginia. The ghost of a man murdered some time ago, it is said, has appeared and demanded vengeance on his murderer. The man pointed out as the murderer has been arrested.

NAVAL HONORS. It is said that the Secretary of the Navy will recommend the same imperial and long medal reforms connected with the naval service, in his annual report. Among other recommendations will be one for retirement, and for promotion according to actual position, rather than by grade. By this plan will also look to the discharge of useless officers, such as prefer shooting grouse on shore to honorable service at sea, and are by loyalty in the next life when there is anything to be done.—It is said, too, that the establishment of gunboats on the Mississippi, for the protection of the planters, will be proposed; also important changes in the contract system, and an increase of the number of steam and other vessels. We agree with the Springfield Republican, that a small infusion of the energy and spirit of "Young America" into our naval service would tend greatly to invigorate the arm of the National Defence.

ALABAMA. The Legislature of Alabama has chosen two Senators of the United States—one, Benjamin Fitzpatrick, for the residue of the term (which expires in 1855) of the late Wm. R. King, whose seat was vacated by his election to the Vice Presidency; the other, Clement C. Clay, for the full term of six years from the 4th of March last, to fill the vacancy occasioned by the expiration of the term of Jere. Clemens.

THE CRAB AND THE TURBA. A private correspondent writing to the Boston Transcript from London on the evening of the 1st inst., states that the Turba was then in port, and that official notice from Count Nesselrode, of the Czar's intention to fight it out with the Turks.

BATES AND BLACK. The Norfolk County Journal says:—"Mr Bates of Plymouth, coalition Democrat, (though he now aspires to be a Whig) has not been long in the field. His defection, ever since that body adjourned, to supervintend the publication of the "Debates" at Washington, and to act as Clerk of the Senate employed on this and other work ordered to be done by the Convention, at compensations very far above what it is said he left in four dollars a day, and the work *is not yet done*. How long are we to have compensations of this kind (no more than useless work) The expense of the Convention has already been about $160,000 for nothing, and it is hardly worth while to pay for nothing longer.

HEALTH OF LOUIS NAPOLEON. A Paris letter says:—"Louis Napoleon is not well. Somehow, bloated appearance which he wore more than a year ago, and from which he had partly recovered; the loss of flesh which he has suffered has been heavily on his stick, as if he required its support to sustain himself. Many persons think that the uncle of Louis Napoleon knew no rest to jeopardize their lives in attempts upon his life, and that the nephew has succeeded to the work, with his body before many years roll around. It is exceedingly rare to see a man with his position, his responsibility, his cares, and with such manifest indications of imperfect secretion, hold on to life so luxuriously as does he. It will seem rare to see a man recover from this condition."

☞ The administration is now the third party in the country.

DR. M'LANE'S VERMIFUGE.

ANOTHER MEDICAL WITNESS.

It is not a small evidence of the value of this remedy that the most Virulent, when even physicians, who too generally prescribe Calomel in preference to other remedy for worms, have learned and testify to its superiority.

There are at Rouge quite a number of Egyptian obelisks, and it is said to have taken twelve years to remove one of them. Of the size of one of these, an account of the hardness of the stone, and to have spoiled the best saw in the operation. Yet the carving of the hieroglyphics seemed with inscriptions as perfect as if executed by the Egyptians. We do not have a knowledge of steel—but they possessed the art of hardening copper, and tempering iron. They made knives of bronze which would bend from ripping and spring back. Some of these knives came down to us.

The art of making the Damascus blades is lost. It is said that they were made by welding together alternate steel and gold wires and weaving them in the process. Their element- ary principles are almost fabulous. We all remember the scene in Scott's novel, in which Richard Coeur-de-Lion cleft his sword in twain at one stroke, and Saladin cut in two parts a silk scarf floating in the air, with his Damascus blade.

The steel of Hindostan is still the best in the world. I have seen it stated that a smith on the banks of the Ganges will take a piece of rusty iron, and by a way which he cannot explain, but which he learned from his father, he will make a better blade than the best English can bring from Sheffield! It is said that a Wi, ite steel, important for his sword, must be at a glowing from the forge, and rude in bat- ile—the wind inspiring it as he went. The Emperor has but recently discovered the cold blast theory.

Did the ancients have steamboats? In the carvings in the Egyptian tombs, among other ships, is shown one with paddle wheels, and with machinery in a complete form. Is there in it evidently a steamer?

I used to think that we might take refuge in the balloon, but steam piping fallow has found re- cords of these pictured in an old Egyptian temple. The art of printing was known and covered by ancient brick cutters, who stamped their names on their bricks. We can, however, satisfy phone corniven on the telegraph.

The Fusion Question—Progress of the Con- servative—Resignation and Appointment on the Ministry of Justice.

Eighty-two days have elapsed since that famous 21st of January, 1768, when "the great, unknown," Junius transmitted his first curt-choking letter to the printer of the *Public Advertiser*. But Junius still—*stat nominis umbra*—stands in the centre of a cloud. The period between the first and last of the Junius letters, was just three years to a day—The first appeared January 21st, 1768; the last, Jan. 21st, 1771. At the publication of each successive letter, (and at every brief interval ensues,) the literary world, no less than the political, quaked at the boldness of the style and the malignancy of the spirit of the fire-hooded author. Even the long vexed question on the character of Mary Stuart has failed to elicit a tithe of the interest that has been called out by Junius. Essay upon essay, folio upon folio, have been piled, like Pelion upon Ossa, to the very gates of heaven, by all sorts of book- makers, sensitive and penny-a-liners, who have vainly essayed to give the living mystery a place in the eternal pantheon. But still the discus- sion, like the ghost of Banquo in the tragedy, though stilled for "a day," will "down," and again will not "down."

Among the most conspicuous personages re- called by the defiant Junius, were the King—(for even Majesty itself could not lift George the Third beyond the reach of the lawless swirling sweeps of this ruthless Junius)—the Duke of Grafton, the Duke of Bedford, Lord Mansfield, Sir William Blackstone, (author of the celebrated Commentaries on the Consti- tution of the Laws of England,) and Wilkes, the Demo-

He held and defiant was the tone assumed by Junius, that a terror struck all hearts at the appearance of each successive missive, as when the terrific hordes of Gothic and Vandalic, under Attila and Genseric, ravaged the South of Europe, and pitched their camp by the Tiber and the Arno. In a torpedo literary sense—from the style of these letters is as sure to particleize as the law of harmony—as the law of gravity—we all remember the scene in Scott's novel, in which Richard divided a thick oaken bar with a blow of his sword, and Saladin cut in two parts a silk scarf floating in the air, with his Damas- cus blade.

The period between the first and last of the Junius letters, was just three years to a day—The first appeared January 21st, 1768; the last, Jan. 21st, 1771. At the publication of each successive letter, (and at every brief interval ensues,) the literary world, no less than the po- litical, quaked at the boldness of the style and the malignancy of the spirit of the fire-hooded author. Even the long vexed question on the character of Mary Stuart has failed to elicit a tithe of the interest that has been called out by Junius. Essay upon essay, folio upon folio, have been piled, like Pelion upon Ossa, to the very gates of heaven, by all sorts of book- makers, sensitive and penny-a-liners, who have vainly essayed to give this living mystery a place in the eternal pantheon. But still the discus- sion, like the ghost of Banquo in the tragedy, though stilled for "a day," will "down," and again will not "down."

Among the most conspicuous personages re- called by the defiant Junius, were the King—(for even Majesty itself could not lift George the Third beyond the reach of the lawless swirling sweeps of this ruthless Junius)—the Duke of Grafton, the Duke of Bedford, Lord Mansfield, Sir William Blackstone, (author of the celebrated Commentaries on the Constitu- tion of the Laws of England,) and Wilkes, the Demo-

is an ingenious writer in the London Quarterly Review, who feels certain that he has discov- ered the term Junius—in the name of Lord George Sackville. This position has, however, been completely demolished by the London Athe- næum, the North British Review, and by the Macaulay himself. Thus, as it has well been stated, the North British Review demonstrates that while Junius was writing his Philippics, Lord Lyttleton was absent in Rome. Of course it would have been impossible for any person who was not really in London, or at least in its neighborhood, to have written the "Letters to the Editor of the Public Advertiser," and so many of them allude to events which had trans- pired only a day or two preceding. Even in this age, when communication between Italy and England is comparatively rapid, it would be a physical impossibility for a man to be in Rome, to carry on such a series of essays. It still more was it impossible to do it eighty years ago, when mail was weeks in going between Italy and London.

But without going further into details, we present our readers with the argument in behalf of the claims of Sir Philip Francis, as presented by the eloquent and discriminating Ma- caulay in his most masterly essay on Warren Hastings, whose speaking of Sir Francis, he says:

"Was he the author of the Letters of *Junius*? Our own firm belief is, that he was. The inter- nal evidence is, we think, such as would alone justify a verdict, until, by a criminal proceeding. The head-writing of Junius is very much like the common hand-writing, slightly disguised. As to the position, pur- suits, and connections of Junius, the letters are the most important facts which can be con- sidered as clearly proved. He was a clerk in some department with the technical forms of the Secretary of State's office. He was one who was intimately acquainted with the business of the war-office; thirdly, that he was in place in the year 1770, attended debates in the House of Lords, and knew many of the persons, particularly of the speeches of Lord Chatham; fourthly, that he bitterly resented the appointment of Mr Chamier to the place of Deputy Secretary at War; thirdly, that he was bound by some strong tie to the first Lord Holland. Now, Francis passed many years in the War-office, Francis was subsequently chief clerk of the war-office. He repeatedly mentioned that he had himself, in 1770, heard speeches of Lord Chatham; and some of these speeches were actually printed from his notes. He re- sented, bitterly resented, the appointment of Mr Chamier. He was bound by strong ties to the first Lord Holland. Now, Francis was a member of the Middle Temple, and was intimately acquainted with the business of the law. Francis was in the House of Lords in the year 1770, attended debates in the House of Lords, and took notes of speeches, particularly of the speeches of Lord Chatham; fourthly, that he bitterly resented the appointment of Mr Chamier to the place of Deputy Secretary at War; thirdly, that he was bound by some strong tie

A Proposition to Parents.

At a meeting of members of the late State Convention, held near the close of the session, the following was adopted in furtherance of the efforts of the Chaplain of that body, in the department of usefulness to which he is devoted.

Whereas, out of the homes issue the character of the neighborhood, the school, the town and the State; and whereas, the discipline and condition of the family precede and greatly affect the order and welfare of all those other associations; and,

Whereas, facts abundantly show that the training of children and the guidance of youth are very imperfectly understood;

Therefore, Resolved, that having listened to an exposition of Rev. Mr Burton's plan of a Union for the promotion of a better domestic education, we do most cordially recommend him and his work to the parents and the Inhabitants generally of the Commonwealth.

Resolved, that a committee of seven be appointed to advise with Mr Burton, and to lend the weight of their influence in forwarding the important cause in which he is engaged.

In pursuance of the above resolutions, the gentlemen, whose names appear below, were appointed.

Having been designated for the purpose above stated, the undersigned would heartily commend the views presented by Rev. Mr Burton, to the serious attention of heads of families, and we earnestly hope that the measures proposed for improvement in education at home, will be very generally adopted.

The measures recommended above are submitted with deference.

A few preliminary words will not be inappropriate.

In human affairs knowledge and skill are considered necessary to success. Preparation and qualification are requisites well regarded, and all the world over.

By the relation of parentage, two persons are appointed to the care of an infant human being. Above all others on the face of the earth, these parents are entrusted with the most sacred obligations.

Not satisfied with this, and aroused by the opposition of the public (before alluded to) in the London Quarterly, Mr Macaulay has appeared in the following letter, which, a-public-ation of the first time in a new edition of Lord Mahon's History of England:

ALBANY, January 5, 1859.

Sir,—I am obliged to you for the new number of the Quarterly Review. I have not had time to read it with deliberate attention. I wonder, indeed, that so important a paper in the Revue should think that his objections have made any impression on my mind. Mr Macaulay has misquoted me, which proves the correctness of the writer's statement. But, on the whole, it seems to be written in a tone not very high in rank or fortune. The tone, though not very coarse objects, is that of an inferior. The writer desires himself to be the writer of a gentleman. "Gentleman!" He says that Grenville must soon be forgotten. "Till then I shall be in very good company." Gentlemen! Why, Pitt, Fox, Burke, and Grenville, called "Gentlemen

Mr. Webster's "Divine Essence" that the engines of the Universe, and some anxiety attending his undertaking "Nationality" to the test. In his famous oration on Webster, Rev. Theodore Parker distinctly avows what he calls "the absolute moral character of the Worthiest man. In his magnificent eulogy to Webster, at Dartmouth, Hon. Rufus Choate declares his firm belief that "no eminently regrets" disturbed the peace of Mr Webster's dying moments. The statements are so re-flecting that, for ourselves, we confine serious and grave doubts to the premises. But one thing is certain: whatever may have been Mr Webster's last sentiments, with reference to the Conqueror, those who were with him know them not; and upon Mr Webster's opinions and character belong to the country, no man can be justified in holding anything back from the public eye. The New York Tribune has recently stated that the last hours of Mr Webster " were embittered by the conviction that he had sacrificed, very much for those who were unwilling to sacrifice anything for him." We would therefore respectfully ask the editors of the Tribune on what authority they aver these things? We ask purely from a desire to know the truth, whatever it be;—let us have it.

Choate on Felton. In the able and brilliant eulogium of the Hon. Rufus Choate in the case of Mrs. Nichols vs. Mrs. Eddy, reported at, &c., a par. too, action, for alluding the worst to tongue and case before he actually received a judgment in favor of the Boston Courier recently, there occurs the following eulogistic allusion:

"I say, if my clients were a little precipitate in their action, intoxicated by their new discovery, I can very well understand that an inventor, who thinks he has laid his hand upon the golden fleece, and who sees in the first impressions of himself perhaps a little too hastily

The Responsible Position of the Whig Party—Duty and Obligations of the Party of Reform.

It is a fact which we could not disguise if we would, and which we would not if we could, that our party is now in a position of solemn or unwise legislation, and receive the credit of "patient wise and judicious inaction, and take place among the great statesmen. The Governor will be whig; the Lieutenant Governor whig; the Council whig; all the Executive Officers whig; the Senate whig, by three to one; the House whig, by two to one;—in a word, all will be whig, inscribed with the whig name, bearing whig phylacteries, and claiming kindred with the great whig party—all the nations over!

Number is power. Power is the basis of obligation—of duty. If, having the power, we faithfully redeem our pledges, made at Fitchburg, and enclosed at every ballot-box from the Connecticut to the Ocean, then we shall assume to ourselves the control of the State for a long and indeterminate period. Doing our duty to the people, we shall receive the people's reward. But if we willfully or carelessly fail to redeem our every pledge, we shall not fail—we cannot fail—to receive the rebuke of a betrayed and insulted people, and by the popular vote, in less than half a year.

What, then, are our pledges? what the vow we made on the platform at Fitchburg? Well,—we pledged ourselves, *first*, to introduce the plurality principle in the election of all State officers. *Secondly*, to remodel the Council, but think the Senators elective by single districts. *Thirdly*, to reduce the House. *Fourthly*, to submit the Constitution to the popular vote. But here let it be remembered, that our pledge in this regard stands on a different basis from several of our other pledges. The district system is not to be regarded as a test by which any party is to stand or fall, as the new constitution was to the coalition party. We are not pledged in our case, as the coalition party was in that case, to *establish* the district system, but only to *submit* it to the people. And, further, if the district system is not a test by which our party is to stand or fall, for ourselves, we are earnestly in favor of the district system. We have advocated it from the first. Whether adopted within a year or two, or not, we are confident that it will one day be established in Massachusetts. But we wish the distinction made above, to be distinctly understood. The district system stands on a different basis from any other reform to which our party pledged itself on the platform of Fitchburg.

Besides the pledges recited above, another obligation was incurred—of retrenching the executive patronage, by making certain State officers, such as the Councillors, Attorney General, &c., &c., elective directly by the people, and a general pledge was given, to secure the consummation of such other reasonable and judicious reforms as the popular will, from time to time, shall indicate or demand. Made in good faith by the majority of the people—these pledges are now to be redeemed.

We have unlimited confidence in Judge Washburn and in the Senate and House about to be convened, that all these pledges will be discharged. The twaddle of certain partisan journals, "that the whig party is ruled by the old Adams," that "the progressive element in the whig ranks is impotent," and similar jargon, recall this is beneath serious animadversion, or consideration. The whig party is now, and will long continue to be, on the track of reform. Not that there is any serious misgovernment in Massachusetts; but a majority of the people have decided that certain changes in the organization and administration of government are desirable, and have entrusted the whig party with the mission of bringing those reforms into practical trial. Success in this case will lead to effort with distinction, let us now proceed cautiously and deliberately to redeem our pledges, to achieve the results we have attempted, to fulfil our own duty and the people's sovereign pleasure.

Correspondence of the Journal and Courier.

New York on It is.

NEW YORK, Nov. 17th, 1852.

Buddies being very muddy, "Gotham" is at present full of gossip. Its haunts are crowded with everybody's country cousins—whom no risk of loosing their individuality and pocket-books in a crowd, prompts to dress in the style by the rule of an omnibus, fenced by mock gentlemen, or made into caliendars by Church street missionaries, could prevent from doing the great Crystal Palace. What a harvest to hotel keepers has been reaped, and still continues to attract attention of 1853. I am told that shares in opening, one hotel (I have forgotten which, but think the Metropolitan,) has cleared $150,000; a nice little sum to retire upon.

But let us descend into Broadway. This, dears, is Broadway—gay, dazzling, noisy Broadway. What a torrent of human life!—how the crowds jostle and scuffle as they march along! Like the Astor, and resident, lifts its heads above the autumn foliage of the Park maples, the City Hall, with its "magnificent front of white marble." Let us move on. Brilliant jew-lights expose the products of Eastern looms—that is, Persian silks and Cashmere shawls of the sparkling gems of the jeweller, and the mall of the old chestnut rooster on the corner. He gapes upon him unwinking. You can see why here,—life moving in silks and glistening with gems, or clothed in rags with its skin bared and mended like old; life looking from out bright eyes beaming with health, with cheeks of living roses, or peering hollow-eyed with the features worn and haggard from disease; life enjoying lightly sleep in all the luxuriancy of childhood, or tossing on the rough and polished silk sitting behind marble counters; blazing with Gladdy, or pressing its wasted fire against a glass of water with a Mill Prayer, which to consumptive Gin seems well to them—supporting them from burning; life moving by happy beams, with the smiles of friends, the wife, the child, the mother, or sickening from the cursings of a drunken husband, or the moans of a dying child; life pleasing by its gayety, with the world's poverty or the luxuries of wine and the opera. All phases are on exhibition, in Broadway, though it glances at evening with a heartbreaking brightness, is as royal promenade through which wealth alone can pass; but the drop of the pave and the sad words of the wretch are more strong side by side. We are pointing out the Broadway of the wonderful city now, including the Metropolitan play; Charley Matthews, the "Yankee" of the day, and the star of the season, has "the whole principle performance" there, is not cool—indeed, is the great evening attraction; and Burton's is the great morning resort, so we have to go for our amusement to one or the other of these, the latest up by the common herd, thump and bustle? Here we are at Taylor's, Pamphanel hath it upon this palace of enjoyment. Is it not magnificent? Is it not inviting? Let us enter. As usual in white gown and glistening apron is Taylor. What a blaze of gilt, carving! what a host of voices surrounds us! The Tuesday's Express, with its telegraphic news, is read by the thousand, and similar journals. Let us descend in the saloon. Here a splendid fountain disperses sparkling Croton, and gold fish dart in its nurseries of coolness. Notice the elegant panel paintings around you, subjects from Shakespeare and Milton. The air invites us. "Sausages for two, waiter?" (We are not supposed to have anything stronger in these Maine Law times.) And now served, let us look closely at What a variety of tongues and faces assail us. Study that pointing over your head. John Palmer? Yes, all, old lying, sack-drinking John.—A stroll from the Henry Wixen of Windsor; the basket cases, with the old knight sprinkling of the mire, and under it his exclamations—

"Have I lived to be carried in a basket, like a harrow of butcher's offal? and to be thrown into the Thames? Well, if I be served such another trick, I'll have my brains dashed out, and buttered, and give them to a dog for a new year's gift. The rogues slighted me into the river with as little remorse as they would have drowned a bitch's puppy, Virginia. Give me a stoup

conducted in the sincere spirit of inquiry after truth, without fondness of dogma, or desire of victory; and in a manner, on all occasions, free from harsh or bitter expressions of hostility to opinions, or direct contradiction, were, after some time, made contented, and proselyted others, to their party principles. The society flourished for the space of sixty years. Within a short time after its foundation, it gave to mental enlightenment to the world, and there are many inventions and discoveries, which have been attributed, unjustly, to this institution, and to individuals connected with it. Its first branch academy was conducted with the utmost harmony, and was, at one time, in a flourishing state. Those branches connected with it, were thereupon formed, namely, the Academy of Fine Arts, and the Mint. Those branches corresponded with the trunk, that is, the Arts, and with each other, and thus mutually exercised an important public influence, in addition to the private benefit they conferred on those individual members. The debates on the Judiciary, the ordinary difficulties of the Provincial Government, in 1720, was the origin of Franklin's Essay on the "Nature and Necessity of a Paper Currency," the principles of which were considered as sound, that they were adopted by government, and effected the desired remedy. B and its branches, were also the means of improving the hitherto imperfect police system of the city, of establishing fire companies, and of giving valuable suggestions for checking "the devouring element." Besides this, the influence they had in giving birth to those sentiments which produced the Declaration of Independence, is so marked, as to have struck the attention of writers upon this important part of American history, both in England and the United States.

But the prophecy of Debating Societies, in the field of general literature, are still more numerous than in politics or science. They obtained for the city the proud distinction of "the Modern Athens." They have perhaps done more for the modern intellect of Scotland than their most sanguine admirers would suppose. The Speculative Society, established at Edinburgh in 1764, continued and corresponded with Benjamin Bentley, on his arithmetical work, entitled "Principles of Human Knowledge." He mentioned the circumstance to the above—and that eleventy and eloquently—the absurdities in his metaphysic system. They also claim the more important honor of having been a more general taste for, and cultivation of English literature in Scotland than had hitherto existed, and abolishing the habit of writing and corresponding in the Latin tongue—the unwieldy people of that country had hitherto adopted. Among its members were Colin Maclaurin, the celebrated mathematician, and Robert Wallace, author of a celebrated treatise upon the numbers of mankind, which is said to be the origin of Malthus' theory upon population.

Another society, called the "Mirror" was established in 1779, the same city in 1777, and which also created a new era in the history of British literature. It was composed of men born of the highest rank in life, and its weekly meetings, essays were read and criticised, and it improved of their same of special attention to the Democratic party has been consulted, while most of them, have been the "Mirror," and the "Lounger." They were the first of the kind ever started in that country. Among the prominent members of this club, were Mr. Brougham, the author of the Book of Fortune, &c.; Home, the author of Douglas; Lord Hailes, and Lord Woodhouselee, both of whom were eminent writers.

The "Bad Success" of the President—The London and New York Correspondent on the Administration—Letter from the "Times Street Cabinet."

Never, since George Washington swore his first presidential oath, in the presence of God and the people of New York, has our country been called to witness such a spectacle as we now last base to the astonished gaze of an indignant nation. Frank Pierce became President less than a year ago. All the people greeted him with loud cheers. He had the best wishes of the whole American race in the Union. Not a man breathed a syllable to dishonor him. Even the most bitter of those who had opposed his election, prepared themselves to judge his every act in a candid and generous spirit. The few months which have since elapsed, have been months of profound peace—months of prosperity—months of signal individual and national happiness. No great issue has arisen; no obstacle beset his quiet and easy path. And yet Frank Pierce is now the most unpopular, the most denounced, the most contemptible, the most impotent man in the United States. Why is this? Why is he not still the honored of the Whigs—the spoiled child of the Democracy? There is but one answer. Frank Pierce is unfitted for his post. His Cabinet is not a unit; all its members are either unknown, adventurers, or known. The Administration has failed solely for want of—*last issue*.

For want of *last issue*, General Pierce gathered around him a Cabinet of discordant material. For want of *last issue*, he sought to please all the free soilers. For want of *last issue*, he deserted the friends of the Massachusetts Coalition in the form of extensions. For want of *last issue*, he announced himself, through his constitutional advisers, in favor of the Pacific Railroad. For want of *last issue*, he declared himself against it in the columns of the Washington Union. In a word, he has been hoodwinked to the epigrammatic point, for no other reason than his poverty of *last issue*.

But we shall see further delineations of his want of this palpable *sequent* to the human frame, in the *four annual messages* of the present Executive, which will be forthcoming in a few hours.

No one did more to lift up to power to elevate Pierce to the White House, with the "*unexceptionable* ribbons" in his glasses, than Charles Edwards Lester, the New York correspondent of that great British *chandelier*, the *London Times*. The *Times* labored for the election of General Pierce more than it had ever done for any former presidential aspirant, solely because of his identification with the American Free Trade policy—the direct opposite of the British Free Trade scheme. But the tone of the Times is now changed. Disappointed in an application for office at the hands of the President, the *Times'* American correspondent has come out against Pierce, and pronounced his Administration a *total failure*. It is not often that we make extracts from the columns of the Times; but the present letter is so acute in the grasp, and epigrammatic in the sentiments, that we cannot refrain from indulging our other readers with a few paragraphs. Hear, therefore, the Times' correspondent, on the 24th of October, in a letter published in the Times on the 19th ult.

New York, Oct. 22.

I shall confine this letter entirely to subjects now agitating the public mind. It is a source of painful mortification that, in giving a truthful account of the progress of popular opinion, and public affairs, I shall be compelled to speak of the President and his Administration. I should be obliged to speak with more severity of censure of a man in whose election to power I contributed whatever influence I had, and to whose inauguration I greeted with such fervent and confident hopes, and, only as an American who rejoiced in every bright ray for his country, but in whatever of good and great and noble example in a free country might contribute to the welfare of all mankind. But the Administration is a wreck in all but the name. It is the first instance, not only in our history, but in the history of any nation with which I am acquainted, in which some political heresy has broken down a cabinet in a period of undisturbed tranquility. So much was the popular mind in this country on political subjects, that for several weeks in the beginning of the new Administration even the political morning of Mount Vernon, if he really had any, could not, at the slightest expression of disapprobation of his course, while no man upon whose views and upon whose career had been impressed the unmistakable seal of nationality would believe that anything would be done by Gen. Pierce, or by a cabinet by him, that would not ultimately be sanctioned by the most manly and sonorous arguments. The Cabinet will probably hold together till the meeting of Congress. They may remain in power some time longer; but, based as their foundations already are, they have put the unanchored resources of desperation to draw on, and, consequently, are looking for a heir, but petty reign of terror, in which the country will be denied the foresight men at Washington and an indignant Republic of principles, whether all the prerogative of the State have been absorbed by a faction created by accident in the midst of the public feeling of the country seems to grow deeper; the mortification of all sections more intolerable, day by day. In no disinterested quarter does the President find justification, or in no impartial man can he any longer look for an advocate. The expressions of disapprobation are on almost every lip.

* * * * *

Although the Democratic party has a large majority in both houses of the next Congress, it is absolutely ascertained that committees in both branches are already committed against the Administration. The Committee on Foreign Affairs in the House of Representatives will be composed of men who have been in the House of Representatives, for twenty years, and will be entirely hostile to the Administration. Of its nearly 700 members, it is very doubtful if the party in the Senate will find advocates enough to constitute even a respectable minority. It is the most popular legislative body in the world. Not a member there entertains the slightest hope, or the misrepresent the well ascertained feelings of his constituencies on great vital issues. Whenever the conscience or the personal independence of a member of Congress requires him to take such a position, he feels it due to himself to resign; and go into private life with the respect of men whom he suffered in judgment. A just and well founded censure will, on an average man who takes a different course. The real sentiments of the country are always represented in measures which commend a very large majority in the House of Representatives. Of the Senate of the United States—the other and higher branch of legislation—I cannot speak with the same confidence. There is but one man in the Senate who has more influence than that of a senator in the Presidency itself. That man is Mr. Douglas, the distinguished author of the Nebraska bill. The little influence which they constructed our Government, to which they possess a conservative spirit, will be the last support of the Federal Constitution. It should give me pain, if I were to live to see it ever attempted to trade with that body—for no one of their decisions have they ever themselves refused willingly and reverently to bow. It is not believed in any well informed circle that there will be found ten senators prepared to overthrow the broad, and stand by the acts of this Administration. We are yet to witness the result of special attempts made in the Democratic party has been consulted, while most of them, have been the "Mirror," and the "Lounger." They were the first of the kind ever started in that country. Among the prominent members of this club, were Mr. Brougham, the author of the Book of Fortune, &c.; Home, the author of Douglas; Lord Hailes, and Lord Woodhouselee, both of whom were eminent writers.

The "Bad Success" of the President—The London and New York Correspondent on the Administration—Letter from the "Times Street Cabinet."

Never, since George Washington swore his first presidential oath, in the presence of God and the people of New York, has our country been called to witness such a spectacle as we now last base to the astonished gaze of an indignant nation. Frank Pierce became President less than a year ago. All the people greeted him with loud cheers. He had the best wishes of the whole American race in the Union. Not a man breathed a syllable to dishonor him. Even the most bitter of those who had opposed his election, prepared themselves to judge his every act in a candid and generous spirit. The few months which have since elapsed, have been months of profound peace—months of prosperity—months of signal individual and national happiness. No great issue has arisen; no obstacle beset his quiet and easy path. And yet Frank Pierce is now the most unpopular, the most denounced, the most contemptible, the most impotent man in the United States. Why is this? Why is he not still the honored of the Whigs—the spoiled child of the Democracy? There is but one answer. Frank Pierce is unfitted for his post. His Cabinet is not a unit; all its members are either unknown, adventurers, or known. The Administration has failed solely for want of—*last issue*.

For want of *last issue*, General Pierce gathered around him a Cabinet of discordant material. For want of *last issue*, he sought to please all the free soilers. For want of *last issue*, he deserted the friends of the Massachusetts Coalition in the form of extensions. For want of *last issue*, he announced himself, through his constitutional advisers, in favor of the Pacific Railroad. For want of *last issue*, he declared himself against it in the columns of the Washington Union. In a word, he has been hoodwinked to the epigrammatic point, for no other reason than his poverty of *last issue*.

But we shall see further delineations of his want of this palpable *sequent* to the human frame, in the *four annual messages* of the present Executive, which will be forthcoming in a few hours.

No one did more to lift up to power to elevate Pierce to the White House, with the "*unexceptionable* ribbons" in his glasses, than Charles Edwards Lester, the New York correspondent of that great British *chandelier*, the *London Times*. The *Times* labored for the election of General Pierce more than it had ever done for any former presidential aspirant, solely because of his identification with the American Free Trade policy—the direct opposite of the British Free Trade scheme. But the tone of the Times is now changed. Disappointed in an application for office at the hands of the President, the *Times'* American correspondent has come out against Pierce, and pronounced his Administration a *total failure*. It is not often that we make extracts from the columns of the Times; but the present letter is so acute in the grasp, and epigrammatic in the sentiments, that we cannot refrain from indulging our other readers with a few paragraphs. Hear, therefore, the Times' correspondent, on the 24th of October, in a letter published in the Times on the 19th ult.

New York, Oct. 22.

I shall confine this letter entirely to subjects now agitating the public mind. It is a source of painful mortification that, in giving a truthful account of the progress of popular opinion, and public affairs, I shall be compelled to speak of the President and his Administration. I should be obliged to speak with more severity of censure of a man in whose election to power I contributed whatever influence I had, and to whose inauguration I greeted with such fervent and confident hopes, and, only as an American who rejoiced in every bright ray for his country, but in whatever of good and great and noble example in a free country might contribute to the welfare of all mankind. But the Administration is a wreck in all but the name. It is the first instance, not only in our history, but in the history of any nation with which I am acquainted, in which some political heresy has broken down a cabinet in a period of undisturbed tranquility. So much was the popular mind in this country on political subjects, that

CITY MATTERS.

WARD CAUCUS.

The Whigs of Lowell are requested to meet at LATHROP HALL, on TUESDAY EVENING, Dec. 6, at 7½ o'clock, for the purpose of selecting two delegates and seven substitutes for Mayor, and such other Municipal officers to the ensuing year, as may be put in nomination by caucus of the Ward Committee.

G. W. JOSSELYN, Secretary.
Dec. 5, 1853.

WARD CAUCUS.

Whigs, remember your caucus to-morrow night, at Jackson Hall. Let us have a full meeting.

☞ The News runs up the name of the *illustrious magistrate*, Timothy Pearson, as a candidate for Mayor of Lowell. This is too bad. We object to having the name of Pearson as much as we do to overworking a laboring beast. Timothy is busily in the lecture-business. A president of the Adelphi, and ticket-peddler, he has too much to do to be able to attend to the duties of the mayoralty. We sincerely regret that the city cannot have the use of his "eminent talents."

FRANCIS CROWLEY, Dec. 5, James Wallace, for drunkenness, fined $1 and costs; committed to House of Correction. John Kelley, Michael Cleary, Daniel Dunne, for getting into a promiscuous fight in a house on Gorham st., were fined in a cent each, and costs. Constance Guthrie, for drunkenness, was fined $1 and costs. Mary Ann Margaret Burns, for drunkenness, fined $1 and costs, or House of Correction.

DIVORCE. In the Supreme Court in Cambridge, on Saturday last, a decree of divorce was granted to Hannah E. Goodwin, libellant, against Frederick Goodwin, libellee. B. F. Jackson, Esq., attorney for libellant.

LAWRENCE DEBATING UNION. This society continues to meet at the Ward Room, corner of Essex and Merrimack streets, every Monday evening at eight o'clock. Subject for discussion this evening as follows—

Resolved, That political communication in producing the greatest moral reform of any age in which it has been made since the time of the Saviour's existence on earth.

The public are invited to attend and participate in the discussion.

A *Sunday School* will be opened in the rooms of the Unitarian Society, on Wednesday afternoon at 2 o'clock—to be continued on Wednesday afternoons through the winter. Its doors will be open to all children and grown persons in this city, who need instruction in common morals.

HOUSEHOLD WORDS, for December, has been received by Fred'k Parker, Esq., Wentworth's Building.

THE No. 2, vol. 1, of the Musical Repository has been received by Fred'k Parker, Esq., Wentworth's Building.

THE No. 3, vol. 1, of the Musical Repository has been received by Fred'k Parker, Esq., Wentworth's Building. The title is—*La Faire D'Amour*, composed by Herman Koesing. It is said to be a master piece.

TELEGRAPHIC. A Washington despatch of yesterday says:—Senators Case, Wright, Huntington, Mason, Badger and Dawson, have arrived, making, with the previous arrivals, fully a quorum of the Senate.

The excitement has greatly subsided since the result of the caucus became known, and the impression to-night is, that the caucus nominations will be elected without serious opposition.

A Baltimore despatch of the 3d inst., says: New Orleans papers of Sunday last are received. Business was quite brisk in that city—Labor was high and employment abundant.

The yellow fever was still prevailing in Woodeville, and other places along the Mississippi.

A motion was made in the Alabama Legislature to adjourn, for fear of the fever, which was carried by only two majority.

The South Carolina Conference of the Methodist Church closed its sessions on Thursday. Twenty-four thousand dollars was collected for missionary purposes.

The Mobile despatch of yesterday says:—New Orleans papers of Monday are received. They contain Galveston dates to the 25th ult., by the same is quite unimportant. The health of Indianola and Lavaca was entirely restored.

A New Orleans despatch of the 3d inst., says: Thomas, a merchant in this city, shot William Turnbull, a tobacco inspector, dead, in the Custom House. This act effair, it is understood, had its origin in family trouble.

A despatch of last night, from Middletown, Conn., says:—Four factory buildings, adjoining each other, owned and occupied by W. & B. Douglass, for the manufacture of pump chains, were destroyed by fire at one o'clock to-day. The probable loss is from $10,000 to $15,000; insured for $6000 as follows: Connecticut Fire Insurance Co., of Hartford, $2,000; Atlantic Fire Insurance Co., of Providence, $2,000; Hartford Fire Insurance Co., $2000. The fire was unquestionably caused by an incendiary.

NEBRASKA. It is said that the people of Eastern Iowa are moving on the subject of a speedy organization of the Territory of Nebraska. Three counties held a meeting on the subject recently, and a general convention of citizens was called.

It is stated that the report of Mr Manypenny, Commissioner of Indian Affairs, will advise additional appropriations for the extinguishment of the Indian titles in Nebraska Territory, and for their removal further West. This report proves that all the stories of white settlements, and emigration to the territory, are unfounded.

Nearly all the votes, amounting to about 850 hundred, given for a Territorial Delegate to Congress, were dispersed by Indians, and the only white inhabitants are a company of draughtsmen, a few agents, boatmen, and mechanics, in the employment of the Government.

THE FISHERY TREATY. In a letter to the state department, Mr Buchanan acknowledges the receipt of the fishery treaty, and says that he thinks it will be adopted; that he has had no official notice of the interview with Lord Aberdeen upon the subject, who promised that the British cabinet would act upon it as soon as possible. It would be sent to Parliament before this, but the Russo-Turkish affairs had occupied their attentions.

Notwithstanding this report, other correspondents say, "positively," that no treaty has been agreed upon with the British minister; "nor is there any more probability of getting one now than there was months ago. The British document impossibilities."

AFFRAY AT MEMPHIS IN PITTSFIELD. Another tragedy was made upon the life of Albert Johnson, a youth of 17, and son of B. F. Johnson of Pittsfield, in that town on the evening of the 17th ult. As he was passing the Western Railway depot on his way home, he heard one of a group of Irishmen who were in conclave there exclaim, "That's him, catch him," and one of the group immediately sprang for him. He eluded the attempt to seize him and succeeded in reaching his home in safety, but a short time after examination proved that a blow had been aimed at him with a knife, and had taken effect upon his cost sleeve, which was cut through. The presumption, says the Spring field Republican, is that the assailant mistook the victim.

☞ It is proposed to found a new Unitarian College in Illinois or Iowa.

☞ The Maine Liquor Law went into force in Michigan on Friday.

OLD ENGLAND AND YOUNG AMERICA. In his very able oration, on evacuation day, in New York, on the 26th of November, in honor of the last war, Hon. H. W. Beecher said:

"Two has spoken—and son stood confronted in battle. May a third conflict never occur to try ourselves! No eminent nations, surrounded in civilization and wealth, can be found, that have not been tried by war. Nations grow prosperous when they are at peace. Their wealth increases, and the men accumulated that time could have destroyed. Then the moods which the passions produced are healed; the animosity of the war is forgotten; the men who went to the deep, and sank to the bottom of the sea, have been succeeded by another race. The parent is becoming proud of her child. The son is proud of grandfather. They call over Washington theirs. And Warren, and Lexington, and Yorktown are ours. Ours too, is an honor in their histories. Bunker Hill, Lake Erie, the English channel—the ejecting of tyranny are theirs. The establishment of constitutional liberties, Ours are their names of genius; our Chancellor Kent, our Webster, our Marshall, and Clay, our Everett, our Milton. We will do them justice. We will be interpreted, what have we our ships; we will board them; we will go into their docks; we will trade with them; we will and bind them, and send them forth to serve mankind. And I say, that the two Americans are fierce to make reprisals, and send forth their ships of commerce and of war. Prescott, and Bancroft, and Hillard, our Emerson, and Longfellow, and Lowell, and Tyng, and Bethune and Edwards—why, I could go on to read the list of God's nobility which God that Old England has yet a race. Let her look to it. Let her look out and have to her. Nay, never—never let our flags be interlocked in battle, but in the fierce fire of God's mysterious overruling of human affairs, let them be united, and let the Anglo-Saxon stream out over the battle field, let their blood flow together, and let it be the seed of the world's liberty, when tyrants are finally to their right of self-government. In such a war I will go to see my grandchildren fight again hardened the heart of Pharaoh, that he might show his power. I say that then shall the people shall come forth from the land of bondage. Then shall the Anglo-Saxon race become Moses; France and America, Aaron and Hur, to hold up the hands of the venerable hands, let it be again, as when it was held up his hand, Israel prevailed. Let it be held up his hand, Israel perished. Let it be

PATENTS.
AMERICAN AND FOREIGN OFFICE.
Agency for Business with United States Patent Office, WASHINGTON. NO. 23 STATE STREET, BOSTON.

IMPORTANT INFORMATION TO INVENTORS. The subscriber (late Agent of the U. S. Patent Office, under the Act of 1837) determined to present advantages in applying for patents, superior to those offered inventors by others, has made arrangements whereby on applications prepared and conducted by him, THIRTY DOLLARS (instead of twenty, as paid back by others,) will be remitted by him in case of failure to obtain a patent, and the withdrawal through him within thirty days, after the rejection. Caveats, Specifications, Assignments, and all papers and drawings, for procuring patents in this and foreign countries prepared, and advice rendered on legal and scientific matters respecting inventions and infringements of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, but can avail themselves of the experience of 20 years' practice, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries; besides being saved a journey to Washington, the usual great delay there, as well as all personal trouble in obtaining their patents. Copies of claims of any patent furnished by remitting one dollar.—Assignments recorded at Washington. R. H. EDDY, Solicitor of Patents.

During the time I occupied the Office of Commissioner of Patents, R. H. Eddy, Esq., of Boston, did business at the Patent Office as Solicitor for procuring Patents. There were few, if any, persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity and success. I regard Mr Eddy as one of the best informed and most skilful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office. EDMUND BURKE, late Commissioner of Patents.

"PATENT OFFICE, ——. "R. H. Eddy, Esq, Boston, Mass. "Sir:—Your facilities for the procuration of any business connected with this Office, are equal to those of any other agent. I am very respectfully, yours, &c. THOMAS EWBANK, Commissioner of Patents." Boston, Sept. 1, 1853.

It is now generally conceded that this highly popular Monthly is the best and cheapest of the Illustrated Magazines. The price of the work is 25 cents for a single number, or $3.00 a year. The number for next January will commence a new volume, and will be ready, it is expected, early in December. It is the determination of the Publishers that there shall be no falling off in the quality of the work the coming year, and that there shall be no change in it excepting such as it is believed will be approved by its patrons. It will be more American in its character than it has been hitherto. The present subscribers can have their numbers bound in styles to suit, at reasonable prices by leaving them at my Bookstore with their directions. A few short extracts from a thousand long notices.

"Those of our readers who do not read every number of this admirable serial, miss a most instructive, agreeable, and judicious work. It is the best sustained enterprise of the kind ever attempted. The most curious information, the most pleasing stories, and the best written papers for the people, appear in each number—from essays on abstract history to details of manufacture; from ingenious paraphrases of events to the most delightful criticism on measures and the facts of the day. The scope of the work is charming and suggestive." [Boston Daily Transcript.

"It needs no commendation; its name and character are enough." [The Churchman.

"It abounds in articles which will be read with pleasure and profit. They are original, just of the right length to be read by the million, written in an easy, familiar, and agreeable style, replete with instructive sentiments, and pervaded by a tone of sound morality. It is suited admirably for the family circle." [Washington Union.

"It is a cabinet of amusement and instruction." [Zion's Herald.

"This work, written by bright and pure minds, is as interesting and safe book, a book for everybody, the most truly so of any periodical of the day." [Troy Daily Post.

"These 'Words' are like apples of gold in pictures of silver—they are always fitly spoken." [Ulster Republican.

"Thousands of households have bid it welcome, and its varied, instructive, entertaining and unexceptionable contents have delighted young and old in all parts of the country." [Rochester Daily Democrat.

"This work is one of the best of the kind published in the world. It is always replete with useful information, wholesome instruction, and agreeable amusement." [Auburn Daily Advertiser.

"The quality of the articles in the 'Household Words' is too well known to need description. Volumes have been compiled of selections from its numbers. The publishers present it in the best style." [Utica Gazette.

"It is a very rich work, and full of pleasant reading for these long evenings. On our first page we copy a story as a sample of what the work turns out, and shall take frequent occasion to enrich our columns from its pages." [Brooklyn Daily Eagle.

"Of the contents of this work we need only say that all the papers are original, and that Charles Dickens conducts it. It is got up in the neatest possible manner, mechanically, and is a credit to the house that reprints it." [Rochester Daily Union.

"There is a vast amount of good, practical, common sense and humor, nature contained in the various little stories and narratives which fill its pages. Its American publishers deserve the thanks of the people for presenting them with so valuable and pleasant a miscellany." [Baltimore Republican & Argus.

"There is no publication which gives, for the same low price, such an instructive and entertaining variety of reading." [Christian Herald, Detroit, Michigan.

"We have only to say of this work, as we have often said before, that in our opinion it is the most entertaining and instructive journal extant. We never feel that we are in danger of praising it too highly." [Burlington Sentinel.

"We know of no publication which contains so much valuable and practical information." [Gospel Messenger.

"No one can peruse this work without being wiser and better." [Albany Argus.

"'Household Words'—words spoken in a thousand English ears, and whispered over again in thousands of American ones—sensible, well timed words, funny words—sometimes wayward words, but generally only plain, blunt words—friendly words, words of counsel, words of good cheer, but seldom loud words—never bad words, and we hope never last words." [Albany Evening Journal.

THE ROAD TO HEALTH!
HOLLOWAY'S PILLS.
CURE OF A DISORDERED LIVER AND BAD DIGESTION.

Copy of a Letter from Mr R. W. Kirkus, Chemist, 7, Prescot Street, Liverpool, dated 6th June, 1851.

To Professor HOLLOWAY, SIR,—Your Pills and Ointment have stood the highest on our sale list of Proprietary Medicines for some years — A customer, to whom I can refer for any enquiries, desires me to let you know the particulars of her case. She had been troubled for years with a disordered liver, and bad digestion. On the last occasion, however, the virulence of the attack was so alarming, and the inflammation set in so severely, that doubts were entertained of her not being able to bear up under it; fortunately she was induced to try your Pills, and she informs me that after the first and each succeeding dose, she had great relief. She continued to take them, and although she used only three boxes, she is now in the enjoyment of perfect health. I could have sent you many more cases, but the above, from the severity of the attack, and the speedy cure, I think, speaks much in favor of your astonishing Pills. (Signed) R. W. KIRKUS.

AN EXTRAORDINARY CURE OF RHEUMATIC FEVER, IN VAN DIEMEN'S LAND.

Copy of a Letter inserted in the Hobart Town Courier, of the 1st March, 1851, by Major J. Walch.

Margaret M'Connigan, nineteen years of age, residing at New Town, had been suffering from a violent rheumatic fever for upwards of two months, which had entirely deprived her of the use of her limbs; during this period she was under the care of the most eminent medical men in Hobart Town, and by them her case was considered hopeless. A friend prevailed upon her to try Holloway's celebrated Pills, which she consented to do, and in an incredible short space of time they effected a perfect cure.

CURE OF A PAIN AND TIGHTNESS IN THE CHEST AND STOMACH OF A PERSON 84 YEARS OF AGE.

From Messrs Thew & Son, Proprietors of the Lynn Advertiser, who can vouch for the following statement. August 2nd, 1851.

To Professor HOLLOWAY, SIR,—I desire to bear testimony to the good effects of Holloway's Pills. For some years I suffered severely from a pain and tightness in the stomach which was also accompanied by a shortness of breath, that prevented me from walking about. I am 84 years of age, and notwithstanding my advanced state of life, these Pills have so relieved me, that I am desirous that others should be made acquainted with their virtues. I am now rendered, by their means, comparatively active, and can take exercise without inconvenience or pain, which I could not do before. (Signed) HENRY COE, North Street, Lynn, Norfolk.

These celebrated Pills are wonderfully efficacious in the following complaints.

Ague, Asthma, Bilious Complaints, Blotches on the Skin, Bowel Complaints, Colics, Constipation of the Bowels, Consumption, Debility, Dropsy, Dysentery, Erysipelas, Fevers of all kinds, Female Irregularities, Fits, Gout, Headache, Indigestion, Inflammation, Jaundice, Liver Complaints, Lumbago, Piles, Rheumatism, Retention of Urine, Scrofula, or King's Evil, Sore Throats, Stone and Gravel, Secondary Symptoms, Tic Douloureux, Tumours, Ulcers, Venereal Affections, Worms of all kinds, Weakness, from whatever cause, &c. &c.

Sold at the Establishment of Professor HOLLOWAY, 244, Strand, (near Temple Bar, London), and by all respectable Druggists and Dealers in Medicines throughout the British Empire, and of those of the United States, in Boxes at 37½c., 87c., and $1.50c each. Wholesale by the principal Drug houses in the Union, and by Messrs A. B. & D. Sands, New York. Sold also by S. KIDDER, Jr., Lowell.

There is a considerable saving by taking the larger sizes. N. B.—Directions for the guidance of patients in every disorder are affixed to each Box. Dec. 20, 1852.

DR. MARCHISI'S UTERINE CATHOLICON.

THE UNDERSIGNED HAVING BECOME AGENT FOR THIS INVALUABLE MEDICINE, would respectfully invite the attention of the afflicted to the gratifying notices of those who have attended its use wherever introduced, and its happy adaptation to the cure of the distressing diseases for which it is recommended. The CATHOLICON is in truth one of the GREATEST MEDICAL DISCOVERIES OF THE AGE, and is destined to become identified with the ... FEMALES.

This declaration is based on the fact that it will cure more than nine tenths of a class of very prevalent diseases, known as Female Complaints, and which have heretofore resisted the skill and exertions of the most accomplished Physicians of all countries, to a degree beyond that of almost every other malady to which the human family is heir. It has already received the approbation and liberal patronage of very many prominent members of the Medical Faculty in the Union, who are willing to abide the truth, and having due regard for the welfare of their patients, and is in every way worthy the confidence of the afflicted as a SUCCESSFUL, SAFE and CHEAP REMEDY. ... Lovet's Wahpene
WILL restore Gray Hair to its original color, and CURE BALDNESS, BEYOND A DOUBT. To satisfy the public, reference is given, and any one has the liberty to write or to call upon THOMAS FRAMAN, Esq., Real Estate Broker, office No. 61 Chamber street, New York, who will testify that he was half gray and partially bald, until he used LOVET'S WAHPENE, which restored it to its natural color and thickness. Mr VANDERBURGH, of the well known firm of Calhoun, Vanderburg & Co., 46 Cedar street, New York, only used four bottles and his hair is perfectly restored, after having been half gray. Mr BOLAND NAIRSON, office 260 and 261 West street, New York, had a bald spot from injury, and after using Lovet's Wahpene for the space of seven months, the spot that was bald is now covered with a fine head of hair, and he also was beside half gray, which is perfectly restored. HANS JOHNSON, 125 Crosby street, New York, who was 54 years of age, and had been bald for 27 years, commenced using Lovet's Wahpene on the 11th day of July last, and he has now fine healthy hair, the size of the bald spot was nine inches long and five in width. BENJ. L. FOWLER, whose white head was well known in Beverly, Mass, is now foreman, and can be seen any day in the Basement Laboratory, 36 Reade street, New York, with a fine head of healthy hair. EXCELSIOR HAIR TONIC!
A purely VEGETABLE Preparation for promoting the Growth, Preservation and Beauty of the HAIR. THE above has been thoroughly tested, and the result is, an universal expression of entire satisfaction. It is warranted to eradicate the Dandruff, prevent Baldness or a tendency to turn gray, prevent the falling of the hair, preserve its color, render it soft, pliable and glossy, and in good condition for curling, eradicate the animalcule which is so destructive to the hair, remove the scurf, cure scald head, relieve headache, &c. The Excelsior Hair Tonic being a purely vegetable preparation, is the thing and the only thing worthy of its name.

BALDNESS! BALDNESS!! Should any one desire to see bald head retiring under the shade of beautiful locks, let him make thorough use of the Excelsior Hair Tonic.

FALLING OR LOOSENING OF THE HAIR. If this disease be neglected, it will prove the precursor of baldness; a result which is by no means a desirable one, and which can easily be avoided by a thorough use of the Excelsior Hair Tonic.

DANDRUFF AND SCURF. This disorder, in most cases owing to neglect or a want of proper attention, may be easily and entirely eradicated by the use, according to directions, of the Excelsior Hair Tonic.

HEADACHE! HEADACHE!! If you would be relieved of headache, and the gloomy disagreeable feelings attendant upon it, and in their stead be inspired with the revivifying, refreshing and hilarious spirit resulting from a head clear and clean, and a brain free and active, use the Excelsior Hair Tonic.

CHILDREN.—It may be used upon the heads of children with the happiest results. Prepared only by LOMBARD & CUNDALL, Druggists, Springfield, Mass. Price 25 cents. Sold by Druggists and Fancy Dealers, Hair Dressers, &c., throughout the United States and the Canadas. Wholesale and retail Agents for Lowell, J. C. AYER & CO., CARLETON & HOVEY.

DR. MORSE'S INVIGORATING CORDIAL.
A PHENOMENON IN MEDICINE. PROFESSOR MORSE'S INVIGORATING ELIXIR, OR CORDIAL. The Eighth Wonder of the Botanic World.

The Invigorating Elixir and Cordial introduced into medical practice by the great chemist, Physician and traveller, Dr. M. Morse, has for its basis an Oriental Herb, first brought from the stony deserts of Arabia Petrea, by that eminent philosopher, which has been endorsed by the medical colleges of all the great cities of Europe as the best preparation extant for the

CURE OF NERVOUS DISEASES. No language can convey an adequate idea of the immediate and almost miraculous change which it occasions in the diseased, debilitated and shattered nervous system. Whether broken down by excess, weak by nature, or impaired by sickness, the unstrung and relaxed organization is at once re-braced, re-vivified, and built up. The mental and physical symptoms of nervous disease vanish together under its influence. Nor is the effect temporary. On the contrary, the relief is permanent, for the cordial properties of the medicine reach the constitution itself, and restore it to its normal condition. Well may the preparation be called the MEDICINAL WONDER of the nineteenth century. It is, as the first scientific men of the old world have admitted, that miracle of medicine heretofore supposed to have no existence.

A STIMULANT THAT ENTAILS NO RE-ACTION. Its force is never expended, as is the case with opium, alcoholic preparations, and all other excitants. The effect of these is brief, and it may well be said of him who takes them, "the last state of that man is worse than the first." But the Elixir is an exhilarant without a single drawback—safe in its operation, perpetual in its happy influence upon the nerves, the mind, and the entire organization. ... [illegible] ...

CONSTITUTIONAL DEBILITY. All who have injured themselves by private and improper indulgences, will find in this Cordial a sure relief. ... [illegible] ...

MARRIED PERSONS or others conscious of inability from whatever cause, will find this Cordial ... [illegible] ...

BUILDING LOAN AND FUND ASSOCIATIONS.
ASSOCIATIONS of this kind having in view the objects sought to be attained by the one now in progress, are generally understood. They are the result of philanthropic labors, providing capital and a home for every one, the means by small monthly contributions, are enabled to raise a fund by which each one may secure a homestead, a freehold residence free from all incumbrances, or if he has an incumbrance on his property, he can if he choose draw out of the funds of the Association a sum sufficient to discharge the debt, remove all incumbrance, and be independent as it were, having the privilege of paying it to the Association in small sums each month. In no scheme ever devised has the accumulation been so rapid—having all the advantages and securities of a Savings Bank, with greater profits, for a member who pays into the treasury two dollars per month will accumulate the sum of Five Hundred Dollars in seven or eight years, according to the operations thus far. The books of the MERRIMACK MUTUAL LOAN FUND ASSOCIATION are now open, and the public are invited to call, examine and subscribe for shares, at the office of the Secretary, No. 8 Wyman's New Block. DEBATING CLUBS.
BY A. FORMAN. *Concluded.*

Some very popular and talented periodicals have been produced by Debating Clubs in England which were connected with some of her colleges. Among these may be mentioned the "Etonian," and the "Microcosm." It was in the latter that Canning, at the age of sixteen, wrote his celebrated paper upon the style of Addison, and which did a great deal toward making it, for a long time, a model for English composition. Franklin's Club, the Junto, was the means of doing much intellectual good to America. Many of its essays were among the most popular of those which were afterwards published in Franklin's newspaper. The want of books which it likewise created, induced its founder to project a scheme for a public subscription library, which, like most of his projects, succeeded;—it flourishes to this day, and, as he observes, "is the mother of all the North American libraries, now so numerous."

Thus it will be seen that Debating Clubs have done public service of no mean importance in science, in literature, and in the progress of political liberty. At a time when English literature was hardly known by her neighbor, Scotland, the Debating Club more generally introduced among her "books and brose" a taste for Milton and Shakespeare, for Jeremy Taylor and John Bunyan. And as no international communication can be permanent unless cemented by intellectual intimacy and ties, we may safely assume, that this change has contributed to destroy prejudice, and to produce that close bond of union which has since subsisted between the two countries, and which has been so beneficial to both. At a time when the political state of Great Britain was dark and dreary, the Debating Club became the safety-valve of public opinion, and the birth-place of thoughts which have brought about many great political reforms. At a time when England's injustice to her American Colonies made their dependence no longer endurable, the Debating Club assisted in spreading those opinions which enabled them to break their shackles and proclaim their freedom. Such have been some of the benefits they have conferred upon the soil where they have been planted; and similar fruits may reasonably be expected wherever else they may be sown.

We turn now to consider the private benefits of Debating Societies; the benefits which a member himself may derive, and the dangers which he must avoid.

One of these advantages is improvement in conversation. This is an acquirement of no little importance. Conversational tact, the faculty of communicating entertaining and instructive thoughts with ease and without effort, is as rare as it is valuable. Corneille wrote the best tragedies in the French language, but he nevertheless spoke very bad French. Goldsmith has written some of the finest specimens of English verse and prose, yet he could not relate an anecdote in his mother tongue without blundering. The eloquent historian, Gibbon, was a silent member of the House of Commons; and the brilliant essayist, Hazlitt, sat almost mute in company. Addison, La Fontaine, Descartes, and others, show likewise that a man may be a very great writer, and a very poor speaker. But to speak is as necessary as to write. Genius is robbed of half her beauty when shorn of eloquence.—Every man has his private circle, his family and his friends, where a word in season, clearly and forcibly delivered, may do more good than many a volume. There is, too, a music of the voice, which only requires to be trained and cultivated, to give to the oral utterance of thought, a greater charm, and a more powerful influence, than can be communicated by the printer's type. We will relate an anecdote somewhat in point. Tyrone Power, the celebrated comedian, had very plain features, covered with marks of small pox. While in a room, amid a fashionable company, a lady who had not seen Power before, and who did not know him, expressed her surprise at the coarseness of his countenance, and wondered how those ladies who knew him could be fascinated by his society! On the evening after this occurrence, Power was introduced to her—a few minutes after, she was heard expressing the pleasure with which she had listened to him, and lo! within a short time after she became his wife! The plainness of his features was lost in the brilliancy of his remarks. Beautiful thoughts reflect themselves upon the face, for the face is the mirror of the soul; and good language improves them, just as fine clothes set off the attractions of a well-developed figure. What man or woman, while in company with Pope, would think his humped back a deformity—or would despise Johnson's conversation because of his bleared eyes and unwashed hands—or would listen without pleasure to Mirabeau because he looked "like a tiger pitted with small pox." Now, for the beauty of mind is so great, and the magic of the voice is so powerful, that they throw around the ugliest features, or the most ungainly limbs of a man of genius, a halo of symmetry and of beauty!

We do not understand a good style of conversation to consist of those ... [illegible] ...

to and eloquent memory of the late Author [illegible] Hamilton, which, in Mr. Everett's beautiful "lament" of [illegible] Washington, will [illegible] to the [illegible] of [illegible] Eaton, And Lord Brougham, in his Lives of Eminent Men of Letters and Science, states that the Historian Robertson's facility and correctness in composition was due to his abundance at the weekly debates in "The Speculative."

The subject of public speaking naturally follows that of private—ordinary after conversation. The advantages urged on behalf of those exercises for the latter, may be equally applied to the former. That they can assist in training a person for public speaking most will not question; for the speech of all is thus, in a comparative sense, to speak in public. Of necessity, they not only train to acquirest, according to his capacity and industry, to connect his thoughts and improve his language, but they give confidence, without which no one can become a good public speaker; and all unpracticed delivery, without which the best language and thought will fail lifeless before an audience. We know one when he used to make the greatest blunders, and the weakest efforts, among the speakers of a Debating Club. But he was not deterred by ridicule and defeat. He strove on with energy and patience—the guarantees of success—and he became an eloquent member, and has now for countryand all who want his youthful imagination. We have read of a member of the House of Commons, who rose to a high rank as a speaker, by a similar course of failure and effort. Curran said when he first rose in a Debating Club in Dublin, the features of the audience swam before his eyes, and the candles seemed to go out one after another, and leave him, and almost deprived him of utterance. Yet, a time arrived when his voice made a corrupt bench tremble; when his language would almost have put an Asiatic to the proud. Even in the winter, alone in a barn; in the open air, in a cornfield, conversing with tall stalk into a judge, and the shorter ones be-

CONGRESSIONAL. The Congress of the United States commenced its session on Monday.

SENATE.—The Senate was called to order by Mr Atchison; and, a quorum being present, the Secretary read a message from the House of that fact. Notice was given of bills, granting lands to Iowa for railroad purposes, and for constructing railroads and telegraph lines from San Francisco to the Colorado river, with a branch passing through the valley of the Sacramento river to the boundary of Oregon; also to establish a line of steamers from the mouth of the Mississippi to Havana, Chagres; also to pay the expenses incurred by California in suppressing Indian hostilities.

Mr Badger moved that Reuben Sanford, late deputy marshal for the southern district of Mississippi, who died while in the discharge of his official duties, be allowed the salary of his office for the time he was engaged in the duties of his office, and the expenses incurred by him in the discharge of his duties, which motion was agreed to.

Mr Bright's resolution, appointing a chaplain to each House, was adopted, and the Senate adjourned.

HOUSE OF REPRESENTATIVES.—The gallaries were densely crowded. Mr Perry, Clerk, called the House to order at 11 o'clock; 217 members were sent to their seats.

Mr Olds moved that the House do now proceed to the election of a Speaker *viva voce*.—Agreed to.

Messrs Ingersoll, Chandler, Davis and Kreiog, were appointed Tellers.

The following vote was then announced:—For Lewis D. Campbell, of Ohio, 103. Thomas L. Orr 4, Solomon G. Haven 6.

Mr Boyd was then declared elected.

Messrs Chandler and Orr then conducted Mr Boyd to the Chair, when he delivered a brief but appropriate address for the honor conferred upon him.

Mr Bayley offered a resolution, that the Rules of the last house be adopted, until otherwise ordered, and providing for the appointment of a committee of five, to revise the Rules.

Messrs Olds, Chandler, and Bayley, were appointed a committee to wait upon the President, and notify him that the House was organized.

The House next proceeded to the election of a Clerk. Whole number of votes cast, 205.—John W. Forney received 121, Richard D. Young 27, B. B. Pringle 18, E. Hutchinson 39. Mr Forney was then declared elected.

The remaining officers of the House were re-appointed by resolution.

The members next selected their seats by lottery. Several notices of bills were then given, and the House adjourned.

TELEGRAPHIC. A New York despatch of yesterday says:—The steamer Illinois, for Aspinwall, and the Northern Light, for San Juan de Nicaragua, sailed to-day, with a large number of passengers.

A large crowd attended the public reception of Dr. John Mitchell, and other fine essays in exemplification of this kind. *Sir James Mackintosh, and Sir Samuel Romilly* attended them for years, and if evidence were wanting to prove the utility and the pleasure of such institutions, it would be easy to condense in their favor a long array of the testimony of men of the first eminence." We have before us a printed report of the proceedings of the Union Debating Club, at the University of Cambridge in England, from 1815 to 1820, and among the list of the debaters we find former mention of *Mr Macaulay*, the brilliant essayist and historian; Sir J. Romilly, the late Solicitor General of England; Lord Grey, the present Colonial Secretary; Charles Butler, and *Mr Villiers*. As before observed, a was in similar associations that Pitt, Burke, Canning, Sheridan, Jeffries, and Brougham trained themselves for fame. A Debating Club called the "Speculative," says a modern writer, were Sir Walter Scott, Robertson, Dugald Stuart, Jeffries, and Brougham, and he adds, that it was treated with an orator who has since edified and delighted mankind. It was in this Club that *Sir James* Macintosh discovered his abilities for public speaking, and was there decided, upon the suggestion of some fellow-members, to abandon medicine, which he was then studying, for the law.

Daily Journal & Courier.

Lowell, Tuesday, December 6, 1853

A MONUMENT TO BENJAMIN FRANKLIN. We are advised that the printers of Buffalo and Rochester are to have a public celebration on the 17th inst., commemorative of the birth of Franklin, the anniversary of whose nativity occurs on that day. Such a celebration seems highly appropriate. It is highly commendable in the craft" to celebrate the birth-day of the great exemplar of the American press. In his *rephlete* character, of editor, statesman and philosopher, Franklin added more of real glory to the American name than any other man of his time, with the single exception of the incomparable and unapproachable Washington. How much he did by his great personal influence, by his profound and versatile understanding, by his eminent intellect, by his acute sagacity, and by the variety and aggregate of his personal experience, whose fruits he brought to bear on the great issues of his time—how much he did by all this, to consummate and establish the Revolution, to save the British Constitution at its dying gasp from the fate of other free constitutions, and to prepare the way for our Federal Union, can never be adequately estimated by us, at this distance from the time and scene of action. How much he accomplished to enlarge the bounds of science, history and literature, by his own proper industry his labors in the private committees of Congress, in the columns of the newspapers of his time, and at the Courts of Europe in his diplomatic capacity.

Unblest with the advantages of a public education; self-taught he all he knew; economical and methodic in the use of time; humble in origin, a model of industry to the present ent scent in Europe; the successful leader of a desperate revolt; the highest among philosophers, yet discovered in any original power of knowledge; a model writer, yet destitute of ornament in the climate; a citizen of sympathy, probity and virtue; a public man of such unbroken integrity and honor—Franklin, in his infinite variations of genius, philosophy, and statesmen, appears as great that,—

> "We never shall look upon his like again."

Anyone of the celebrations, we would ask our contemporaries of the Key Stone State what further has been done towards erecting a monument to Franklin on the site of his grave.—We have several times alluded to this matter before, and trust that the project will not fail for want of encouragement. The memory of the great dead, we humane Republics are supposed to be honored by a good monument; though—

> "Nothing can make the bad base but treason;
> But the true act of valor is of reason."

We have before us a printed report of the proceedings of the Union Debating Club, at the University of Cambridge in England, from 1815 to 1820, and among the list of the debaters we find former mention of *Mr Macaulay*, the brilliant essayist and historian; Sir J. Romilly, the late Solicitor General of England; Lord Grey, the present Colonial Secretary; Charles Butler, and *Mr Villiers*. As before observed, a was in similar associations that Pitt, Burke, Canning, Sheridan, Jeffries, and Brougham trained themselves for fame. A Debating Club called the "Speculative," says a modern writer, were Sir Walter Scott, Robertson, Dugald Stuart, Jeffries, and Brougham, and he adds, that it was treated with an orator who has since edified and delighted mankind. It was in this Club that *Sir James* Macintosh discovered his abilities for public speaking, and was there decided, upon the suggestion of some fellow-members, to abandon medicine, which he was then studying, for the law.

CONGRESSIONAL. The Congress of the United States commenced its session on Monday.

SENATE.—The Senate was called to order by Mr Atchison; and, a quorum being present, the Secretary read a message from the House of that fact. Notice was given of bills, granting lands to Iowa for railroad purposes, and for constructing railroads and telegraph lines from San Francisco to the Colorado river, with a branch passing through the valley of the Sacramento river to the boundary of Oregon; also to establish a line of steamers from the mouth of the Mississippi to Havana, Chagres; also to pay the expenses incurred by California in suppressing Indian hostilities.

Mr Badger moved that Reuben Sanford, late deputy marshal for the southern district of Mississippi, who died while in the discharge of his official duties, be allowed the salary of his office for the time he was engaged in the duties of his office, and the expenses incurred by him in the discharge of his duties, which motion was agreed to.

Mr Bright's resolution, appointing a chaplain to each House, was adopted, and the Senate adjourned.

HOUSE OF REPRESENTATIVES.—The gallaries were densely crowded. Mr Perry, Clerk, called the House to order at 11 o'clock; 217 members were sent to their seats.

Mr Olds moved that the House do now proceed to the election of a Speaker *viva voce*.—Agreed to.

Messrs Ingersoll, Chandler, Davis and Kreiog, were appointed Tellers.

The following vote was then announced:—For Lewis D. Campbell, of Ohio, 103. Thomas L. Orr 4, Solomon G. Haven 6.

Mr Boyd was then declared elected.

Messrs Chandler and Orr then conducted Mr Boyd to the Chair, when he delivered a brief but appropriate address for the honor conferred upon him.

Mr Bayley offered a resolution, that the Rules of the last house be adopted, until otherwise ordered, and providing for the appointment of a committee of five, to revise the Rules.

Messrs Olds, Chandler, and Bayley, were appointed a committee to wait upon the President, and notify him that the House was organized.

The House next proceeded to the election of a Clerk. Whole number of votes cast, 205.—John W. Forney received 121, Richard D. Young 27, B. B. Pringle 18, E. Hutchinson 39. Mr Forney was then declared elected.

The remaining officers of the House were re-appointed by resolution.

The members next selected their seats by lottery. Several notices of bills were then given, and the House adjourned.

TELEGRAPHIC. A New York despatch of yesterday says:—The steamer Illinois, for Aspinwall, and the Northern Light, for San Juan de Nicaragua, sailed to-day, with a large number of passengers.

A large crowd attended the public reception of Dr. John Mitchell, and other fine essays in exemplification of this kind. *Sir James Mackintosh, and Sir Samuel Romilly* attended them for years, and if evidence were wanting to prove the utility and the pleasure of such institutions, it would be easy to condense in their favor a long array of the testimony of men of the first eminence." CITY MATTERS.

WARD CAUCUS.

The Whigs of Lowell are requested to meet at Jaquith Hall, on TUESDAY EVENING, Dec. 6, at 7½ o'clock, for the purpose of taking some preliminary steps to nominate a candidate for Mayor, and such other Municipal officers for the ensuing year, as may be deemed expedient.

By order of the Whig Ward Committee.

PRESIDENT'S MESSAGE. The Government Messenger, whose duty it was to deliver copies of the Message, in advance, to the Post Masters of the principal cities, has failed to do his duty. No Message have been furnished the Lowell Postmaster. The Messenger was in Boston last week.

The Message was probably delivered at 11 M. to-day. We have made arrangements to get it this afternoon, (if possible,) when we shall immediately issue it in an extra.

BY WHIGS, RALLY FOR THE CAUCUS TO-NIGHT, AT JACKSON HALL. Stand by your arms, and trust nothing to the weakness of your opponents. Rally for good nominations!

DECEASED. Dexter Livingston, about 11 years old, son of Elbridge Livingston, who resides at the corner of Appleton and Thorndike streets, while sporting on the ice which covers the pond on the South Counties, yesterday afternoon, broke through and was drowned.—Dexter was a bright and active boy, and passed through the ice and narrowly escaped a like fate. This should serve as a caution to boys not to go out of skating and sliding.

IN MEMORY OF THE DEPARTED. The Choir of the Lee street Unitarian Church have purchased a beautiful silver plate, at an expense of about $30, on which is engraved,

"To the memory of Mr William B. Ordway, who after a gratuitous service of seventeen years as Organist of this Society, died April 26, 1853, at the age of 33 years."

The plate is to be attached to the Organ. It was presented by Joseph Haynes, and may be seen in his window.

☞ We have an anonymous communication, taking exception to a brief local paragraph (communicated) in Saturday's Courier. On recurring to the item we do not find the objectionable.

WINDING UP. We learn that the Lowell American is to be discontinued after Thursday next. The publication was commenced by the American and the Advertiser, being all one in point of editorials and general reading, it is more than best this end.

TRAGEDIE. To-day's Herald has a column of brain-sweat on the "bargain-and-sale" lie. It says that Mayor Lincoln, formerly the imperious whigs of Lowell to emigrate—that Mayor Mack was the principal agent in the rum interest—that the rum party has been bought up by the whigs, with four or five other stupid lies. The calumniator, who signs his name to the Herald, is evidently becoming "small by degrees and beautifully less." It is useless to contradict their lies. Let the long-eared animals bray.

MECHANICS' THREE PRINCIPLES ARE PRACTICAL ENGINEERS. Edited by Oliver Byrne, Civil, Military and Mechanical Engineer, &c., &c., author of "Pocket Companion for Engineers and Mechanics," "Dictionary of Machines, Mechanics, and Engineering," &c., &c., one vol., 12 mo., elegantly bound in cloth. APPOINTMENT OF NOTWITHSTANDING COMMON PLEAS JUDGE.

The Governor & Council have appointed Hon. Isaac Davis, of Worcester, Judge of the Court of Common Pleas, in the room of Hon. Charles Allen, resigned.

Mr Davis is a native of Worcester, and has been a resident of that city for more than forty years. He graduated at Harvard College in the class of 1811, and studied law with Levi Lincoln, Jr., and was admitted to the bar in 1814. He has been a member of the Executive Council, and a State Senator, and was elected Mayor of Worcester in 1848, and re-elected in 1849. He was also a member of the Constitutional Convention of 1853.

Mr Davis is a man of fine talents, and has a high reputation as a lawyer. He is a Democrat in politics, and has been a prominent member of the party in Worcester county.

Boston Post.

A correspondent of the Philadelphia Ledger, the evening French paper in New York, says that Mr. de Lamartine has written a letter in one of the Cuban or Washington, eulogizing the policy of President Pierce in sending autographical letters as diplomatic envoys to European courts, thus "demonstrating that under democratic institutions, neither rank nor fortune, nor social position, nor political antecedents can prevent a man of energy and talent from arriving at the highest dignities; that the republic establishes no distinctions between men, and that, whether native or foreign birth, they are equal in its eyes."

CUBA. The new Captain General is daily expected at Havana, and it is understood that he is invested with all the attributes of a Viceroy, without the name. Heretofore the Captain Generals of the Island have had no control over the Admiral of the station, or over the Generals of Artillery, Engineers, &c.; but the new Governor's authority is understood to be supreme. The natives are favorable to the change. The soldiers are still being tampered with, and a young student has been detected in carrying seditious papers to a sergeant on guard at one of the hospitals.

WHIG FESTIVAL IN WORCESTER. From the Worcester Transcript we learn that the following gentlemen, among others, have been invited to be present at the Whig Festival and Supper which is to come off in that city this evening: Gov. Clifford, Hon. Emory Washburn, Hon. B. C. Winthrop, Hon. Charles Hudson, Hon. Linus Child, Hon. Geo. S. Hillard, Hon. E. H. Kellogg, Hon. Chas. H. Warren, Hon. Abbott Lawrence, Samuel Lawrence, Esq., H. Bartlett, Esq., Judge Hopkinson, Col. Wm. Nelson, &c., &c.

CAPT. RUSSELL AMONG THE MAD BEARS. The Springfield Republican can hardly credit the report, that the redoubtable Capt. Reuben has been appointed a secretary of legation, at a salary of fifteen hundred dollars and traveling expenses. The Captain may, for aught we know, possess the accomplishments which are required for the discharge of the duties of that office, but in addition to those the incumbent will be driven to a man of more than ordinary tegrity—one in whom the public can confide, and who will always be found at his post when the latter is more universally acceptable than the former. We have no doubt the message to the Virgin—a being of the same race as themselves—will be "justly observed" by the "Bridge of Sighs" have too much indignation for the "Bridge of Sighs" to be in mercy pathos and humor in the novels of Scott and Dickens than in all the Bears.

LAUDABLE. A one-idea'd enthusiast named William Giles Dix, has written a pham phlet which he calls a book, in which he proposes that the Queen of England shall abdicate—that He goes for driving out the Turks from Europe, and how and as soon as possible, in order to accomplish this object, that the Queen should marry him. He says that the Turks are "barbarians," Greek, Roman and Anglican. How is that for high?

A GREAT BLESSING to the AFFLICTED. The number and formidable character of diseases of the throat and lungs render the attention of medical men. Some of these diseases, chiefly those of the throat and lungs, have been supposed incurable, and the unhappy patient advised to go to a warmer climate, and there to die in the hope of recovery. Happily this can no longer be the case. Dr. Wistar's Balsam of Wild Cherry, now prepared by Seth W. Fowle & Sons, Boston, is offered to the afflicted with the full assurance, that in the first stages of consumption, and in all cases of severe coughs, colds, whooping cough, croup, asthma, bronchitis, and all diseases of the throat and lungs, it will give relief, and in most cases a speedy cure. Sold by all druggists and dealers in medicines throughout the United States and Canada.

PATENTS.
AMERICAN AND FOREIGN OFFICE.

Agency for the Sale and Procurement of Patents.
WASHINGTON,
NO. 36 STATE STREET, BOSTON.

IMPORTANT INFORMATION TO INVENTORS.

The undersigned, late Examiner of Patents, (appointed under the Act of 1837) discontinued to present advantages, which, from his long experience in the business, he is confident will be acceptable to inventors. He will continue to examine projected and rejected inventions, and advise as to their patentability, free of charge; and if found to be so, will procure patents for the same, on the most reasonable terms, and in the shortest time consistent with the interests of his clients. He will also continue to prepare specifications, and conduct all other business appertaining to the procuring of patents, and the management of cases in the Patent Office, and will be happy to receive the models, papers and drawings, for preliminary examination, of those who may favor him with their business, and will endeavor to give them his best attention, and the most careful and prompt execution of their business.

Inventors will find it for their interest to employ one who has had considerable years of legal and professional study of the principles of patents presented to the end either concerning the novelty of the invention, or the validity of the patent when granted; and, as he will be personally responsible for the faithful performance of all business entrusted to him, he refers to any person for whom he has done business.

H. B. EDDY,
Late Commissioner of Patents.
Washington, D. C.

During the time I occupied the Office of Commissioner of Patents, I was called upon by many persons to act as agent in the procuring of patents for new inventions. Several years ago, I was persuaded, owing to the pressure of business at the Patent Office, to relinquish the practice, and accordingly declined acting as agent for any person whatever. Since my resignation, I have been frequently solicited to resume the agency, and have finally concluded to do so, and to that end have associated with me Mr. H. B. Eddy, late Examiner in the Patent Office, who has been in business in soliciting inventions that they may be secured by patents, and who is well acquainted with the duties of the office, and will be able to attend to any business that may be entrusted to us, as well as I could myself. I can, therefore, recommend him to the confidence of inventors, as a gentleman of integrity and ability.

Thomas Ewbank, late Commissioner of Patents.

We hear a great deal about the impromptus of genius, but most of them, we fear, if looked into would be found to be the result of much care and labor. In fact, we never heard of one without becoming very suspicious and skeptical, for it brings one to our recollection which we saw copied in a young lady's album, and which we know to have been the result of two months' hard work. We are told that Shakespeare never altered but one of his plays after the first time writing; but there is abundant proof to the contrary, when the early editions of some of them are compared with the copies now published. Sheridan is said to have written Pizarro at Drury Lane Theatre, over port-wine and sandwiches; but every one acquainted with his life, will recollect that those brilliant sayings of his, which used to pass for "off-hand" in the House of Commons were, in fact, the result of previous reflection, which were afterward copied in his memorandum-book. Nearly all great writers have taken unimaginable care in preparation of their works. "Euripides wrote five lines," says Todd, "while a cotemporary wrote five hundred—but one wrote for immortality, the other for a day." We think it was Bembo, a Venetian poet, who used to keep forty portfolios on his table, through which each of his productions had to pass before they were considered ready for publication. Goldsmith wrote four lines of poetry per diem, and took seven years to compose his "Deserted Village." St. Pierre copied his "Paul and Virginia" nine times before he was satisfied with his style. Addison made alterations in his essays in each edition they passed through during his life.—Bolingbroke was equally particular with each of his sentences. It is foolish to suppose that great things can be accomplished in the world of intellect without a corresponding amount of labor, as is required to perform any great undertaking in the physical world. Industry, patience, and perseverance, are indispensable for the productions of genius. Without these no one can attain success.

Whig Caucus. The Whigs of Lowell met in large numbers at Jackson Hall last night, for the purpose of nominating a candidate for Mayor. The meeting was called to order by D. S. Richardson, Esq., Chairman of the Central Committee, and after some pertinent remarks, the meeting was organized by the choice of Dr. Ambrose Lawrence, Chairman, and H. G. Blaisdell, Secretary.

On motion—Voted, That a Committee of 24—4 from each Ward—be appointed to retire and nominate a candidate for Mayor, and recommend the course to be pursued by the several Wards in their nomination.

The Committee retired for a few moments, and returned into caucus, and reported the name of Sewall G. Mack to be nominated by acclamation as candidate for Mayor. Mr Mack was re-nominated by a loud acclamation. The Committee also recommended the several Wards to hold meetings as early as Thursday evening, to nominate each one Alderman, and report to the Central Committee; and that the Central Committee nominate two Aldermen at large.

On motion—Voted, That the several Wards be requested to appoint each six men to serve on the Central Committee for the ensuing year.

Ward meetings were notified for the several Wards to be held on Thursday evening at 7 1-2 o'clock.

On motion—Voted to adjourn.

A. LAWRENCE, *Chairman.*
H. G. Blaisdell, *Secretary.*

Foreign News. By the arrival of the Europa at New York, and of the Humboldt at Halifax, we have four days later news from Europe.—There is nothing new of any importance.

The Turks had re-crossed the Danube. They retired without a battle. Some grand movement is in contemplation, which the passage of the Danube has, in the meantime, served to mask.

France has formally announced to Austria that if she gives refuge to the armed Russians retreating from the Turks, France will regard it as a declaration of war.

It was said that the Russian troops had evacuated Lesser Wallachia.

Latest News from the Seat of War. Letters from Krajova state that the Russians had concentrated a large force of men there. Their outposts were close to Kalafat, where frequent skirmishes took place.

Ismael Pasha's head-quarters were at Kalafat, which Omar Pasha has taken, and been ordered to hold, if possible, and to abstain from further operations during the winter.

The Russians are reported to be marching upon Kalafat, with the view of attacking the Turks there. The latter were receiving strong reinforcements from Widdin, and an engagement was therefore expected.

The Turks were making considerable preparations to send succor to the Circassians.

A letter from St. Petersburg says that the Emperor of Russia is suffering from illness.

Death of the Queen of Portugal.—A telegraphic despatch via Paris announces that Donna Maria Second, de Gloria, Queen of Portugal, died on the 15th ult., at noon, in childbed.—The King was immediately declared Regent, until the majority of the Prince, according to the laws of that kingdom.

The Duke of Braganza, the eldest son and successor of the late Queen, is in his 17th year. Lisbon is quiet.

The Whig Caucus, last evening, was a rousing affair. Mayor Mack was re-nominated by acclamation. Measures were also taken for the nomination of candidates for the remaining offices in the city government. We have no space for comments to-day. No one can doubt that Mr Mack will be triumphantly re-elected. He is the favorite candidate of every interest in the city, except one—the rowdy interest, as embodied and represented by the *Herald.* The fact that Mayor Mack has incurred the displeasure of that class whose opinions are represented by that paper, is "confirmation strong as Holy Writ," that he is pre-eminently qualified for his post. Did the Herald support his claims, decent men might have doubts about voting for him. As it is, he is sure of a re-election by a large majority.

☞ It is well known that a bitter feud exists between Col. Benton and Senator Atchison, of Missouri. The latter, in a recent speech at Jefferson, Mo., closed by saying that if his friends thought fit to select, in his place, "a good State rights Whig," he would use his influence to effect his election, rather than Benton should succeed him. Atchison's term expires in 1855. Col. Benton is said, upon reading the report of this speech, to have declared Atchison to be badly frightened, and in his alarm to have gone over to the Whigs for help.

☞ A despatch from Halifax, states that the Humboldt is full of water, and will prove a total wreck. A portion of the cargo will be saved in a damaged state. The passengers are all safe, and are coming up to the city. She ran ashore on the 'Sisters,' about 12 miles from Halifax, near the mouth of the harbor.

Gone. The Commonwealth says that the result of the late election has infused new life into the Free Soil party. Well, there was enough for it, the old spirit having been knocked out most completely.

Cambridge. At the election on Monday, the vote stood 631 in favor to 99 against loaning the credit of the city to the Cambridge Water Company, to the extent of $60,000, for a term of twenty years. The amended city charter was accepted, 468 to 156.

President's Message.

Fellow citizens of the Senate, and of the House of Representatives:

The interest, with which the people of the Republic anticipate the assembling of Congress, and the fulfilment, on that occasion, of the duty imposed upon a new President, is one of the best evidences of their capacity to realize the hopes of the founders of a political system, at once complex and symmetrical. While the different branches of the government are, to a certain extent, independent of each other, the duties of all, alike, have direct reference to the source of power. Fortunately, under this system, no man is so high, and none so humble, in the scale of public station, as to escape from the scrutiny, or to be exempt from the responsibility, which all official functions imply.

Upon the justice and intelligence of the masses, in a government thus organized, is the sole reliance of the confederacy, and the only security for honest and earnest devotion to its interests, against the usurpations and encroachments of power on the one hand, and the assaults of personal ambition on the other.

The interest, of which I have spoken, is inseparable from an inquiring, self-governing community, but stimulated, doubtless, at the present time, by the unsettled condition of our relations with several foreign powers; by the new obligations resulting from a sudden extension of the field of enterprise; by the spirit with which that field has been entered, and the amazing energy with which its resources for meeting the demands of humanity have been developed.

Although disease, assuming at one time the characteristics of a wide-spread and devastating pestilence, has left its sad traces upon some portions of our country, we have still the most abundant cause for reverent thankfulness to God for an accumulation of signal mercies showered upon us as a nation. It is well that a consciousness of rapid advancement and increasing strength be habitually associated with an abiding sense of dependence upon Him who holds in His hands the destiny of men and of nations.

Recognizing the wisdom of the broad principle of absolute religious toleration proclaimed in our fundamental law, and rejoicing in the benign influence which it has exerted upon our social and political condition, I should shrink from a clear duty, did I fail to express my deepest conviction, that we can place no secure reliance upon any apparent progress, if it be not sustained by national integrity, resting upon the great truths affirmed and illustrated by divine revelation. In the midst of sorrow for the afflicted and suffering, it has been consoling to see how disaster made true neighbors of districts and cities separated widely from each other, and cheering to watch the strength of that common bond of brotherhood, which unites all hearts, in all parts of this Union, when danger threatens from abroad, or calamity impends over us at home.

Our diplomatic relations with foreign powers have undergone no essential change since the adjournment of the last Congress. With some of them, questions of a disturbing character are still pending, but there are good reasons to believe that these may all be amicably adjusted.

For some years past, Great Britain has so construed the first article of the Convention of the 20th of April, 1818, in regard to the fisheries on the northeastern coast, as to exclude our citizens from some of the fishing grounds, to which they freely resorted for nearly a quarter of a century subsequent to the date of that treaty. The United States have never acquiesced in this construction, but have always claimed for their fishermen all the rights which they had so long enjoyed without molestation. With a view to remove all difficulties on the subject, to extend the rights of our fishermen beyond the limits fixed by the convention of 1818, and to regulate trade between the U. S. and the British North American Provinces, a negotiation has been opened with a fair prospect of a favorable result.

To protect our fishermen in the enjoyment of their rights, and prevent collision between them and British fishermen, I deemed it expedient to station a naval force in that quarter during the fishing season.

Embarrassing questions have also arisen between the two governments in regard to Central America. Great Britain has proposed to settle them by an amicable arrangement, and our minister at London is instructed to enter into negotiations on that subject.

A commission for adjusting the claims of our citizens against Great Britain, and those of British subjects against the United States, organised under the convention of the 8th of February last, is now sitting in London for the transaction of business.

It is in many respects desirable that the boundary line between the United States and the British Provinces in the northwest, as designated in the convention of the 15th of June, 1847, and especially that part, which separates the Territory of Washington from the British possessions on the north, should be traced and marked. I therefore present the subject to your notice.

With France our relations continue on the most friendly footing. The extensive commerce between the United States and that country might, it is conceived, be released from some unnecessary restrictions to the mutual advantage of both parties. With a view to this object, some progress has been made in negotiating a treaty of commerce and navigation.

Independently of our valuable trade with Spain, we have important political relations with her, growing out of our neighborhood to the islands of Cuba and Porto Rico. I am happy to announce, that since the last Congress no attempts have been made, by unauthorized expeditions within the United States, against either of those colonies. Should any movement be manifested within our limits, all the means at my command will be vigorously exerted to repress it. Several annoying occurrences have taken place at Havana, or in the vicinity of the island of Cuba, between our citizens and the Spanish authorities. Considering the proximity of that island to our shores, lying, as it does, in the track of trade between some of our principal cities and the suspicious vigilance with which foreign intercourse, particularly, that with the United States, is there guarded a repetition of such occurrences may well be apprehended. As no diplomatic intercourse is allowed between our consul at Havana and the Captain General of Cuba, ready explanations cannot be made, or prompt redress afforded, where injury has resulted.

All complaint on the part of our citizens, under the present arrangement, must be, in the first place, presented to this government, and then referred to Spain. Spain again refers it to her local authorities in Cuba for investigation, and postpones an answer till she has heard from those authorities. To avoid these irritating and vexatious delays, a proposition has been made to provide for a direct appeal for redress to the Captain General by our consul, in behalf of our injured fellow-citizens. Hitherto, the government of Spain has declined to enter into any such arrangement. This course on her part is deeply regretted; for, without some arrangement of this kind, the good understanding between the two countries may be exposed to occasional interruption. Our minister at Madrid is instructed to renew the proposition, and to press it again upon the consideration of her Catholic Majesty's government.

For several years Spain has been calling the attention of this government to a claim for losses, by some of her subjects, in the case of the schooner Amistad. This claim is believed to rest on the obligations imposed by our existing treaty with that country. Its justice was admitted, in our diplomatic correspondence with the Spanish government, as early as March, 1847; and one of my predecessors, in his annual message of that year, recommended that provision should be made for its payment. In January last it was again submitted to Congress by the Executive. It has received a favorable consideration by committees of both branches, but as yet there has been no final action upon it. I conceive that good faith requires its prompt adjustment, and I present it to your early and favorable consideration.

Martin Koszta, a Hungarian by birth, came to this country in 1850, and declared his intention in due form of law, to become a citizen of the United States. After remaining here nearly two years, he visited Turkey.—While at Smyrna, he was forcibly seized, taken on board an Austrian brig of war, then lying in the harbor of that place, and there confined in irons, with the avowed design to take him into the dominions of Austria. Our consul at Smyrna and legation at Constantinople interposed for his release, but their efforts were ineffectual. While thus imprisoned, Commander Ingraham, with the United States sloop of war St. Louis, arrived at Smyrna, and, after inquiring into the circumstances of the case, came to the conclusion that Koszta was entitled to the protection of this government, and took energetic and prompt measures for his release. Under an arrangement between the agents of the United States and of Austria, he was transferred to the custody of the French consul-general at Smyrna, there to remain until he should be disposed of by the mutual agreement of the consuls of the respective governments at that place. Pursuant, however, to that agreement, he has been released, and is now on his way to the United States. The Emperor of Austria has made the conduct of our officers who took part in the transaction a subject of grave complaint. Regarding Koszta as still his subject, and claiming a right to seize him within the limits of the Turkish Empire, he has demanded of this government its consent to the surrender of the prisoner, a disavowal of the acts of its agents, and satisfaction for the alleged outrage.

After a careful consideration of the case, I came to the conclusion that Koszta was seized without legal authority at Smyrna; but he was wrongfully detained on board of the Austrian brig of war; that, at the time of his seizure he was clothed with nationality of the United States; and that the acts of our officers, under the circumstances of the case, were justifiable, and their conduct has been fully approved by me, and a compliance with the several demands of the Emperor of Austria has been declined.

For a more full account of this transaction and my views in regard to it, I refer to the correspondence between the charge d'affaires of Austria, and the Secretary of State, which is herewith transmitted. The principles and policy, therein maintained on the part of the United States, will, whenever a proper occasion occurs, be applied and enforced.

The condition of China, at this time, renders it probable that some important changes will occur in that vast empire, which will lead to a more unrestricted intercourse with it. The commissioner to that country, who has been recently appointed, is instructed to avail himself of all occasions to open and extend our commercial relations, not only with the empire of China, but with other Asiatic nations.

In 1852, an expedition was sent to Japan, under the command of Commodore Perry, for the purpose of opening commercial intercourse with that island. Intelligence has been received of his arrival there, and of his having made known to the Emperor of Japan the object of his visit; but it is not yet ascertained how far the Emperor will be disposed to abandon his restrictive policy, and open that populous country to a commercial intercourse with the United States.

It has been my earnest desire to maintain friendly intercourse with the governments upon this continent, and to aid them in preserving good understanding among themselves. With Mexico, a dispute has arisen as to the true boundary line between our territory of New Mexico and the Mexican State of Chihuahua.

A former commissioner of the United States, employed in running that line pursuant to the treaty of Guadalupe Hidalgo, made a serious mistake in determining the initial point on the Rio Grande; but, inasmuch as his decision was clearly a departure from the directions for tracing the boundary contained in that treaty, and was not concurred in by the surveyor appointed on the part of the United States, whose concurrence was necessary to give validity to that decision, this government is not concluded thereby; but that of Mexico takes a different view of the subject.

There are also other questions of considerable magnitude pending between the two republics. Our minister in Mexico has ample instructions to adjust them. Negotiations have been opened, but sufficient progress has not been made to enable me to speak of the probable result. Impressed with the importance of maintaining amicable relations with that republic, and of yielding with liberality to all her just claims, it is reasonable to expect that an arrangement mutually satisfactory to both countries may be concluded, and a lasting friendship between them confirmed and perpetuated.

Congress having provided for a full mission to the States of Central America, a minister was sent thither in July last. As yet, he has had time to visit only one of these States, (Nicaragua), where he was received in the most friendly manner. It is hoped that his presence and good offices will have a benign effect in composing the dissensions which prevail among them, and in establishing still more intimate and friendly relations between them respectively, and between each of them and the United States.

Considering the vast regions of this continent, and the number of States which would be made accessible by the free navigation of the river Amazon, particular attention has been given to this subject. Brazil, through whose territories it passes into the ocean, has hitherto persisted in a policy so restrictive, in regard to the use of this river, as to obstruct, and nearly exclude, foreign commercial intercourse with the States which lie upon its tributaries and upper branches.

Our minister to that country is instructed to obtain a relaxation of that policy, and to use his efforts to induce the Brazilian government to open to common use, under proper safeguards, this great natural highway for international trade. Several of the South American States are deeply interested in this attempt to secure the free navigation of the Amazon, and it is reasonable to expect their co-operation in the measure.

As the advantages of free commercial intercourse among nations are better understood, more liberal views are generally entertained as to the common rights of all to the free use of those means which nature has provided for international communication. To these more liberal and enlightened views, it is hoped that Brazil will conform her policy, and remove all unnecessary restrictions upon the free use of a river, which traverses so many States, and so large a part of the continent.

I am happy to inform you that the Republic of Paraguay and the Argentine Confederation have yielded to the liberal policy still resisted by Brazil, in regard to the navigable rivers within their respective territories.—Treaties embracing this subject among others have been negotiated with these governments, which will be submitted to the Senate at the present session.

A new branch of commerce, important to the agricultural interests of the United States, has, within a few years past, been opened with Peru. Notwithstanding the inexhaustible deposits of guano upon the islands of that country, considerable difficulties are experienced in obtaining the requisite supply. Measures have been taken to remove these difficulties, and to secure a more abundant importation of the article.

Unfortunately, there has been a serious collision between our citizens, who have resorted to the Chincha Islands for it, and the Peruvian authorities stationed there. Redress for the outrages committed by the latter, was promptly demanded by our minister at Lima. This subject is now under consideration, and there is reason to believe that Peru is disposed to offer adequate indemnity to the aggrieved parties.

We are thus not only at peace with all foreign countries, but, in regard to political affairs, are exempt from any cause of serious disquietude in our domestic relations.

The controversies, which have agitated the country heretofore, are passing away with the causes which produced them and the passions which they had awakened; or, if any traces of them remains, it may be reasonably hoped that it will only be perceived in the zealous rivalry of all good citizens to testify their respect for the rights of the State, their devotion to the Union, and their common determination that each one of the States, its institutions, its welfare, and its domestic peace shall be held alike secure under the sacred aegis of the constitution.

This new league of amity and of mutual confidence and support, into which the people of the republic have entered, happily affords inducements and opportunity for the adoption of a more comprehensive and unembarrassed line of policy and action, as to the great material interests of the country, whether regarded in themselves or in connexion with the powers of the civilized world.

The United States have continued gradually and steadily to expand, through acquisitions of territory, which, how much soever some of them may have been questioned, are now universally seen and admitted to have been wise in policy, just in character, and a great element in the advancement of our country, and with it, of the human race, in freedom, in prosperity, and in happiness. The thirteen States have grown to be thirty-one, with relations reaching to Europe on the one side, and on the other to the distant realms of Asia.

I am deeply sensible of the immense responsibility which the present magnitude of the republic, and the diversity and multiplicity of its interests, devolves upon me; the alleviation of which, so far as relates to the immediate conduct of the public business, is, first, in my reliance on the wisdom and patriotism of the two Houses of Congress; and, secondly, in the directions afforded me by the principles of public polity, affirmed by our fathers of the epoch of 1798, sanctioned by long experience, and consecrated anew by the overwhelming voice of the people of the United States.

Recurring to those principles, which constitute the organic basis of union, we perceive that, vast as are the functions and the duties of the federal government, vested in, or entrusted to, its three great departments, the legislative, executive and judicial, yet the substantive power, the popular force, and the large capacities for social and material development, exist in the respective States, which, all being of themselves well constituted republics, as they preceded, so they alone are capable of maintaining and perpetuating the American Union. The federal government has its appropriate line of action in the specific and limited powers conferred on it by the constitution, chiefly as to those things in which the States have a common interest in their relations to one another, and to foreign governments; while the great mass of interests which belongs to cultivated men, the ordinary business of life, the springs of industry, all the diversified personal and domestic affairs of society, rest securely upon the general reserved powers of the people of the several States. There is the effective democracy of the nation, and there the vital essence of its being and its greatness.

Of the practical consequences which flow from the nature of the federal government, the primary one is the duty of administering with integrity and fidelity the high trust reposed in it by the constitution, especially in the application of the public funds, as drawn by taxation from the people, and appropriated to specific objects by Congress. Happily I have no occasion to suggest any radical changes in the financial policy of the government.

Ours is almost, if not absolutely, the solitary power of Christendom having a surplus revenue, drawn immediately from imposts on commerce, and therefore measured by the spontaneous enterprise and national prosperity of the country, with such indirect relation to agriculture, manufactures and the products of the earth and sea, as to violate no constitutional doctrine, and yet vigorously promote the general welfare.

Neither as to the sources of the public treasure, nor as to the manner of keeping and managing it, does any grave controversy now prevail, there being a general acquiescence in the wisdom of the present system.

The report of the Secretary of the Treasury will exhibit, in detail, the state of the public finances, and the condition of the various branches of the public service administered by that department of the government.

The revenue of the country levied, almost insensibly to the tax-payer, goes on from year to year, increasing beyond either the interests or the prospective wants of the government.

At the close of the fiscal year, ending June 30, 1852, there remained in the treasury a balance of fourteen million six hundred and thirty-two thousand one hundred and thirty-six dollars. The public revenue for the fiscal year ending June 30, 1853, amounts to fifty-eight million nine hundred and thirty-one thousand eight hundred and sixty-five dollars from customs, and two million four hundred and five thousand seven hundred and eight dollars from public lands and other miscellaneous sources, amounting together to sixty-one million three hundred and thirty-seven thousand five hundred and seventy-four dollars, while the public expenditure for the same period, exclusive of payment on account of the public debt, amounted to forty-three million five hundred and fifty-four thousand two hundred and sixty-two dollars; leaving a balance of thirty-two million four hundred and twenty-five thousand four hundred and forty-seven dollars of receipts above expenditures.

This fact of increasing surplus in the treasury, became the subject of anxious consideration at a very early period of my administration, and the path of duty in regard to it seemed to me obvious and clear, namely: first, to apply the surplus revenue to the discharge of the public debt, so far as it could judiciously be done; and secondly, to devise means for the gradual reduction of the revenue to the standard of the public exigencies.

Of these objects, the first has been in the course of accomplishment, in a manner and to a degree highly satisfactory. The amount of the public debt, of all classes, was, on the 4th of March, 1853, sixty-nine million one hundred and ninety thousand and thirty-seven dollars; payment on account of which have been made, since that period, to the amount of twelve million seven hundred and three thousand three hundred and twenty-nine dollars, leaving unpaid, and in the continuous course of liquidation, the sum of fifty-six million four hundred and eighty-six thousand seven hundred and eight dollars.

These payments, although made at the market price of the respective classes of stocks, have been effected readily, and to the general advantage of the treasury, and have at the same time proved of signal utility in the relief they have incidentally afforded to the money market and to the industrial and commercial pursuits of the country.

The second of the above mentioned objects, that of the reduction of the tariff, is of great importance, and the plan suggested by the Secretary of the Treasury, which is to reduce the duties on certain articles, and to add to the free list many articles now taxed, and especially such as enter into manufactures, and are not largely, or at all produced in the country, is commended to your careful consideration.

You will find in the report of the Secretary of the Treasury, also abundant proof of the entire adequacy of the present fiscal system to meet all the requirements of the public service, and that, while properly administered, it operates to the advantage of the community in ordinary business relations.

I respectfully ask your attention to sundry suggestions of improvements in the settlement of accounts, especially as regards the large sums of outstanding arrears due to the government, and of other reforms in the administrative action of his department, which are indicated by the Secretary; as also to the progress made in the construction of marine hospitals, custom houses, and of a new mint in California and assay office in the city of New York, heretofore provided for by Congress; and also to the eminently successful progress of the Coast Survey, and of the Light House Board.

Among the objects meriting your attention will be important recommendations from the Secretaries of War and Navy. I am fully satisfied that the navy of the United States is not in a condition of strength and efficiency commensurate with the magnitude of our commercial and other interests; and commend to your special attention the suggestions on this subject, made by the Secretary of the Navy. I respectfully submit that the army, which, under our system, must always be regarded with the highest interest, as a nucleus around which the volunteer forces of the nation gather in the hour of danger, requires augmentation, or modification, to adapt it to the present extended limits and frontier relations of the country, and the condition of the Indian tribes in the interior of the continent; the necessity of which will appear in the communications of the Secretaries of War and the Interior.

In the administration of the Post Office Department for the fiscal year ending June 30, 1853, the gross expenditure was seven million nine hundred and eighty-two thousand seven hundred and fifty-six dollars; and the gross receipts, during the same period, five million nine hundred and forty-two thousand seven hundred and thirty-four dollars; showing that the current revenue failed to meet the current expenses of the department by the sum of two million forty-two thousand and thirty-two dollars. The causes which, under the present postal system and laws, led inevitably to this result, are fully explained by the report of the Postmaster General; one great cause being the enormous rates the department has been compelled to pay for mail services rendered by Rail-road companies.

The exhibit of the report of the Postmaster General of the income and expenditures by mail steamers, will be found peculiarly interesting, and of a character to demand the immediate action of congress.

Numerous and flagrant frauds upon the Pension Bureau have been brought to light within the last year, and in some instances merited punishments inflicted; but, unfortunately, in others, guilty parties have escaped, not through the want of sufficient evidence to warrant conviction, but in consequence of the provisions of limitation in the existing laws.

From the nature of these claims, the remoteness of the tribunals to pass upon them, and the mode in which the proof is, of necessity, furnished, temptations to crime have been greatly stimulated by the obvious difficulties of detection. The defects of the law upon this subject are so apparent, and so fatal to the ends of justice, that your early action relating to it is most desirable.

During the last fiscal year, nine million eight hundred and nineteen thousand four hundred and eleven acres of the public lands have been surveyed, and ten million three hundred and sixty-three thousand eight hundred and ninety-one acres brought into market.

Within the same period, the sales by public purchase and private entry amounted to one million eighty-three thousand four hundred and ninety-five acres; located under military bounty land warrants, six million one hundred and forty-two thousand three hundred and sixty acres located under other certificates, nine thousand four hundred and twenty-seven acres; ceded to the States as swamp lands, sixteen six hundred and eighty-four thousand two hundred and fifty-three acres; selected for railroad and other objects, under acts of Congress, one million four hundred and twenty-seven thousand four hundred and fifty-seven acres.

Total amount of lands disposed of within the fiscal year, twenty five million three hundred and forty-six thousand nine hundred and ninety-two acres; which is an increase in quantity sold, and located under land warrants and grants, of twelve million two hundred and thirty-one thousand eight hundred and thirteen acres over the fiscal year immediately preceding.

The quantity of land sold during the second and third quarters of 1852, was three hundred and thirty-four thousand four hundred and fifty-one acres. The amount received therefor, was six hundred and twenty-three thousand six hundred and eighty-seven dollars. The quantity sold the second and third quarters of the year 1853, was one million six hundred and nine thousand nine hundred and nineteen acres; and the amount received therefor, two million, two hundred and twenty-six thousand eight hundred and seventy-six dollars.

The quantity of land sold during the second and third quarters of 1852, was three hundred and thirty-four thousand four hundred and fifty-one acres. The amount received, therefore, was six hundred and twenty-three thousand six hundred and eighty-seven dollars.

The whole number of land warrants issued under existing laws, prior to the 30th of September last, was two hundred and sixty-six thousand and forty-two; of which there were outstanding of that date, sixty-six thousand nine hundred and forty-seven. The quantity of land required to satisfy these outstanding warrants, is four million seven hundred and seventy-eight thousand one hundred and twenty acres.

Warrants have been issued to 30th of September last, under the act of 11th February, 1847, calling for twelve million eight hundred and eighty acres; under acts of September 28, 1850, and March 22, 1852, calling for twelve million five hundred and five thousand three hundred and sixty acres; making a total of twenty-five million three hundred and eighty-four thousand six hundred and forty acres.

It is believed that experience has proved the wisdom and justice of the present system, with regard to the public domain, in most essential particulars.

You will perceive, from the report of Secretary of the Interior, that opinions, which have often been expressed in relation to the operation of the land system, as not being a source of revenue to the federal treasury, were erroneous. The net profits from the sale of public lands to June 30, 1853, amounted to the sum of fifty-three million two hundred and eighty-nine thousand four hundred and sixty-five dollars.

I recommend the extension of the land system over the territories of Utah and New Mexico, with such modifications as their peculiar laws may require.

Regarding our public domain as chiefly valuable to provide homes for the industrious and enterprising, I am not prepared to recommend any essential change in the land system, except by modifications in favor of the actual settler, and an extension of the pre-emption principle in certain cases, for reasons, and on grounds which will be fully developed in the reports to be laid before you.

Congress, representing the proprietors of the territorial domain, and charged especially with power to dispose of territory belonging to the United States, has, for a long course of years, beginning with the administration of Mr Jefferson, exercised the power to construct roads within the territories; and there are so many and so obvious distinctions between this exercise of power and that of making roads within the States, that the former has never been considered subject to such objections as apply to the latter, and such may now be considered the settled construction of the power of the federal government upon the subject.

Numerous applications have been, and no doubt will continue to be, made for grants of land in aid of the construction of railways. It is not believed to be within the intent and meaning of the Constitution, that the power to dispose of the public domain, should be used otherwise than might be expected from a prudent proprietor, and, therefore, that grants of land to aid in the construction of roads should be restricted to cases, where it would be for the interest of a proprietor, under like circumstances, thus to contribute to the construction of these works.

For the practical operation of such grants thus far, in advancing the interests of the States in which the works are located, and at the same time the substantial interests of all the other States, by enchanting the value and promoting the rapid sale of the public domain, I refer you to the report of the Secretary of the Interior. A careful examination, however, will show that this experience is the result of a just discrimination, and will be far from affording encouragement to a reckless or discriminate extension of the principle.

I commend to your favorable consideration the men of genius of our country, who, by their inventions and discoveries in Science and Art, have contributed largely to the improvements of the age, without, in many instances, securing for themselves anything like an adequate compensation. For many interesting details upon this subject I refer you to the appropriate reports, and especially urge upon your early attention the apparently slight, but really important modifications of existing laws therein suggested.

The liberal spirit which has so long marked the action of Congress in relation to the District of Columbia, will, I have no doubt, continue to be manifested.

The erection of an Asylum for the Insane of the District of Columbia, and of the army and navy of the United States, has been somewhat retarded, by the great demand for materials and labor during the past summer, but full preparation for the reception of patients before the return of another winter is anticipated; and there is the best reason to believe, from the plan and contemplated arrangements which have been devised with the large experience furnished within the last few years in relation to the nature and treatment of the disease, that it will prove an asylum indeed to this most helpless and afflicted class of sufferers, and stand as a noble monument of wisdom and mercy.

Under the acts of Congress of August 31, 1852, and of March 3, 1853, designed to secure for the cities of Washington and Georgetown an abundant supply of good and wholesome water, it became my duty to examine the report and plans of the engineer who had charge of the surveys under the act first named. The best, if not the only plan, calculated to secure permanently the object sought, was that which contemplates taking the water from the Great Falls of the Potomac, and consequently, I gave it my approval.

For the progress and present condition of this important work, and for its demands, so far as appropriations are concerned, I refer you to the report of the Secretary of War.

The present judicial system of the United States has now been in operation for so long a period of time, and has in its general theory and much of its details, become so familiar to the country, and acquired so entirely the public confidence, that, if modified in any respect, it should only be in those particulars, which may adapt it to the increased extent, population, and legal business of the United States. In this relation the organization of the courts is now confessedly inadequate to the duties to be performed by them; in consequence of which, the states of Florida, Wisconsin, Iowa, Texas and California, and districts of other States, are in effect excluded from the full benefits of the general system, by the functions of the circuit court being devolved on the district judges in all those States, or part of States.

The spirit of the Constitution with a due regard to justice requires that all the States of the Union should be placed on the same footing in regard to the judicial tribunals. I therefore commend to your consideration this important subject, which, in my judgment, demands the speedy action of Congress. I will present to you, if deemed advisable, a plan, which I am prepared to recommend, for the enlargement and modification of the present judicial system.

The Act of Congress establishing the Smithsonian Institution provided that the President of the United States, and other persons therein designated, should constitute an "establishment" by that name, and that the members should hold stated and special meetings for the supervision of the affairs of the Institution.

The organization not having taken place, it seemed to me proper that it should be effected without delay. This has been done; and an occasion was thereby presented for inspecting the condition of the Institution, and appreciating its successful progress thus far, and its high promise of great and general usefulness.

I have omitted to ask your favorable consideration for the estimates of works of a local character in twenty-seven of the thirty-one States, amounting to one million seven hundred and fifty-four thousand five hundred dollars, because, independently of the grounds which have so often been urged against the application of the federal revenue for works of this character, inequality with consequent injustice is inherent in the nature of the proposition, and because the plan has proved entirely inadequate to the accomplishment of the objects sought.

The subject of internal improvements, claiming alike the interest and good will of all, has, nevertheless, been the basis of much political discussion, and has stood as a deep graven line of division between statesmen of eminent ability and patriotism. The rule of strict construction of all powers delegated by the States to the general government has arrayed itself, from time to time, against the rapid progress of expenditures from the national treasury on works of a local character within the States.

Memorable as an epoch in the history of this subject, is the message of President Jackson, of the 27th of May, 1830, which met the system of internal improvement in its comparative infancy; but so rapid had been its growth, that the projected appropriations in that year, for works of this character had risen to the alarming amount of more than one hundred millions of dollars.

In that message the President admitted the difficulty of bringing back the operations of the government to the construction of the constitution set up in 1798, and marked it as an admonitory proof of the necessity of guarding that instrument with sleepless vigilance against the authority of precedents, which had not the sanction of its most plainly defined powers.

Our government exists under a written compact between sovereign States, uniting for specific objects, and with specific grants, to their general agent. If, then, in the progress of its administration, there have been departures from the terms and intent of the compact, it is, and will ever be, proper to refer back to the fixed standard which our fathers left us, and to make a stern effort to conform our action to it.

It would seem that that the fact of a principle having been resisted from the first by many of the wisest and most patriotic men of the republic, and a policy having provoked constant strife, without arriving at a conclusion which be regarded as satisfactory to its most earnest advocates, should suggest the inquiry whether there may not be a plan likelier to be crowned by happier results.

Without perceiving any sound distinction, or intending to assert any principle as opposed to improvements needed for the protection of internal commerce, which does not equally apply to improvements upon the seaboard for the protection of foreign commerce, I submit to you, whether is may not be safely anticipated that, if the policy were once settled against appropriations by the general government for local improvements for the benefit of commerce, localities requiring expenditures would not, by modes and means clearly legitimate and proper raise the fund necessary for such constructions as the safety or other interests of their commerce might require.

If that can be regarded as a system, which, in the experience of more than thirty years has at no time commanded the public judgment as to give it the character of a settled policy—which, though it has produced some works of conceded importance, has been attended with an expenditure, quite disproportionate to their value,—and has resulted in squandering large sums upon objects which have answered no valuable purpose—the interests of all the States require it to be abandoned, unless hopes may be indulged for the future find no warrant in their past.

With an anxious desire for the completion of the works which are regarded by all good citizens with sincere interest, I have deemed it my duty to ask at your hands a deliberate reconsideration of the question, with a hope that, animated by a desire to promote the permanent and substantial interests of the country, your wisdom may prove equal to the task of devising and maturing a plan which, applied to this subject, may promise something better than constant strife, the suspension of the powers of local enterprise, the exciting of vain hopes, and the disappointment of cherished expectations.

In expending the appropriations made by the last Congress, several cases have arisen in relation to the works for the improvement of harbors, which involves the right of soil and jurisdiction, and have threatened conflict between the authority of the State and General Governments. The right to construct a break-water, jetty or dam, would seem, necessarily, to carry with it the power to protect and preserve such constructions.

This can only be effectually done by having jurisdiction over the soil. But no clause of the constitution is found, on which to rest the claim of the United States to exercise jurisdiction over the soil of a State except that conferred by the eighth section of the first article of the constitution. It is, then, submitted, whether, in all cases where constructions are to be erected by the general government, the right of soil should not be obtained, and legislative provision be made to cover all such cases.

For the progress made in the construction of roads within the territories, as provided for in the appropriations of the last Congress, I refer to the report of the Secretary of War.

There is one subject of a domestic nature, which, from its intrinsic importance, and the many interesting questions of future policy which it involves, cannot fail to receive your early attention. I allude to the means of communication, by which different parts of the wide expanse of our country, are to be placed in closer connection for purposes both of defence and commercial intercourse, and more especially such as appertain to the communication of those great divisions of the Union, which lie on the opposite sides of the Rocky Mountains.

That the government has not been unmindful of this heretofore, is apparent from the aid it has afforded through the appropriations for mail facilities and other purposes. But the general subject will now present itself under aspects more imposing and more purely national, by reason of the surveys ordered, by Congress, and now in the process of completion, for communication by railway across the continent, and wholly within the limits of the United States.

The power to declare war, to raise and support armies, to provide and maintain a navy, and to call forth the militia to execute the laws, suppress insurrections, and repel invasions, was conferred upon Congress, as means to provide for the common defence, and to protect a territory and a population widespread and vastly multiplied. As incidental and indispensable for the exercise of this power, it must sometimes be necessary to construct military roads and protect harbors of refuge.

To appropriations by Congress for such objects, no sound objection can be raised.—Happily for our country, its peaceful policy and rapidly increasing population impose upon us no urgent necessity for preparation, and leave but few trackless deserts between assailable points and a patriotic people ever ready and generally able to protect them. These necessary links the enterprise and energy of our people are steadily and boldly struggling to supply. All experience affirms that, wherever private enterprise will avail, it is most wise for the general government to leave to that and individual watchfulness the location and execution of all means of communication.

The surveys before alluded to were designed to ascertain the most practicable and economical route for a railroad from the river Mississippi to the Pacific ocean. Parties are now in the field making explorations, where previous examinations had not supplied sufficient data, and where there was the best reason to hope the object might be found.

The means and time being both limited, it is not to be expected that all the accurate knowledge desired will be obtained, but it is hoped that much and important information will be added to the stock previously possessed, and that partial, if not full reports of the surveys ordered will be received in time for transmission to the two houses of Congress, on or before the first Monday in February next, as required by the act of appropriation.

The magnitude of the enterprise contemplated has aroused, and will doubtless continue to excite a very general interest throughout the country. In its commercial, and its military bearings, it has varied, great, and increasing claims to consideration. The heavy expense, the great delay, and at times fatality attending travel by either of the isthmus routes, have demonstrated the advantage, which would result from interterritorial communication by such safe and rapid means as a railroad would supply.

These difficulties, which have been encountered in a period of peace, would be magnified and still further increased in a time of war. But whilst the embarrassments already encountered, and others under new contingencies to be anticipated, may serve strikingly to exhibit the importance of such a work, neither these, nor all considerations combined, can have an appreciable value, when weighed against the obligation strictly to adhere to the constitution, and faithfully to execute the powers it confers.

Within this limit and to the extent of the interest of the government involved, it would seem both expedient and proper, if an economical and practicable route shall be found, to aid by all constitutional means, in the construction of a road, which will unite, by speedy transit, the populations of the Pacific and Atlantic States.

To guard against misconception, it should be remarked that, although the power to construct, or aid in the construction, of a road within the limits of a territory is not embarrassed by that question of jurisdiction which would arise within the limits of a State. It is, nevertheless, held to be a doubtful power, and more than doubtful propriety, even within the limits of a territory, for the general government to undertake to administer the affairs of a railroad, a canal, or other similar construction, and therefore that its connexion with a work of this character should be incidental rather than primary.

I will only add, at present, that, fully appreciating the magnitude of the subject, and solicitous that the Atlantic and Pacific shores of this Republic may be bound together by inseparably ties of common interest, as well as of common fealty and attachment to the Union, I shall be disposed, so far as my own action is concerned to follow the lights of the constitution, as expounded and illustrated by those, whose opinions and expositions constitute the standard of my political faith in regard to the powers of the federal government. It is, I trust, not necessary to say, that no grandeur of enterprise and no present urgent inducement promising popular favor, will lead me to disregard those lights, or to depart from that path which experience has proved to be safe, and which is now radiant with the glow of prosperity and legitimate constitutional progress. We can afford to wait, but we cannot afford to overlook the ark of our security.

It is no part of my purpose to give prominence to any subject, which may properly be regarded as set at rest by the deliberate judgment of the people. But while the present is bright with promise, and the future full of demand and inducement for the exercise of active intelligence, the past can never be without useful lessons of admonition and instruction. If its dangers serve not as beacons, they will evidently fail to fulfill the object of a wise design. When the grave shall have closed over all who are now endeavoring to meet the obligations of duty, the year 1850 will be recurred to as a period filled with anxious apprehension. A successful war had just terminated. Peace brought with it a vast augmentation of territory. Disturbing questions arose, bearing upon the domestic institutions of one portion of the confederacy, and involving the constitutional rights of the States.

But notwithstanding differences of opinion and sentiment, which then existed in relation to details and specific provisions, the acquiescence of distinguished citizens whose devotion to the Union can never be doubted, has given renewed vigor to our institutions, and restored a sense of repose and security to the public mind throughout the confederacy.—That this repose is to suffer no shock during my official term, if I have power to avert it, those who placed me here may be assured.

The wisdom of men who knew what independence cost—who had put all at stake upon the issue of the revolutionary struggle—disposed of the subject to which I refer, in the only way consistent with the union of these States, and with the march of power and prosperity which has made us what we are.

It is a significant fact, that from the adoption of the Constitution until the officers and soldiers of the revolution had passed to their graves, or, through the infirmities of age and wounds, had ceased to participate actively in public affairs, there was not merely a quiet acquiescence in, but a prompt vindication of the constitutional rights of the States. The reserved powers were scrupulously respected. No statesman put forth the narrow views of casuists to justify interference and agitation; but the spirit of the compact was regarded as sacred in the eye of honor, and indispensable for the great experiment of civil liberty, which, environed by inherent difficulties, was yet borne forward in apparent weakness by a power superior to all obstacles.

There is no condemnation, which the voice of freedom will not pronounce upon us, should we prove faithless to this great trust.

While men inhabiting different parts of this vast continent can no more be expected to hold the same opinions, or entertain the same sentiments, than every variety of climate or soil can be expected to furnish the same agricultural products, they can unite in a common object and sustain common principles essential to the maintenance of that object. The gallant men of the south and the north could stand together during the struggle of the Revolution; they could stand together in the more trying period which succeeded the clangor of arms. As their united valor was adequate to all the trials of the camp and dangers of the field, so their united wisdom proved equal to the great task of founding, upon a deep and broad basis, institutions which it has been our privilege to enjoy, and will ever be our most sacred duty to sustain. It is but the feeble expression of a faith strong and universal, to say that their sons, whose blood mingled so often upon the same field, during the war of 1812, and who have more recently borne in triumph the flag of the country upon a foreign soil, will never permit alienation of feeling to weaken the power of their united efforts, nor internal dissensions to paralyze the great arm of freedom, uplifted for the vindication of self government.

I have thus briefly presented such suggestions as seem to me especially worthy of your consideration. In providing for the present, you can hardly fail to avail yourselves of the light which the experience of the past casts upon the future.

The growth of our population has now brought us, in the destined career of our national history, to a point at which it well behooves us to expand our vision over the vast prospective.

The successive decennial returns of the census since the adoption of the constitution have revealed a law of steady progressive development, which may be stated, in general terms, as a duplication every quarter-century. Carried forward, from the point already reached, for only a short period of time as applicable to the existence of a nation, this law of progress, if unchecked, will bring us to almost incredible results.

A large allowance for a diminished proportional effect of emigration would not very materially reduce the estimate, while the increased average duration of human life, known to have already resulted from the scientific and hygienic improvements of the past fifty years, will tend to keep up through the next fifty, or perhaps hundred, the same ratio of growth, which has been thus revealed in our past progress; and to the influence of these causes may be added the influx of laboring masses from Eastern Asia to the Pacific side of our possessions, together with the probable accession of the populations already existing in other parts of our hemisphere, which, within the period in question, will feel, with yearly increasing force, the natural attraction of so vast, powerful, and prosperous a confederation of self governing republics, and will seek the privilege of being admitted within its safe and happy bosom, transferring with themselves, by a peaceful and healthy process of incorporation, spacious regions of virgin and exuberant soil, which are destined to swarm with vast-growing and vast-spreading millions of our race.

It is evident that a confederation so vast and so varied both in numbers and in territorial extent, in habits and in interests, could only be kept in national cohesion by the strictest fidelity to the principles of the Constitution, as understood by those who have adhered to the most restricted construction of the powers granted by the people and the States. Interpreted and applied according to those principles, the great compact adapts itself with healthy ease and freedom to an unlimited extension of that benign system of federative self government of which it is our glorious, and, I trust, immortal charter.—Let us, then, with redoubled vigilance be on our guard against yielding to the temptation of the exercise of doubtful powers, even under the pressure of the motives of conceded temporary advantage and apparent temporary expediency.

The minimum of federal government, compatible with the maintenance of national unity and efficient action in our relations with the rest of the world, should afford the rule and measure of construction of our powers under the general clauses of the Constitution. A spirit of strict deference to the sovereign rights and dignity of every State, rather than a disposition to subordinate the States into a provincial relation to the central authority should characterise all our exercise of the respective powers temporarily vested in us as a sacred trust from the generous confidence of our constituents.

These considerations seem fully to justify the presumption that the law of population above stated will continue to act with undiminished effect, through at least the next half century; and that thousands of persons who have already arrived at maturity, and are now exercising the rights of freemen, will close their eyes on the spectacle of more than one hundred million of population embraced within the majestic proportions of the American Union. It is not merely as an interesting topic of speculation that I present these views for your consideration. They have important practical bearings upon all the political duties we are called upon to perform. Heretofore, our system of government has worked on what may be termed a miniature scale, in comparison with the development, which it must thus assume, with a future so near at hand, as scarcely to be beyond the present of the existing generation.

In like manner, as a manifestly indispensable condition of the perpetuation of the Union, and of the realization of that magnificent national future adverted to, does the duty become yearly stronger and clearer upon us, as citizens of the several States, to cultivate a fraternal and affectionate spirit, language, and conduct in regard to other States, and in relation to the varied interests, institutions, and habits of sentiment and opinion, which may respectively characterize them.—Mutual forbearance, respect, and non-interference in our personal action, as citizens, and enlarged exercise of the most liberal principles of comity in the public dealings of State with State, whether in legislation or in the execution of laws, are the means to perpetuate that confidence and fraternity, the decay of which a mere political union, on so vast a scale, could not long survive.

In still another point of view, is an important practical duty suggested by this consideration of the magnitude of dimensions to which our political system with its corresponding machinery of government, is rapidly expanding. With increased vigilance does it require us to cultivate the cardinal virtues of public frugality and official integrity and purity. Public affairs ought to be so conducted that a settled conviction shall pervade the entire Union, that nothing short of the highest tone and standard of public morality marks every part of the administration and legislation of the general government. Thus will the federal system, whatever expansion time and progress may give it, continue more and more deeply rooted in the love and confidence of the people.

That wise economy, which is far removed from parsimony as from corrupt and corrupting extravagance,—that single regard for the public good, which will frown upon all attempts to approach the treasury with insidious projects of private interest cloaked under public pretexts,—that sound fiscal administration, which, in the legislative department, guards against the dangerous temptations incident to overflowing revenue, and the tendency of all national expenditure to extravagance,—while they are admitted elementary political duties, may, I trust, be admitted as properly adverted to and urged, in view of the more impressive sense of that necessity, which is directly suggested by the considerations now presented.

Since the adjournment of Congress, the Vice President of the United States has passed from the scene of earth, without having entered upon the duties of the station to which he had been called by the voice of his countrymen. Having occupied, almost continuously, for more than thirty years, a seat in one or the other of the two Houses of Congress and having, by his singular purity and wisdom, secured unbounded confidence and universal respect, his failing health was watched by the nation with painful solicitude. His loss to the country, under all the circumstances, has been justly regarded as irreparable.

In compliance with the act of Congress of March 2nd, 1853, the oath of office was administered to him on the 24th of that month at Ariadne Estate, near Matanzas, in the island of Cuba; but his strength gradually declined, and was hardly sufficient to enable him to return to his home in Alabama, where on the 18th day of April, in the most calm and peaceful way, his long and eminently useful career was terminated.

Entertaining unlimited confidence in your intelligent and patriotic devotion to the public interest, and being conscious of no motives on my part which are not inseparable from the honor and advancement of my country, I hope it may be my privilege to deserve and secure, not only your cordial co-operation in great public measures, but also those relations of mutual confidence and regard, which it is always so desirable to cultivate between members of co-ordinate branches of the government.

Daily Journal & Courier.

Lowell, Thursday, December 4, 1856

New Paper.

The publisher of Lowell are in want their notice that the Daily Journal and our weekly issue of Wednesday next the paper; and as our present office is too small for the advantageous publication of a paper of the size and character of the one we propose to issue, we have decided to remove to more commodious quarters. As a private citizen, he is universally esteemed, and no word of evil report has ever been spoken against him in his public capacity.

He thinks that the new Aldermen men, and the Council two years—the Aldermen men, and Council one. In all these places he has ever been true to the interests of the city, and faithful to the duties assigned him. He is not one of those men who accept office for more show, but one who feels that when his citizens elect him to a responsible position, he is bound to attend to the duties of the place with all his strength. No Mayor, since the first organization of the city government, has devoted as much time to the office as Mayor Mack. He has applied his whole attention to the duties of his office, and to the entire exclusion of his private affairs. Early and late, Mr. Mack has labored for the city, looking after its benefits in all its branches so far as he had any control, and if anything has been neglected it cannot be laid to the Mayor. Within the legitimate duties of his office, no subject has been brought to his notice that he has not promptly and carefully investigated, and no citizen has called upon him on any matter that he has not attended to. And in every respect we believe that Mr. Mack has taken as much interest in, and been as careful of, the business of the city as if it had been his own.

We believe too that he has given almost universal satisfaction. During the whole year we have heard positively a word of fault-finding with his course; and the Lowell Advertiser, in a very fair article on the subject says, that "there never have been a Whig, they prefer Mayor Mack to any other man." For a year to elapse without any great amount of noise and fault-finding against the Mayor, and for the Advertiser to approve his course when an opponent, certainly argues strongly in favor of his administration. We believe the citizens, without distinction of party, will vote for Mayor Mack, and that he will be re-elected and prove an excellent Mayor another year.

CONGRESSIONAL. In the Senate on Tuesday, a bill was introduced granting to the State of Illinois the alternate sections on the Illinois river in the valley of the Sacramento, to the boundary of Oregon—Gov. Gardner to Olds all the lands. The remaining unsold in that State,—granting lands to Mississippi to aid in the construction of Railroads; and also a bill to reduce and graduate the price of public lands.

After the Message was read, the usual number of it and the accompanying documents were ordered to be printed, and also 10,000 additional copies.

Mr Clayton offered the following resolution:

Resolved, That the President be respectfully requested to recommend to the next Congress to be proposed to in his Message to Congress this day, and which he is prepared to recommend to the enlargement and modification of the present judicial system of the United States. Laid over.

In the House, on Tuesday, on motion of Mr Richardson, it was resolved that the Speaker be authorized to appoint a committee of seven to wait upon the President elect, and inform him that a quorum of the House had been re-assembled, it is the pleasure to meet a part at his administration of the next session of Congress. Also, that the Speaker appoint a committee of seven to wait upon the President and inform him that a quorum of the House had been re-assembled, and is ready to receive any communication he may have to make.

Mr Black is a well known business man of high moral character; liberal in his views, industrious in his habits, charitable in his feelings and conduct, and one who is a private citizen, he is universally esteemed, and no word of evil report has ever been spoken against him in his public capacity.

Various petitions were presented and notices given of bills to be introduced, among which was one of a Chaplain. Mr Mike Walsh voted for the Chaplain. Mr Benjamin, of Louisiana, moved that Mayor has been re-nominated, it is a matter of no consequence to us, but as our readers may feel an interest in the administration of the city, we have thought it proper to give the following list of the officers elected:

CITY RATTERS.

WHOSE OF WARD ONE,
WHOSE OF WARD TWO,
WHOSE OF WARD THREE,
WHOSE OF WARD FOUR,
WHOSE OF WARD FIVE,
WHOSE OF WARD SIX.

You are requested to meet in your several Ward Rooms, on THURSDAY EVENING, Dec. 4, at 7 o'clock, for the purpose of electing a Mayor and Aldermen, for the ensuing year.

Per order.

Dec. 3. L. W. JAQUITH, Secretary.

WARD GAUCHES TO-NIGHT. We hope there will be a *full attendance* of the Whigs of Lowell at their Ward Caucuses to-night. By paying a proper attention to them in nominating candidates of good and satisfactory nominations will be returned—and we can, triumphantly elect them—every Whig, then, to the caucuses to-night.

LOWELL MATTERS. We have hitherto said little touching the municipal election, which takes place on Monday next. Our reason for this course is, that we have been desirous from the first that the present board of city officers would satisfactorily be re-elected. This, we believe, is the settled conviction and intention of three-fourths of our citizens. This, too, is the sentiment of the press. The News—the leading penny paper in this vicinity—has expressed its preference for Mayor Mack, as its candidate for Mayor, in view of his eminent fitness for that office. Vox Populi has been very sensitive of late to "the grievance of Hollow Hydrants," and speaks favorably of Mayor Mack. The Advertiser has also a preference for Mr Mack above all other whigs. Only the puny Herald, and the "non-indents" which it represents, oppose Mayor Mack. Why? we have before observed, this opposition, from a source so insignificant, we will not be said that very and which is at least, to restrain. We commend the communication headed "Our Mayor," in another column, to the attention of all our readers.

Parson Brownlow says he "votes for whigs when believed to be better taxpayers than loafers and sorry scamps." Ohio! but then he takes good care never to "believe" in a whig. Witness the last trial for Representatives, Governor, Brewster spurned the temperance nominations, and voted the entire ticket—Dawes Melvin, John Green, W. L. Andrews, Holland Brewster and Company!

POLICE COURT, Dec. 3. James McMannon, an old offender, had each had manners, that he struck one of his fellow old manners, he struck one Thos. B. Crage, and the Court, to improve Mr. Manners' manners, fined him $5 and costs. Patrick Mahaney, for drunkenness, was fined $2 and costs—committed to House of Correction in Cambridge.

SUNDAY SCHOOL. At the earnest solicitation of very many of Mr Willey's pupils—who are desirous of attending the popular lectures on Wednesday evening—no lesson will be given on that evening. The class will meet Monday evening and Saturday.

A *Sunday School* will be opened in the rooms of the Free Chapel on Wednesday afternoon at 2 o'clock—to be continued on Wednesday afternoons, through the winter. Its doors are open to all children and grown persons in the city, who need instruction in common and

Mr. KNOX'S LECTURE, last evening, afforded a rare treat to an unusually large audience. Many of our audience, in which the "fair" element largely preponderated. We were sorry to see Hon. (?) Edward Timothy falling in his promise, made one week previous, to bring in his lecture "at precisely a quarter before eight." This lecture of a committee, added to the inconsiderate coldness of the temperature of the Hall, furnished the theme of considerable comment from many of the audience; especially, from some of those "fair" friends, who generously accorded to the support of Lectures—But since we have Timothy's word, that he will attend to this matter, we trust the source of complaint will be (in legal parlance) "closed."

An eminent critic divided public addresses into three kinds—the entertaining, the instructive, and the argumentative. Adopting this classification, we must place the lecture of Mr King in the first or lowest class. It was most decidedly amusing—the hearers were kept on the "titter" more than a full fourth of the time. There was nothing of an instructive, and still less; anything of an argumentative, character to it.

The title of the lecturer was, that all the events in nature, in society, and the institutional constitution itself, are under the control of a beneficent defender and intelligible law. This, in its broadest sense, was the theme of the lecture; all the way was set in illustration, amplification, or repetition. To subject such a production to the test of rigid or scholastic criticism, as to its logical accuracy, would be a most unfair performance of Mr King, (and in a most masterly, though discourteous way,) would be palpable injustice to the lecturer and such a test. The lecturer is a genius—a genius of a very peculiar, and, it may be, inferior order—but we insist upon this, that he has his own laws, and that it is unfair to subject it to any laws foreign to itself.

The thesis, above stated, was very felicitously illustrated, by references to facts in astronomical physical science, in society and its various relations, in the history of nations, and especially with references to the laws which regulate the properties of the atom, to such laws as govern the vegetable kingdom up to the highest form, which regulate the development and growth of genius.

Perhaps the greatest defect of all his illustrations was, that they were too numerous. In the variety of the, we candidly confess, were extremely—that "—were the following—It was a most interesting and the excellent lecture, that, for every one hundred females, one hundred and one males were born. This has attracted the attention of men in various ways. Some (such as the old Scots,) have supposed in the wisdom of Providence, the risk of the life of females for this disparity, the risk of the life of males in battle, &c. Others have suggested that this supplies the deficiency in females, caused by the celibacy of the Catholic Priesthood. (Here a hit—excited great laughter.) And an old lady suggested to the lecturer, that the total loss by the war with Mexico, would amount even to "as good any day" as one hundred and six men!!! Many other illustrations and facts were offered to him, having reference to the connection with the sun, and to the fixed stars, which, if we remember right, fixed the time of the birth of Adam, at "one hundred and two years" after the "time" we do not remember. Many other curious facts were given, which we have not space to notice.

LAFAYETTE. The municipal election in this city took place on Monday last. There were no tickets in the field, and the contest was between the Democratic and Whig parties. The Democrats elected their candidate for Mayor by 1,200 majority.

TEN YEAR OR HOLDER RESOLVED.” The two terms mentioned in our caption, are the remedy of a grievance which has long been felt in this city, in the management of our by-laws. It is well known, that the present system operates as a trifling expense; and, being altogether in the hands of the Board of Aldermen and they Boards of Common Council, our citizens have no direct control over their own affairs. Our Government did its duty in giving into the hands of the people the power of an independency to the Board of Aldermen, and we presume this Congress will not. Two terms in any office is sufficient for any man, and we presume this Congress will not. Two terms in any office is sufficient for any man, and we presume this Congress will not. Two terms in any office is sufficient for any man, and we presume this Congress will not.

Democracy.—A New York despatch of yesterday says—The extraordinary conspiracy now brought by John R. Stuyvesant against his brother Peter, and his wife, for the purpose of taking away not his wife, for she never had it, but a house and lot, came up in Court this morning, but after some time, Intelligencer was dismissed in that Mr Stuyvesant had discovered sufficient of Astorite choices. It is said, however, that he committed suicide.

The Lexington ferry boat Monongo was destroyed by fire this morning, at the Brooklyn side of the river. She cost $28,000, and was insured for $20,000.

A despatch from Lockport, N. Y., says—Rev. Alexander Wilson is officially home on a visit to his family, and hopes are entertained of his recovery.

A Syracuse despatch of yesterday says—Ice has formed in the canal basin this morning, for the first time this season.

The Chronicle, a free soil paper, has ceased to exist.

A Buffalo despatch of yesterday says—The Steamer Niagara is clear and frosty, and ice is making fast. Navigation, at present, is unobstructed.

An Erie despatch of Thursday says—Last night the public meeting at Harbor Creek, east of Erie, resolved to remove the track from the highways, and about one-half will be moved immediately by 8 o'clock to-day. The Railroad company are confident of their rights, and it is understood that the Government will take immediate measures to protect the road.

The riotous, this morning, entered the House telegraph office in this city, and threatened the operator with personal violence, and the dissolution of the office, for sending accounts of their proceedings to the press.

A Baltimore despatch of yesterday says—The Baltimore and Ohio Railroad company have resolved to accept the settlement giving the city endowment for five million dollars loan. They objected to the provision restraining through trade.

A Nashville despatch of yesterday says—The steamer Mary McKinzie, from the Kentucky to Chattanoga, was finally lost on Saturday last, with the most of her large freight. The passengers were all saved.

CUTLERIA.—The neglect of the proper official to supply this city with copies of the President's Message, so that our printers might have to put into their hands for publication Monday, is not only upon the arrival of intelligence of the commencement of its reading at Washington, on Monday, is the other citizen, a wanton and unnecessary one, and the most culpable description. The Providence (R. I.) Journal of Friday has complains of a similar neglect of that city, also, and adds:

But the most singular thing in relation to the transmission of the message was that it was received by the office at Boston. Post in five minutes after the copies were delivered to the editors, whereas that the paper, for the use of the sites of all others, had received a copy in advance. What the reason was for such a preference we leave the Boston Daily Advertiser to determine. It is certainly not creditable; nay, on the bill on which the message was based, as Colonel Hamilton Fish, the United States, is an any other suitable paper; as this, we should like to know the reason of our own and, and remembrances by the clerks of any Company or Company's agent in the Boston.

To this answer we think there can be no reasonable objection. A wheel of ample capacity for the purpose might be got up in a few days, and the expense of it nothing extreme; and, being altogether at the disposal of the Directors of our own, our communications would be promptly and certainly executed. We see in this reference to any that has been passed at the present session to their charter, by way of the adjacent ponds; especially since, in the language of the Committee on the part of the Merrimack River may be so diminished the supply of water, as to render it doubtful if it will be found the most feasible.” We are now paying $7.00 per annum for our supply of water. There are $10,000 invested in it, upon which we pay 7 per cent, the interest of any kind. By procuring the right to put in power at Pawtucket Falls, we can procure a sufficient supply for all contingencies of consumption, and more than double the quantity of our streets to sprinkle, and still, instead of paying $7.00 per annum for our supply, dividends for those own expenses now.

The Legislature of Connecticut, in framing the Legislature for the aforesaid right to put in power fell, that they have not the power to levy the Locks and Canals Company—[for we understand that the Locks and Canal Company have the right—and of which they have availed themselves—to put in power at Pawtucket Falls]—to be used for the purpose of locating such a supply of the waters of the Connecticut river, as may be reasonably necessary for the city of Hartford, and that the Locks and Canals Company shall be bound to furnish the same, and that, in case of refusal by the Locks and Canals Company, the Legislature shall have the power to levy the same

THE ROAD TO HEALTH!

HOLLOWAY'S PILLS. CURE OF A DISORDERED LIVER AND BAD DIGESTION. Copy of a Letter from Mr R. W. Kirkus, Chemist, 7, Prescot Street, Liverpool, dated 6th June, 1851. To Professor Holloway, Sir,—Your Pills and Ointment have stood the highest on our sale list of Proprietary Medicines for some years. A customer, to whom I can refer for any enquiries, desires me to let you know the particulars of her case. She had been troubled for years with a disordered liver, and bad digestion. On the last occasion, however, the virulence of the attack was so alarming, and the inflammation set in so severely, that doubts were entertained of her not being able to bear up under it; fortunately she was induced to try your Pills, and she informs me that after the first, and each succeeding dose, she had great relief. She continued to take them, and although she used only three boxes, she is now in the enjoyment of perfect health. I could have sent you many more cases, but the above, from the severity of the attack, and the speedy cure, I think, speaks much in favor of your astonishing Pills. (Signed) R. W. KIRKUS.

AN EXTRAORDINARY CURE OF RHEUMATIC FEVER, IN VAN DIEMEN'S LAND. Copy of a Letter inserted in the Hobart Town Courier, of the 1st March, 1851, by Major J. Walch. Margaret M'Connigan, nineteen years of age, residing at New Town, had been suffering from a violent rheumatic fever for upwards of two months, which had entirely deprived her of the use of her limbs; during this period she was under the care of the most eminent medical men in Hobart Town, and by them her case was considered hopeless. A friend prevailed upon her to try Holloway's celebrated Pills, which she consented to do, and in an incredible short space of time they effected a perfect cure.

CURE OF A PAIN AND TIGHTNESS IN THE CHEST AND STOMACH OF A PERSON 84 YEARS OF AGE. From Messrs Thew & Son, Proprietors of the Lynn Advertiser, who can vouch for the following statement. August 2nd, 1851. To Professor Holloway, Sir,—I desire to bear testimony to the good effects of Holloway's Pills. For some years I suffered severely from a pain and tightness in the stomach which was also accompanied by a shortness of breath, that prevented me from walking about. I am 84 years of age, and notwithstanding my advanced state of life, these Pills have so relieved me, that I am desirous that others should be made acquainted with their virtues. I am now rendered, by their means, comparatively active, and can take exercise without inconvenience or pain, which I could not do before. (Signed) HENRY COE, North Street, Lynn, Norfolk.

These celebrated Pills are wonderfully efficacious in the following complaints. [illegible] Sold at the Establishment of Professor Holloway, 244, Strand, (near Temple Bar, London), and by all respectable Druggists and Dealers in Medicines throughout the British Empire, and of those of the United States, in boxes at 37½c., 87c., and $1.50c. each. Wholesale by the principal Drug houses in the Union, and by Messrs A. B. & D. Sands, New York. Ransom & Co., Boston, and S. KIDDER, Jr., Lowell. There is a considerable saving by taking the larger sizes. N. B.—Directions for the guidance of patients in every disorder are affixed to each Box. Dec 20, 1852.

Carlyle's first appearance before the public was as an author, in the form of a translation from the German. "Wilhelm Meister's Apprenticeship," as also specimens of other German novelists and romancers. [illegible]

"The temper," says Goethe, "in which Carlyle works, is always admirable. What an earnest man he is, and how he has studied our Germans! He is almost more at home in our literature than ourselves!" [illegible]

When it is remembered that the Germans are far before other nations in liberal, truly philosophic criticism, in depth and purity of learning, and more especially, in the knowledge and just appreciation of foreign literature—and when to this it is added that Goethe himself [illegible]

CITY MATTERS.

Democratic Nominations. We are requested to state that the Democratic caucuses held in the several wards in Lowell, to nominate candidates for the various offices to be filled at the coming election, were harmonious and spirited throughout, and that the ticket nominated by the caucus of each ward was the result of a fair and honorable contest.

The Facts in the Case. Certain unscrupulous politicians are trying to make political capital against Mayor Mack's re-election, by alledging that he gave fifty dollars towards the building of the Catholic school in Lowell. Mr Mack is undoubtedly a generous man, but in this case they attribute to him what he never did. The facts of the case are simply these: When the Catholic school on Adams street was built, Gushing & Mack were employed to put up the building the framing apparatus, and entered into a contract to do the building was first planned. When the building was ready, they put in the apparatus and did the work; and having done much more than was included in the original contract, they left us over $200 more than was expected. Their employees were somewhat disappointed, and thought a testimonial ought to be made; whereupon Messrs Gushing & Mack, rather than have any trouble in settling the bill, and in order to have their customers satisfied, deducted fifty dollars from the bill, and thus the matter was settled as we reagard. What blame is there to Mr Mack in such a fair and honorable transaction?

Sylvester Ballou. We are informed that numerous tickets are already in preparation for several offices in the city. Beware of all such. A cunning supply of regular Whig tickets will be ready for use on Monday; and no man whose eyes is in his head need be imposed upon either by open enemies or by secret traitors.

Accidented. In an article a day or two since, we alluded to Mr William Livingston as one of the mostdespicable cubs who conduct the Herald, or, as the Mayor pronounces it, the "Hell Hound." We learn since, that Mr L. has never had any connection with that disreputable establishment. Believing that a charge of so gross an offence against decency demands retraction, we have endeavored this, the earliest possible opportunity, to retract all that we have said hereupon. We regret that we were accidentally imposed upon by some of Mr L.'s enemies to believe him capable of consenting himself to any way with a paper which all decent and Christian men regard as a pest and a nuisance to the city.

Hon. Ensign Wardner's Speech. In his address at the Whig Celebration in Worcester on Wednesday evening last, as reported in the Transcript of that City, Hon. Ensign Wardner says of the present Governor, etc.

That he didn't wish to come here in any official relation, or as one of the officers of the State Government, to solicit office or claim or hope of office. He wanted to stand here as a free man sharing the sorrows and joys of the fighting democracy—to speak as a citizen to his fellow-voters. It was in that relation that he came to Worcester on the 4th of July last, and he was glad he wished here only to be known as a Worcester citizen.

He attended weekly and daily for months at the State House, and was visited by the first men of other parties in the State, who came to him to ask him to withdraw his name, for the danger which threatened the State was so great that they saw no way of such a triumph, the people of Massachusetts had a right to rejoice, let us hope that the same prudence, diligence and general capacity, which has characterized the administration of the State Government, will be continued in the future. Let us therefore, one and all, forget all personal animosity, which has characterized the election for the past few days, and

which proving very happy, it became the custom to invoke the muse of Hymen at all nuptials.

Daily Journal & Courier.

Lowell, Monday, December 12, 1853.

The Boston Times' strictures on the Courier's article touching the President's Message.

Our strictures on the first annual message of the present Executive, were intended to be slightly severe. A less able and manly message had never been communicated to the Houses of Congress. We gave the President full credit for whatever of fairness, explicitness or courage he there exhibited; but in all his message could find little to approve. The cynical private editor of the Boston Daily Times, seemed to regard our strictures as furnishing too favorable an opportunity for the display of his critical tendencies to be passed unimproved. He quotes us correctly, as remarking that "the style is heavy, leaden, and turgid; the sentiment vacillatory, Talleyrand-like and noncommittal," and that "the President has no policy in anything." He then proceeds—

"But mark the change which so suddenly comes over him, [the editor of the Journal and Courier] as evinced in the self-same article.—The Journal continues—'Having thus done with our foreign affairs, and the general principles of government, he comes to *more practical business affairs*.' '*A reduction of duties is recommended*, and the addition of a number of articles to the free list'—He thinks the army and navy *need increase and greater efficiency*'—'The frauds upon the government under the pension system *demand a revision of the laws upon this subject*'—'The policy of judicious donations of public lands in aid of railroads *is approved*'—He condemns the policy of internal improvements, both for inland works, and for those on the coasts and harbors'—'On the issue of State rights, the President *speaks with more courage* and *explicitness* than on any thing else'—'The importance of the Pacific railroad *is admitted* and a guarded recommendation *is made of incidental aid*'—'The compromise measures are endorsed *in a handsome sentence*.'—'The Message indulges in anticipation of the future greatness of the Union, and, in well tuned sentences, EXHORTS THE STATES TO MUTUAL FORBEARANCE, THE PEOPLE TO FIDELITY TO THE CONSTITUTION, AND THE GOVERNMENT TO SIMPLICITY, PURITY AND ECONOMY!'

But hold! We have only touched upon the article—itself a long one and a leader, which the Journal devotes to a review of a document which it characterises as having 'no policy in any thing'—and its style as 'heavy, leaden, and turgid!' Comment on such gross inconsistency and contradiction as we have thus exposed, is entirely superfluous. We respectfully suggest to our cotemporary an anxious search in his own cranium for the leaden and turgid deposits he speaks of. Examine thyself, brother."

We have here given the Times' strictures, italics, capitals and all, that our readers may see how much that paper has done to prove the charge of "GROSS INCONSISTENCY AND CONTRADICTION," which it has preferred against us. The Times would feign have us believe that a few general remarks on "practical business affairs," a recommendation of "a reduction of duties," a casual observation that "the army and navy need increase and greater efficiency," and two or three other unobjectionable sentences, are abundantly sufficient to overturn our statement, that the President "has no policy in any thing;" or, in other words, that he has no great scheme to propose, touching the foreign or domestic affairs of our country.—When we said that the President had no policy in any thing, we did not suppose that our readers would understand us as meaning that he had no policy of going to bed or to church, of attending to the every-day offices of his government, or any thing of the kind. All that any sensible reader would understand is, *that he has no policy on any great, vital question now affecting the politics of the country*. The gnat-straining, camel-swallowing sophistry of the editor of the Times, only shows the desperate dilemma to which he is reduced, in his efforts to back up the existing administration.

If there is a single paragraph in the whole Message containing any thing that can be mocked with the name of *policy*, we have been unable to detect it; and we will thank the editor of the Times if, with his microscopic eye, he can point us to such a paragraph. What is said of Cuba? What of the Nebraska question? What of the Sandwich Islands? What of the Pacific Railroad? *What of any vital question* calculated to interest the country, during the coming six months? The Times editor knows there is absolutely nothing.—Why then does he thus catch at straws, or carry over hyperbolas? Does he wish to bring a "bill of indictment" "against a trope?" Will he found an allegation on a "figure of speech?" Shade of Richard Brinsley Sheridan, come to our aid! Will the Times man make "an anxious search in his own cranium?" "Examine thyself, brother."

Four Days Later from Europe.—The Steamship Arctic arrived at New York at ten o'clock yesterday. The news is not important.

Nothing had occurred along the Danube; a heavy snow and rain had set in.

There were rumors of an armistice, but it was doubtful. It was also rumored that the Turks and Servians had had an engagement—but this was also considered doubtful.

Omer Pacha's conduct is sanctioned by the Government, and the Sultan has sent him a present of a horse.

The allied fleets are at Beycos. The Turkish fleet had gone to the Black Sea, to keep open the coast of Circassia.

The Turks have repulsed the Russians five times from before the fortress of San Nicholas.

Two Russian ships had been lost in the Black Sea.

The English Admiral, Sir L. Lyon was on his way to take the command of the British fleet.

It is reported—contrary to the former advices—that Dost Mahommed is hostile to the Russians, as are all the Mahomedan tribes of India.

No British news except the reported treaty between Great Britain and France, to guarantee the rights of Turkey, with the option of Austria and Prussia to join it.

In Prussia the Chambers have been opened.

Prussia claims to act as she sees best for her own interest.

Some trouble is reported in Baden between the government and clergy.

Large doses of artillery are ordered to Hungary.

Turkey demands of Greece to dismiss a certain professor from Athens who wrote a libel. Greece refuses.

Melbourne advices to the 29th of August, report Australia trade good.

The British Parliament had been prorogued till the 24 prox.

The Russians do not appear to have adopted any definite plan. They remain encamped at Oltenitza, Bucharest and Giurgevo.

The rumor that the Emperor and Empress was about to visit London is again current in Paris.

The Turkish Admiralty has provided a special depot for the re-fitting of the French and English steamers.

There is no ostensible movement of the War office or in the Military Department of France,

yet it is known that the army is in the highest state of efficiency, and that the government is fully prepared to meet any contingency that may arise.

At a ball given at Madrid by the French Ambassador, a disturbance occurred between young Soule, son of the American Minister, and the Duke of Alba, the brother-in-law of the French Empress. The latter had made some insulting allusion concerning the dress of Mrs Soule, which young Soule overhearing, the latter immediately approached the Duke, and made a slight assault upon him. Much excitement ensued, and young Soule was taken away by his father. The former afterwards challenged the Duke, who refused to accept.

The Chinese news is important. The insurgents became masters of Shanghae almost without resistance on the 7th of September, and organized plans were said to be in existence for a simultaneous rising in Sunkeang Soochow, Tse Hang, and other places. The natives say that Shanghae was the soul of Keang Nan, and that being lost, the whole province may be considered as gone.

The rebels in Amoy still hold the Island against the Imperialist fleet.

Canton was threatened, and there was little doubt that it would have changed masters before the despatch of the next mail.

The naval forces of the Imperialists now seem to be concentrated around the Island of Amoy, one-tenth of them, it is said, would be sufficient to overpower the rebel fleet in the inner harbor. Only once such an attempt has been made, and on that occasion one of the Imperialist Admirals is said to have displayed considerable courage, but to have been altogether unsupported. The land forces do not even pretend to approach within shot of the rebel troops, and the principal sufferers from the three weeks fighting before Amoy have been the non-combatants.

California Items.—California dates by the Pampero, at New Orleans, convey nothing further as to the Sonora expedition.

The markets are rather more brisk, but prices rule low.

The mining intelligence is highly favorable.

Capt. Brown, of ship Ontario, had been accidentally killed.

Several fires had occurred at San Francisco, and elsewhere. No great damage was reported.

A lump of gold, weighing 11 pounds had been found.

A prize fight had taken place at San Francisco. The combatants were John Carey and Cavagan. Thirty rounds were fought, and each severly contested. Cavagan was declared the victor. The purse was for $1000 a side.

An earthquake occurred at Hambolt Bay.—No serious damage ensued.

The papers record more than the usual number of murders.

The weather was propitious.

At the Sandwich Islands the small pox continues to prevail. No further change has occurred in the ministry.

Telegraphic. A Washington despatch of yesterday says:—Mr Houston, it is understood, will be chairman of the committee of ways and means, and the last committees of both houses will be generally reappointed so far as the members of them are in the present Congress.

A Baltimore despatch of yesterday says:—The New Orleans mail of Sunday is received. The opening of the New Orleans and Opelousas Railroad was celebrated on Saturday. The Mayor of New Orleans has published a card, declaring that the health of the city never was better, and perfectly safe for visitors.

A New York despatch of yesterday says:—The fire yesterday destroyed in all sixteen buildings, and the entire loss is estimated at three-quarters of a million dollars, of which about one-half falls on Messrs. Harper & Brothers, who are, however, largely insured.

Gen. Cass' Position. The Washington correspondent of the N. Y. Herald states that Gen. Cass has said that "his heart is with the national democracy of New York in their struggle for principles, and he repudiates the idea that the issue made by the national democracy of that State is confined to its limits, but that it extends all over the Union, wherever national democracy has a foothold. He looks with pride upon the hundred thousand true hearted men of New York, who, disregarding offices or favors, boldly avowed to the Union their loyalty to principle and not to spoils.

With reference to John Van Buren's attempt, in a speech in New York, to associate his name with that of the faction to which Van Buren belongs, Gen. Cass regards it with contempt, and he considers it an insult to find John Van Buren bawling out for three cheers for the man who, in 1848, was the representative of the democratic party which the Van Buren men then traitorously deserted.

Gen. Cass further states his intention of not only voting against the confirmation of many of the appointments of the present administration, but also of speaking against them as unworthy to hold office under a democratic President. * * * * *

An early opportunity will be taken by the distinguished Senator to express his views publicly to the country."

The New York Herald says,—"Gen Cass will rive the cloud now overhanging our national affairs, and then will commence a storm such as has never been experienced among the political elements of this country."

The Fate of Franklin. At a recent meeting of the Royal Geographical Society, says the Boston Journal, Sir Roderick Murchison in the chair, Capt. Englefield, in answer to a question addressed to him, stated his belief that Sir Edward Belcher (who was in Wellington Channel at last accounts) would be acquainted with the operations and unsuccessful results of the other expeditions by means of his exploring parties. His opinion was that Franklin had passed up Wellington Channel, penetrating beyond the distance of eighty degrees, and reached some land more moderate in its climate than that further south, and where he would be likely to find an abundant supply of deer and musk oxen. If the ships had been lost he thought some traces of the wrecks would have drifted on to the shores of Spitzbergen. He had never entirely given up the idea that the two ships seen on an iceberg in 1851 were Franklin's and that their crews might have escaped in boats to Spitzbergen. It was curious that the Norwegian fishermen who frequented that island, had for the last two or three years been finding rein-deer with their ears split roaming on it, and the most likely way of accounting for this was, by supposing that some English sailors were lodged on its northern shores. There was an instance of four Russians having subsisted on the north coast for six years, though they had but a single musket and a few necessary articles. He could not renounce the hope that Capt. Kennedy, in the Isabel, which was now at Valparaiso, about to go up Behring's Straits, might be enabled to come back by Spitzbergen and Nova Zembla. If he had such a mild season as Barentz met with in 1596, he might be enabled to do this, accomplishing also the examination of the Siberian coast in a single season.

Capt. Beechey remarked that the sea between Spitzbergen and Nova Zembla had never yet been penetrated, and he thought there was little ground for the belief that it would not be frozen at the pole. A hope was expressed that another expedition would be ordered to proceed for the purpose of exploring the seas around Spitzbergen.

CITY MATTERS.

☞ In the Police Court this forenoon, James Mahoney, a common drunkard, was sent 3 months to House of Correction. George Leafe, a common drunkard, was bailed for future appearance.

Remember Yankee Locke's great entertainment at Huntington Hall, tomorrow, (Tuesday) evening. It will be a great affair. The Yankee is "preparing to pucker."

☞ Raynes, 43 Central street, has just returned from New York, and will open to-morrow a large invoice of new and elegant jewelry, gold and silver watches, silver ware, fine cutlery, fancy goods, &c.—the best styles and qualities in the Metropolitan market. The old stand—43 Central street—"is bound to shine."

The "Amende Honorable." "W. H. B.," in the Herald of Saturday, makes a full and unqualified retraction of a false charge he made against the publisher of the Courier, more than a year ago. Though this acknowledgement comes late, we accept it in good faith. Here is his card in full:

The Lowell Courier. *Mr Editor*:—This paper accuses me of lying in charging the publisher with being closeted with M. H. Smith. What I said was in reply to an article published in that paper, from Mr Henry Emery—and here it is:

"How many hours did they spend in conference that day? How long was the publisher of the Courier in conference with Mr Smith?"

This insinuation, based upon statements made to me, the publisher denied, charging me I think, at the time, with falsehood. Fairness would have required a retraction of that insinuation, and I ought to have made it upon its denial.

The Courier says I voted the entire Coalition ticket. I reply, I did not do so, either time—wisely, or foolishly, I voted for two whigs the first time, and five the second. I did it to place myself where such a charge could not be made.
Lowell, Dec. 9th. W. H. B.

The publisher of the Courier, in denying the charge, at the time, *did not* charge the writer "with falsehood" any farther than a simple denial of the false statement *implied* falsehood.—Here is all the publisher said:—

"The publisher of the Courier has not spoken with, communicated with, nor ever seen, the Rev. M. Hale Smith, for more than four months; nor did he attend the City Hall meeting referred to, or in any way confer or advise concerning said meeting."

Justice requires that we should repeat the words of this denial here, that the "W. H. B." and the public may see we accompanied it with no offensive language.

☞ Some scribbler, who signs himself "A Methodist," writes to the Herald, calling upon the members of a *certain* church to *oppose a certain candidate*. The article is in all probability a forgery. As the particular candidate is an irregular one, possessing no claims on the support of our party, we take no umbrage at the communication on that account. But the introduction of church matters into politics can not be regarded as other than unwise and detestable. We understand that all the members of the society in question disdain the communication.

Magazine. We have received from James Brackett, No. 144 Merrimack street, a copy of the January number of Peterson's Ladies' National Magazine;—a periodical devoted to sentimental stories, romances, and general literature;—edited by Mrs. Ann S. Stephens and Charles J. Peterson, 102 Chestnut street Philadelphia.

Handsome Testimonial. The friends of Mr Horace S. Robbins, the retiring Agent of the Jackson Manufacturing Co., Nashua, N. H., met at the Pearl St. House, on Thursday evening last, and sat down to a bountifully spread table, at which Mayor Baldwin presided. Mr. R. L. James in behalf of the company, presented Mr. Robbins with a beautiful set of draughting instruments made of pure silver, excepting those parts necessarily steel. Below we give the speeches and sentiments of the occasion.—Among the invited guests present was our old friend Beard of the Nashua Telegraph. Mr Robbins is well known in this city, having been long employed as an overseer on the Massachusetts corporation, and is the inventor and patentee of several useful inventions. Mr James addressed Mr Robbins as follows:

Mr. Robbins,—In behalf of the overseers and mechanics of the Jackson Company, allow me to present you this set of draughting instruments so peculiar to your genius as a mechanic, not for their intrinsic value, but as a token of our high regard and esteem for you as an Agent and mechanic of the Jackson Company, under whom we have been so happily employed during the time you have been connected with the Company. And as you are about to leave us and our connection is to be broken, allow me to say further, that we shall cherish that affection for you that has been contracted by so many hours of pleasant employment under your charge. And in all your future enterprise may they be as true as the plumb square, and the remainder of life be as straight as a line and even as the level.

Mr Robbins replied:

Mr. Chairman and gentlemen,—It gives me the greatest pleasure to receive at your hands this token of your friendship, a memento upon which I shall look in after days and be carried back to the field in which you have rendered me great assistance, and in tendering that assistance you have done honor to yourselves and to your calling. I shall look upon this and feel that, although I came here a stranger to all, or nearly all of you, that I leave you with your best wishes. Gentlemen, I thank you a thousand times for this mark of your friendship and respect.

VOLUNTEER SENTIMENTS.

Mr Shaw gave—Here's to our honorable Mayor; may he be to the Gentiles what Josephus was to the Jews; and may his words be as sweet to us to-night, as the Baldwin apple is to the palate.

By Mr Dow.—The age of improvement is indelibly marked upon every thing new; one of its latest and best, is the magnetic telegraph. Its speed is that of lightning; one of its best results is a weekly Telegraph for Nashua and vicinity.

By Mr Woodward.—It may seem quite foreign to the occasion on which we are assembled to-night to intrude upon this company, the expression of my feeling of sympathy and affection for *birds*. But I frankly own that for a certain kind, that greet us with their songs in the early spring-time, these feelings are peculiarly strong. I hardly need to say here that I allude particularly to *Robins*. I love to see these birds build their nests and rear their young, and pursue their business, unmolested by vagrant boys and birds of prey; and when thus molested I love to see their disturbers driven off. *Robins* I know are birds of passage and migrate annually from one place to another, to find a warm and genial climate; and the sentiment I wish to offer is this,—that our own *Robbins*, whenever they may see fit to fix their residence, may be free from the annoyance of all such boys and all such birds.

By Mr Hinckley.—I will give you the editor of the Telegraph,—May he raise up a young crop of Beards that will never get shaved.

By Mr Lawrence.—Old Indian Head,—May she always prosper as she has for the last year.

By Mr Woodward.—Here's to our retiring Agent,—May he meet hereafter with all that success in life which his well known energy and and integrity deserve.

By Major Baldwin.—Gentlemen, your retiring Agent,—May he live a long and happy life.

By Mr Lawrence,—Our retiring Agent,—May prosperity attend him, wherever his paths may lead him.

By Mr Wheeler,—I offer as a sentiment,—Our new agent,—May he be to all under his direction as a *Patent Rights* securing to all their respective *rights* and privileges. May he be able to right all that is wrong, and with the consciousness of being right himself, may he pursue a straight forward course, not deviating to the right or left.

By Mr. Woodward—Gentlemen: I offer as a sentiment, your guest, Mr. Beard, the Editor of the New Hampshire Telegraph—May the lines of his Telegraph meet the approbation of all, and gain a patronage unprecedented in the annals of literary enterprise. May the Telegraph ever remain as it is—a model paper—and its face ever be adorned with a Beard.

By Mr. Hinckley.—Our retiring Agent—May he never meet with colder friends.

Mr. Robbins—Whether at the drafting-board or in the wheel-pit, his motto is honesty.

By Mr. Dow.—Allow me to give you the Landlord—with a Jewell for a Landlady, and Pearl for a house, and Bristol that ever wears bright, he is able to make this a place of comfort and rest to the weary traveller, and an ornament to our city.

GENERAL SUMMARY.

Picnic. The West Congregational Society in Dracutt (near Pawtucket Bridge) will hold a Picnic on Wednesday evening next. The High-street Church Choir, of Lowell, will be present and perform some of their select pieces. Tickets 25 cents—to be had at the door. It is hoped a good delegation from Lowell will be present. M&W

Fire in Lawrence. We understand that a millinery store in Merchant's Row, Lawrence, was broken into and robbed of goods and then set on fire, last night. It was discovered in time to prevent a destructive conflagration.

☞ On Friday evening last, the ladies of North Andover asserted their rights by giving a magnificent party, to which some forty gentlemen were invited. A magnificent entertainment was provided, the whole expense of the affair, including even the stabling of the horses being borne by the ladies.

Endorsed. The Boston Herald, Mail, and Bee, all agree in endorsing our article recommending Edward C. Purdy, Esq., of Somerville, for Clerk of the House of Representatives.

Loss of the Revenue Cutter Hamilton.—The revenue cutter Hamilton left the dry dock at Charleston, S. C., on Wednesday for a cruise having on board Thomas B. Rudolph, of St. Mary, Georgia, the captain; Camillus Saunders, son of Gen. R. M. Saunders, first lieutenant; E. C. Hines, second lieutenant, and a crew of twelve men. It blew a hurricane on Thursday night, during which the Hamilton was lost off Fully breakers, Charleston bay. The officers and crew took to two life boats, one of which has not yet been heard of; the other, containing Capt. Rudolph, the quartermaster and four men, were all drowned, with the exception of one seaman, who was lashed to the boat and was picked up by a Savannah steamer.

Precarious. We regret to learn from the *Olive Branch*, that its editor, Mr Norris, continues in a very precarious state of health.

Destructive Fire in New York.—*Harpers' Establishment Consumed.* The entire establishment of Messrs Harper & Brothers, comprising seven buildings five stories high, on Pearl and Cliff streets, and several adjoining houses are in ruins. The fire, which broke out about 1-4 past one Saturday afternoon, is supposed to have originated from the spontaneous explosion of a camphene lamp. The hands, numbering some 600, had just returned from dinner, and with the exception of two girls are reported to have escaped injury. The Old Walton House, a blank book factory, and George T. Coolodge & Brothers premises are amongst the property destroyed. The Mansion House and Franklin street Hotel were badly burned in their upper stories. The loss will doubtless exceed half a million dollars. Messrs Harpers are said to be largely insured in City Companies who will be heavy losers. Their stock of valuable stereotype plates are understood to be safe in their vaults.

Boston Merchants. The Chronicle says it is believed by competent judges, that there has never been a period when Boston merchants stood better or firmer than at this moment, and as a consequence were never more prosperously conducting their extensive operations, whether at home or abroad, than at the present time.

Railroad in Broadway. We learn from New York that the old Broadway Railroad bill, under the name of a Road to Manhattanville, has passed both branches of the City Council, and only awaits the signature of the Mayor to become a law. The Mayor will probably veto the bill, but in that case it will be passed by the two boards by the constitutional majority.

☞ Gardner Stow, Esq., of Troy, has been appointed Attorney General of New York, in place of Levi S. Chatfield, who has left the State.

Body Found. Coroner Wm. Andrews was called, on Thursday, to hold an inquest on the body of a male child, found enclosed in a herring box and partially buried, on the new Old Colony Railroad wharf, South Boston. The child was undoubtedly buried alive, and a verdict of death by means to the jurors unknown was rendered.

Fatal Accident. A Mr Haskins, an employee on the Fall River Railroad, while engaged in switching out a train of cars, Tuesday morning, at Myrick's station, in attempting to jump upon the train, fell under the cars and broke his leg, besides sustaining severe internal injuries, which caused his death on the same day.

☞ As a proof of the utility of exhibitions, it is stated that since the Great Exhibition of 1851, French lamps, of a kind then exhibited, have been sold in England to the amount of one million of dollars.

The Late Vice President. The Washington correspondent of the Journal of Commerce says: "It is a fact not very generally known, that Mr King did not feel himself much flattered by being put second on the ticket; and he remarked at the time to a friend, who is my informant that he was inclined to decline the nomination, and would have done so, but for the apparent necessity of allowing his name to be used, for the sake of the harmony of the country."

An Intense Native American. The most decided case of nativeism we have recently known, is that of a person in Boston, who was asked to attend the Pilgrim Ball at Plymouth on the 22d ult. He replied that "he was not going forty miles to attend a celebration in honor of the arrival of a parcel of foreigners."

☞ This year's product of shawls in this country is estimated at about 500,000; of which the Bay State Mills, Mass., have made 300,000.

☞ The ferrymen of Detroit say that 900 fugitive slaves have crossed into Canada the past year. It is also reported that 250 have crossed to Cleveland. Their market value must have been full one million of dollars.

A Fair Salary. Madame Sophie Cruvelli has bound herself to the Grand Opera of Paris for two years, on such terms as no soprano has ever obtained in that city. Her salary is $20,000 a year, with four months' leave of absence. She is bound to sing but twice a week, and if ever she sings three times, she is to receive $300 extra. The first two months of her absence in 1855, June and July, coinciding as they do with the Universal Exposition, are already bought back by the management for $10,000; so that the prima donna will earn $30,000 during the second year, and have two months left to repose in. The aggregate amount for the two years is just what the President of the United States gets for the same length of service.

Irish Journalism in New York. We understand that the friends of John Mitchell advise him very strongly not to deliver lectures in this country, but to establish a new journal in New York, and make it the organ of Irish nationality both in this country and in Europe. Mitchell has remarkable talents as a journalist; he exhibited those talents in a remarkable manner during the disturbances in Ireland in 1848; and could not employ them better than in a journal which should advocate Irish independence. The columns of the *Irishman*, the *Felon*, and the *Nation*, form an index to Mitchell's style. The Irish who believe in Mitchell, O'Brien and Meagher, should have an organ in America, and John Mitchell is the man to give it to them.

☞ A trial took place in 1650 in Connecticut under the section of the Blue Laws prohibiting kissing. The offenders were Sarah Tuttle and Jacob Newlice. It appeared that Sarah dropped her gloves and Jacob found them.—When Sarah asked for them Jacob demanded a kiss for his pay; and as the demand did not seem to Sarah to be extravagant, she adjusted it forthwith. The facts were clearly proved, and the parties were each fined twenty shillings.

☞ It is said that the skull of Voltaire has recently been exhumed and examined, and it is proved not only that his head was small, but that he had the organ of *veneration* developed to an extraordinary degree.

"Correcting" History. The Claremont (N. H.) Eagle announces that Prof. Bowen delivered a lecture in that place, on *Sir* Edmund Burke! Pray when was Burke *knighted?*

☞ A Mrs Ward in Ashley county, Ark., was told by the "spirits" a few nights ago that her left hand had offended her Maker and she must part with it. She immediately rose from her bed, procured an axe and cut it off at the wrist.

☞ Koszta was much affected in his interview with Mr Marcy, and could express but in tears his gratitude to him who had liberated him from the shackles of tyranny. He is a good looking man, of about thirty years of age; has a military air, and is becomingly quiet and modest.

☞ A new Society of the Free Presbyterian Church of Scotland has been formed in Boston, and Rev. Mr Muir of Glasgow, is to be its pastor.

Sentence for Rape. In the Court of Common Pleas for Franklin county, Horatio Cole has been sentenced to ten years in the State Prison, for an attempted rape on a girl sixteen years old.

☞ Ex-Gov. Lane of New Mexico has come on to Washington to contest the seat of Padre Gallegos, the newly elected delegate from New Mexico.

☞ The steamer's news caused a decline of twelve and a half cents per barrel on flour, at Baltimore.

☞ Rev. Edwin Hall, D. D., has declined the Professorship in East Windsor Seminary to which he was appointed.

☞ A bill has been introduced into the Tennessee Legislature to tax the selling of slaves, when carried on as a business.

☞ The Directors of the Albany and West Stockbridge or Western Railroad are again agitating the subject of a bridge across the Hudson at Albany.

☞ Ex-Governor Hunt, of New York is considered out of danger.

Monument. The N. Y. Tribune don't believe there is much prospect of an early completion of the Washington Monument, at Washington, but this it considers rather a good evidence of the national taste than otherwise—the editor execrating the "whole concern" as a work of art. Thus we are told—

"A model of it stands in the Crystal Palace, and it is a melancholy confession of public ignorance and want of taste, that with that model in view, a single copper should have found its way into the contribution boxed which stand at its base. A monument to Washington should be grand, simple, severe, harmonious; such a work a man of original genius, an artist by nature and education might, perhaps, in some happy moment, have designed. This model is poor, confused, meretricious and discordant; it outrages the elemental laws of art, and the plainest hints of nature. It seeks to combine opposites; it consists of an ornate Greek temple, with a bare, tall shaft rising from the centre of the roof, and suggesting nothing so much as a stake sticking in a pumpkin. This combination is ugly in the extreme, uglier even than that other wretched but costlier edifice which stands near its site at Washington,—we mean the Smithsonian Institute.—Why should the memory of Washington be expensively dishonored by connecting it with such an affair."

Patents to New Englanders. The following is a list of Patents to New Englanders, issued from the United States Patent Office, for the week ending December 6, 1853, each bearing that date:

Ira Warren, of Boston, Mass.,—for improvement in shower syringes.

James Watt, of South Boston, Mass.,—for improved valve arrangement for steam hammers.

George Wellman, of Lowell, Mass.,—for improvement in cleaning machine cards.

R. M. Evans, of Gilford, N. H., assignor to himself and Asa weeks, of South Boston, Mass.,—for improvement in cutters for planing mouldings.

Jonathan Davis, of New Bedford, Mass.,—for improvement in indicating electro-magnetic telegraphs.

Glorious Uncertainty of the Law.—A laughable illustration of the heading of this article occurred in a neighboring county a few days since. A Mr B—— was out hunting with his rifle, and in crossing the field of a Mr C—— a Frenchman, Mr C——'s large dog attacked him savagely, while Mr C—— stood looking on, without attempting to call off his dog; Mr B—— getting out of patience shot the dog, and he fell apparently dead. Mr C——, in high dudgeon, forthwith got out a warrant, and had Mr B—— arrested for killing his dog—owned to the killing, and was corroborated by two of his neighbors, who were present at the shooting. The Magistrate fined B—— ten dollars and costs which amounted to about ten more; B—— paid the fine and costs—and when the parties got home from the trial, the dog had come home also, and was not killed; B—— then got out a warrant against the Frenchman and his two associates for perjury for swearing B—— had killed the dog. They were frightened and made peace with B——, paid him back his twenty dollars, and ten more for his trouble, and no trial was had; and when the parties returned home from the last suit, lo! the dog was dead. Imagine the "feelings" of the Frenchman and his party.

SALE OF DR. M'LANE'S VERMIFUGE.

☞ Among the hundreds of letters, certificates and orders received by the proprietors of this medicine, the following are selected to show its character, and the effect of its use, in a distant part of the West:

ROYALTON, Boone Co. Ia., May 10, 1850.

Messrs J. Kidd & Co.—Gentlemen—I write to you to solicit an agency for the invaluable Vermifuge you prepare. [illegible] Mr C Edy, and prescribed it in my practice, and it proved so effectual in the *expulsion of worms*, the no other preparation will satisfy the citizens of this village and vicinity.—Please send me one gross of the Vermifuge immediately. Yours, &c. SAMUEL ROSS.

NEW PROVIDENCE, Tenn., July 1, 1851.

Messrs J. Kidd & Co.—Please send the Vermifuge for us as soon as possible, as we are nearly out, and the demand for it is very great. We believe it to be the best Vermifuge ever invented. PORTER & DYCUS.

*** Purchasers will be careful to ask for Dr. McLane's Celebrated Vermifuge, and take none else. All other Vermifuges, in comparison, are worthless.

Dr. McLane's Celebrated Vermifuge, also his Liver Pills, can now be had at all respectable Drug Stores in the United States and Canada.

Assessment of Taxes.

Commissioners' meetings, Wednesday, Thursday, and Friday for the Wards, and general meeting and revision on the 30th inst. at the Mayor's office.

Mayor Nesmith was re-elected, in spite of all opposition, by a majority of *one hundred and twenty-four*. The vote stood as follows: Nesmith, 1,062; *all other candidates*. Such a testimony to the popularity and real worth of an officer, his address here, given by one of the finger of a few people. We may now rest confident that the hope we expressed a day or two since, will be fully realized—that the same industry, diligence and general capacity for business, characteristic of the administration now existing, will continue to mark the second administration of Mayor Nesmith, in the year 1866. Our Aldermen, Councilmen, &c., are also nearly all elected, as will be seen by the annexed returns. We shall not, in this brief space of time, descend to notice the desperate efforts of malice and stupidity, which were made against us; they were indeed powerful and active against us; they were indeed powerful and active against us; they were indeed powerful and active

IMPORTANT LEGAL DECISION PROVING REAL ESTATE.—Leonard Ash, Lessee, vs. Edmonds Dame. We are unaccustomed to lend our columns with observations on the property, or the quality of decisions of our courts of law; but the importance of the case of Ash vs. Dame, lately adjudicated upon by the Supreme Court, sitting at Cambridge, seems to justify a departure from our ordinary usage. The case is reported in Gray's Massachusetts Reports, and is known to have been connected with a very singular story of facts.

Nathaniel Ash, formerly of Charlestown, on the 18th of July, 1841, conveyed to William Hill, of North Berwick, Me., a house and land situated on Main street, in Charlestown city. On the 1st of August subsequently, as Reginald says, Hill conveyed it to Edmonds Dame, and on the 17th of October subsequently, Reginald conveyed the same property to one William Tufts M. also a resident of Charlestown.

The deed of the 1st of August, purporting to be from William Hill to Brayton, is said by Hill to be a forgery. At any rate, on May 12, 1843, Hill commenced an action against Tufts for the recovery of the land in question, (which is the same now in controversy,) and the only matter raised in the case was upon the authenticity of this deed of August 1st, 1841.

The deed was given under the name to immediately, from Hermon Dame as a security, as was explained the time previous, for a loan of money, which he had obtained of Tufts, and which, with interest, amounted to $1,000. Edmonds Dame, who is a son of the grantee of the City and County property, and who is a man of property in his own right, and who is known to the Bar as a man of the highest character, and of the strictest honor, and who is also a brother of Hermon Dame, the grantor, testified that the deed was given as a security for the loan, and that it was not intended to convey the property, but was to be void on the payment of the money. Hermon Dame, the grantor, was also a witness, and testified to the same effect. Tufts, the grantee, testified that he had no knowledge of the transaction, and that he had paid the consideration money, and had received the deed in good faith, and had been in possession of the property ever since.

The plaintiff then showed, substantially, that the deed was not executed by Hill, on the day of the date of the deed, and that it was executed by him at the instance of Edmonds Dame, and that Hill was not in the State of Massachusetts on the day of the date of the deed, but was in the State of Maine, and that he did not return to Massachusetts until the month of August, 1842, when he executed a deed of the same property to Edmonds Dame, and that Hermon Dame was present at the execution of that deed.

The jury, after a few minutes' consultation, found a verdict for the plaintiff.

Under the rule of evidence above referred to it seems to us, that no case can be more of a stand-off than Harper, the oldest of the four brothers who now constitute the firm. He was born in the city in 1818, a bad fifteen year old and served an apprenticeship of six years to Paul Reynolds, then a bookseller on Pearl street.

His brother John soon followed him, and also learned the trade of Mr. Seymour, a printer, in John street. In 1817, with the small capital James had saved, the brothers set up business for themselves, and took an office in Dover street. The first book they published was the Rev. Henry Ware's first edition of the Methodist Catechism. The first book they published on their own account was Locke's Essay on the Human Understanding. They toiled with energy and industry, and maintained the highest character for enterprise and integrity. In 1826 their brother Wesley joined them, and six years later Fletcher Harper, the fourth son, and the present head of the firm until now they have carried on the publishing business of the firm, as well as the printing business, which has five pensilled.

THANKSGIVING.—An Erie dispatch of yesterday says—The railroad company have begun to relay the track and rebuild the bridge at Hartstown Creek this afternoon. It is the opinion now that it will be torn up by to-morrow.

VACCINATION.—A Sermon of the World—by Frank Crosby. Redfield, New York: Fowler's Building.

This book is printed and embellished in a style in the highest degree creditable to the taste and skill of the publisher, Mr. Redfield, and are also all the works published by him, noticed below. The best of paper, the cleanest type, handsome binding, ornamented with gilt, all lend acknowledgments to the work. The style of Mr Cooper is easy, readable and elegant, and that of the schooner North Carolina at Porto Rico, in 1858. He advocated the measure in a spirited speech. Laid over.

Mr Washburn of Maine introduced a bill granting lands to Maine, in aid of the Maine and North American Railroad. House then adjourned.

LOWER CALIFORNIA A RESCRIPT: Recent California advices, slowly published, state that a filibuster exhibition of 45 men under Col. Walker, left San Francisco in October and reached La Paz, a common town in Lower California, Nov. 3d. They landed, captured the town, secured the Mexican Governor, and got possession of an independent flag, two red stripes and two golden stars, and proclaimed the independence of Lower California. Col. Walker entered upon the duties as President of the Republic of Lower California. On the 8th the President determined to march upon the town of Santa Rosalia, on the Gulf of California, on the Pacific side, and established a custom house there. The Mexican Governor arrived in the night, and attacked the camp of the invading party. The President was thinking of establishing a form of government at Rosalia Bay. Those men are set forth with all the pomp and circumstance would be in the establishment of a great empire. No. 2 article bulletin from *President* Walker, dated very indefinitely, "at the Head-quarters of the Republic of Lower California, January 7, 1853."

The steamship *John L. Stephens*, on the 16th ult., while going from San Francisco to Panama, came across the filibusters in their "barque Caroline," all on board, with their two captive Governors. They appeared to be steering for San Diego, and had probably left their new Republic to save their heads.

Walker was formerly a writer for the San Francisco Herald. The whole affair, remarks the Springfield Republican, is a funny farce, though it may prove anything but funny to those engaged in it.

TELEGRAPHIC. A Washington despatch of yesterday says—Purser John P. Jones, attached to the Steamer S. Phelps, and several other officers of the Navy, have been ordered to the sloop of war Decatur, at Charlestown. The destination is supposed to be the Pacific.

The contracts for printing paper, for the present Congress, were awarded to-day—1st class to Grant, Daniel & Co., Boston.

In the Gardiner case, the examination of witnesses for the United States commenced today. Justice Mayer, and others, have been called and their testimony is substantially as before. It is presumed that the trial will last a month or two. But little interested is manifested.

An unfortunate difficulty occurred between Secretary Guthrie and Senator Gwin, at the Treasury Department. The Secretary is charged with treating the Hon Senator very rudely. A personal encounter was likely to grow out of it; but mutual friends are understood to have provided for an amicable settlement to-morrow, by an apology from Secretary Guthrie.

A New York despatch of yesterday says—The jury in the Bennett trial, for libel on Fry, brought in a verdict of $10,000 damages for the defendant. Six of the jury first stood in favor of $20,000, the full amount claimed.

A despatch from Charleston, 22th, says—Four Indies, supposed to be seamen of the revenue cutter Hamilton, were found on Sunday, at Rawah Beach.

INTERNATIONAL COPYRIGHT. We learn from the New York Day Book, that Messrs Vogel, Delmes & Co., a foreign and domestic publishing house in New York, have commenced, or are prepared to put in execution, a plan to publish the thirteen works of Dickens, Eugene Sue, Victor Hugo, Soulé, and other popular French authors, in English and French, simultaneously, in the country. A new episode in science of their operations in Europe. The new house possesses the contracts to this effect with the authors, for which the authors are to receive a certain portion of the profits of the American publications. A translator of unquestionable ability, Madame Julia De Margerie, of this city, has been engaged, and the first work from the new house will make its appearance every fortnight, under the title of "Romances of the World; or, Leaves from the First Days of Blood," by Alexander Dumas—is announced as ready to appear in a few days.

This plan secures all the advantages of a copyright to the American publishers of the works of foreign authors, and places them also on the authors themselves for their American popularity—and enables the publishers, not only to procure the earliest, but to have it from a competent translator, so that the new works shall be presented to us English dress from the same and elegant as the original French. This is to the American reader, the most important feature of all; for it is notorious that the best French authors have suffered awfully from translation. We hail this novel enterprise as the *beginning* of the reform of an International Copyright. Success to it.

A RUSH FROM THE UNITED STATES.—The New York (N. Y.) Advertiser states that some persons who were engaged in printing counterfeit bills, left that city on Saturday last, while working at the house of Mr Hunter down in Jersey. High and dry, Squash, were a large bank, and the bill was found in the bottom. The discovery has caused considerable curiosity in the vicinity.

☞ The Ohio Canvass will be the next in the House of Representatives.

CITY MATTERS.

WARD THREE SCHOOL COMMITTEE. E. B. Patch, Esq., was yesterday elected to Ward Three to fill the vacancy in the Board of School Committee. The vote was as follows: Patch 146; Dana 140; necessary to a choice 271. Blanks Dana 140; necessary to a choice 271. Blanks Dana 1; Daniel C. Eddy, 105; Joseph F. Tufts, 116; Ephraim B. Tufts, 205.

☞ Sanborn is constantly receiving new and elegant patterns of jewelry and fancy goods for New Year's and Christmas presents can be found in endless variety at his store.

SONTAG'S CONCERT. Madame Sontag's Concert last evening was attended by a large and grand affair. The reduced price of the tickets, and the general desire to hear the last singer in the country, presented a full house. Her concert in Boston have been crowded the past season, and we assure our readers that they will have a concert the equal of which has never before been offered in this city.—Madame Sontag is to her way to New Orleans, Cincinnati, and goes at the close of the opera season there, to Europe. So that this is the close of her concerts in this vicinity, and no one should fail of hearing her and the delightful artists who accompany her.

☞ The Journal of Madame Soulé is to be at Merrill & Stone's bookstore during the day and evening, and will attend to the sale of tickets for the concert of Monday night.

☞ We acknowledge ourselves indebted to S. O. Johnson, of San Francisco, for favors by way of California papers, and by Adams & Co. California, and Rand & Co. Boston Express.

PAYSON MARRIED. Parties wishing for pretty wedding cards or any endings whatever, or models of new inventions, are referred to the advertisement of J. E. Cross, in to-day's paper. Mr Cross is recommended as a very correct workman, and all work entrusted to his care will be done in the most finished manner.

☞ The Lowell officers of the late Lodi Brook remaining unsold to-day, will be disposed of at auction at 10 o'clock to-morrow.

☞ Lowell is one of the healthiest towns in America, which the statistics of the old one. The Hillsboro' says: "Among those who have entered the new Governor, and shortly after sent him on Border for some wood. This party was attacked by the Indians and returned to the vessel under a heavy fire of musketry, without losing a man. Col. Walker and his men, the other party were wounded by the enemy, while pursuing the enemy through a chaparral, when the whole party were surrounded and overpowered by superior numbers, and all killed except five Americans and one Frenchman, who were taken prisoners. The Irregulars are announced as ready to appear in a few days.

GENERAL SUMMARY.

ALFRED BILLS. Bonnet of $1 bills on the Atlantic Bank, Portland, Me., abused to $10. Several were passed at different places in the city yesterday.

☞ The Maine law party had a State convention at Providence on Wednesday last, and nominated Wm. W. Hoppin, whig, of Providence, for Governor; Schuyler Fisher, democrat for Secretary; Benjamin Mumford, whig, Secretary of State; John F. Knowles, dem., of Providence, for attorney general; Benjamin Mumford, whig, of Newport, for treasurer.

☞ Forts 6 and 7 of the United States Illustrated (The West), and parts 6 and 7 of the United States Illustrated (The East), have been received of Hermanus Meyer, publisher, New York. Charles A. Dana is the editor.

☞ Jones and Goodcrossage, two of the convicts who escaped from the State Prison at Charlestown, two weeks ago, were arrested last Sunday, at Lansdown'.

GOOD IDEA. A writer in the Mail suggests that the Senate House a *presidium pro tempore* until the vacancies are filled, and that Hon. Benjn H. Kellogg be then made president for the session.

☞ Russia has an army of 1,030,000 men, extends over a surface embracing thirty-five degrees of latitude, or a journey of 2,100 miles in length and 1000 in breadth, with a population amounting to 60,000,000. Cavendish can bring into the field 500,000 men, and has been able for the last 24 years, not only to resist the power of Russia, but to become arbiter in the many engagements. These facts show that Turkey may be able to cope, single-handed, with Russia.

WHO SUCEEDS. The whigs of Pinckney, and neighboring towns will hold a festival of congratulation on the results of the recent election, at the Town Hall, this evening, at half past seven. Among those expected to be present are Hon. Horace Mann, Governor Clifford, Winthrop, Lieut. Gov. Bond, Hon. Thomas Bartlett, John Sargent, G. S. Hillard, Moses Grant, &c.

☞ The New York Herald offers a reward of $500 for an authentic copy of a letter written by Franklin Pierce, to Gen. Walker on the subject of the Buffalo convention of 1846, and expressing sympathy with the movement. It is proper to say that the Hon. Caleb Cushing is not in the possession of any of the documents. The offer would bring the original.

☞ The Rev. Mr. Chapin has found deed in bed in a wretched tenement in the rear of Everett street, East Boston, on Sunday evening, at 8 o'clock. He was a widower with four children, and had long been addicted to intemperate habits, which was the basis of Rev. Mr. Chapin's feeling.

SUDDEN DEATH. James Burns, 23 South Margin street, Boston, d ed on Monday morning of apoplexy, soon after breakfast.

DIED IN JAIL. Jeremiah Buckley, committed on Saturday evening on a charge of drunkenness, died on Monday morning in the House of Correction, and was buried on Tuesday.

INJURED. Thos. Lee, a grass cutter for Locomotives; a rags descending almost to the ankle. Since the days when the young of Greece were fattened and sacrificed to the whitlings of the soothsay, Miss Fed, at this time, no people have surpassed the New Englanders in their love for public instances, public entertainments, or exercises of a character to serve generally. The following conversation, on this subject, will be read with interest by our readers in the country:

WATERTOWN, Dec. 12, 1853.

Mr Editor—Dear Sir: I want to say a few words through you valuable paper to our friends in Woodland on the subject of providing for the coming year during the present winter, hoping at the same time the same subject may be seriously considered by other towns which are progressing, and a living principle there is another such. Our population in the centre of the town consists of printing and paper mills, machine shops, factories, merchants, mechanics and farmers, all intelligent beings, meeting daily through this life, each in his own peculiar way. Now allow me to question: Are we all sure we are in the best way? Can we not find a better one? Are we not all to be benefited by attending a lyceum one evening in each week? And our children, with us, by attending a similar course for them, on evenings in each week? Preachers of the gospel, can you not give us one lecture each on some subject connected with your office? Physicians, can you not give us a lecture on physiology, and one we not all profitably interested each other either by debate or lecture? Perhaps you may think I have no tact or ability for delivering a lecture. Well, then write one and have it read for our benefit; or if you cannot write, get it read. Then you have your purse and let that talk. Merchants, will your trade be injured by the occasional absence of your clerks, or the neglect of business one or three evenings in each week? Will not the mind be expanded and the whole system rendered by the very likely at the same time to give you a call for a few goods, which might otherwise be purchased in the city? Farmers, on the other hand you rather see your children employ their evenings at the stores in idle pastime, and to the bar-room, than to spend a few cents or a few dollars for the support of lyceums and singing schools, where a taste may be created and many members of both church and general society? Are we not in some measure accountable for the circumstances in which we live? In consideration of that accountability, can we do better than to contribute for the support of such institutions? With our wish that we may derive a lasting benefit from all meetings held in the midst of us for intellectual improvement, we subscribe ourselves to the above in words well put,

A CITIZEN.

The Message of President Pierce.

Our last delineation in Congress was unanimously for. But by the course of 1853, our delegation was found to be divided in opinion upon the only State—Georgia excepted—which passed a law for that measure. Of the 5 members who now represent Massachusetts on the floor of the House, nine are whigs, one—Boyden—is a democrat, and one—Rantoul—is a free soiler, who, regarding the Locofocos as the only political evil, the great danger to our country, if defeated it is quite ready to vote for Gen. Cass in 1853. Of the 5 members who represent Massachusetts on the floor of the Senate, nine are whigs, one—Rantoul—is a democrat, and one—Wilson—is a free soiler, who, regarding the Locofocos as the only political evil, the great danger to our country, if defeated it is quite ready to vote for Gen. Cass in 1853. Cass in 1853.

Charles W. Upham, of Salem, who goes from the sixth district, is well known to the public. He is a man of sterling worth, of high character for ability and attainments, and possesses intellectual talents in a larger measure than any other man in the delegation. He was formerly a clergyman, but is now out of business, having left the pulpit from conscientious motives. H. P. Rocke, jr., of Waltham, the late Speaker of the House. He is a young man of promise, and has been elected by the Democracy of the district. He does not profess to be a politician, or for consulting over a public assembly and of declining its honors with facility. He is said to be a man of fine talents, and will be a very popular member, though not disposed to be active during the first session. He is a man of sterling integrity of character, and will be found to be a valuable member. Edward Dickinson, of Amherst, goes in from the tenth district. He has been in both branches of the State Legislature, and is a member of the Executive Council. He is a good lawyer, possesses excellent judgment and good common sense, and his speech was remarkably sober and sensible. The district is complete, with the exception of John Q. Goodrich, of Northampton, who succeeds the eleventh district. He has been a member of the House before for six years, and is well known to the public. He is a man of much ability and of sterling character.

Lowering.—The mercury on Saturday morning, at 7 A. M., stood at 20 degrees above zero, at 12 M., at 32 degrees, and at 9 P. M., at 28 degrees. Rain was the form in which the water fell during the greater part of the day, although it commenced in the morning with snow, and ended with it. The ground was not much whitened by the snow, and soon became bare. The rain was very fine, and was driven by the wind, and in fact, was not much else than a fine mist.

A Presidential despatch of yesterday says:—The Cabinet met yesterday in the Hon. I. C. Pray's room, at the Willard House, Washington, D. C. Postmaster, Hammond, in the absence of the Secretary of the Interior, was present at about $1000. The machinery and steel was considered by the Cabinet, and, as in the case of the Secretary of the Interior, was referred for more information.

A Baltimore despatch of yesterday says:—The Chesapeake and Ohio Canal has been leased to a company, which has purchased the whole property, and intends to extend the canal to Cumberland. The lease was now running without obstruction.

Mr. Pray, a member of our city council last night passed an amended ordinance giving the Boston and Ohio Railroad Company the free use of Merrimack street, without the reductions as to through travel.

A Washington despatch of yesterday says:—It is understood that the annual message of the House at a full meeting to-day voted unanimously to report a bill at the first opportunity, probably to-morrow, declaring the independence of six dozen frigates, to be built under the direction and of the Navy department, appropriating $300,000.

Mr Kerr, of North Carolina, has been called to fill the vacancy occasioned by the unfortunate illness of his wife.

General Houston is daily expected, from—Senator Rusk is said to be in Texas, Texas, attending to a Pacific Railroad project.

A Cincinnati despatch of yesterday says:—H. Collins, editor of the Maysville Eagle, shot Luther Dobyns in the forehead at Maysville, Ky., to-day. The wound, it is supposed, will prove fatal.

A Charleston despatch of yesterday says:—The brig Wm. Penn, Capt. Hall, arrived from Matanzas for Boston, with molasses, was sunk on the 6th inst. between Cape Florida and Gun Key by the French bark Mauritius. The brig was insured.

A Hallet despatch of yesterday says:—The Hunkadori's are anxious to pass, and as nothing more can be saved, except one salvage. They invite all her materials will be sold—About half of her cargo will be saved—all thoroughly damaged, however.

Old Ironsides and Young America.—All religious men have long since heartily agreed with the rejoicings and gunpowder and peace and reconciliation with which brokendown old Ironsides was received on the seaboard of America, and with which rambling parsons, better-writers, and college-boys, after a running race to Europe, have treated everything but the pass. No language could express the contempt we feel for stylishing mistakes and literary spasms of this vast race—except the style and not-rainbow. How much better is the spirit displayed in the following notice from a letter in the New York Tribune, from the Hotel de Chelsea, the host of the most extensive publishing house in the world, who left this country for home, in the Europa, recently:—

I leave the United States with much regret, and I carry with me the esteem that a great and grateful nature at times does. England I shall visit for a few months, and then I shall leave a young but rapidly growing nation, having an example to the old governments of Europe. It is far from my wish to flatter; but what do I not find myself delighted in! I am overcome with the expansive generosity of the people, with the unbounded hospitality which has been shown to me, and with the universal kindness of the press. Whatever may be the faults of this country, they are undoubtedly overbalanced by the great virtues it possesses. Its institutions are in harmony with universal freedom; its people, with their unbounded energy, are destined to make gigantic advances in every department of civilization, and its literature will soon be the most extensive in the world. I am proud to be considered as one of them, and I am proud to be considered

Wave Festival at Pittsburgh.—The Whigs of Pittsburg held a grand festival at the Town Hall, Thursday evening, in honor of the late victory. A procession was formed of the Pittsburgh fire-men, under the Marshalship of D. M. Riddle, which marched to the hall, where a splendid supper was served. The hall was decorated with evergreens, and speeches were made by the Hon. John Covode, and others by Hon. John Ogontz, Esq., of the Wing Point Coal Company, Hon. Geo. W. Toby, Esq., editor of the Gazette, Hon. Geo. W. Wilson, Esq., editor of Pittsburgh, who responded to a sentiment complimentary to Gov. Chase; John J. Cox, Esq., of Allegheny, Hon. Jas. Pitcairn, Esq., of Pittsburgh, and others. The supper must have been fine. Robert C. Winthrop, Edward Everett, Hallett, and others. The entertainment was highly creditable to the taste, liberality, and generosity of the citizens.

Mass Convention.—The N. Y. Tribune's Albany correspondent says:—The Committee to which was referred the petition of Wendell Phillips and others, for the call of a convention to amend the Constitution of this State, so as to abolish the clause in the present Constitution which requires a property qualification of colored voters, met in the Assembly Chamber at 11 o'clock this morning, and determined to report adversely.

CITY MATTERS.

"Pirates and Conservatism."—The Courier Dutch is now ready to put into circulation a new edition of "Pirates and Conservatism." Night gleds.

Another Bank at Lowell.—Applications will be made to the next Legislature for a charter of a new Bank in this city, with a capital of $150,000, or $200,000. Subscriptions for stock, were opened this week, and about $90,000 has been taken in sums ranging from $200 to $1000. The Bank will be established in Nesmith's new Block, Merrimack street, fellow-townsmen may be sent at Cyrus Fisher's store, in said block.

Police Court.—Saturday, Dec. 17. Edward McDermott, a Southern child, was sent to the Workhouse for six months. Margaret Connolly, common drunkard, was fined $3 and costs.—Thos. Welch, for assault and battery, fined $3 and costs.

Charge or Murder.—The male department of the High School will be examined at 1 1-2 o'clock, and the female department at 3 o'clock, P. M., on Monday.

Wine Festivals.—We notice that our wide brethren in various parts of the State are celebrating the late glorious victories by festive gatherings. The subject has been broached in Lowell. What say our gallant whigs? Shall we or shall we not celebrate? Lowell has cause of rejoicing.

The Festival at the Fremont Baptist Society.—The Festival of the Fremont Baptists in the vestry of their new house of worship on Pagg street, Thursday evening, was largely attended and pleasant affair. The School, for whose benefit it was given, realized about $170.

Gift.—Mr. Andrew Leighton lost an overcoat at the picnic at the Baptist Church, on Paige street, on Thursday evening.

Mr. Andrew Leighton lost an overcoat at the picnic at the Baptist Church, on Paige street, on Thursday evening.

Boot Fight.—A beautiful little boy about five months old was left at No. 4 Lindell st., Boston, last night, wrapped up in an old pair of boots, and was found by a watchman, who carried it to the police office.

Judge Leigh, of Virginia, has decided that stage and railroad companies are responsible for the baggage of the passengers, notwithstanding notice is given "at passenger at the risk of the owner."

Twelve thousand bunches of apples have been forwarded from Canandaigua this season by railroad to eastern markets.

How to make a man smart. The Russians make wounded soldiers. A Russian soldier is frightened at the sight of a cannon, and a ball, hits a planet outside of a cannon, and dies on, and thinks the big gun is dead and he is not dead.

The Secretary of War puts the army, at home and abroad, at 18,591, but says that the dead and wounded are not included in this.

Cause and Effect.—The Manchester, N. H., Mirror says:—Warren F. Smith, the keeper of the Amoskeag Falls, has measured the water at eight inches high, but a dark cloud has passed over the sun, and the water has fallen to the level of the bottom of the female heart. He don't see the cause if he can only marry the lassie.

Wine Festivals.—We notice that our wide brethren in various parts of the State are celebrating the late glorious victories by festive gatherings. The subject has been broached in Lowell. What say our gallant whigs? Shall we or shall we not celebrate? Lowell has cause of rejoicing.

The Festival at the Fremont Baptist Society.—The Festival of the Fremont Baptists in the vestry of their new house of worship on Pagg street, Thursday evening, was largely attended and pleasant affair. The School, for whose benefit it was given, realized about $170.

Gift.—Mr. Andrew Leighton lost an overcoat at the picnic at the Baptist Church, on Paige street, on Thursday evening.

Mr. Andrew Leighton lost an overcoat at the picnic at the Baptist Church, on Paige street, on Thursday evening.

Boot Fight.—A beautiful little boy about five months old was left at No. 4 Lindell st., Boston, last night, wrapped up in an old pair of boots, and was found by a watchman, who carried it to the police office.

Judge Leigh, of Virginia, has decided that stage and railroad companies are responsible for the baggage of the passengers, notwithstanding notice is given "at passenger at the risk of the owner."

Twelve thousand bunches of apples have been forwarded from Canandaigua this season by railroad to eastern markets.

How to make a man smart. The Russians make wounded soldiers. A Russian soldier is frightened at the sight of a cannon, and a ball, hits a planet outside of a cannon, and dies on, and thinks the big gun is dead and he is not dead.

The Secretary of War puts the army, at home and abroad, at 18,591, but says that the dead and wounded are not included in this.

Cause and Effect.—The Manchester, N. H., Mirror says:—Warren F. Smith, the keeper of the Amoskeag Falls, has measured the water at eight inches high, but a dark cloud has passed over the sun, and the water has fallen to the level of the bottom of the female heart. He don't see the cause if he can only marry the lassie.

GENERAL SUMMARY.

☞ The News says that William A. Porter, the late popular clerk of the Police Court, left a day or two since for Fort Washington. Wherever he has taken up his residence. We hope he will be as successful in making friends as his new business, as he has been in Lowell.

☞ Lieutenant Governor Talbot, Right Honorable, sailed, says the Cincinnati Commercial, who have decided to that city since the cold weather set in in the fall, have held several meetings lately, opened a [illegible] with the Central Committee of New York, and will [illegible] ready to embark for Constantinople at three day's notice. Most of these refugees were driven to the last Hungarian revolution, of education and varied accomplishments. They have supported themselves while in Cincinnati in honorable and honest ways.

Murder Prevented. Constable Henry C. Hunton and Watchman Hamblen, of Boston, arrested a man named Thomas Green, on a warrant, for throwing the life of his wife. The parties had lived separately, the wife being in the house of Chas. Turvey, No. 2 High street, in that city, whither Green proceeded on Thursday evening, to carry out his threat. The officers were, however, in waiting, and took him into custody. He was taken before Judge O. Cahoon, and his wife was probably his intention to commit suicide. In the Police Court, yesterday, he was held in $1000 to answer for his offence.

Reserve. In the following sentence, from yesterday's leader, the words in italics were omitted in the proof for the sake of the [illegible] of the original sentence—Georgia exception—which gained a number by that [illegible] ...

Offence. Thomas Cassidy, whose name is [illegible] made a desperate attempt on Miss Mary Ann Jones, of Scotland, on a recent evening, but was prevented from accomplishing his fiendish purpose by the sudden appearance of the lady's brother. Mr. Jones displayed considerable muscle in wrestling with the villain, and giving him by the jaw, until assistance came.

Reserve. In the election of Beverly Tucker, secretary to the Senate, Mr. Hunter has obtained a still modest rebuke for his rascally attempts to intimidate the Senate of the United States. He it was who, a short time since, through the columns of his paper, the Union, impertinently and insolently threatened that if Senator Seward "dared" to vote against Mr. Bell's confirmation, it would be to that Senator, Seward, "a personal and political, case of regret the end of existence."

☞ The Norwich Courier announces the failure of A. E. Peabody, for the retail of the Norwich Bulletin, which was, who is charged with very large amount of the [illegible].

☞ Judge Leigh, of Virginia, decided that stage and railroad companies are responsible for the baggage of the passengers, notwithstanding notice is given "at passenger at the risk of the owner."

☞ Twelve thousand bunches of apples have been forwarded from Canandaigua this season by railroad to eastern markets.

How to make a man smart. The Russians make wounded soldiers. A Russian soldier is frightened at the sight of a cannon, and a ball, hits a planet outside of a cannon, and dies on, and thinks the big gun is dead and he is not dead.

Lowell, Monday, December 19, 1853.

Gen. Pierce's Intrigues for the Presidency.

Alas for us! when the highest post on earth becomes the game of base "tricksters" and card-playing politicians. When Franklin Pierce received the nomination of the last Baltimore Democratic Convention, ninety-nine hundredths of the people actually believed that his nomination was an "accident." No one supposed it the result of a deep laid plot, as base as any that was ever expiated by a Catiline. Even Cass, Douglass and Buchanan, expressed their satisfaction at the nomination.

But, as is well said by another, "time has rolled on, and the threads in this net-work of New Hampshire cunning are one by one revealed." It is now certain that Generals Pierce, Cushing and Pillow, spent the whole of the last Sunday before the meeting of the Baltimore Convention, at Cushing's residence in Newburyport. That Gen. Pierce was incessantly at work, from the death of Hon. Levi Woodbury, in September, 1851, up to May, 1852, in order to secure his own nomination, we now doubted. The death of Gov. Woodbury was as fortunate a circumstance for him as that of Silas Wright was for Gen. Taylor, and the body of Gov. Woodbury was hardly cold in death before the intriguing friends of General Pierce redoubled such exertions as were going on even before Gov. Woodbury's decease, and as the sequel proved, with entire success. Of these movements, the worst that has been supposed by that very small number of people who are aware of the subterranean work performed in Concord by New Hampshire politicians of the stamp called democratic, was that those operations were going on with the knowledge, and, of course, by the consent of Gen. Pierce himself. It has now become certain that he by no means was so passive an agent as merely knowledge and consent were concerned; but that, on the contrary, he was chief engineer in operations through which Gen. Cass and Messrs Buchanan and Douglass, were blown up—the two first for ever, and the last to come up, if at all, only as a damaged candidate.

In one of the numbers of his *Old Guard*, Hon. Edmund Burke, of New Hampshire, says that for months before the Democratic National Convention met he became convinced that neither Cass, Buchanan, nor Douglas could get the nomination, and that the convention would agree upon a compromise candidate; and he was satisfied that Pierce stood a better chance than any other man. "But his only chance," says Mr Burke, "was to keep him out of the ring of competitors, who were sure to destroy each other." He then goes on to expose the wires which he set in operation to secure the nomination. After alluding to his extensive acquaintance with the Democratic politicians throughout the country, and of the opportunities which his residence at Washington gave him to see many of them, he says—

"For months before the Baltimore Convention, we took especial pains to see and converse with those gentlemen upon the subject of the Presidential nomination. We took pains on all occasions, to suggest the name of General Pierce, as a compromise candidate, in the event that the Convention should not agree on either of the three prominent gentlemen above named in connection with that office. We saw and conversed with from fifty to one hundred of the leading politicians of the Union upon the subject, on all occasions introducing the name of Gen. Pierce. After satisfying our own mind that Gen. Pierce could be nominated, we wrote to Gen. Pierce our views and opinions at length, expressing our belief that he could be nominated. He answered our letters.

We also communicated the project of the friends of Gen. Pierce to the shrewdest and ablest letter-writer at Washington, and procured him to throw out in the papers to which he corresponded, the idea that, in the event of a failure by the Convention to nominate either Cass, Buchanan or Douglas, Gen. Pierce would be brought forward by his friends as a compromise candidate. That gentleman did as we requested, in several adroit and ingenious letters, published in the Philadelphia Ledger and Baltimore Sun, which were neutral papers, and therefore the best mediums through which to communicate such designs."

Mr Burke goes on to say that about four weeks before the Convention he came home and corresponded with General Pierce in relation to his nomination. The latter desired that the delegation from New Hampshire should meet at Concord to consider the matter, and requested Mr Burke to write to some of the delegates and request their attendance. This Mr Burke did, but was unable to attend the meeting himself. In a letter, however, he suggested a plan of operations. General Pierce replied to this letter, acknowledging its receipt and stating that the delegates present concurred in its views. What that plan of operations was will appear presently. Shortly after, Burke and General Pierce had an interview, at the request of the latter, and fully discussed the plan, *which was carried out almost to the very letter at Baltimore.*

In the following extract, Mr Burke fully exposes the cunningly devised scheme which, under the artful management of shrewd politicians, secured the nomination of Gen. Pierce as the Democratic candidate for the Presidency:

"At that time Gen. Pierce expressed his desire that our delegation should not cast its vote unanimously for any one candidate before the Convention. The reason he assigned was, that in consequence of the high character for fidelity to principle which the Democracy of New Hampshire enjoyed among their brethren of the Union, the united vote of her delegation, though small, would have a greater moral force than the votes of delegations much larger in numbers; and if given for any leading candidate in the outset, would endanger the ultimate end we had in view.

We then went to Baltimore, having some weeks previous engaged rooms for our entire delegation at the Eutaw House, one of the best hotels in that city. The Convention assembled, and throughout the session we exerted every energy to carry out the wishes of Gen. Pierce. On some of the first ballots I gave my vote for Mr Douglas, in accordance with what I knew was Gen. P.'s express desire in regard to our delegation giving a united vote. Subsequently we all united on Gen. Cass; and then we again divided, Mr Atherton and myself voting for Mr Buchanan, and our colleagues voting for Gen. Butler, of Kentucky. At length the delegation from Virginia introduced the name of General Pierce, and *then our delegation gave him a unified vote until he was nominated.* These facts the records of the Convention abundantly prove."

In continuation, Mr Burke speaks of his own services after the nomination, and says among other things, that he, "in co-operation with an ardent and distinguished [illegible] aided in inducing Kossuth to take ground in favor of the Democratic nominee, which he subsequently did."

The remainder of the article is occupied with an exposition of the personal relations which have existed between Burke and Gen. Pierce since the nomination. The article, it will be remembered, is in reply to the reports industriously circulated that the General was personally hostile to Mr Burke. In this connection an extract from one of the private letters of Gen. Pierce is given, in which he says:

"*I can state distinctly that the charge that I am your enemy has, so far as I know, no foundation in any word or act of mine.*"

Subsequently Gen. Pierce personally assured Mr Burke that he did not countenance the reports. Mr Burke says, "we prefer to believe that he is a man of truth and honor, and that they [Butterfield, George, and others who have circulated the reports] are base and infamous calumniators of both him and us."

Our readers can put their own interpretation on the following sentence:

"We have seen several Presidents in our day. And we have learned to look upon them as men, and not as gods. We approach them with no fear nor trembling. They are men, but the office which they fill is the most exalted of human honors. It represents the majority of the people, and whoever fills it is entitled to the respect of the people while in office.—But there is one character far above that of President; it is the GENTLEMAN. That implies truth, honor, integrity, and justice.

A President personally may be without those eminent qualities, but a gentleman never. The President who represents and carries out our principles will have our political support if he is no gentleman. The pretended friends of Gen. Pierce would attempt to show that he was destitute of truth and honor, and therefore no gentleman. We prefer to believe that *they* are of that character, and not he. The facts we have above enumerated, go to show they are the ones who are destitute of truth, integrity, and honor, and not General Pierce."

It will be well for our readers, says an exchange, remarking recently on this subject, to bear in mind, that notwithstanding General Pierce was diligently employing every means by which to procure his own nomination; that he was not only aware of movements in his behalf, but actually directed the stealthy processes by which Cass, Buchanan and Douglas, were used merely as instruments of his own success. It is well, we repeat, to bear in mind that notwithstanding all these procedures, the impression was kept up previous to and after the Baltimore Convention, that nothing would afford so much pleasure to the party in New Hampshire as the nomination of Gen. Cass.—Files of the New Hampshire Patriot contain numerous evidences to this point. And Gen. Pierce, notwithstanding he, in a sense, neither slumbered nor slept for months before the Convention, and had omitted none of the arts of which he is admitted to be a skillful master, in order to lay flat Messrs Cass, Buchanan and Douglass, dissembled to the last. The Lally letter, circulated privately among the members of the Convention, containing, in substance, amongst other expressions, the declaration, "My name will not be before the Convention," was in all probability one link in the chain by which the intriguers effected their designs;—and, coupled with the words of the General to Col. Barnes, (who went to apprise him of his nomination) uttered amidst the tombs of Mount Auburn, "*You could not have notified a more surprised man,*" led the country into the belief that he was utterly taken by surprise, when on the contrary, he was the chief agent in the whole affair. A more stupendous act of duplicity and intrigue was never unfolded upon this continent; never was the American public so completely taken off its guard; and never before was a candidate for the Presidency revealed to his countrymen in so undesirable a light.

This political revelation, and others which will without doubt succeed it, will be the subject of newspaper discussion and public thought for a long time to come. What their effect will be, remains to be seen. That the country will be amused by the adroitness of the operation, there is no doubt. But what opinion will the people form of their Chief Magistrate, after this and succeeding proofs of his intrigue and dissimulation? Putting the Revelations by Edmund Burke in connection with the Lally Letter and collateral circumstances, what will be the conclusion inevitably reached by all who regard open, above-board conduct as one of the most desirable elements in the character of every citizen—much more in him called to rule over a great and powerful nation? Without predicting the effect upon Gen. Pierce, it is certain that neither Daniel Webster nor Henry Clay, had they the heart to play such a game—which is not, in fact, supposable for a moment—could have outlived the odium which would have rested upon them, if detected in weaving such a net as Mr Burke displays to the gaze of his countrymen. As we seem to have reached, in the order of events, a period when lesser men than those whose light was so recently extinguished forever—such men as Webster, Clay, Calhoun, and others who might be named—are to be upon the stage, and leaders in both the Whig and Democratic parties—it would be a merciful dispensation of Providence to give us for rulers those only who will reach the highest office in the gift of the people with clean hands and an honest heart, and who will regard even the Presidency as an empty bauble, if to purchase it the aspirant must adopt such means as are now unfolded.

TELEGRAPHIC. A New York despatch of yesterday says: A letter from Washington states that Gen. Wool has been ordered to the military division in California, to supercede Gen. Hitchcock.

Street preaching was held this afternoon by Rev. Mr Parsons, and three or four other speakers. No attempt was made to arrest them, and no disturbance occurred; 20,000 persons were present. Three regiments were under arms all day.

A Baltimore despatch of yesterday says:—The New Orleans papers give details of Mexican news. The only important item is a statement that the plan of Guadalajara, relative to the prolongation of Santa Anna's power, has been seconded by the capital and other cities. A proclamation to that effect, issued by the governor of the city of Mexico, was received with great demonstrations of joy by the citizens.

Judge Mason, minister to France, and Gov. Seymour, minister to Russia, will sail in the steamer from New York on Saturday.

A Pittsburg despatch of the 17th says: The United States circuit court has refused the injunction of the Cleveland and Ashtabula Railroad against the city of Erie and others.

In the case of the Buffalo Railroad against the Erie and North-eastern Railroad, the city of Erie, and others, the injunction has been granted.

A Chicago despatch of the 17th says: A bloody riot took place yesterday at Lasalle, among the laborers on the Illinois Central Railroad, owing to a reduction of wages. It began by an altercation between Albert Story, a contractor, and a party of Irishmen, during which one of the latter was shot dead. Shortly afterwards Story's office was attacked and pillaged, and Story, himself, who had fled to a barn, brutally murdered, his body being shockingly mutilated. Mrs Story was also fired upon, but escaped injury. It is reported that Mr Dunn, Story's partner, on the other side of the river, has shot nine laborers. The sheriff of Lasalle county was present, and succeeded in arresting thirty of the rioters after shooting one dead and wounding two others. The ringleader has escaped.

A Troy despatch of the 17th says: Foster Hosworth sent into the Common Council his resignation to-night, as Mayor, which was accepted.

CITY MATTERS.

"PRIVATE AND CONFIDENTIAL." The Courier Bank is now ready to put into circulation a new emission of *five dollar bills*, executed in better style than any ever before issued. Each Courier subscriber is entitled to one of these bills as a *keepsake*. "First come, first serve." Bank hours from 7 A. M. to 9 P. M.

CHRISTMAS this year falls on Sunday, and we have often heard it asked, will the mills stop on the Monday following, as is the custom when the 4th of July falls on the same day of the week? We have it on the authority of one of the Agents, that the mills will not be stopped on a week-day for the keeping of Christmas. This is in accordance with all past custom. Christmas is a strictly religious festival, and can be kept as well on the Sabbath as any other day of the week. There is an impression in the community that the corporations are obliged, by a restriction in their charters, to stop the mills four days in the year. There is no such restriction in any charter. It is only on such days as are appointed by the Governor, such as Fast and Thanksgiving, when the mills are obliged to be stopped.

MADAME SONTAG. To-night this distinguished vocalist, assisted by Paul Julien, Alfred Jaell and Signor Rocco, gives a concert in this city. The great musical talent here arrayed, cannot fail to draw out a full house. Our music loving citizens have never before in this city had an opportunity of listening to a singer of such celebrity. Tickets for the concert can be obtained during the day at Merrill & Straw's, and in the evening at the door of the Hall, at the entrance on Shattuck street. Reserved seats must be secured during the day.

SPLENDID. Miller, the celebrated Daguerreian Artist, has taken a splendid picture of Ocean Hydrant Hose Company and carriage. See card of the company in another column.

For the Journal and Courier.

Term of Service—Reform.

Messrs Editors:—I regretted to see the avowal in your paper, a few days since, that there never had been an understanding in the Whig party that any man should hold an office two terms in succession. Such an avowal does not agree with the facts, as I know from twenty-four years' residence here. Whether it does or not, however, is not material to the point at issue. All will agree, that where no serious objection is raised against a citizen, that he takes the office for a second term much better qualified to fulfil its duties, and to repay the confidence of his fellow-citizens. The agreement in any party to nominate the same man for re-election, is a strong recommendation of that party to the favor of the people.—It evinces a high and honorable interest in the public good. No real advantage can accrue to any great purpose, without experience in that department of life which is to be benefitted,—and how is that experience to be gained? Only by service in the cause.

How many men with ultra and radical notions of government and its functions, while out of office, when once elected to discharge its duties, become suddenly and eminently conservative! While out, they felt none of that personal responsibility which office is sure to bestow. They were impelled by a current of opinions, and were supported by a multitude. They have not yet attracted the scrutiny of a jealous public, and of every envious friend. They are elected. With some, then comes circumspection, distrust, and its train of halting opinions. Character, under such circumstances, if ever, stands out boldly, and challenges scrutiny, for an independent mind fixes itself upon principle as a sheet anchor.—The storm of opinions may lash in fury around it, without starting it from its moorings. Soon the waves subside, and our barque floats safely on the bosom of an unruffled sea. The first term of office may be a stormy time, but a second term is like the blessing of a true friend—it thanks you for the past, and bids you God speed for the future. The confidence it indicates, crushes all petty malice and leaves the mind free to work.

Most of the important offices in the nation have been wisely regulated with longer than annual terms of service—those of the highest importance, extend to the term of life.

The discussion of this subject leads me to State Reforms. Having attended the Whig Convention at Fitchburg, it was a source of congratulation, I noticed, among its members, that the party pledged itself in favor of certain essential State Reforms; and I trust when our representatives meet in the Capitol at Boston, those pledges will not be forgotten. Among other matters, the subject of a longer term than at present, for the Chief Magistrate of the State, should receive their candid attention.—The members of our Legislature should be relieved, for one year at least, of the anxieties and troubles incident to the task of deciding who shall be the Chief Magistrate for another year, and thus be more favorably disposed to accomplish their legitimate business. It would be a reform in the true sense of the word,—but I am not about to discuss its merits. That I leave to abler pens.

AN OLD WHIG.

☞ The re-election of Mayor Mack is considered as a victory of the liquor interest over the Massachusetts law.—[Portsmouth, N. H., Chronicle.

Not exactly so, Mr Chronicle. Mr Mack was nominated and elected last year, and re-nominated and re-elected this year as a good and TRUE WHIG. He is a patriotic, honest man—knowing no "interest" but the public good. He will do his duty, his whole duty, and nothing but his duty.

THE CONSTITUTION. The Committee of the Constitutional Convention to count the votes on the defeated Constitution, meets to-day at the State House. It consists of the following gentlemen:—Nath. P. Banks, jr., of Waltham, Chairman, and Messrs. Boutwell for Berlin, Dana for Manchester, Giles of Boston, Morton of Andover, Upham of Salem, Butler of Lowell, Wilson of Natick, Griswold for Erving, Frothingham of Charlestown, Wood of Middleborough, Hillard of Boston, Aspinwall of Brookline, Chapin of Springfield, Sleeper of Roxbury, Allen of Worcester, French of New Bedford, Oliver of Lawrence, Eames of Washington, Phinney for Chatham, and White of Quincy.—*Long* and *pale* faces will be quite abundant to-day.

☞ The Lowell Christian Era and the Portsmouth, N. H., Chronicle are engaged in a controversy on the question, whether a minister may, in keeping with good taste, deliver a sermon instead of a lyceum-lecture, when invited to do the latter. The Chronicle says "a lyceum lecture ought not to be a sermon;"—the Era, that a minister may be "allowed to bring his profession into a public lecture, as well as a lawyer or a physician." "Who shall decide when doctors disagree?"

GENERAL SUMMARY.

☞ Both branches of Congress having adjourned from Thursday till Monday, we of course received but little news from Washington.

DIVORCED. Herman Kimball, of Haverhill, has obtained a divorce from his wife Harriet, who a few months since strayed with a clergyman into Boston, and were obliged to visit the Police office, for adultery.

CONSTITUTIONALLY COOKED. The Whigs of Northboro' are to have a jubilee supper on Wednesday evening next. In a letter to a friend in this city, the writer says: "We shall have some good whig turkies, *constitutionally* cooked." We propose to test the quality of *them turkies*.

CLERGYMAN ARRESTED. On Saturday night last, the deputy Sheriff of Groton came to this city and arrested Jacob W. Cooper, a clergyman preaching to a mixed congregation of different denominations, at Groton Junction.—The Rev. gentleman, it appears, had paid his addresses to two young ladies of his parish, and had promised marriage to them both, and one of them caused his arrest in this city, whither he had come to preach on Sunday, at St. Paul's Church, Hurd st. The Sheriff, accompanied by the parents of the young ladies, called Cooper up after he had retired for the night. He is about 26 years of age.

☞ The trial of Mr Tucker, (the engineer who ran the train into the river at Norwalk,) has been still further postponed, on account of the feeble state of his health.

☞ Hon. Thomas Corwin has been elected President of the Cincinnati and Cleveland short line railway.

☞ A cotton factory has just been erected near Monticello, in Florida, for the manufacture of osnaburgs. This is the third establishment of the kind in Middle Florida.

TO BE EXECUTED. Clough, convicted of murder at Fall River, nearly a year since, will soon be executed under the law requiring a year's confinement in State Prison. The year will expire in a few days, when the executive will probably appoint a day for his execution.

THE CANALS. We learn from the Albany Register of Saturday, that it is the intention of the Canal Commissioners to suspend navigation on the canals on the 20th inst.

GREAT EXPLOSION. By the explosion of an engine-boiler in the foundry of Nicholson & Paine, at Pittsburg, on Tuesday last, the roof of the building was torn off, and two walls of the engine room thrown down. The boiler was thrown into the river by.

A NEW TOWN. Portions of West Cambridge, Watertown and Waltham, are shortly to be set off and form a town, under the name of Waverly.

☞ We learn from the Springfield Republican that indictments for murder have been found against Sands, the negro, who murdered his brother on the Hill, and Smith, the Irishman, charged with the murder of his wife, at Chicopee.

ACCIDENT TO A BLIND MAN. Mr Lewis, who has for some ten years sawed the wood of the Fitchburg Railroad, at the depot in Concord, had one of his hands sawed off the other day by accidentally placing it against the saw. All the fingers were cut off and barely held on by a portion of the skin. The parts were replaced in the hope that the wound might heal.

ARRESTS. Five of a gang of robbers have just been arrested in Boston. Their operations have extended to Salem, Lynn, Roxbury, and other places.

☞ The New York Tribune, which has been one of the foremost champions of a high tariff, seems inclined to abandon the doctrine of "protection for protection's sake," and to become a moderate trader. Go it, Horace.

ON DIT. That Hon. C. C. Hazewell, editor of the Boston Times and "Algoma" correspondent of the New York Herald, has terminated his labors for the latter paper. We have not seen a letter of his in the Herald for several weeks. "A silent guillotine."

AMERICAN HOUSE, BUFFALO, N. Y. A friend of ours, who has just returned from a western tour, and who knows well what are the prerequisites of a good hotel, assures us that the best conducted public house he visited was the American, kept by Mr Hodges at Buffalo. We have heard good reports from this house before. Mr Edwin B. Bullens, a Lowell man, is the officiating clerk of this establishment, and is an invaluable assistant in its good management.—To his superior qualifications and untiring devotion to the comfort of visitors, this model hotel is largely indebted for its good name and fame.

SUPPOSED SUICIDES. Two young women named Annette Sampier and —— Burnham, were found dead in their beds at the Merrimack House, in Newburyport, on Saturday morning. They were ladies of dubious virtue; or, as Carlyle would say—"ladies on whom virtue sat easily, by no means incommoding."

TERRIBLE. The Brattleboro' (Vt.) Eagle gives the following particulars of a railroad accident of a peculiarly painful nature which happened at Whitehall on the 3d inst: "As the train was crossing the bridge near that village, the engine and tender were thrown off, from some cause, and the legs of the engineer caught between the two in such a way that he could not be extricated. The fire from the engine was scattered over him, and in his agony he begged for some one to kill him. No one being willing to relieve him in that way, and every other attempt to release having failed, he took a knife and cut off his own leg at the knee-joint. The terrible operation was too severe to be endured, and he died in about ten minutes."

FATAL RAILROAD ACCIDENT. We learn that on Saturday afternoon, about 3 o'clock, an unknown Irishman was run over at Waltham by a train on the Fitchburg Railroad, and had both legs broken. He died in about an hour. The accident was caused by an attempt to avoid one train, while another was approaching in another direction.

MURDER BY BOYS IN PITTSBURG. At Pittsburg, about 11 o'clock, Dec. 16, a man named Henry Carson, who worked in the Sligo Iron Mill, was found in a dying condition on Monongahela bridge. He had been stabbed several times in the abdomen, and three boys who were seen going in the same direction, about the same hour, have been arrested. A knife with blood on it has been found on one of the boys.

MURDER TRIAL. John Murphy of Fall River, will be tried at Taunton during the present week, for the murder of his wife. It will be recollected that he resorted to the fiendish cruelty of tying his wife upon the bed, and pouring vitriol down her throat.

☞ Mrs. George Ashman has attached the Springfield Post for libel in alleging that he had fraudulently obtained from the government an appropriation of $5000. The article was written by Charles Stearns, and the grand jury had refused to find a bill upon Mr Ashman's complaint.

☞ The question of appropriating money to erect a monument in memory of Mr Calhoun, has recently been rejected, for the second time, by the Legislature of South Carolina—just as the proposition to build a monument to Mr Webster was rejected by the Massachusetts and New Hampshire Legislatures—and for kindred reasons. South Carolina has abandoned Mr Calhoun's principles—if indeed she ever fully endorsed them; she never adopted the practice of building monuments to her great men; and her treasury is in an exhausted condition.—Like Webster, like Clay, like Adams, Mr Calhoun has left behind him speeches and works, which be to him *monumentum aere perennius.*

GREAT LAW CASE. The Hon Reverdy Johnson has been employed by the Governor of Florida to assist Mariano D. Papy, the Attorney General of that State, in arguing the boundary question between Florida and Georgia, which is to come up before the Supreme Court of the United States at the present term. The counsel for Georgia are Judge Berrien, of Ga., and Hon. Geo. E. Badger, of N. C.

BIGAMY. The Albany, N. Y., Transcript says—"Mrs Gertrude Kohler, a lady of German extraction, was charged with making a small arithmetical mistake, by retaining two husbands more than the regular and legal allowance."

MORE BIGAMY. The Manchester (N. H.) Mirror chronicles another case of bigamy by a man who has one wife in that city and another in New York.

☞ It is stated on competent authority, that the rumor that our Minister at Mexico had threatened to seize the Mesilla Valley unless the Mexican government confirmed the Garay grant, is without foundation.

☞ Frederic Douglas and Wm. Lloyd Garrison are peppering each other severely. Douglass's lash cuts the deepest.

☞ There has been a heavy storm sweeping over Louisiana and Mississippi, doing a vast amount of damage.

☞ The Baltimore Board of Trade has devoted $1741 17 to the association for the relief of the poor in that city.

☞ A bill for the establishment of a system of common schools is now under consideration for the first time, in the Texas Legislature.

☞ Eighty negroes, en route for Liberia, had arrived at Savannah on Thursday, mostly from Tennessee.

☞ Father Gavazzi is lecturing in Washington. His first lecture was not very fully attended.

☞ Several cases of small pox have occurred in Charlestown.

DR. M'LANE'S LIVER PILLS.

☞ When the proprietor of this invaluable remedy purchased it of the inventor, there was no medicine which deserved the name, for the care of Liver and Bilious complaints, notwithstanding the great prevalence of these diseases in the United States. In the South and West particularly, where the patient is frequently unable to obtain the services of a regular physician, some remedy was required, at once safe and effectual, and the operation of which could in no wise prove prejudicial to the constitution. This medicine is supplied by Dr M'Lane's Liver Pills, as has been proved in every instance in which it has had a trial. Always beneficial, not a solitary instance has ever occurred in which its effects have been injurious. The invention of an educated and distinguished physician, it has nothing in common with the quack nostrums imposed upon the public by shallow pretenders to the medical art. Experience has now proved, beyond a doubt, that Doctor M'Lane's Pill is the best remedy ever proposed for the Liver Complaint.

_ Purchasers will be careful to ask for Dr. M'Lane's Celebrated Liver Pills, and take none else. There are other Pills, purporting to be Liver Pills, now before the public.

Dr. M'Lane's Liver Pills, also his Celebrated Vermifuge, can now be had at all respectable Drug Stores in the United States and Canada.

FURS! FURS!!

E. PACKARD has opened at 116 Merrimack street, the largest and most magnificent stock of FURS that were ever before offered for sale in a retail store in the United States. And what is better, every article is NEW, having been purchased this season. No person in want of Rich Furs should fail to visit Packard's store and examine his mammoth stock. He having had some ten years' experience in the Fur business, Ladies may be assured if they purchase Furs of him, they will get good goods and at lower prices than elsewhere. As he buys larger quantities than any other trader, he buys cheaper, as a matter of course, and will sell CHEAPER than any one else—as usual.

N. B. Ladies, be sure you are in Packard's store before you purchase your Furs, as some were deceived last season, and bought at another store, thinking they were buying at Packard's, and were made to pay much higher prices for the same quality of goods. oct19d3m

GRATIS!

Just Published—A New Discovery in Medicine!

A FEW WORDS ON THE RATIONAL TREATMENT, without Medicine, of Spermatorrhea, or Local Weakness, Nervous Debility, Low Spirits, Lassitude, Weakness of the Limbs and the Back, Indisposition and Incapacity for Study and Labor, Dullness of Apprehension, Loss of Memory, Aversion to Society, Love of Solitude, Timidity, Self Distrust, Dizziness, Headache, Involuntary Discharges, Pains in the Side, Affection of the Eyes, Pimples on the Face, Sexual and other Infirmities in Man. From the French of Dr B. De Lanney.

The important fact that these alarming complaints may easily be removed WITHOUT MEDICINE, is, in this small tract, clearly demonstrated; and the entirely new and highly successful treatment, as adopted by the Author, fully explained, by means of which every one is enabled to cure himself perfectly, and at the least possible cost, thereby avoiding all the advertised nostrums of the day.

Sent to any address, gratis and post free, in a sealed envelope, by remitting (post paid) two postage stamps to Dr B. De LANEY, 51 Lispenard street, New York. New York, Nov. 10, 1853. dec17tf

FIFTEEN DOLLARS ONLY
FOR A
BEAUTIFUL COUNTRY RESIDENCE!
Located South of the Railroad to Lakeland Village and adjoining.

WHERE a new Church and a number of private dwellings have already been erected, and several more are now being erected, and crops of almost every kind may be seen growing equal to any on Long Island, and very near Lakeland Station. Lots ... 100 Farms will be distributed among 100 subscribers on the Evening of the 31st of December. Each subscriber, for only $15, will receive a warranty deed ... A few Farms of from 5 acres and upwards can now be had if applied for immediately, at from $20 to $50 per acre, and as it regards the quality of the soil, I refer to a statement which was made at the American Institute, at a regular meeting of the Farmers' Club, on the 21st of June last, and without any knowledge of mine: "With respect to Long Island Lands which had been so much talked of at the last meeting, Mr. Meigs ... the subject of a sandy soil,' the following fact was recorded:—A gentleman has bought from one to two thousand acres on the south side of Long Island, about 47 miles from New York, where the land is no better, if as good, as about Lakeland Station. He has since raised ... acres ... He estimates the carrot crop at eight hundred bushels per acre, worth from 20 to 40 cents per bushel, or from six to seven thousand dollars for the crop. Mr Ireland, who has a farm in the vicinity, thinks the Lakeland Station land is still better than his."

As but a short time is left to procure a share in these lots and farms, a few only being left, (the books will be closed in a few days,) application should be made immediately to CHARLES WOOD, No. 208 Broadway, New York, or to L. J. FLETCHER, No. 25 Central street, Lowell, Mass., where Maps and Pamphlets can be had gratis. nov23

SAFETY FLUID LAMPS,
INVENTED BY Prof. HORSFORD AND Dr. NICHOLS, of Cambridge and Haverhill.

THESE Lamps are different from all others. Made of glass, they are lined on the interior with metal, presenting tight like burnished silver, and forming a complete protection against breakage. It is well known that more accidents have been caused by BREAKING Lamps than by their bursting; hence the importance of Lamps such as these. They may fall and the glass be broken to pieces yet not a drop of Fluid will escape; and by the wire gauze arrangement in the interior they cannot, by any possibility EXPLODE. They are therefore indeed

SAFE SAFETY LAMPS,

and as such they are commended to general use, especially to families where there are children.

BUILDING LOAN AND FUND ASSOCIATION.

ASSOCIATIONS of one kind, having in view the accumulation of a fund for the benefit of the members, are generally understood. They are the means of enabling a number of persons to contribute a small sum monthly, which, in the aggregate, will amount to a sufficient fund by which each one may purchase the home of his choice. The Building Loan and Fund Association of Lowell, is for the benefit of its members, and is conducted on principles which have been tested by experience, and which will not be abandoned as it grows. Loving the principles of the Union, and the prosperity of the city in which we live, we have established this Association, and invite the co-operation of others—having all the advantages and securities of a New Jersey Association, and none of the disadvantages. Any one can become a member by subscribing for shares, at the regular monthly meeting, or by application to the Secretary at any other time. Shares are $100 each.

Office in the Exchange Building, Merrimack Square.

The Rules of the Association and Subscription Lists may be found at the Post Office, Bookstores, and at the Secretary's office.

Lowell, Oct. 6, 1853. SAMUEL HADLEY, Secretary.

MORTIMORE'S RHEUMATIC COMPOUND.

THIS truly celebrated remedial preparation, effectually relieves the most confirmed cases of RHEUMATISM, within the short space of one week. SARSAPARILLA

SARSAPARILLA

SARSAPARILLA

SARSAPARILLA

BITTER CORDIAL

AND BLOOD PURIFIER.

The invaluable properties have obtained a popularity over other preparations of Sarsaparilla, which the public are not slow to appreciate. The result is, that the sales are unprecedented, and the Proprietor is constantly receiving testimonials of remarkable cures, from individuals who have used it, and have noticed its effects in restoring Health, Strength, and Vigor.

Restoring the Nervous System,

more than any other medicine, is the immediate report of almost every one who has taken it. Its power over the Nerves is truly wonderful, and in all cases of Nervous Debility, Prostration and Hysterics, it is effectual.

ALTERATIVE AND BLOOD PURIFIER

Is what it is. No one can take it according to the directions for any length of time, without being entirely cured of Scrofula in any of its forms, Erysipelas, Pimples, Blotches, Boils, Tumors, Ulcers, Sores, Scald Head, Sore Eyes, Rheumatism, Dyspepsia, or any disease of the Blood, Liver, Stomach, or Kidneys. Right Side Pain, Female Complaints, especially those arising from a Scrofulous habit, Fever and Ague, Intermittent Fever, Debility, Indigestion, especially at the Stomach, Piles, Dropsy, Jaundice, Dizziness, and all the Nervous Affections of the System. These Complaints are readily removed by the use of this Compound.

For the Secretary it has proved itself

THE BALM OF GILEAD.

ESPECIALLY TO FEMALES.

In every community there are females who, if questioned, would say that they are "sickly"—always sick, or else so nervous that they are miserable. Such persons should use SARSAPARILLA.

Those who are troubled with Pimples on the face, or Blotches on the body, should use SARSAPARILLA.

Those who have Ulcers, Sores, or Boils, may be assured that SARSAPARILLA will remove the cause, and cure them.

Those who have Scrofula in the system, may be sure that SARSAPARILLA is the best remedy that can be used.

Those who have Rheumatism, should use SARSAPARILLA.

Those who have Erysipelas, should use SARSAPARILLA.

I am dead. I bowed assent. He looked at me again and said,—"Do you understand?" I repeated—yes sir. "The will! be sure about the counties being counted." I bowed. He breathed heavier and heavier, and died.

—he would not have his hand from mine, my own girls. I spoke to him of what he had done for the—he came to the battle-field—I took it in mine and pinned it on my breast. Dr Craig pinned his hand upon his breast and died without a struggle or a sigh.

While my children gazed in silent grief, Mrs Washington asked in a firm and collected voice—"is he gone?"

THE PRESIDENT AND THE BALTIMORE PLATFORM—RECREANCY OF THE ADMINISTRATION—THE UNDERSIGNED AND OTHERS AGAINST THE ADMINISTRATION PRESS.—If any principle ruled the election of President Pierce—which election, as we had occasion to show yesterday, was achieved more by *chance intrigue* than by any principle whatever—it was the principle of the compromises of the platform of the last Democratic Baltimore Convention. General Pierce was supposed to be pertinently silent on the question of the compromises; Gen. Scott was suspected to be lax. Theodore Parker, Horace Mann, Wendell Phillips, Frederick Douglass, in fact, all the abolition orators, from Charles Sumner down to Anson Burlingame, proclaimed that if Gen. Pierce was elected, we should have "a strong pro-slavery administration!" out if Gen. Scott, then, "a moderate pro-slavery administration." After the election of Pierce, Nov. 4th, the Boston Post distinctly said:—

"But with the secession to power will come occasion to responsibility, as to the democratic party. How will its representatives meet this responsibility? How *might* a new administration so meet it? Obviously the answer is on the plain one. It is simply to carry out, with a firm hand, and in an honest way, the platform of the nation, the strictly constitutional and laudably national policy laid down by the Baltimore convention. It is to frown upon political skirmishes in all the States, and to leave the policy embraced in the compromise measures as much a settled question as that of a national bank, or of any other political question. It is to discountenance at the Head of the Union what would place itself upon local questions; and array itself by progressional lines; and to leave the broad, country-uniting idea which the lofty spirit of Webster and Clay first proclaimed, and which the unselfish patriotism of the American people, and their second compromise will ever rally about and sustain. To do this, the eyes of the administration must be kept peering intently localities to see what may be necessary to enable an ambitious and unscrupulous party to make himself strong in a congressional district, but which would be fatal to the good of the entire republic.

Gen. Pierce has now been in the presidential chair about ten months; with the accession of power "he" came accession of responsibility. His "pathway" was indeed "a plain one"—*but not on earth but in heaven*. But he *ascended not*, "with a firm hand, and in strict accordance with the fitful and softer and strictly constitutional and broadly national policy laid down by the Baltimore convention." Has he *frowned* upon political abolitionism in all its shapes? Has he *discountenanced* that party action that would place the present Democratic Union, and its compromises, upon local questions, and array itself, through its accustomed agents, the Washington Union and the Boston Post, that he was not abroad as a conservative man, and one who was the property of the Baltimore platform and a unity to him? Instead of frowning "upon political abolitionism in all its shapes," has he not appointed Seaellers to important offices, and has special from office a fanatical editor, Jas. Buchanan Sawyer, because it would not become partisan enough, a partisan paper to the treachery and in the crisis! Instead of "discountenancing" that party action that would plant itself upon local questions," has he not taken the "ashs" of New York under his own proscription only *two* men who were known and branded abolitionists—to the end of the chapter—two?

Instead of fostering what bread, country, loving idea" which was originated by "the lofty spirit of Washington's times," he has fostered that other spirit of sectionalism which was conceived by Giddings! Instead of keeping himself disentangled from "an ambition and agitating demagogue," who sought "to make himself strong in a congressional district," has he not "rushed into the petty localities" for that supreme purpose. Duplicity, treachery, cunning, unskilled-ness, are stamped upon his administration—and there they will remain forever! He has betrayed his country, his party, and his own reputation, as far as possible. them, listen:—A deep vein, about cut by Alpine hills from the rude world, yet with silver hair, hungered by fruit of gold and vegetables, purples, glows, refined and beautiful. Here are wild rare and remote shadows, as I could paint for you.

"My own dear love! "—Beautiful Position.

"A palace," she murmured, "with marble walls, from out a joyous bower of coolest fountains, jasmine and birds, whose every sound syllables thy name. At dawn we'd sit beneath the orchard trees, and wonder why earth could not be happy, while the heavens still let us youth and love." We'd dress in threads that were not woven in sunshine, nor to excite them all in love, and I would be your queen, and you my king." "I would be President in a direct vote of the people, that we might smile to think how poorly the 'counting' of words translates the poetry of hearts like ours; and when night came, amid the breathless heavens, we'd gaze out and read the brilliant lessons we'd learned in love." Position, that is not love for money nor passion, that is not love for beauty, but love for love—all, true art, noble love, that is love for love's sake, why, who would not have them fall in?

"Dear Prince," said Position, "when young men see me, they are apt to think me the sweet one through the medium of fattening pies; but—and, true art, noble love, that is love for love's sake, why, who would not have them fall in?

"Ah me!" sighed Melinette, eagerly, "as that poor gardener's son, who dared to lift his eyes to the Princess."

"Even those!" said Position, "methinks they would be the happiest of all. Ah, if I could only find I could prove how deep in women's love! We are like the insects caught by the poor glittering thing, and they—but oh! the wings are scorched, the bright star burns on the more, and by and by they fall till death."

"Angel!" murmured Melinette. Commence stamp like for the treacherous part he was playing. By the time he had given a torture wants than her hate.

Madame Le Contesse and Miss Josephine

The concert at Mechanics' Hall on Monday evening was one of the most delightful we have had the pleasure of attending. It had been rumored to our mind by the following notice, which we find in a recent number of the New York Herald:—

"Various agitations and exiles from Europe have come here in recent years, but none equal to the Hungarian; Kinkel, the Germans; Kossuth, the Hungarians; Mazzini, the Italians; young and progressive, and have been received with public honors, but none received more cordial welcome than the Countess Le Contesse, who arrived here on Saturday, and has been welcomed by the Hungarians patriots from other countries. They are unlikely for the more cherished or the more honored."

The Countess now arrives, how is all this to be? Is she a Hungarian? Is she a Countess? Is she here for the sake of Kossuth? Generally, not; a Countess is not a Countess in this country, and Miss Mitchell is the very name to lead to Kossuth and Kinkel, and Kossuth republicans by the Irish, Scotch, and English republicans by the Germans, and Mazzini by the Italians, and Le Contesse by the Hungarians. Let addresses be made to Miss Mitchell, and let them be read by Kossuth and Kinkel, and let them be printed in the Irish, Scotch, English, German, Italian, and Hungarian papers, and then the world will be astonished at the discovery that Miss Mitchell is the Countess Le Contesse, and that Kossuth, Kinkel, Mazzini, and Le Contesse are all one and the same person.

Other Important Intelligence.

☞ The New York Herald says that on Monday night the Mayor of that city visited the Metropolitan Police Station, and informed the Superintendent that he had received information that a large number of rifles and revolvers were secreted in the basement of the Police Station, and requested him to have a search made for them. The Superintendent refused to do so, stating that he had received no such information, and that he was willing to have the Police Station searched by any one. The Mayor then left, and in the course of the evening returned with a search warrant, and had the Police Station searched, but found nothing. The Herald says that the Mayor is determined to have the Police Station searched, and that he has received information that there are a large number of rifles and revolvers secreted in the Police Station.

☞ The Ohio and Cincinnati Railroad Company is about to extend its road to Chicago.

The organized loss of the Cincinnati Gas Company by the explosion of their gasometer on the 4th of October last, is estimated at $100,000.

A Chicago dispatch of yesterday says:—"The Board of Trade meeting to-day was the largest ever held in this city. Resolutions were passed favoring the construction of the Ohio and Mississippi Railroad."

☞ In the Police Court yesterday afternoon, Hannah M. Farrell and Mary Jane Tate, for larceny, were fined $3 and costs or committed to House of Correction for 30 days.

☞ A Convention of the Teachers of Middlesex County, will be held in Charlestown on the 29th, 30th and 31st of this month. Dr. Sears and Prof. Agassiz will deliver lectures on the occasion, and other interesting exercises will be had during the holding this Convention, reference was had to the conveniences of the Lowell railroad. It is to be hoped they will attend in large numbers. This Convention is designed as a preliminary step to the formation of a Middlesex County Teacher's Association, the want of which exists and feverish in counties around us.

☞ The Grand Jury for the December term of the United States District Court have presented the want of a new Court House in Boston for the transaction of the United States, and for the accommodation of the United States Courts.

☞ There has been a grand and humane display in the fire departments at Buffalo, and that among the most intelligent and responsible citizens, since the first visit of the Perseverance to that city.

PORTRAIT OF PRESIDENT PIERCE. We learn that Mr. F. B. Carpenter, who painted an admirable full length portrait of Mr Fillmore, having been requested by his Excellency, has received a commission to paint one of President Pierce, which he will commence on that account.

☞ We learn that the difficulty between young Scotia and the Duke of Alba, at Madrid, has been amicably adjusted. Through the friendly offices of the English Charge des Affaires the Duke apologized for the remarks of which Scotia had taken offence.

☞ Miss Rose Douglass has been hidden in $500 at Norfolk, for stealing a child. She was recaptured, to much regret to read and write.

NEW GASHOLD CHURCH IN HOLY BOSTON.—The Roman Catholics are about building a splendid church on the corner of Merrimack and Lowell streets.

☞ Secretary Guthrie was painfully injured by a fall from the steps of the treasury building on Saturday evening.

☞ On Friday the Georgia Senate refused 47 to 41, to go into the choice of the United States.

☞ The name of the Queen of Portugal, just married, was "Maria de Gloria Josefa Juan Leite-Leopoldina-Isadora de Cruz-Francisca-Xaviera-de Paula Michael-Gabriele-Rafaela-Gonzaga."

GENERAL SUMMARY.

THE GOLD CONCERTS. A. B. Davis informs the public by a card in the Boston Times, that the proposed Concerts in that city cannot be held. The city authorities having interdicted, and officially sending him that if he holds the Concerts he will be subject to the penalty of $500. Mr Davis' explanation is quite satisfactory, but he says he is ready to make good all he has promised, or will refund one to double what he has received.

LAWRENCE. We learn that the Democrats have elected their Mayor (Bartlett) in Lawrence by 70 majority; all their Aldermen, and 13 out of 18 Common Councilmen.

☞ We understand that Mayor Seaver positively declines to be a candidate for a re-election to the Mayoralty of Boston.

SAD AFFAIR. Dr. Josiah P. Flagg, a well known surgeon dentist, died yesterday forenoon at his residence, 17 Winter street, Boston. We learn that he had been laboring under great indisposition for some time past, and during a fit of temporary insanity, leaped from a front upper story window, injuring himself so seriously that he survived but a short time. An inquest is to be held to-day.

☞ The School Fellow Magazine, for boys and girls, is for sale at C. F. Parker, Bro.'s establishment, in Wentworth's Building.

☞ Governor Isaacwood in the City Hall, Charleston, on Monday evening, to a large and respectable audience of ladies and gentlemen.

☞ The editor of the Boston Times is giving Archbishop Hughes of New York "fits"—for his course on the street preaching difficulty.

GEN. WOOL. The announcement that Gen. Wool is to be transferred from the command of the Northern division of the army to the command of the troops in California, takes the public by surprise. It is evidently the policy of the powers that be, to keep Wool off the earth for the next presidency, in order to make the chances of the rascals of the Cabinet more secure.

☞ Elihu Burritt is to speak in Faneuil Hall, in Boston, on Thursday evening, of this week, on the subject of Cheap Ocean Postage.

☞ Mr Thompson's defence against the charge of having spoken ill of Washington, in one of his works, will do; it is quite strong enough for a defence. The charge must have been brought by some dreadfully thin-skinned person.

☞ A German gentleman, who had held quite a lot in the swamps of Illinois, which the State has been arrested and sent to Webster's almshouse. He had formed his estate of stakes and rushes, and had been at the pains to have woven a curtain of leaves to protect the entrance. His food and clothes he begged of his neighbors.

THE WAR DEPARTMENT. The special Washington correspondent of the New York Herald states that, "the President has determined to call Gen. J. McDonald to the War Department, in place of Jefferson Davis, who is to be elected Senator from Mississippi, notwithstanding the efforts of Governor Brown, who is for Gen. Quitman, and Gov. Pettus, who is for Gen. Foote. Gen. Foote has been determined upon to get McDonaldsout of Mr Cobb's way, so as to induce the latter to come to the Senate from Georgia."

PRESENT TO MRS PIERCE. An elegantly-engraved handkerchief, of the finest cambric, has been presented to the wife of President Pierce by a New York firm. The handkerchief is bordered with a wide black veil, with flags and other emblems of American liberty; in each corner is a medallion containing a portrait of an American statesman, surrounded by the names of the thirteen original States. Below each medallion is a shield, with the arms of the State represented. Over the whole is a wreath of laurel, in the centre of which is the coat of arms of the United States. The whole is surrounded by a border of stars.

☞ On Friday last Wm. P. Prescott was fined $100 and costs in the Boston Municipal Court, for selling liquor, and appealed in five cases in which he was fined $100 and costs, and the bill and gave the bonds. This is the first case of successful prosecution under the liquor law in that city, and is therefore an event of special interest.

PRAYER. At the breaking ground for the Methodist Seminary at the Ingraham and Tremont Railroad at Lynchburg, Rev. J. K. commenced slowly and solemnly to read a manuscript prayer. At the conclusion an old negro man, who had been resting with one foot on the spade and his arms on the handle, looking intently in the chaplain's face, straightening himself up, remarked audibly, "Well, I reckon that's de fust time de Lord has ever been written to on de subject of railroads!"

☞ There are rumors in Washington that the Mexican negotiations with the Americus Minister, Gadsden, indicate trouble.

☞ The people of Pittsburg are agitating the question of constructing every manufactory and other establishment in the city to consume its own smoke, and thus prevent the falling of soot and dirt, which corrodes and blackens every thing, animate and inanimate, in that smoky city.

☞ Ireland is now affected by a silent revolution which promises to remove prosperity to that long afflicted people. Her population is rapidly decreasing, and the rate of the land revolution is as' hand.

☞ Thomas, N.J., a few days since, in Kingsbury, an insane fiend fired in a meeting-house in the town of Mansfield Ct. The coroner's jury returned the verdict of "Insane from the visitation of Satan."

☞ The year 1854 will begin and end on the Sabbath, five months in the year will contain five Sabbaths, and four will have but fifty-three Sabbaths in the year.

☞ The number of physicians in Massachusetts is about 1,100.

☞ M. de Lamartine has entirely recovered and he has insured his life for 100,000f.

sleyz in the same tent. Have you any message to send to Helmuth? any word or token for Ilsey?"

She approached Meinotte, but with a stern look, as turned away from her voice, the old time tone, and as he heard her voice, the old time came over again.

"Tell Helmuth," she said, "that for years I never missed a thought that was not for you—that the wandering waif, deaf, blind and lame, I poured a mourner's prayer. Tell him that I would rather share his lowliest cot—wait by his side an outcast—work for him—live upon the light of one kind word from him—than wear the crown of the Russian czar."

Almost maddened with the joy that those sweet words produced, Meinotte exclaimed in a mournful tone:

"You love him then, and yet desert him."

"Say that if life yet," continued Pauline, "I could rend this heart—in its unrestrainedness—his love itself would pardon that desertion! Look at that poor old man—he is my father; he stands on the verge of an abyss—he calls upon his child to save him! Shall I shrink from him who is my father? withhold my hand and see a parent perish? Tell him this, and say we shall meet again in heaven."

Here the voice of Baron Ilsey was heard rising at the table on which the popes were scattered, was heard exclaiming:

"The popes are prepared—we only need your head and soul."

"Bey, lady," exclaimed Meinotte, with anxiety, detaining Pauline, "one word more. Were you ever poor? Have you faith united, would you still share the lowborn peasant's lot?"

"Would I?" exclaimed Pauline. "Ah! better death with him I love, than all the power, which is but as the flowers that crown the victim."

She turned to take the contract from the notary, when Meinotte seized it and tore it into fragments.

"Are you mad?" exclaimed Rosmenet.

"How, sir," exclaimed Meinotte, "you ask—but once in this insult?"

"Peace, old man," said Claude, "I have a prior claim. Before the face of men and heaven I swear by Pauline's love—by that letter for your priceless jewel. There is the one which could blush to take it; there is the act a sem of it that is not bought and hallowed on the cause of freedom and the soldier's blood."

"That voice!" exclaimed Pauline, breathless with amazement; "then sir—"

"Thy husband!" exclaimed Meinotte, as Pauline rushed into his arms.

That was the blessed hour! What sweet and holy vows were then kept, as she was to be her husband! Monsieur Decappelon was very happy to find his daughter's welfare restored to one who had so nobly won both love and life. Baron Ilsey, as Meinotte had predicted, she had no objection to Claude Meinotte for a husband, but she had thought the latter was a man of wealth, splendid wretch when he was a gardener's son, she observed a wonderful increase of interest in him, now that he was a colonel and a hero.

Daily Journal & Courier.

Lowell, Tuesday, December 29, 1863.

JUDICIARY MOVEMENT. A few days since, in the Senate of the United States, Mr. Sumner, of Mass., moved an important resolution relative to the State Laws of the United States, as follows:

Resolved, That the Committee on the Judiciary be directed to consider the expediency of providing by law for the appointment of a commission to revise the statutes of the United States, to simplify their language, to correct their inconsistencies, to supply their defects, to arrange them in order, and to reduce them into one harmonious text, and to report the same improved to Congress for its final action, to the end that the public may more easily all see pre cannot be known; may be in such form as to be more within the appreciation of the people.

We cannot but express our unqualified approval of this timely movement. The "Statutes at Large" of the United States, (recently published,) comprise nine large octavo volumes, which a careful person would refuse to own. Nine-tenths of this mass of legislation has been rendered null and void by more recent enactments, and should therefore be cast to recognize the statute books. Another great object sought by the honorable Senator, is the arrangement of the laws under separate heads, according to their nature, so that reference to them may be made without difficulty, not only by lawyers, but by all classes of citizens. At present an almost interminable search must be made in order to determine the status law of the United States, in any given case. The accumulation of act upon act for sixty-four years, without system or classification, has produced an evil—less more of obscurity which nothing short of the measure proposed can render intelligible.

Every lawyer will see the importance of the proposed revision at a glance; while plain citizens can understand the utility of substituting one or two volumes for a library, the purchasing one or two volumes for a library, the purchase of which would involve a heavy expenditure, and which are promiscuously jumbled together.

Nearly all the old States, and perhaps many of the new, have had their statutes revised in order to lessen and simplify the administration of justice. New York is said to have led off in this enlightened policy, in which she was followed by Massachusetts. Both Carolinas have had two revisions—the first adopted in 1836 or '37, and completed in 1837; and the second is now in progress, if not finished. In each instance the revision has been made by a Commission consisting of three able lawyers.

When it is considered that the work applies with which all business of real utility is neglected by the "powers that be" at Washington, it might at first blush seem chimerical to hope for any of so much real utility has been so long neglected by the Federal Government. But, finally, our eyes or want of system, is more grievous than that of the tyrant who had his brave posted so high that the people could not read them.

The complexity, incongruity and inequality of the Federal statutes, and the consequent evils of their administration, are common to all countries, the expense of a commission for revising the laws, which ought to be substituted by a few simple rules based on reason and equity.

CONVERSATION. In the Senate, yesterday, (Wednesday,) Mr. GWIN, from the Naval Committee, made a report in favor of the building of six steam frigates, as recommended by the Howell bill.

Mr Hunter, from the Finance Committee, reported back the bill concerning Sumpter bill.

The French Spoliation bill was referred to a select committee, consisting of Messrs. Sumner, Fessenden, Foster and Johnson.

Resolutions were offered for the admission of Representatives from the south of the States, and it is understood at Cape May, the considering the mail of Mess. General by letter, for the consideration of the Judiciary Committee; whether any provision can be made for collecting "commutation money" from drafted men. Mr Hunter's notice of a bill to amend a law of telegraph from the Mississippi river to the Pacific coast.

In the House there was some discussion on a resolution instructing the Committee on Commerce to inquire into the propriety of abrogating the treaty and further resolutions were discussed. The resolution was tabled.

The House then went into Committee of the Whole on the state of the Union, when Mr. Dunn, of New York, spoke in the interest of preparing a record and a vote of thanks to Capt. Ingraham.

Mr Giddings replied to Mr Dunn, in an anti-slavery speech, and against the payment of the indemnity in the American case.

Mr Chanler defended a former member from Philadelphia from reflections cast on him by Mr Giddings.

After a few words from Mr Walsh, Mr Wright, of Pennsylvania, obtained the floor when the Committee rose and the House adjourned.

TELEGRAPHING. A Detroit despatch of yesterday reported an active movement of the citizens for the purpose of celebrating the opening of the Great Western Railroad. Resolutions were unanimously adopted inviting the citizens of Buffalo and Niagara Falls, and their friends in Canada, to participate in the celebration.

AN EVIL PA., despatch of yesterday says—The visitors are out in full force; nearly 100 in are engaged in touring up the track of the western line. The rowdies intend to stop the cars when they hear on the Ohio State line. Balls have been ringing and cannons firing for two hours. A mob of rollmen have gone to Fairhaven in hour the people have to ride.

Another despatch says—A large body of men led by the mayor and high constable is now engaged in removing the track of the western line at the short crossings, no injunction having been served as far as the western line is concerned. The citizens of Fairviews are about to take up the track in that village.

A Thanksgiving despatch of yesterday says—The steamboat Zachary Taylor, from Lawrenceburg for this city, exploded her boilers between 7 and 8 o'clock this morning, three persons and escaping the scalding.

A New Orleans despatch of yesterday says—The news from Austin were to the 16th inst. An important bill to incorporate the Mississippi and Pacific Railroad has passed the Senate and would probably pass the House and be signed by the Governor.

A STUFF COMPLIMENT TO A PEACE SON CHIEF. Thomas Jefferson, (Va.) Treasurer, says of Col. DeWitt, the Representative in Congress from Worcester District, Mass., "He is a Democrat of the Jefferson school, and he is a lawyer; candid, fearless, and sound, handsome, and a bachelor; (with hundreds of thousands of dollars,) he will make a Member of the first distinction in this winter. He is destitute of even a particle of Northern frigidity. He glows with warmth, and *fun*, and good nature, and the efforts of kind gentility. He will know everybody, and he will be known by every one favorably before five days close."

Upon this compliment the Commonwealth in a hilary exclaims: "Here is a tribute to a Democrat from a Democratic member of Congress, and it is from old Virginia! Manly Northerners may no more southern regions, but they know how to respect Northern men."

Surely, the Commonwealth is thankful for small favors! and makes enormous out of very indulgent.

THE CONSTITUTIONAL CONVENTION COMMITTEE. The Committee, in session yesterday, voted to limit the time of speaking to one hour or two other terms.

On motion of Mr Butler, the returns were ordered to be given in *extenso* on the official journal of the Convention, and on motion of Mr Hillard, the returns were ordered to be published in various papers, under the supervision of a committee, viz.—Messrs Hillard, Bosten Wood, White and Morton. On motion of Mr. Oliver of Lawrence, the same returns were ordered to be added in the form of an appendix to the debates of the Convention.

LECTURES. Mr. Daniel Pratt, jr., the American traveller, proposes to deliver his course of eight lectures in this city, as soon as he can make arrangements so to do. The Bellamy Comedy Quartette thus speaks of one of these lectures:—Pratt's lecture on Saturday evening at Burnham's Hall, on the "Economy of Creation," was received with unbounded applause; the deep sense of the spoken sympathy astonished the audience, the like of which never having been listened to by the people of this vicinity. A unanimous vote of thanks was tendered Mr Pratt by the audience at the close of the lecture.

FATHER GAVAZZI IN LOWELL. Many of our citizens have been waiting for some movement on the part of somebody, to invite the celebrated Father Gavazzi to Lowell. He is now in our vicinity and probably can readily be induced to visit here. His efforts are powerful, and those who have heard them, to be fully appreciated, must call in all cities where he has spoken. Probably no man is found who can lecture on his peculiar topics with such power, and from so full an experience, as Father Gavazzi. He has been in Lowell forthwith, in some spacious hall or church, where all can hear? What will hold the matter? To whom does it belong? Will not all our clergymen unite and perfect a plan by which our citizens may all be gratified? For one, I am persuaded no lecturer would be better attended, or more successful. They should be open for all without fee.

"ALL ABROAD."

FOR THE JOURNAL AND COURIER.

It is well known that stringed instruments form the basis of the orchestra. For which reason the orchestra for the opening of the Music Hall, which the great masters composed their choicest productions. To them combined with organs the orchestra is composed of expressive, together with an inconceivable variety of sounds. The Vocal especially is, in all compositions, the chief, yielding to a multitude of incomparable shades of coloring. It possesses power, ease, sweetness, and as well as joyful expression, pathetic sensitive and pensive. It only depends upon a correct training, to make it speak.

At the present day, the Violin is a universe almost every thing. It plays to the extremities of height, and is easily set in the middle register. Its quick, syncopated passages, the strongest chords do not stop it. In general, the existence of the violin is so essential, that when it is not found; there is no necessity of calculating the length of it mentioned tone, as is the case with many instruments, and the violin is the very soul of its power lasting breath. The Violin is a faithful, wise, obliging and untiring servant, which the Missionary Quarterly Cure is so well known how to manage; but when we find it by the hands of little CARLOS WARD, then it is indeed to have lost its magic spell to the poet's thoughts, when speaking of music:

"Sweet music's more than words can say."

Are the best instruments for the home.

FEMININE BEAUTY IN AMERICA. In a recent address before an agricultural society in New Jersey, one Francis Blair, Esq., said:—

Shakspeare, who studied the world closely, and knew how to learn from it the strength and climate of different regions had much to do in accounting for the loveliness, form, and even the exalted character. In peopling his charming Arcadian he drawn his fairest forms from the delicious soil and ocean and summer sky of Italy; and from no other source can we point to the dwelling of a Juliet as fair and tender as she. The Italian women are as handsome as beautiful as the lyrics of Venetian, which are sung by the gondolier. The most delightful Beauties that he has time to paint within the limits of a single day's visit are the Greek women of the Islands; and in a single family I could point out three Graces which would have been happy for him to have had for their models.

Influence of Virginia.—The State in the Union that has ruled over Congress so that which is permitted to Virginia. Of the 21 Presidents, 8 were Virginians. The Committee of Foreign Affairs in the Senate of the United States, 5 out of 7 were Virginians; of the Committee on Finance, 3 out of 7; of the Committee on Commerce, Mr Roosch, in the Senate, and Mr Millson on Expenditures in the Navy Department, in the House; and of the Committee on Foreign Affairs. There were always Virginians at the head of the most important branches of government. New York, notwithstanding her numerical strength, never had the power that Virginia has. The reason for this is, that Virginia has been governed by men who are put forward by the Ancient Dominion, while the people of New York have never had a member of Congress to obtained by some fourth rate gregarious politician. Hence, the members of Congress to obtained by some fourth rate gregarious politician. Hence, the members of Congress are selected by the strength of party organization, and not by the will of the people. Virginia has a system and depend upon the voluntary support of the people, and she makes for himself, and she would be responsible to the people. Hence, the people of Virginia, and not to any other, and hander up the House with rare talent, and has been the great source of legislation.—Hartford Courant.

DR. SCHENCK'S HAIR TONIC!

A purely VEGETABLE Preparation for promoting the Growth, Preservation and Beauty of the HAIR.

THIS is an entirely new discovery, and the result of a long course of experiments, and is the most successful combination for restoring and preserving the hair ever offered to the public. It is not a dye, but a tonic, and will not stain the skin or injure the hair, but, on the contrary, will leave it soft and glossy, and promote its growth. It is unnecessary to enlarge upon the merits of this article, as the proprietor feels confident that a single trial will satisfy the most skeptical of its superiority over all other preparations for the hair. the business.

I have been a thousand times aided in bitter hours; and as often stood trembling on the brink of death, when an enveloping hand put a bottle to my lips or wiped my weary, God-like record of tears.

I stood in the eye of the blessed Christ, when he was touched with the infirmities of the Lazarus family. Again when he saved from the drowned Israelites.

I was one of those great drops of sweat which stood on the agonized brow of the suffering Son of God, when he knelt in Gethsemane and agonized for the world's redemption.

Independent Voters and Party Men.

There is a class of men in this (as in every other) community, who are proud to call the name of *independent voter*, and who look down with dignified contempt on all who call themselves party men. They are where the atmosphere at party—amid smoked by party prejudices, party obligations or party animosities. At least, so they say. Are you, are we obliged to confess that we never found a more contradict. narrow, selfish, illiberal, vinegar-faced set of bigots, than these same independent voters, who despise party. For ourselves, we are party men. We know no better system of operations in a free government than the system of parties. We want parties—two at least, so that one can keep the other in check. It would be a great misfortune to this country to lose the democratic party, unless some other organization at once assumed its place. It would be a still greater misfortune to this country to lose the whig party, unless some similar organization at once assumed its place. With *all* styled *no-party men*, we have no patience. We like some of the sentiments of the Boston Mail bourgeon, and will quote:

"We shall stand by our party nominations, whether this or that candidate is personally liked or disliked, for in those past we have drank deep of the fountain of party, and we know that its bitter waters are wholesome. In no way are we sure of preserving rights, enjoyments laws and equal rights, as by fidelity and loyalty to party organization. Inevitable and unavoidable as that may be to secure all we want; these factions organizations, made up of the sound and disaffected of all parties—the non-commission of politics, who can see no higher aim for the American Union than to free negroes, and to make social equality with a city government than to pursue a rum hostile—the hungry and impulsive crowds that follow the leaders of would-be great men, the loiters in an emergency, the old fogies who never earned an honest penny in their lives and now resent their pride and fury and impudence, the stylings and feelings casting a first vote, and ignorant, all of these difficulties which are met with in their exercises, reckless no-mind-of-their-own men, who make the Governor Mr. and woman—are a thousand times worse. He who puts trust in them, puts trust in the air. He over knew one that ripened into ripe fruit strength. They are like the sand, which only shoots of a grape vine, they grow high in summer, but wither at the first frost. We will say first they are of no use, but if so, it is in the same way that the thistle is of no use, a poison purifier. But neither the name of the king of democracy, nor that of the great whig reformers are any fairer for a resistant good, for which they were created, and for which we owe a thought given in the hour of their strength.

But while we believe so fully in the utility of party organization, and the duty of fairly investing—each man according to his ideas of right and wrong—we are also equally well convinced that the time is fast approaching when the people will be called upon to form a new party organization, such as we now behold in Massachusetts and in Ohio. This party will be the overcurse, of back-office arrangements, of secret caucuses, of packed conventions, of the use of a fund, has yet to be done away with. To be startled by a Native Know, that the Presidential candidate of the Democratic party is a member of a lodge, has yet to be done away with. To be startled by a Native Know, that the Presidential candidate of the Democratic party is a member of a lodge, has yet to be done away with. to put through her baking for Sunday—and had over so much to do in the house, as old Ormond' wives and widows have to do when she was a little impatient. Thomas Smith was therefore sent for.

"That one Dowding over in a county like ourn, had been left by his father a million or two—the widow's dead, and then Dowding died too—but the widow's alive yet."

"That wer short horned Durham is not a bad looking beast, but I don't know"—seemed to hold it in the mouth.

"The Downing cow I knew before the late Mr James bought her." Here he applied at the allusion to the late Mr James, she sighed, and both looked at each other—it was a slightly awkward moment.

"Old Gem is a faithful old milch, and so is Brindle—but I have known better." A long stare succeeded this speech,—the peace was getting awkward—and at last Mrs Jones broke out—

"Lord! Mr Smith, if I'm the cow you want to try on I"

The intentions of the Deacon and the widow Jones were duly published the next day; and so soon as they were 'out' published 'they were married.

One Hour Massachusetts Legislature—Democratic Caucus—Gen. Banks Nominated—Democratic Congressmen.

The election of Washburn and Plunkett to the governorship and lieutenant governorship of this Commonwealth, may now be regarded as morally certain. The completion of the Legislature, upon which the election of these officers devolves, guarantees this. It has been thought that the Council will be renewed—for the present Executive retiring at the close of their present official term. And in view of this, a correspondent of this paper recently suggested the name of Hon. Horace Mann LATE as the choice of Middlesex for Councillor from this district. A better selection could not be made. Should the Council really be renewed, Mr Bartlett will in all human probability be the person. But should this not be the case, should the present Councillors remain in office a second term, Mr Fairbanks will, of course, remain with the rest. But to the Legislature.

The Senate will stand 11 whig, 10 opposition, with 19 vacancies. The Whigs have a majority of one. The following table shows in figures

THE SENATE.

	Whigs.	Dems.	Vacancy.

Total,	11	10	19

Turning now to the House, we find that body standing, 197 whigs, 113 opposition, with 110 vacancies—giving the whigs a majority of 84 over all others. This great majority is quite as large as we desire—for, next to no majority, a very large majority is the most to be dreaded. But, fortunating to remark at present as the high responsibilities laid upon us hereby, we present the following table of figures, the completion and condition of the House of Representatives :—

THE HOUSE.

The opposition in the House consists, in part, of something like a dozen old line Democrats, who have persevered in the maintenance of their principles in spite of the coalition, and who stand ready to aid the whigs whenever their aid may be asked in opposition to anything in the shape of free soilism or coalitionism. These are honest men and good fellows generally. The remainder of the opposition consists of a compact mixture of free soilers and disaffected democrats. But the coalition being now completely broken up, it is highly probable that all the parties in the Legislature will resolve themselves into three organizations ; whig, free soil, and free soil democrat.

Should the Senate elect its President before its vacancies are filled, Charles Edward Cook, of Boston, has a fair chance to be one of those elected to that office. A more proper way, however, in our opinion, would be, to follow "as illustrious a precedent" as that of Presidency pro tem until the 19 vacancies have been filled by the Senate, and then elect Hon. Chicago Bailey to the Presidency. Mr Bailey, after a session or two as Speaker of the House, his eminent talents and his legislative experience in the Senate, all pointing to him as the most fit man for that high office. But whether President or not, he is to be an ornament of the present Senate. The Cheltenhiz for betrayer Charles Calhoun, who has filled the office with credit and ability many times before, and John J. Piper, who was ordered chief of last year—Mr Piper seems most likely to be elected to the Presidency, from present appearances. Of the persons of the Senate, the Springfield Republican so kindly remarks :

"Among the whigs, Samuel H. Lyman, of Berkshire, will be most prominent. He is without any political ambition, and has long filled his office with ability and high credit. In the whig ranks, Lyman will be succeeded by Hon. Thomas Sterling, his associate counsel of three years ago, a man of fine talents, and a leader in the Senate last year. Sterling, his administration of a year and a half in the Senate, and over a million dollars.

Ten Generals. So little interest is manifested in regard to the concert announced by this unequalled band, for Monday evening, that we could not have a better *hook* to the Christmas festivities; and that these splendid musicians will be crowned with a full and appreciative audience, we cannot doubt. The programme embraces what is at once popular and good, and when so much is offered at so reasonable a price, (three tickets for one dollar) we feel confident that the people will not without their support. Again we say, every success to these excellent performers. Tickets are to be obtained at Merrill & Straw's, J. P. Walker's, Sargent's, Varker & Sargent's, Carleton & Hovey's, F. We have at last arrived at the point that the Whig Party is the only true party of progress in Massachusetts. Other parties have been, but have outlived their usefulness, or have been shown up for, in any sense, conservative. The energies of the Opposers are all expended in the work of destruction, and have no room for the province of the democracy. So of the free soil party; it fit secret mission as a party, was to prevent the blotting of slave out the Constitution; it never carried out a single great measure to a result.

The Whig party, in the meantime, has ever stood before the country—the party of progress, the party of education, the party of true reform. All the great reforms which have obtained in Massachusetts, during at least thirty years, were carried through, either by the present whig party, or by its immediate predecessor, the National Republican party. The Worcester Transcript recently published a history of the progress of the principles of party, religion, and morality. In that document the Lawrence with confidence to refute upon all subjects as attempted by the opponents of the public teachers elsewhere; and finally, it answered the question, "What has the whig party done?" by the answer—"Everything!" The standing of a man or party is determined by the company with which he did not leave it. The standing of a man or party is determined by the company with which he did not leave it. Sweeping and Severe.

In the form and character of those two eminent men—the most brilliant orator in the British Parliament, and, in the U. S. Senate—there are many points of correspondence. The New York Tribune has the following:

"When it was announced lately that "Macaulay was up," in the debate on Indian affairs on a debate that had already continued through two weeks, embracing the talents as well as the patience of members, all the seats in the House of Commons were at once filled, and those members customarily assisted in a legislative attendance, until the orator had closed—a period of two hours. His customary tones, and his style of speech, so free, sure, rather more than usually vigorous.

His speech was characteristic, in every respect—not very profound nor bold, but very brilliant, abounding in learned and valuable particulars of learned wit, severe, dexterous and sweeping criticism. Macaulay's reputation evidently was not already announced, and starting off the pleasure of the house, at its outset, in other words it was an elaborate, scholarly, effective, and striking effort. The style of his great Edinburgh reviewer and the essayist was manifest, but not an ostentatious one in this speech, which ensured an adjournment of the house before which cards were in a condition to legislate upon calmness and judgement. Compared with the remarks of Gladstone, Disraeli, and Sir Joseph Hobhouse, on the same evening, it was a fin de siècle effort, and a declining of the old classical cannon.

Yet Macaulay is not deficient in logic, nor does he want convictions; on the contrary, he is a man of extraordinary reasoning, and believes, even to his poinient opinions; but his logic is in his brilliant rhetoric, and his conviction in his lucidity more than of strength, while his sincerity is not of that deep, intense, inexpressible kind which is the soul of eloquence. He is consequently more admired than trusted in the House, ready to dazzle and to demonstrate, and, though courted as a friend and dreaded as an opponent, he is not one to be followed implicitly by parties. He wants the enormous earnestness of Burke, and he has spent as a Parliamentarian to men of far inferior talents, like Sir Robert Peel, Lord John Russell, and John Bowell. No one disputes the greatness of his powers, the vigor of his intellect, the brilliancy of his fancy, the extensive reach and readiness of his learning, the rareness and originality of his style, but he is and he never sure to command the majorities by his eloquence.

Mr Macaulay reminds us of an accomplished gentleman and scholar, who converses well, with whom, though on the whole superior, he offers many points of resemblance as well as contrast—we refer to the late lamented Senator, Edward Everett. It is not surprising that he had both been early weaned from classical retirement into the noisy arena of public life, in which each has played a part, that suggests the parallel to us, but a certain temperamental difference in the strength of their minds and in the incidents of their personal history, has made the one a brilliant orator, who will have written poesy, both rhetoricians rather than orators, both conservatives fearfully of any thing that are liberal and both are remarkable for a rare union of extensive erudition with great ease of style, whether as talkers or writers. Mr Macaulay began active life as a writer, and has since become eminent in Parliament. Mr Everett as a clergyman, and has since become eminent as a statesman. Each of them has spoken enough to the fellow human beings to have left a kind of reputation, but it is upon a English subject, and the great British public, and the other upon a subject of universal interest, but one which has not always within one day's call of every reader. Let political questions have a place of English importance, or portion of it, and Macaulay will be read, and Everett will be read, but not otherwise to any extent. Here I am done with the subject, and think of me if you please.

Lowell, Tuesday, December 27, 1853

The Present Situation.—Next to the Eastern question the most important topic of the week is quite important. The whole condition has assumed a new phase. The coalition between England and France, consolidated in case of Russian aggressions in, the East, has been fully consummated; and the ardent desire of all the lovers of peace has been keenly gratified.—Prussia has now been completely unmasked. Austria has been compelled to show her hand very much against her will, on the side of Turkey, her "natural enemy." France, England, Prussia and Austria have pledged themselves to maintain the existing territorial arrangements of Europe, and insist upon an adjustment of the questions pending between Russia and Turkey. The evacuation of the Danubian principalities by the armies of the Czar, is insisted on as a sine qua non;—and it is threatened to enforce these conditions at the cannon's mouth. If Russia will not consent to a more amicable adjustment. This is just the position which "the powers" should have assumed six months ago; and would have done so, but for the fact that when the fiats that even the neutrality of her former allies in the event of a war, was appreciation, and that terms of peace, to which she may not submit without many humiliations, are equally presented by Vienna and Berlin as by Paris and London. The Emperor Nicholas is deeply reckoned, at the commencement of this transaction, on the want of cordiality between France and England, and on the subservience of Austria and Prussia to his will and pleasure. He is equally mistaken on both points; for not only have France and England acted in perfect harmony and their fleets, but they have ended by rallying Austria and Prussia to their support, native cause of peace and order which Russia has so wrongfully broken and to which she is keeping that token of the best powers to be able to resist, which is to be the last, heck and all of those adhere to those common duties and public interests upon which it is based, the peace of war is confined to the contract existing of Europe, and the division of power is not imperial for such a contest to be indefinitely prolonged. If, on the contrary, Russia will not lower or deliver him—during the policy of Russia, either by a defensive aggression on the Turkish territory or by an attempt to oppose the maritime communication of England and France, it is evident that war must have become inevitable, and would have opened at once from the Black Sea and the Danube to Lone. Shortly as it is the Rhine."

After administering some severe censures to the European democrats for their rashness in coupling Prussia and Austria with France and England, the Times pertinently concludes:—

"We shall shortly know whether, at the eleventh hour, a return of prudence will induce the powers to sway over the pestilence which Nicholas has let loose upon the Continent, or whether the latter will be allowed to run its course, and the Emperor of Russia to be left to his fate. In either case, we have no fear on the world from it as long as any two men and of gold on the side of the Czar."

The Administration or Professor Pierce is growing more and more unpopular. The evidence that shows us his head to-morrow morning will unfold him in more vivid, genuine and repulsive hues, than the sun which blows his forehead up the evening of to-day. Even his own immediate supporters are ashamed of him, and refused to open their eyes to the discomfort of the spectacle. Gen. Cushing has been compelled to shake the odium from the Executive, and to confide it upon the already overburdened shoulders of the Secretary of the Treasury. But this will never avail. The President is responsible for his Cabinet; in some instances, he has controlled their action; and in all he is responsible for the general character of the Administration.

"It is not to be expected that the people of the United States will sympathize with Pierce, and the Democratic party with the measures and views of the Executive, which are at variance with the world known it. It is to vote that indifference to the principles of free institutions which, in America, and hostility to democracy, in the Presidency, that all is well. It is to vote that measures are important to sectors that confidence which is great. It is useless for Salmagundi or the King to make a great feast to a thousand of his nobles, and to drink, when before the Lord Mayor's Show, to the health of every one of the guests, which have been invited to partake of. Each Democratic subscriber has been inviting in upon the PRESIDENT and his party, and we hope that it will be the duty of the friends and soul both of the Democratic party in the country, to the Democratic party in Congress.—[M. 8 P. Three Days Later from Europe.

ARRIVAL OF THE PACIFIC.

IMPORTANT NEWS.

GREAT NAVAL BATTLE

Total Destruction of 21 ships!

TERRIBLE LOSS OF LIFE!

AN EUROPEAN WAR IMPENDING!

New York, Dec. 26. The United States Mail Steamship Pacific, Capt. Nye, from Liverpool, about two o'clock A. M., on Wednesday morning, the 14th of December, arrived here at one o'clock to-day with 103 passengers.

The steamship Arabia sailed from Boston yesterday at one quarter before 3 o'clock.

The news by the Pacific is of thrilling interest.

The particulars are as follows: On the 30th of November the steamers Inman from Boston, and Ogden from Liverpool, arrived at Halifax, the former having on board Prescott Hall Butler, Esq., appointed of the Turkish harbor of Sinope, where Vice Admiral Osman Bey lay with fourteen Turkish sail. The battle immediately commenced. The batteries being of no force, the Russians forced the harbor. The Turks fought like devils, scorning to surrender, until all their ships were sunk, burnt, or blown up. Osman himself escaped, and one only survived to tell the tale.

Seven Turkish frigates, two corvettes, one steamer and seven transports, with ammunition and men, have totally perished, and Osman Bey, the Turkish admiral, is killed.

Each of the Turkish ships had, besides their crews, eight hundred troops on board, and some had more than that—a quantity of money to pay for the fleet, which of course was all lost. The Turks burned or attempted to shoot 250, ships, namely—two line-of-battle, three frigates, and two steamers. The battle lasted only one hour. The remainder of the Russian fleet was so disabled that it could not reach Sebastopol.

All Europe is in excitement at the desperate disaster to the brave Turks, and the general opinion is that Russia will receive her longed for castigation.

GENERAL SUMMARY.

☞ We are indebted to Sargent's and Bond's Expresses, for copies of the Boston Journal and Boston Traveller, extra, to-day—from which we get important news.

☞ We have no Boston exchanges to-day, in consequence of the holiday.

California Papers. We are again indebted to our old friend, S. O. Johnson, of the San Francisco Prices Current, for files of California papers, brought through ahead of the mail, by Adams & Co.'s California and Utah's Boston and Lowell Express.

Prefyer's Festival. We are reminded of the fact by a notice in the Boston Journal, that the arrangements being made by the Printers, in that city, for a Festival on the 17th of January, that the "Pay Day" will be on the 20th.

Suspended. The Springfield Post has been suspended since last Thursday, its office being in the possession of the Sheriff, because the publisher will not give the proper security to meet the result of the libel suit brought against it.

The House. A Washington writer says:—"The House of Representatives is undoubtedly superior in point of talent to any which has assembled here for eight or ten years past. Not only is it superior to any of the wars of the United States, thereby placing that branch of the service on a footing with the army and seldom. A series of resolutions were adopted, which suggests some important modifications in the law, so as to allow its benefits to accrue to the widows and children, fathers, mothers, and brothers, and sisters of those who may have died.

Suppose of a Murderer. In the N. Y. Court of Oyer and Terminer, last Saturday morning, James L. Hoare, convicted of the murder of Susan M'Laney, was sentenced to be hanged on the 17th of January next. Hoare, on being asked what he had to say, read a paper, in which he said that he had until will all to say, and by the side and fashion of the city. If living his life as he had, he would have died an evil artist; a crime, has ever been listened to in this city. The whole—vocal and instrumental—was executed in a manner of much exquisition that Lowell is now enjoying the highest musical treat that it has ever enjoyed—a treat, by subscription, on all hands, to the list for a series of concerts now open by the Germanians, to gratify them all we can desire for the season. Those who intend securing tickets for the series, should do so at once. All the book-stores will be open this evening, and must be open the last to secure tickets at the lowest rate.

The Christmas Festival at the Free Chapel was attended by upwards of two hundred poor children—for every one of whom the splendid Christmas Tree yielded an appropriate and welcome present. The contributions from the new last citizens were unusually large, in food, clothing and money—the distribution of which, by the various committees, had brought grateful comfort to many poor families.

More Holiday Gift Books. Messrs Morrill & Anthoine, 23 Cornhill street, have a large and handsome assortment of Christmas gift books, which they offer for sale at the lowest prices.

Among the best we have noticed are, "Longfellow's Poetical Works," "Whittier's Poetical Works," "Dr. Franklin and his Friends," by Paul Creyton. These are all handsomely bound, illustrated with appropriate engravings, and "just the books for the children."

Bartlett's Dictionary of Americanisms, which we notice elsewhere, is a valuable work, and will be found very useful to all who have occasion to write or speak the English language correctly.

Putnam's Monthly, for January presents a rich table of contents, and is handsomely illustrated with appropriate engravings.

Harper's Magazine for January has been received. Also, Graham's Magazine for January.

☞ A talisman in New York who was gaining a comfy subsistence by stitching pantaloons for twenty-five cents per pair, quite prepared a sewing machine, with which it is stated he day the finished sixty pairs, realizing fifteen dollars per day's work.

☞ Judge Grier, of the U. S. Circuit Court, has decided that the translation of "Uncle Tom's Cabin" into Germen, is no infringement of the copyright.

☞ The Concord Patriot publishes weekly, and is "devoted to the interests of the Democracy." It has a column or two of puffs on the President's message, from the penniest presses of the establishment.

☞ A soldier named Alexander has been stationed in Montreal, Canada, charged with having murdered his wife. It is stated that he killed her and then disposed of her body by burning it in the stove.

☞ W. H. Chandler has become associate editor of the Vermont, Brattleboro, Statesman.—He is a graduate of its printing-office.

The New England School of Design for Women.—We have an opportunity to-day of viewing the rooms of the New England School of Design for Women, in this city. Our readers are already aware that this institution is the child of the Ladies' Industrial Society; it was upon a professional footing at the last session of the Legislature, and received an act of incorporation, and an annual grant of fifteen hundred dollars, with the usual conditions of such grants. Its object is provide industrial employment for women in branches of work suited to their abilities, but not ordinarily accessible to them, which they may employ themselves. Besides the beauty which is conferred upon many mechanically avail themselves of the privileges of the school, and incidental employment is given to a large number of female teachers, following in however slight a degree the principles of design which are taught and awarded with competitors.

Ample accommodation are received exspect such as state their intention of making the school their permanent resort. Terms are moderate. Nothing is taught simply as an accomplishment. The price for a term of 24 lessons is but five dollars. There are four terms in each year.

The Lowell Institute. Dec. 13, 1853:

It must be remarked that great perplexity and anxiety prevailed in the minds of many at this important event. All the accurate recorded system in the country, from Boston to Lowell, and to have passed through Worcester. They are therefore altogether free from all.

On the other hand, it is well ascertained that on the 25th of November, *ten days prior to the* was attended by upwards of two hundred persons who shall hold relations with them, and who shall incur the same treatment; that all individuals who shall retire from the centre of population in order to avoid the pestilence, or who shall prove reluctant in fulfilling the obligations which are imposed upon them by their country, shall be considered equally dead and buried by partial law, and the least penalty to which they shall be liable shall be that of imprisonment in the corps of Voconas.

Those who intend securing tickets for the series, should do so at once. All the book-stores will be open this evening, and must be open the last to secure tickets at the lowest rate.

EXCELSIOR HAIR TONIC!

A powerful, PURELY VEGETABLE Preparation for the Growth and Preservation of the Hair.

THE elasticity and vitality of the hair depends upon the healthy condition of the skin. Whatever, therefore, is calculated to cultivate the healthful, natural functions of the skin, must be the most effectual preparation for the hair. Such a preparation is the EXCELSIOR HAIR TONIC, which, by its action upon the skin, restores the hair to its natural color, prevents it from falling off, and promotes a new growth. It is entirely free from any mineral poison, and is perfectly harmless in its effects upon the most delicate skin.

Sold by druggists and dealers, at 75 cents per bottle. Depot, 7 Tremont Row, Boston.

For further information apply to W. H. FOURDRAIN, 27 Central street, Lowell, Mass., and to H. B. HYDE & CO., 170 Broadway, New York.

DR. MORSE'S INVIGORATING CORDIAL.

A PHENOMENON IN MEDICINE.

PROFESSOR MORSE'S INVIGORATING CORDIAL IS FOR SALE BY

The Eighth Wonder of the Botanic World.

The Invigorating Elixir and Cordial introduced and sold by Professor Morse, is the most wonderful medicine ever discovered. Dr. R. Morse, the celebrated botanic physician, has spent the greater part of his life in the study of Botany, and has discovered from the many deserts of Arabia, Persia, &c. that extensive country, the most valuable medicinal herbs, roots, &c., and has got all the true virtue of Senega and the best properties of Sarsaparilla.

DR. MORSE'S BOTANIC BALSAM.

THIS is the medicine that has healed, it is believed, more cases of Consumption, Coughs, Sore Throat, Severe Colds, Influenza, Whooping Cough, Asthma, Bronchitis, Hoarseness, Croup, Pain in the Side, Breast and Lungs, than all other medicines in use.

Sound and Hale, Dana Corporation, Dy. Co.

Lowell, Oct. 20, 1852.

DR. MORSE'S INDIAN WINE BITTERS.

THIS is the compound now sold by all druggists, under the name of Dr. Morse's Indian Root Bitters. It is the same medicine in every respect, and is composed of the same ingredients. Those who have used them, have found them worth more and will continue to use them, and those who have not, will find them worth trying.

Sold by druggists, or in sent out Canada as it suffers less every month from the ravages of the scurvy. Those who have used it, will find it

...ure the landmarks which opened before us—the Hermitage stretching to the North and the South as far as the eye could reach the living city teeming with human life and the fruits of industry, the commercial fleets in all directions, crowding both shores of the Hudson. For a moment, the eye of the mighty Father of Waters will look upon a more populous city, and upon a more extensive mart of commerce. But hush! be still, oh my soul! Hush, for this is the temple wherein I must worship the Lord, but be bid. Hence, the language of Tyre, to lofty sins, and all the pride of its heart, shall be humbled! I have entered the temple without help from anybody."

Daily Journal & Courier.

Lowell, Wednesday, December 30, 1863

THE WAR AT THE DARDAN is not now brisk; but by the despatches published in our evil-omens of yesterday, it will be seen that the Russians have gained a naval victory in the Black Sea. The statements received concerning this affair are from Russian sources, and probably magnify the importance of the victory. We must also remind our readers that the letter-writers at the seat of war are credulous creatures, catching at straws as if they were a habit of swimming, and ready to come to their aid. "A story loses nothing by carriage." Such is their language. Some of them are staunch liars. It is certain that the main body of the Turkish squadron was not engaged in the affair, and the vessels captured or sunk were probably the transports and their convoys which left Constantinople on the 29th ult. for the Black Sea, with troops. The Russian force, according to their own accounts, was greatly superior. This intelligence has created a profound sensation in England and France. The inactivity of the British and French squadrons at Constantinople is sharply commented upon, and it is likely that more active interference will be imperatively demanded of the Western governments. Russia can do no less than fight on now; and the next arrival will probably bring stirring tidings of "battles fought and won."

THE VERY LATEST NEWS from the seat of war leaves little room to doubt that the Turkish arena has suffered a diplomatic disaster. The particulars are unknown. During the last action at Sinope the British and French fleets, by, not far distant, quietly sat at anchor. This inaction is in perfect keeping with the whole course of these two powers thus far on this question. This has been our daily fault-finding bull or creditable. The end is not yet.

Quints and Dennis have been declared "off" parts of the Russian commander. The Turks were still successful in Asia and on the lines of the Danube.

It is reported that the British charge d'affaires at Teheran has suspended his diplomatic relations with the Persian Government in consequence of that power having resolved, as it is said, to take part against the Porte and to march an army into Asia Minor.

A Constantinople telegraphic despatch of the 24 reports the prevalence of great alarm and excitement, owing to the news from Sinope. The soonest given of the action is substantially the same as the Russian. The Turkish vessels bound to enter the Black Sea. Perote had declared war against Turkey.

This is the latest summary received of a treaty offensive and defensive between Perote and Russia, concluded some months ago. It adds a new complication.

LATER FROM CALIFORNIA. The steamship Texas arrived at New Orleans on Monday, from Vera Cruz, with Mexican dates to the 17th, and the Sonora route, via Mazatlan, to the 7th inst., being one week later than our previous advices. The yellow fever epidemic has been only 14 days between San Francisco and New Orleans.

The mail steamship Winfield Scott, which left San Francisco on the 1st of December, for Panama, went ashore on the following day, on the coast of Santa Barbara, and is a total loss. Her passengers and treasure were all saved, and arrived both in San Francisco on the 6th, whence they were again despatched in the steamer California, on the 7th, for Panama.

Owing to the absence of newspapers, our California news is very meagre.

Oregon dates are to the 26th of November. Governor Stevens had arrived. The rivers were high, owing to heavy rains. Business was active.

THANKSGIVING. A Washington despatch of yesterday says:—Judge Clayton's official resignation of the Consulship at Havana has been received.

Boston Municipal Election. There was no choice made of Mayor in Boston yesterday, though Dr. J. V. C. Smith, the Independent Whig candidate, came within about eight votes of being elected. The whole number of votes cast was 13,161; necessary for a choice, 6,581. Dr. Smith had 6,077; Mr Bigelow 6,487; Mr Sleeper, 774; Mr Hobart, 748; scattering, 198; so there was no election. Some improvements must be made ere an election—but we leave Boston to take care of her own affairs. Three Aldermen, Josiah Dunham, Jr., on the Whig and "Citizens' Union" tickets, and Benjamin L. Allen and Mr Washburn, on the Democratic "League," and the "Citizens' Union," appear to have been chosen. This will make a quorum in the Board of Aldermen elected, having three vacancies.

CELEBRATIONS. The New England Society, of New York, celebrated the 23d, the anniversary of the landing of the Pilgrims, by a business meeting, and a dinner at the Astor House. The society expended $200 last year in charity, have $672 on hand in cash, and $12,981 in stocks. A committee was appointed to carry out the project of erecting a bronze statue of Daniel Webster in that city. Rev. Mark Hopkins, having delivered an address before the society, responded to a toast after dinner, and spoke particularly in praise of the late Amos Lawrence. Rev Henry Ward Beecher made a humorous speech. There never was a large business done with so little loss as the raising of soldiers and Seavers' children in New England. (Great laughter.)

New No. The Advertiser is mistaken in its announcement that "the News and the Courier have been nominated George Cheshire for our next City Clerk, in place of Thomas Ordway, who it is said declines a re-election." The Courier has said nothing of the kind. We are not about to leave the nomination of City Clerk to those in whom it pertains to appoint that officer. We should be gratified if our neighbor was from the state our conduct in this respect—minding their own business, like quiet and exemplary Christians.

A MATRIMONIAL CATASTROPHE. All will deplore the destruction of the ship Great Republic, in New York, as it must be viewed as a misfortune to the city. The presence of this truly magnificent ship in a foreign port would inspire feelings of patriotic pride, by all who cherish a regard for the principles which are represented by the "Stars and Stripes." In the present case, Mr McKay has insurance upon the Great Republic to the amount of $500,000. Of this sum Boston has one thousand shares only 14 days before from San Francisco and New Orleans.

The mail steamship Winfield Scott, which left San Francisco on the 1st of December, for Panama, went ashore on the following day, on the coast of Santa Barbara, and is a total loss. Her passengers and treasure were all saved, and arrived both in San Francisco on the 6th, whence they were again despatched in the steamer California, on the 7th, for Panama.

Owing to the absence of newspapers, our California news is very meagre.

Oregon dates are to the 26th of November. Governor Stevens had arrived. The rivers were high, owing to heavy rains. Business was active.

THANKSGIVING. A Washington despatch of yesterday says:—Judge Clayton's official resignation of the Consulship at Havana has been received.

Boston Municipal Election. There was no choice made of Mayor in Boston yesterday, though Dr. J. V. C. Smith, the Independent Whig candidate, came within about eight votes of being elected. The whole number of votes cast was 13,161; necessary for a choice, 6,581. Dr. Smith had 6,077; Mr Bigelow 6,487; Mr Sleeper, 774; Mr Hobart, 748; scattering, 198; so there was no election. Some improvements must be made ere an election—but we leave Boston to take care of her own affairs. Three Aldermen, Josiah Dunham, Jr., on the Whig and "Citizens' Union" tickets, and Benjamin L. Allen and Mr Washburn, on the Democratic "League," and the "Citizens' Union," appear to have been chosen. This will make a quorum in the Board of Aldermen elected, having three vacancies.

CELEBRATIONS. The New England Society, of New York, celebrated the 23d, the anniversary of the landing of the Pilgrims, by a business meeting, and a dinner at the Astor House. The society expended $200 last year in charity, have $672 on hand in cash, and $12,981 in stocks. A committee was appointed to carry out the project of erecting a bronze statue of Daniel Webster in that city. Rev. Mark Hopkins, having delivered an address before the society, responded to a toast after dinner, and spoke particularly in praise of the late Amos Lawrence. Rev Henry Ward Beecher made a humorous speech. There never was a large business done with so little loss as the raising of soldiers and Seavers' children in New England. (Great laughter.)

New No. The Advertiser is mistaken in its announcement that "the News and the Courier have nominated George Cheshire for our next City Clerk, in place of Thomas Ordway, who it is said declines a re-election." The Courier has said nothing of the kind. We are not about to leave the nomination of City Clerk to those in whom it pertains to appoint that officer. We should be gratified if our neighbor was from the state our conduct in this respect—minding their own business, like quiet and exemplary Christians.

Congressional. In the Senate yesterday (Tuesday), Hy Seward introduced a bill to provide for the construction of a Military railroad through the Territories of the West, connecting the Atlantic States and California.

Mr Sherman introduced an amendment of the River and Harbor Act of last year, referring to the census appropriation of $200,000, to complete the census or abstract thereof. Passed.

Mr Sliddell brought forward bills for the improvement of the mouth of the Mississippi river and the establishment of a Navy Yard near New Orleans.

The death of Mr Campbell, of the House, was announced.

Mr Jones, of Tennessee, pronounced a brief and eulogistic tribute to the memory of Hon. Brookins Campbell, late a member of the House, when the Senate adjourned.

House. The death of Hon. Brookins Campbell, a member of the House from Tennessee, was announced, and eulogies spoken by Mr Smith, of Tennessee, and Carruthers, after which the customary resolutions were passed, and the House adjourned.

CITY MATTERS.

—"PATRIOTS AND CONSERVATIVES." The Courier finds it now ready to put into circulation some opinions of Mr. Seward, which are a little more stylish than any ever before issued. Each Congressional subscriber is entitled to one of these bills in exchange for a dollar. "Turn some first serve." Bank bills from 7 A. M. to 9 P. M.

WANTED—for reference—the file of the Reports of the Lowell Sunday School Union. Any person having such a file, will confer a favor by leaving it at the Courier Counting-House.

Rev. Dr. Bowman will deliver his second and last lecture, this evening, at Huntington Hall.

Howe, when the Senate adjourned.

Howe. The death of Hon. Brookins Campbell, a member of the House from Tennessee, was announced, and eulogies spoken by Mr Smith, of Tennessee, and Carruthers, after which the customary resolutions were passed, and the House adjourned.

GENERAL SUMMARY.

MARRIAGE OF A LOWELL BOY IN CALIFORNIA. Among the list of marriages in California we notice that of Jonathan Nason, formerly of Lowell, to Miss Mary Brooks, of South Groton, Mass.

17 Dr. John Otis *Jr.*, of Boston, has been appointed Surgeon-in-Superior of the State Prison at Charlestown.

17 Two girls, fourteen and sixteen years of age, named Wentworth, have been arrested in Boston for house breaking.

NARROW ESCAPE OF A CHURCH. The Unitarian Church in Taunton caught fire from the furnace on Sunday noon, and the flames were with much difficulty extinguished. The damage was considerable.

17 Rev. J. H. Ingraham, the author of various fictions, has accepted the office of rector of St. John's Church, in Hartford.

ANOTHER LOWELL. Lewiston Falls promises one day to become a second edition of Lowell. The Portland Argus says that 1,000 houses have been published in the Lewiston Journal, asking of the Legislature charters for five manufacturing companies. What the Legislature will do with the application we know not, but it is probable that it will be granted by a respectable community.

THE MAILS. Mr Hale has succeeded in his object $20,000 more per cent for the Great Republic.

Sudden Death.—Thomas McGowen, an Irishman, died suddenly on Saturday night, at his residence, No. 202 Commercial street, Boston. Patrick Black, gives assistance to that fact. Death is a modal barber.

BOOKS AT AUCTION. J. Philbrick, the prince of book auctioneers, has commenced a series of sales at auction to-morrow evening, and to continue for a few nights only. Those who would secure choice books for holiday presents, should attend early.

NEW YEARS' PRESENTS. Now is the last opportunity to get a *form* for $14. in the distribution of the Lakeland estates, L. I., for the 30th inst. This is really a good and safe opportunity for a small investment. Every one who buys is sure to get 10,000 feet of land, and may in drawing for location, get a farm of 20 to 100 acres. Advertisement, and call on L. J. Fleetwood, 56 Central street, Agent for the above. Remember, only two days before the distribution.

17 Gov. Winslow, of Alabama, was inaugurated at Mobile on Tuesday last. The procession was the largest ever witnessed there.

17 The committee on good dinners met at Leonard's yesterday afternoon. Most of the fat men were also slaughtered by Gage of Dracut.—Lowell Courier. [Leonard's is the best place to eat this Leonard, and he is always prepared to furnish a good dinner at the best short rate; he is honest, either in this or Boston market.—[Mercury Herald.

That's a fact. We have often ordered that sentiment with a hearty relish. If any one wants a delicious steak, he can get it at Leonard's.

PERSONAL RECEIVED. The January number of each of the following periodicals has been laid upon our table by F. Parker, Esq., of whose size in Wentworth's Building subscriptions are received and copies sold:—*The Popular Monthly; Household Words; Littell's Living Age; The Illustrated Magazine of Art.* Of the Magazine of Art, it is sufficient to say, that it is the greatest of its kind published in the United States, and that the present number surpasses any number ever before published.—To the former attractions in the Living Age, a new feature has now been added in the appearance of a thread and engraving. Alexander Montgomery, New York, is the publisher of the Popular Monthly, and of the Magazine of Art. Littell & Son, of the Living Age.—The combined merit of the opening year affords a favorable opportunity to all who wish to subscribe for these interesting periodicals.

For the Journal and Courier.

Wanted Brothers.

MR. EDITOR:—If you have room to insert the following communication, you will greatly oblige your readers.

Amid all the excitements of busy life, we are constantly forming resolutions, which, if we do not keep, we do much to make life less pleasant and the world brighter, and by neglecting a few of them added to childhood may chill the sensibilities to the enjoyment of many after years, and not satisfied to suppress the social principle still lives as an incentive to make us think of others. The not any duty, however, to be neglected, but one which, if performed, would bring with the fond early copy at my Musical Review. It comes from the pen of the Rev. A. D. Mayo, and is nothing more than a word in relation to the subject of the Fifth Anniversary Meeting of the Lowell. In all societies this one thing is desirable, that there should be a new person solicited by different motives from what prevail with the old members, which constantly tend to diminish both their usefulness of numbers and their interest. The only way to secure this desirable object is to invite, by every means in our power, new members to join us. Every one who has a friend not connected with any society should invite him to attend the meeting of some one of the societies, and if he is not pleased with that, to attend another. Let us all do something to swell the number of our members, and thus enjoyed our first sleigh-ride.

LOWELL MUSEUM. We are happy in announcing to our readers that the new Museum is now nearly completed, and will be ready to open on Monday evening next. It is one of the most convenient rooms in the country, and from what we hear of the company to appear upon its boards on Monday evening, it will be an unusually good treat for the public during the dramatic season about to commence. If it opens with a talented company and in a popular manner, as we understand that the manager is resolve' that it shall, it will be well patronized by a respectable community.

THE MAILS. Mr Hale has succeeded in his object $20,000 more per cent for the Great Republic.

17 We rejoice that the French Spoliation Bill has again been reported and referred to a Select Committee in the Senate. There is a prospect that the bill will pass both branches of Congress, but there is more fear that it may be killed by the pocket veto. The bill is known to be hostile to the provisions of the bill, having voted against it when a member of Congress. Is Mr Pierce ambitious to follow in the footsteps of the illustrious Mr Polk?

SANTA ANNA'S NEW TRICK. A letter from Havana, which contains many items of news, says that General Santa Anna is to be Queen-Consort with the title of Highness, and a provision for the support of the exiled President, he shall be styled His Excellency the Santa Anna, Grande Elector of Mexico. The Queen is to be a government, Grand Admiral (of what?) and Marshal General of the Mexican Army, with the title of Serene Highness.

17 The British admiral on the Pacific station writes to his government that the great quantity of guano on the Chincha Islands is decreasing rapidly, and that, at the present rate of exportation, it will be exhausted in a very few years. Some of the guano is worth $60 per ton.

17 Advices from Paris state that another plot against the life of the Emperor has been discovered, and a large number of arrests were made on the 19th inst., upon which evening over a hundred persons were arrested.

17 An Irish peasant-lad tells us of a stitching machine which he had seen in the Dublin Exhibition. "There was lying beside it, (he says) a most wonderful machine by the machine, which the latter feller, which the gineman had presented to Prince Albert."

Insurance on Colleges throughout the Country. Among the acts of the recent session of the Ohio Legislature, was an act to prohibit the collection of domestic agents, students of Colleges and Institutions of education, in this State.

17 Here is a deep and learned speculation in the Garden and in the Close, the Bible and the tribulation, the toil and the mention, which is the most to all.

Some men write the one, and close with the other; it is the Bible in the beginning, but the Calvary in the end.

Sudden Death. Mr Hamilton Marshall, aged 50 years, was found dead in his bedroom at the Columbian Hotel, Harrison avenue, Boston, yesterday morning—supposed from disease of the heart.

WEIGHT OF ONE HAY. The California papers adopt the English Custom of publishing births, and add a truly American or Yankee peculiarity, by giving the weight of the young citizen.

17 The report that Michael Norton of Brighton had murdered his wife, has turned out that she killed herself by getting drunk and then falling down stairs.

17 Archbishop Hughes, of New York, obtained his passports on Saturday for Cuba, where he intends to spend a portion of the winter.

17 The United States ship Cyane has been ordered to the Isthmus of Darien, for the purpose of protecting the route of the mail steamship canal.

17 The National Democrat has a variation of an old quotation, in opposition to some of the newspaper writing of the day:—

"Let those lie mad, who please to write prose,
We have more sensation out Shoppin Sense."

17 A Lady in New Bedford was delivered of a fine child on Christmas night, two of which age living.

17 The New York Journal, containing much spicy reading matter—published by F. D. Orvile, New York, is received.

17 The citizens of Troy, N. Y., will give Gen. Wool a public dinner on the 4th inst.

EDITING. The homely is "Religious Bigotry and intolerance" in yesterday's Advertiser.

17 It is a significant fact, that the Union Democrats are strongly disposed to press the claims of Gen. Scott for the Presidency.

17 The Geneva, N. Y., Medical College has been galvanized into a new life.

THE MAILS. Mr Hale has succeeded in his object $20,000 more per cent for the Great Republic.

Sudden Death.—Thomas McGowen, an Irishman, died suddenly on Saturday night, at his residence, No. 202 Commercial street, Boston. Patrick Black, gives assistance to that fact. Death is a modal barber.

THE CURE OF NERVOUS DISEASES

By language can convey an adequate idea of the wonderful effects of this Cordial. Prostration and weakness, with all the nervous diseases, disappear before it, as the mists of night before the morning sun. Its action is magical, and the most delicate invalid, or the most robust, may be assured of its

CURATIVE POWER.

Its tonic properties are unequalled by any other medicine. Its effects are immediate, and the most wonderful results follow its use. Its action upon the nervous system is truly astonishing

grand scale, with the Jordan running through the middle of it. And by means of irrigation they have conducted the waters of the river through every street and garden of the city.—Homer has thus every element of the Oriental world, the Hebrew and Homeric ages are contrasting. Which in 1855 from the Atlantic ocean at the mouth of the Jordan, is the condition of the backwoodsmen, and I see that the house will be finished in time. Mr. Mitchel, did I not speak of the domestic feature of the Mormon religion. Their letters immediately go away—how can we reach paradise unless we bear a husband in the other world? I have none but, the bother will be his reach in heaven.

The Mormons now have their Delegate in the Congress of the United States, and they will soon apply for admission as a State. What will be the result of the application, no man can foretell. But, it is highly probable that Constantine hence, when the inquiry is made for the person who effected the greatest results in America, in the nineteenth century, the answer will be, Joseph Smith, the Mormon Prophet.

Residence of the Emperors on Cuba.—The recently minions and patrician of the present land-and-slave-holding aristocracies have created much dusting the past few months in forging exaggerations and grand memory to see, and proving that the British Administration was bent on the complete Africanization of Cuba and the entire unfortunate race of slaves, under the hypocritical *ultra* *Anti* of opposition. After a careful examination of the facts, we have arrived at the conclusion, that nothing of the kind was ever intended; such disclosures have now been made placing this matter entirely beyond the shadow of a doubt. Lord Howden, the British Minister at the Court of Madrid, who was maligned in the most unmeasured terms by the Spanish Union, the New York Herald, and other Billingsgate newspapers, instead of being engaged in the nefarious schemes attributed to him and his government with so much boldness, vivacious and perseverance in base lies, has acted with consistency and creditably for advancing the true interests of freedom and humanity in Cuba. He is thoroughly opposed to annexation, and our administration and its organs well according them good works.

"I have myself (says Lord Howden, in a letter to a friend) the strange statements you have sent me about Lord Clarendon's wish to Africanize Cuba, and about the arrangements which I have been making at Madrid to that end. I give you, in the most solemn manner each laughable (friend) to them. They are the result of the unqualified contradictions of the whole matter. Here are the highest authority for saying whatever you what have been, during the last three years, my negotiations with the Spanish government respecting Cuba, and you will see if there is the slightest foundation for the rumors which seem to have been most assiduously circulated in the United States.

First, I have been making unceasing representations of the number of slaves annually imported into the island, and complaints of the atrocious cruelty with which the slave trade was carried on under the very noses of the captains general, and even of the Queen's ministers. Secondly, I have been making fruitless attempts to induce the Spanish Government to adopt some practicable traffic in some plenty, that is to say, to that extent which the state of the United States is in this particular. Thirdly, I passed my time in endeavoring to induce the Spanish Government to adopt complete freedom of the trade between Cuba and the United States, for those negroes called "Emancipados" in bonding since the year 1817 in disregard of treaties. I rejoice in my part of the Christian Servants' and Slaves' Friend to the doctors of justice and humanity, and the enemies of slavery.

Fourthly, I have been endeavoring to prevail upon the Spanish Government to abolish the slave trade, by which means, wishing to centre in Cuba, those of them of most intelligence, and on the somewhat startling principle [one word illegible] Government, I have been making a most confidential preliminary to becoming good subjects. The Queen's Government, I have added, at various times, friendly and efficacious representations in favor of improvements in the island, by facilitating the administration of justice, and by the introduction of a better class of settlers and immigrants among the natives of the Canary Islands, as well as other places. In short, I have done all that was in my power, and all that I was told to have done in your name.

When the whole state of the case is known, and ignorance or malevolence dispelled, I even venture to say the good wishes of your countrymen in the success of the measures I am, as mentioned, with your own knowledge undertaken. In all that I have here told you with entire truth, the United States can only see the natural and worthy of England's declared and unchangeable policy in a cause which is dear to her, and dear to herself; must feel that, to days like these, the best return for her engagements and sacrifices for incidences the one never before to exist, and which we might do, in the friendship of nations.

Telegraphic.—A Washington despatch of yesterday says—Nothing was transacted in the Senate to-day. The funeral of the late Hon. D. Campbell took place to-day from the House of Representatives. There were a number of members from the States in the vicinity. Mr. Spicer, Chaplain of the Senate, read the 15th Psalm, and part of the 14th and 15th verses of the 4th chapter of Corinthians. Mr. Gilmore, Chaplain of the House, then addressed a few solemn words to the audience, when the funeral moved from the Hall to the Southern door with the pall bearers in front, where the ceremonies were concluded.

A General Army Court Martial, consisting of Col. Johnston, U. S. Artillery, and twelve other officers, is ordered to convene at West Point on the 4th of January, for the trial of several Cadets.

A Cincinnati despatch of yesterday says—The Democratic members of the Legislature met last night to organize the Judiciary of our citizens, with reference to the Rhi-del. Great indignation is manifested at the conduct of Philadelphia's delegation.

A New York despatch of yesterday says—The case of Alexander Sullivan, a fugitive claimed by the British authorities, was decided by the Recorder this morning. He was brought before the New York Supreme Court on a writ of habeas corpus, was handed the recorder to be discharged, and that an order to that effect be issued, and that an order to that effect be issued upon the Governor of Montreal, will refuse to deliver up Sullivan, but will leave the question of the validity of the claim to the courts.

A New Orleans despatch of yesterday says: The Whig Central Committee of the 23d inst. at the Mechanics' Institute, and all parties are invited to attend. A battle ordered for the 1st of January, at which the Whig ticket will be voted. At last accounts Gen Wheeler would run ahead of his ticket. The Democrats will vote for Gen. Jo Johnston, which will probably secure his return.

Steamer arrived this day from the Pacific with dates to the 1st inst. The Panama Railroad will be finished the 1st of January by a large majority.

IMPORTANT INDUCEMENTS TO INVENTORS.

THE Subscribers, Solicitors of American and Foreign Patents, have had many years experience in procuring Patents in the United States and all foreign countries, and have the most ample facilities for obtaining Patents in the shortest possible time. Inventors who may employ them may rely upon having their business transacted with the greatest fidelity, care and dispatch, and on the most reasonable terms. Models should be sent by express, addressed to the care of Messrs. Adams, Harris & Co., Boston, Mass., with a full description of the invention, and the name of the inventor, and the express charges will be paid. Drawings for the Patent Office will be executed by the most skilful draughtsmen, and the Patent will be forwarded to the inventor as soon as it is allowed. Inventors who may wish to visit Washington to attend to the business of their Patents, will find it to their advantage to employ the subscribers, as they will be able to attend to the business of their Patents, without delay, after the inventor arrives at Washington. Inventors who may wish to ascertain the probability of their obtaining Patents, are invited to send a description of their inventions, when they will be informed, free of charge, whether in our opinion they are probably patentable. We would invite the attention of all to an inspection of our

SPECIMEN BOOK OF PATENTS,

containing the most valuable Patents ever issued from the United States Patent Office, and which will be found interesting to every one, whether he wishes to procure a Patent or not. It is open to the inspection of the public, daily, and visitors are always welcome.

Circulars containing much information in relation to the most reasonable terms, and the most successful manner of procuring Patents in the United States and foreign countries, will be sent free to any one who may apply for them.

Copies of the Patent Laws, and all other information that may be desired, will be promptly furnished on application.

Assignments of Patents carefully drawn, and all business connected with Patents promptly attended to.

THE "Forties" of the two antagonistic branches of the old Bourbon dynasty, brought about under the auspices, though secret, yet none the less real, of Russia, Austria, Belgium and England, promises to become a more serious affair than was at first supposed. It is not at all improbable, that it will give an entire new turn to the affairs of all Europe, France and "the rest of way" included. It has indeed already given a new twist to the knotty Eastern question. The facts of the case are thus well stated by the N. Y. National Democrat, whose illustrations on Noble-Wallachian affairs are least stupid, generally, than its animadversions on the stupidities of the spoils-administration:

Generals Changarnier, Lamoriciere, Bedeau, and Cavaignac, have given in their adhesion to Henri V.; many regiments have been gained over to the intrigue—conspiracy, and the third priesthood of France are in favor of the restoration. Louis Napoleon knows not where to look for support; the peasantry who raised him to power are conducted by the Chambord Republicans, who might have secured the partial liberty of a constitution, but they prefer to the evasion of Cayenne, or hosting the convoys of Algeria; the soldiers have forgotten the champagne with inspired their "embarkation mess," in addition to his daily wages of two dollars per day, at the expiration of the three years, one share in the said Company and one dividends as may be declared on said share in the years 1850-1. It was nevertheless proved, that, if said Ripley was unable to perform according to the agreement aforesaid, by the burning of the Mill, sickness or death, then such amount of purchase does or said shares with dividends as should correspond to the time he might have worked for the Company, should be paid him, his heirs or assignees; also, the parties might be cancelled by mutual agreement.

The facts testified to before the Court, were as follows:

That in the autumn and winter of 1849—1850, negotiations were going on between the defendant, Tyrone Power, of Lowell, and Mr. Ziba Gay of Nashua, N. H., as one party, and John Mixer of Lowell, as the other party, that the defendant refused to give up the same, but that he on the first day of April, 1850, caused notice to Mixer that he would give up the property to the owner of the same if said Mixer and friends to him at any time that Mixer might choose, the shares to be dated back to March 24, as originally agreed upon. Mr Mixer appointed the next day, April fifteenth, as the day—the day the transfer took place at the office of Messrs. Gay, Silver & Co., in North Chelmsford, near the Company's Mill, where Mixer, after the signing of the stock, called up at the Mill and then learned for the first time, from Mr Ripley, that Sumner had settled with him, and that he had been paid by Southwick two hundred and seventy dollars and odd cents over and above his daily wages, although he (Ripley) was not to receive any money from Sumner and Southwick for the Company, but that he had contracted to work for the Company, and that he was going to keep on and work for the Company. Mr Mixer promised to stay till the Company could get another man in his place.

On the 1st of April a Stockholders' meeting was held to fill vacancies in the board of Directors caused by the resignation of Mr Wentworth and Gay, and a Treasurer and Agent in place of Mr Southwick, which was done accordingly, and a committee appointed to audit the accounts of said Company, and the Treasurer, which committee met and settled with Mr Ripley, and found a balance in favor of said Company of $218.33 paid Ripley contrary to the vote of the Directors, which vote was made known to Ripley at the time of payment. Ripley expressed his sentence of satisfaction, and said he would refund the $218.33 paid Ripley contrary to contract, which he declined doing, stating which he was informed that proceedings would be instituted against him to recover the same. The new Agent entered upon his duties April 15th, and urged Ripley to stay, which Ripley would not do, but promised him also to stay two months if he could come to fill his place—he left the 20th of April without the Agent's knowledge and three days before his successor could come.

Mr Wentworth stated in his deposition before leaving for Washington that, as one of the Directors, some time during the winter the defendant had consulted him about paying Ripley $1 per cent and cancelling the same, and that he had advised him to do so he thought best, but he was no ingrossing.

Mr Gay, as one of the Directors, had twice called on to by Ripley during the autumn and winter, to be paid as per contract, and gave as a reason, that the Company had more facts new hands whom he did not know how he should like it; that he was poor and had a family, wished therefore to settle up; that he, Gay, advised Ripley to see Mr Southwick and have made the contract with him, and that being connected in Mr Southwick about the matter, he had advised him to do what he thought for the interest of the Company, and that Ripley's wife was in the habit of acting generally as he thought best without consulting with any of the Directors. Messrs Mixer and Silver, then Directors of the Company, said that they had heard nothing whatever about Ripley's leaving, until after the transfer of the stock, and friends; that books of Records and were kept of the doings of the Directors and Stockholders at their meetings, but no records or notes were found on those books relating to the subject. The Company had been running and with the help once a month and made up their accounts every six months, semi-annually, which, two bills were shown the Court,—one dated April 1st, and entered on the Company's book under April 10th, paid Ripley for doing the Superintendent of the Mill in the months of March 1850 $23.00, and $10.00 for doing extra work, $33.00; the other bill, dated April 6th and entered on the Company's books April 10, for the months of fifty dollars paid Ripley for "inventing and making a gauge for Parkhurst's Burring Machine," and a section of the fluted gouge owned by John Nesmith. The Agent's report of April 1st, was produced on a Mortgage Note held by the Company against Ripley, April 1st, and entered on the Company's book April 9th. Since leaving the Company the defendant has been building Company and built a Mill at Zac' Wilton, N. H., in which those who sold out to the Company were interested, where the same kinds of goods were manufactured as those made by the Company, and that Ripley helped to start that Mill and worked for some time afterwards in the same.

In view of these facts the plaintiffs argued that defendant, while in the service of the Company had not faithfully performed his duties towards it in discharging such a valuable man, whom he had found it necessary to employ for very three years, whom he himself afterwards employed, and whose services he valued so highly, he endeared his ability; that if he was dissatisfied with the Agent of the Company he would be equally so other Gentlemen, and had no right to act in the contrary without the vote of the Directors; that the two Directors whom he consulted—one on the subject in question—were not a majority of the Directors and constituted not the Court allowing the evidence of the two first mentioned Directors to be incompetent, and that they had not their interest in the suit, and therefore were no Directors; that Ripley made Sumner pay away the Company's money; that no Stockholders' meeting was held after the leaving of Ripley, as would in the contrary, had taken place; that if he had been dealing with Sumner for the Company, and doing his duties faithfully and honestly, he would have come to Mr Sy Lowell with whom he came almost daily in contact, and informed him of the matter, which he could be consulted, in fact acting; that it was singular that he did not settle with Ripley, although the subject had been discussed a long time, because the defendant had declared he himself should have no longer any interest in the Company; then he paid him and not till then; that if Ripley went now, why not paid him until then, the two bills shows the Court, one of which had been running three years? while, as had been proved, there was no particular practice of the Company to settle with the hands monthly, and only up to April semi-annually. Taking all those leading events, the dates and facts into consideration, it evidently ought to inform the plaintiffs all in his power—and they have at least the satisfaction ought to be awarded them by the jury. The defendant argued that the Company (the plaintiffs) had such a right to cancel it, and that it was but doing justice to Mr Ripley to settle up with him before leaving the office of Agent of the Company, that he had the consent of a majority of the Directors.

Hosea, Gay, one of the Directors, of the two Directors, whom defendant had consulted, was called, as to the case in Banks, where two Directors act for the whole board, and instructed the jury that the Company had a right to cancel the contract in conformity to law, if the plaintiffs were entitled to any damages. The jury much, &c. Verdict for defendant. J. D. Abbott and L. F. Pillsbury for plaintiffs, and B. F. Butler for defendant.

On the 1st of April a Stockholders' meeting was held to fill vacancies in the board of Directors caused by the resignation of Mr Wentworth and Gay, and a Treasurer and Agent in place of Mr Southwick, which was done accordingly, and a committee appointed to audit the accounts of said Company, and the Treasurer, which committee met and settled with Mr Ripley, and found a balance in favor of said Company of $218.33 paid Ripley contrary to the vote of the Directors, which vote was made known to Ripley at the time of payment. GENERAL SUMMARY.

PERSONAL. We regret to learn that the Hon. Samuel H. Walley is unwell. He intended to leave for Washington yesterday, but his health prevented. We trust his recovery will be speedy.

ELECTED. It is said that John T. Dingley, a Democrat of Boston, has been elected to Alderman in that city. His election is to be disputed.

ET The Maine Legislature will assemble at Augusta on Wednesday next. A U. S. Senator is to be chosen at this session.

ET About every one of our Boston exchanges have a column devoted to details of the stores and its effects in that city and vicinity.

ET We have no information whether the legislature of Missouri passed the bill before it that no indorsement of a note shall be valid without the consent of the endorser's wife.

THE GROTON MEMBER CASE. We learn from the Clinton Courant that Rev. J. W. Cooper, arrested in this city for breach of marriage promise, has since married Miss Fletcher, one of the parties, and thus has tied up that case.

ET Strange. A mill man, while driving his team through Dock square, Boston, Wednesday, knocked a poor old woman down. He stopped, picked her up, and, finding that she had received little or no injury, pressed her with three dollars, and drove off. Guess that old woman's stockings are stopples all to-day when it snows.

ET A cow died in Oxford, Maine, and a *post mortem* examination revealed a dozing needle in her heart. She had swallowed it with apple-parings.

ET The body of the little son of Mr Warren Coe, missing from his father's house in Portland, some days since, has been found on the shore of the bay.

ET Theodore Parker said, in his Thanksgiving sermon, that the greatest man this century produced was Napoleon, and the greatest Ralph Waldo Emerson, the poet and prose-writer of Concord. This may be considered the last of Ralph in much the same sort of a man as Theodore himself. Like enlogised, like admired like.

THE CARDOZ IN REBELLION. The Roman priesthood in the Grand Duchy of Baden have revolted in a body from the laws of that country, and though about 200 have been arrested, the Archbishop has directed that the priests shall refuse to perform the marriage ceremony, in consequence of which only two or three up to the present have formally refused. The Archbishop has also issued a circular to the Liesbury to appear before the criminal tribunals for having incited the priesthood to disobey the laws.

ET The Supreme Court has refused the application of Mrs Prudence Eastman, for a divorce from her husband, Joseph Eastman, of Hawley, Mass., on account of alleged cruel treatment and neglect. The case has been some time before the public.

THE SECRET OF THAT "Southern influence" which is so much complained of, may be found in the important difference in the value of time between the political tactics of the North and the South in regard to public men. The Southern man has had contracted to work for the Company, and that he was going to keep on and work for the Company. Mr Mixer promised to stay till the Company could get another man in his place.

On the 1st of April a Stockholders' meeting was held to fill vacancies in the board of Directors caused by the resignation of Mr Wentworth and Gay, and a Treasurer and Agent in place of Mr Southwick, which was done accordingly, and a committee appointed to audit the accounts of said Company, and the Treasurer, which committee met and settled with Mr Ripley, and found a balance in favor of said Company of $218.33 paid Ripley contrary to the vote of the Directors, which vote was made known to Ripley at the time of payment. Ripley expressed his sentence of satisfaction, and said he would refund the $218.33 paid Ripley contrary to contract, which he declined doing, stating which he was informed that proceedings would be instituted against him to recover the same. The new Agent entered upon his duties April 15th, and urged Ripley to stay, which Ripley would not do, but promised him also to stay two months if he could come to fill his place—he left the 20th of April without the Agent's knowledge and three days before his successor could come.

Mr Wentworth stated in his deposition before leaving for Washington that, as one of the Directors, some time during the winter the defendant had consulted him about paying Ripley $1 per cent and cancelling the same, and that he had advised him to do so he thought best, but he was no ingrossing.

Mr Gay, as one of the Directors, had twice called on to by Ripley during the autumn and winter, to be paid as per contract, and gave as a reason, that the Company had more facts new hands whom he did not know how he should like it; that he was poor and had a family, wished therefore to settle up; that he, Gay, advised Ripley to see Mr Southwick about the made the contract with him, and that being connected in Mr Southwick about the matter, he had advised him to do what he thought for the interest of the Company, and that Ripley's wife was in the habit of acting generally as he thought best without consulting with any of the Directors. Messrs Mixer and Silver, then Directors of the Company, said that they had heard nothing whatever about Ripley's leaving, until after the transfer of the stock, and friends; that books of Records and were kept of the doings of the Directors and Stockholders at their meetings, but no records or notes were found on those books relating to the subject. The Company had been running and with the help once a month and made up their accounts every six months, semi-annually, which, two bills were shown the Court,—one dated April 1st, and entered on the Company's book under April 10th, paid Ripley for doing the Superintendent of the Mill in the months of March 1850 $23.00, and $10.00 for doing extra work, $33.00; the other bill, dated April 6th and entered on the Company's books April 10, for the months of fifty dollars paid Ripley for "inventing and making a gauge for Parkhurst's Burring Machine," and a section of the fluted gouge owned by John Nesmith. The Agent's report of April 1st, was produced on a Mortgage Note held by the Company against Ripley, April 1st, and entered on the Company's book April 9th. Since leaving the Company the defendant has been building Company and built a Mill at Zac' Wilton, N. H., in which those who sold out to the Company were interested, where the same kinds of goods were manufactured as those made by the Company, and that Ripley helped to start that Mill and worked for some time afterwards in the same.

In view of these facts the plaintiffs argued that defendant, while in the service of the Company had not faithfully performed his duties towards it in discharging such a valuable man, whom he had found it necessary to employ for very three years, whom he himself afterwards employed, and whose services he valued so highly, he endeared his ability; that if he was dissatisfied with the Agent of the Company he would be equally so other Gentlemen, and had no right to act in the contrary without the vote of the Directors; that the two Directors whom he consulted—one on the subject in question—were not a majority of the Directors and constituted not the Court allowing the evidence of the two first mentioned Directors to be incompetent, and that they had not their interest in the suit, and therefore were no Directors; that Ripley made Sumner pay away the Company's money; that no Stockholders' meeting was held after the leaving of Ripley, as would in the contrary, had taken place; that if he had been dealing with Sumner for the Company, and doing his duties faithfully and honestly, he would have come to Mr Sy Lowell with whom he came almost daily in contact, and informed him of the matter, which could be consulted, in fact acting; that it was singular that he did not settle with Ripley, although the subject had been discussed a long time, because the defendant had declared he himself should have no longer any interest in the Company; then he

PEACE OR WAR. Of the present warlike attitude of the opposing and democratic nations in Europe, the N. Y. National Democrat well says:—

"Much as we would do to avoid the waste of blood, we look upon the approach of such a war with satisfaction, believing that the carnage of one battle-field where only men are slain, than the long, lingering pestilence, the ghastly and diseased misses, the dungeons and the scourges, the famine and the desolation of the peasantry, power enduring on from age to age, and sparing neither age, nor sex, nor intellect, nor poverty. Better the red grave of freedom than the slimy cells of Biede, or waste their days in the galleys of Toulon, or the mines of Cayenne. There is a Canaan before the Democracy of Europe, and Kossuth will conduct them over the chilling waters of Jordan, as Moses has conducted before the promised land can be enjoyed."

The Archbishop has also issued a circular to the Liesbury to appear before the criminal tribunals for having incited the priesthood to disobey the laws.

BUILDING LOAN AND FUND ASSOC.

ASSOCIATION of the 15th, having in view the object, both to benefit its members and to aid the public, is now generally understood. They are the result of practical experience, and are believed to be the most perfect and satisfactory plan ever devised for the purpose intended. Any person who desires to purchase a home, or to build one, can have a fund by which both the purchase and cost of building can be paid for, on terms more favorable than he can obtain elsewhere. Any person who desires to invest a small sum of money, can have it loaned to him, having the privilege of paying it back in small monthly instalments, and be indemnified against loss. Among the privileges of membership, is the right to withdraw the money paid in, with the interest, at any time, having the advantages and exercises of a fund, during the time it remains in the Association. Persons who have money to invest, can have it loaned to them on the best of security, and receive a fair interest for the use of it.
The books of the MERRIMACK MUTUAL LOAN AND FUND ASSOCIATION, No. 15, are now open for subscription to said common, and shares may be had of the Secretary, at the office of the Treasurer, No. 10 Merrimack Block.

Monsieur Mobile.

One to three Republics," Mobile, in passing another period of transition—another or periodical ones." Under the rule, or under the advice of President Arden, the Republic had become completely disorganized—her army in confusion, her finances in a state of bankruptcy, her people in mobs. Such—and all turned in—while SANTA ANNA at the only man capable to control the storm has been very much in the whirlwind in the history of nations. The student of the past will readily recall one illustration of this sort when he reads in the history of Rome, when Cæsar mounted the dictator's chair on the ruins of a fallen Republic; another in the history of England, when Oliver Cromwell became Lord Protector; another in the same nation's annals, when William the Third, encouraged by the British polity in Church and State, after the inglorious flight of that imbecile Bourbon, James the Second; another in the history of France, when Napoleon Bonaparte became First Consul and "found" a throne—almighty throughout nearly all the French nationality; another in our own history, when General Washington and his compeers rose from the Confederation to the Union. But in the present state of affairs in Mexico, we do not contend that exile resembling the United States, or Lord Protector; another in the same nation's annals, when William the Third, encouraged by the British polity in Church and State, after the inglorious flight of that imbecile Bourbon, James the Second; another in the history of France, when Napoleon Bonaparte became First Consul and "found" a throne—almighty throughout nearly all the French nationality; another in our own history, when General Washington and his compeers rose from the Confederation to the Union. PATENTS!

AMERICAN AND FOREIGN OFFICE.

Agency for Patents and Patent Office Reports.

WASHINGTON, D. C.

NO. 22 STATE STREET, BOSTON.

IMPORTANT INFORMATION TO INVENTORS. The subscriber has established an agency at the above office, for the purpose of procuring patents for inventions in the United States and foreign countries, and for the sale of patent rights. He will attend to the preparation of specifications, and the necessary drawings, and the securing of patents in the shortest time and on the most reasonable terms. Persons residing at a distance can procure patents by sending a model or drawing and description of their invention. Examinations and reports will be made at the Patent Office, and opinions as to the novelty and utility of inventions will be given when desired. Communications and models should be addressed to the subscriber, and will be strictly confidential. Reference is permitted to the Hon. Commissioner of Patents, and to many persons throughout the United States for whom patents have been procured.

Boston, Sept. 1, 1855. THOMAS EDMAND, Solicitor of Patents.

BUILDING LOAN AND FUND ASSOCIATION.

A SOCIATION of the kind, formed to meet the demand for a safe investment for small sums, and to afford the means of procuring homes for the industrious, providing capital and a home for every one, who will practice economy and industry, and save a part of their earnings. Any person can become a member of the Association by subscribing for one or more shares, and paying the monthly dues thereon. Shares are $100 each, and may be purchased at any time after the first day of the Association's existence, by the payment of the monthly dues, and the premium bid for the same. Dues are 50 cents per month on each share, and premiums are bid for monthly at the meeting of the Association. The Association will continue for the term of eight years.

The funds of the Association will be loaned to members only, and the security required will be a mortgage of real estate, or personal property for double the amount of the loan. Applications for loans will be acted on at the meeting of the Association, on the first Monday of each month.

Office of the Association, No. 3 Merrimack Block, Merrimack Street, Lowell. Meetings will be held at the office of the Association, on the first Monday of each month, at 7½ o'clock, P. M.
